

Argument Ellipsis, Classifier Phrases, and the DP Parameter

Hsu-Te Cheng, Ph.D.

University of Connecticut, 2013

This thesis investigates two theoretical consequences of a point of typological variation, namely, the presence/lack of Determiner Phrase (DP) in a language. I argue that the availability of Argument Ellipsis (AE) is directly tied to the lack of DP in a given language, and that (numeral) Classifier Phrases (CLP) and DP cannot co-occur in the same language.

In chapter 2, building on Bošković's (2008a, 2012) claim that languages without articles lack DP, I investigate the status of DP in Mandarin Chinese (MC). I examine previous literature and show that claims regarding the existence of DP in MC are not supported and provide evidence that the DP projection is indeed missing from the nominal structure of MC. In chapter 3, I examine the null argument paradigm in MC and argue that the phenomenon of AE, in which the argument is elided in the PF component, is independently attested in MC. In chapter 4, I propose a new theory of AE, where the licensing condition on AE is tied to the absence of DP. In other words, AE may only occur in languages without the DP projection. I propose that the lack of DP makes VP (rather than *v*P) a phase in these languages. As a consequence, the direct object of the verb, which is the complement of a phase head, may be elided in the PF component, resulting in the phenomenon of AE. In chapter 5, I explore the second consequence of the lack of DP: its relation with numeral classifiers. Examining various languages, I establish a correlation between the existence of a numeral Classifier (CL) system and the lack of DP, which states that numeral CLPs do not co-occur with DP in the same language. I also examine CLP systems in Japanese and MC as case studies to capture certain differences in their nominal domains.

Argument Ellipsis, Classifier Phrases, and the DP Parameter

ACKNOWLEDGEMENTS

The 1992 United States men's Olympic basketball team was the first American Olympic team to feature all active NBA players, including Michael Jordan and many other star players. It was nicknamed the "Dream Team." For someone working in theoretical syntax, a committee consisting of Jonathan Bobaljik, Željko Bošković, Mamoru Saito, and Susi Wurmbrand, with the first two serving as co-major advisors, may well be qualified as the "Dream Team". I feel truly honored and blessed to have such a wonderful committee.

First, I want to thank my two major advisors. The completion of this thesis would not have been possible without their help and supervision. Jonathan is the instructor of my Syntax I class and the overseer of my first general paper, which means I have been in close touch with him since my first semester in UConn. His ability to instantly notice my logic flaw in argumentation and the ability to express an idea succinctly and clearly is remarkable. I have benefited a lot from him on how to build arguments and how to do scientific research in general. I will never forget the kind words and the ongoing encouragement from him at the last stage of writing the dissertation, when I almost think I cannot finish it. Željko's enthusiasm in theoretical linguistics and his knowledge on (almost) every phenomenon of syntax are outstanding. From him I see a role model of a researcher in linguistics. Moreover, Željko is always dedicated to the welfare and academic achievements of the students. I will always remember the days when I went to his house to get the comments that he hung on his door knob and to hang my new revised version on it, which looks like a gift-exchange party. I cannot express enough my appreciation for all the helps I got from my two advisors during my stay in UConn.

I also want to thank Mamoru Saito and Susi Wurmbrand for giving me insightful comments and invaluable suggestions. During his annual visit to UConn, Mamoru always made himself available for meetings. His kindness, his humor, and his informative lectures and comments have always made his visit a memorable experience for UConn students. I also remembered the days when I met with Susi and she could instantly notice the problems in my analysis. Her insightful questions and suggestions always inspired me tremendously. The dissertation would not have been in good shape without the help from Mamoru and Susi, for which I am truly grateful.

In addition, I also want to express my sincerest gratitude to all other faculty members in the UConn Linguistics family, including, but not limited to, Andrea Calabrese, Marie Coppola, Jon Gajewski, Harry van der Hulst, Magdalena Kaufmann, Diane Lillo-Martin, Yael Sharvit (who has left), and William Snyder (in alphabetic orders). Their instruction, help, and encouragements in various aspects is what made my stay in UConn a joyful memory and indispensable part of my life. I am also grateful to Thomas Ernst, Keiko Murasugi, Jairo Nunes, and Daiko Takahashi, who have visited UConn and given lectures/seminars. Thanks are also due to the program assistants of Linguistics department, including Judy, Catalina, and Tamara. Life in UConn would have been much more unbearable without their help and encouragements.

