S. A. C. LOOKOUT.

The children of the farmer seeking other pursuits add largely to the population of cities, and the products of the tiller of the soil sustain the very life of the people; so that the business of the city depends largely upon the prosperity and condition of the farmer.

Mr. A. C. Hendrick,
Mayor of New Haven,
S. A. C. LOOKOUT.

Published monthly by the students of the Storrs Agricultural College during the college year.

Entered as second class mail matter at the post office at Storrs on May 11, 1896.

FACULTY.

B. F. KOONS, PRESIDENT. Professor of Geology, Zoology, and Political Science.
A. B. Peebles, Prof. of Chemistry and Physics.
C. S. Phelps, Professor of Agriculture.
Geo. A. Waterman, Professor of Veterinary Science.
A. G. Gulley, Professor of Horticulture.
Miss Margaret Kenwill, Lady Principal.
Miss Harriet Lysle Smith, Professor of Domestic Science.
Rev. E. J. Lewis, Professor of English and Rhetoric.
H. S. Patterson, Instructor in Wood and Iron Work.
Miss L. J. Barber, Instructor in Mathematics and English.
L. P. Chamberlain, Farm Superintendent.
Miss Lulie G. Lincoln, Instructor in Instrumental and Vocal Music.
C. L. Beach, Instructor in Dairying.
W. L. Chamberlain, Instructor in Poultry Culture.
M. H. Parker, Assistant in Horticultural Department.
C. S. Francis, Ass't Sec. of Extension Department.

BOARD OF EDITORS.
Geo. E. Smith, '98, Editor-in-Chief.
Joseph W. Pincus, '98, Business Manager.
Harry D. Emmons, '00, Ass't. Manager.
Dr. G. A. Waterman, Treasurer.
Norman J. Webb, '98, Athletics.
Clinton G. Smith, '98, College Notes.
George M. Greene, '99, Exchange.

COLLEGE SOCIETIES AND ORGANIZATIONS.

SHAKESPEAREAN CLUB.—President, J. N. Fitts; Vice-President, N. J. Webb; Secretary, B. H. Walden; Treasurer, B. S. Taylor; 1st director, F. Comber; 2nd. director, G. E. Smith; 3rd. director, R. H. Gardener.

ECLECTIC LITERARY SOCIETY.—President, A. O. Green; Vice-President, Max Shaffrath; Secretary, H. B. Luce, Treasurer, H. Kirkpatrick; Marshal, W. B. Munson.

Meetings Saturday evenings at 7 O'clock.

ALETHIA SOCIETY. — President, Miss Roberts; Vice-President, Miss Leach; Secretary and Treasurer, Miss Coy; Marshal, Miss Swift.

COUNCIL.—President, F. N. Buell; Vice-President, L. F. Bancroft; Secretary, H. L. Garrigus; Marshal, J. W. Pincus.

Y. M. C. A.—President, H. L. Garrigus; Vice-President, J. M. Stocking; Recording Secretary, B. H. Walden; Corresponding Secretary, Prof. C. S. Phelps.

Meetings at 6:30 O'clock Tuesday evenings.

STUDENT'S ORGANIZATION.—President, V. E. Lucchini; 1st Vice-President, C. L. Foskett; 2nd Vice-President, L. F. Bancroft; Secretary, C. S. Chapman.

ATHLETIC ASSOCIATION. — President, F. Comber; Vice-President, C. S. Chapman; Secretary and Treasurer, G. M. Greene; Keeper, C. E. Smith.

JUNIOR PROHIBITION LEAGUE.—President, V. E. Lucchini; Vice-President, C. S. Chapman; Secretary, H. B. Luce; League Reporter A. C. Gilbert.

S. A. C. DEBATING CLUB. — Recording Secretary, V. E. Lucchini; Corresponding Secretary, Max Shaffrath; Treasurer, C. S. Chapman; Sargent-at-arms, Joseph W. Pincus; 1st. Director, Max Shaffrath; 2nd. Director, G. H. Johnson; 3rd. Director, V. E. Lucchini.
EDITORIALS.

To the readers of the Lookout, Greeting.

The new board of editors has taken possession of the paper and although we are inexperienced, we will do the best we can. The paper has been a little late and the size rather small, but in the future we expect to print a larger sheet, and hope to have it out on time.

Although the full number of papers originally planned for volume one have not been published it has been thought best to begin volume second with this issue, as the new board of editors come into office at this time. All subscriptions however will be continued until each subscriber receives ten numbers of the paper.

Many of our subscriptions expire soon. When a red mark is placed on the first page of the paper, the subscriber may know that his subscription expires with that number. We hope none of our present subscribers will refuse to renew, and any person sending in two new subscriptions can have the Lookout free for a year.

We would suggest that the students and readers of the Lookout, patronize those who advertise with us, as far as possible. We wish to call special attention to the advertisement of Moseley & Stoddard Mfg. Co. This company furnished a large part of the creamery outfit for our dairy department. The apparatus has stood the tests of several months usage with full satisfaction.

