7. The investment of funds was discussed by the Board. The President had previously mailed to each Board member a statement summarizing all endowment funds, investments and earnings.

THE BOARD VOTED to approve the President's schedule of investments and further VOTED that those scholarship funds which allow only the use of interest be taken out of savings banks and invested in Series G Government bonds.

8. The President had planned to present a statement summarizing the legislation passed at the 1943 session of the General Assembly. The General Assembly adjourned too late to make such a summary possible. The President stated he would forward such a summary to each member of the Board of Trustees at a later date, the summary to include the appropriations for the operating budget.

University Comptroller

9. THE BOARD VOTED to authorize Mr. L. C. Riccio <sup>3/lock</sup> to sign all State certificates in the name of the Connecticut Agricultural College and the Connecticut State College which are to be transferred to the name of The University of Connecticut.
10. The President discussed the research activities of the University. He pointed out that the University has been losing ground in its research program because of inability to compete with other institutions in securing necessary research assistants. It is no longer possible to secure adequate research help by employing laboratory technicians. Several departments have in the past carried on excellent research programs. Purnell funds have permitted the setting up of a number of graduate assistantships on the master's level. The number of accepted candidates for the master's degree now numbers approximately 250 students. Adequate help in the immediate future can be secured through the development of doctorate work in a limited number of fields. Candidates to be carefully selected and assigned to work in the research laboratories of the University. These research assistants would replace the less well qualified laboratory technicians and would be under the guidance of research professors. This matter was discussed at considerable length and THE BOARD VOTED to approve the Graduate School of the University of Connecticut doing doctorate work in a limited number of fields, the fields of study to be designated by the President upon the recommendation of the graduate faculty and the Executive Committee of the Graduate School.

Respectfully submitted,

Ruth M. Dadourian  
Secretary