Furthermore, I want to express my gratitude to my friends and colleagues at UConn: Duk-ho An, Masahiko Aihara, Ana Bastos, Safet Beriša, Jeff Bernath, Carlos Buesa Garcia, Hang Yee Cheung, Jean Crawford, Miloje Despić, Natasha Fitzgibbons, Mary Goodrich, Corina Goodwin, Jungmin Kang, Zhanna Glushan, Gísli Harðarson, Simona Herdan, Chris I-ta Hsieh, Helen Koulidobrova, Pei-Jung Kuo, , Yu-Riu Liu, Troy Messick, Irina Monich, Beata Moskal, Toshiko Oda, Koichi Ohtaki, Vanessa Petroj, Nina

Radkevich, Miguel Rodriguez Mondoneda, José Riqueros, Jelena Runić, Tsuyoshi Sawada, Nilufer Şener, Serkan Şener, Zheng Shen, Yoshiyuki Shibata, Koji Shimamura, Peter Smith, Shigeki Taguchi, Aida Talić, Takuro Tanaka, Oksana Tarasenkova, Lyn Shan Tieu, Neda Todorović, Kyriaki Vassilaki, Alexandre Vaxman, Julio Villa-Garcia, Sandy Wood, Ting Xu, YongSuk Yoo, and Cynthia Zocca. I also thank the following scholars who had visited UConn: Krzysztof Migdalski and Kensuke Takita.

I also want to thank my teachers and advisors in Taiwan, who led me into the world of linguistics and who showed me that linguistics is worth living for, including Jen Ting and Wei-Tien Dylan Tsai, my advisors in my MA studies, and Bonnie Chiu and Doris Chen, whose course in introduction to syntax has inspired my interest in theoretical linguistics. Thanks are also due to my friends and colleagues in Taiwan. With the number reaching up to more than a hundred, space limitation has prevented me from naming all of them, but they all have my gratitude in heart.

Lastly, I want to thank my family. Studying abroad and pursuing a Ph.D. degree would never have been possible without their unfailing love and continuous support. I want to thank my parents, Pi-Cheng Cheng and Yu-Pin Lin, who have never stopped encouraging me and caring for me in every stage of my life. I also want to thank my dearest wife, Hui-Shan Huang, and my two little babies, Allison and Andrew. I would not have been able to finish the dissertation without the constant support and encouragement from Hui-Shan, especially during the last stage of finishing the dissertation.

Finally, I want to thank Lord for his guidance and encouragement in every aspect of my life. His words have always encouraged me and renewed my strength. As is put in the Scriptures: “Though I walk through the valley of the shadow of death, I will fear no evil: for thou art with me.” May He have the kingdom, the power, and the glory. Amen!

Table of Contents

Chapter 1: Introduction	1
1.1 Linguistic Variation and Language Typology	1
1.2 Organization of the thesis	5
Chapter 2: On the Lack of DP in Mandarin Chinese	8
2.0 Introduction	8
2.1 Determiners as projections	9
2.1.1 The Determiner Phrase (DP) and the Universal DP Hypothesis	10
2.1.2 Abney's (1987) arguments for DP	11
2.2 The generalizations in Bošković (2012)	16
2.2.1 Negative Raising	18
2.2.2 Adnominal Genitive	20
2.2.3 Majority Superlative Reading	22
2.2.4 Focus Morphology	25
2.2.5 Quantifier Scope	27
2.2.6 Radical pro-drop	29
2.2.7 Number Morphology	30
2.2.8 The interpretation of possessors	31
2.2.9 Focus Adjacency	32
2.2.10 Classifiers	34
2.2.11 Left Branch Extraction	35
2.2.12 Adjunct Extraction from TNP	36
2.2.13 Scrambling	37
2.2.14 Interim conclusion	39
2.3 Against the Existence of DP in Mandarin Chinese I – the free word order	40
2.4 Against the Existence of DP in Mandarin Chinese II – the binding paradigm	43
2.4.1 Despić's (2011, in press) paradigm	43
2.4.2 The Paradigm in Mandarin Chinese	45

2.4.3 The DP Status in Japanese	51
2.4.4 Interim Summary	54
2.5 Against the Existence of DP in Mandarin Chinese III – relative clauses	55
2.5.1 Relative clauses in English	55
2.5.2 Relative clauses in MC	58
2.5.3 Relative clauses in Japanese	61
2.6 On the (Non)-Existence of DP	63
2.6.1 Two Competing Views	64
2.6.2 The functions of D(P)	66
2.7 Examining previous DP analysis of Mandarin Chinese	71
2.7.1 Introduction	71
2.7.2 Previous Analysis	72
2.7.2.1 Tang (1990a,b)	72
2.7.2.2 Li (1998, 1999)	78
2.7.2.3 Simpson (2001)	88
2.7.3 interim conclusion	95
2.8 Conclusion	95
2.8.1 Implications	97
Chapter 3: Argument Ellipsis in Mandarin Chinese	99
3.0 Overview	99
3.1 The Null Argument Paradigm in Mandarin Chinese	100
3.1.1 The Null Argument Paradigm	100
3.1.2 Previous Analyses	102
3.1.2.1 The Topic-variable analysis	104
3.1.2.2 VP ellipsis analysis	107
3.1.3 Discussion	112
3.2 The existence of Argument Ellipsis in Mandarin Chinese	117
3.2.1 Argument Ellipsis in Japanese and Korean	118
3.2.2 Similar behavior with Japanese and Korean	126
3.2.3 Argument Ellipsis is NOT VP ellipsis in disguise	133
3.2.4 Additional evidence for Argument Ellipsis in Mandarin Chinese	136

3.2.4.1 Post-verbal duration/frequency phrases	136
3.2.4.2 Double object and dative constructions	140
3.2.5 Goldberg's typology of V-stranding VP ellipsis	148
3.2.6 Interim Conclusion	153
3.3 Discussion	154
3.3.1 The Theory of AE	154
3.3.2 Subject Ellipsis in MC	156
3.4 Conclusion	158
Chapter 4: The Theory of Argument Ellipsis	160
4.0 Overview	160
4.1 Previous Analyses	161
4.1.1 Oku (1998)	162
4.1.1.1 Review of Oku (1998)	162
4.1.1.2 Problems of Oku (1998)	165
4.1.2 Li (2006, 2008)	174
4.1.2.1 Review of Li (2006, 2008)	174
4.1.2.2 Problems with Li (2006, 2008)	179
4.1.3 Saito (2007)	185
4.1.3.1 Review of Saito (2007)	185
4.1.3.2 Problems with Saito (2007)	189
4.1.4 Ohtaki (2011)	191
4.1.4.1 Review of Ohtaki (2011)	191
4.1.4.2 Problems with Ohtaki (2011)	195
4.1.5 Conclusion	199
4.2 On the Licensing Condition of Argument Ellipsis	201
4.2.1 Introduction	201
4.2.2 The Proposals	202
4.2.3 Phases and the DP/NP parameter	207
4.2.3.1 On the definition of phase	207
4.2.3.2 On the difference in the nature of Case assignment	211
4.2.4 Evidence from Turkish and Mandarin Chinese	215

4.2.5 On subject ellipsis in Japanese, and PP and CP ellipsis	217
4.2.6 Potential problem	225
4.2.7 Interim Conclusion	225
4.3 On the Mechanism of Argument Ellipsis	226
4.3.1 Arguing against LF-copying	228
4.3.2 Shinohara's (2006) argument	228
4.3.3 Non-reconstructing cases	231
4.3.4 Capturing the paradigm: deep anaphora	237
4.4 Discussion and Theoretical Implications	239
4.4.1 Why "Argument" Ellipsis?	240
4.4.2 Relation to Saito's (2007) account	241
4.4.3 Does every NP language allow AE?	243
4.5 Conclusion	246
Chapter 5: Classifiers and DP	248
5.0 Introduction	248
5.1 What is a classifier?	249
5.1.1 Different types of classifiers	250
5.1.1.1 Noun classes (gender systems)	250
5.1.1.2 Noun classifiers	253
5.1.1.3 Numeral classifiers	255
5.1.2 Classifiers to be discussed	257
5.2 Classifiers and DP	258
5.2.1 Previous analyses of classifiers	259
5.2.1.1 Chierchia (1998a,b)	259
5.2.1.2 Cheng and Sybesma (1999, 2005)	261
5.2.2 On the Condition of Mutual Exclusiveness between Classifiers and DP	262
5.2.2.1 The functions of articles and classifiers	263
5.2.2.2 Checking of the [___ def] feature	271
5.2.3 Classifiers are not a notational variant of articles	274
5.2.4 On Typology: evidence from WALS	276
5.2.5 Re-examining the languages on WALS	278

5.2.5.1 Kosraean	279
5.2.5.2 Loniu	281
5.2.5.3 Tsimshian (coast)	283
5.2.5.4 Vietnamese	283
5.2.5.5 Kana	285
5.2.6 Interim conclusion	287
5.3 Classifiers: a comparative study	288
5.3.1 Similarities and differences of Japanese and Chinese classifiers	288
5.3.2 Previous analysis and some potential problems	290
5.3.3 New proposal	293
5.3.3.1 <i>-de</i> is also a contextual case marker, not D ⁰	293
5.3.3.2 The Status of Classifiers in MC and Japanese	296
5.3.3.3 Classifier movement in Japanese	299
5.4 Conclusion	308