In criticizing our paper and comparing it with other school and college papers you must remember that we edit and print our entire paper at the college, without help from the faculty except in correcting proof. It must be remembered that the outfit was purchased only a few months ago. At that time there was but one student in the college who had had any experience in type setting or press work.

Commencent day this year comes on Wednesday, June, 16. The program and exhibits of work done in the year will be better and more extensive than in former years. The Class Day exercises to be held the night before Commencement will undoubtedly be of special interest to all. The large class to graduate this year shows that the college is rising in importance in the state, and is becoming better known among the farmers.

ALUMNI NOTES

J. H. Evans '96, has recovered from a severe attack of measles.

A. P. Fenn '92, has added a new horse to the live stock of his farm.

J. L. Fenn '84, has been reappointed clerk of the city court at Hartford.

M. H. Parker '94, has recently sold a bicycle of ancient date to Dennis O'Brien. He also has a young fox, which is very gentle.

A. J. Pierpont '95, is hard at work on the farm at home. He has set 10,000 strawberry plants, and planted several other crops.

Mr. Pierpont presented the C. S. C. with $30, for the purchase of books. The money was won as the first prize in Composition in '95.

Mr. C. Curtis '96, has recently secured a position in Newport, R. I.

W. A. Stocking '95, expects to remain at Cornell this summer for the purpose of taking some special work.

The Alumni field day will probably be held here as usual. The events as chosen by the committee are: 50 yards Dash: 100 yards Dash: 220 yards Dash: 120 yards Hurdle: Running Broad Jump: Running High Jump: Shot Put; Hammer Throw: Pole Vault; High Kick: Mile Run: Mile Walk: and Mile Bicycle Race.
THE WAR OF THE
UMASLOPAGAITONITES AND
AMORLARMALIFLOPS.
WRITTEN BY H. D. EMMONS AND
W. S. GILLETTE.
FOR THE E. L. S.

One night a while ago I had a remarkable
dream. I was sleeping soundly when I was
awakened by a voice near me saying, "Arise
Friend arise." I started up and was surprised
to see standing on the bed beside me, a little
man not much larger than my thumb.
He was dressed in tights, doublet and
cocked hat. He had also a tiny sword.
His face was wrinkled as if he had had much
care and anxiety, and as a ray of moonlight
shone through the window, I saw tattooed
on his forehead a skull and cross-bones.
I wondered what he wanted, and
asked him what was the matter, but he said not
a word, and grabbing a lock of my hair, tried
with all his might to pull me out of bed.
Upon my refusal to get up he waved a little
magic wand over me, and I soon became as
small as himself. Then drawing his tiny
sword he threatened me with instant death
if I did not follow him. Not being armed
I concluded to do so. Going to the edge
of the bed, he unwound a rope from his waist
and fastened it to a nail, which I had driven
into the bed to hang a clock on. He let
the other end fall to the floor, and after sliding
down himself, motioned me to follow,
which I did, and reached the floor.
Crossing to my clothes, I tried to put them
on, but they were so large I could not lift
them. Seeing my distress he waved his
magic wand over them, and they became
as small as his.
He then led me across the floor to one
corner of my room, and then touching the
wall with his magic wand, it opened as a
door, allowing us to pass in. We then entered
a dark passage through which my guide traveled. As soon as we had passed, the
wall closed up again, and we were left in darkness.
We then descended a slight slope through
a long low passage. Soon I heard several
low rumblings, which seemed to shake the
sides of the passage.
I asked my guide the cause, but he did
not answer me, and only hurried on all the
faster. Coming to a turn in the passage, I heard a noise like the running
of an elephant. My guide heard it at the
same time, stopped short, drew his sword
and crouched on one knee.
A minute more and the terrible animal was
upon him, my guide jumped to one side,
and giving a vigorous thrust, plunged his
sword to the creature's heart, killing him
instantly. As I passed the animal, I
perceived that it was nothing but an im-
mense rat. We then passed hurriedly on
and entered a large room, in which were
magnificent decorations of silver.
In the center of the room was a large
silver table covered with paper and manu-
scripts. At the opposite end was a tiny
silver throne, occupied by a man even older
than my guide, who also had a skull and
cross bones tattooed on his forehead, and
a little sword lying across his knees.
Around the sides, and in chairs in the cen-
ter, sat a large number of old counselors,
who were enjoying themselves over silver
cups of wine.
My guide immediately took me to the
base of the throne, and kneeling, motioned
me to do the same. He then spoke
and said, "Most Mighty King, thy will is
done." The King bowed and my guide
retired. The King then arose and led me
to the large table in the center of the room.
Then raising a small gavel, he struck
the block three sharp blows. At this sum-
mons all the old men stopped their merry
making, and formed in line around the ta-
ble and at a signal from the king they were
all seated.
Turning to me the king said, "Friend,
we have a very important question to lay
before you to-night. Off in another corn-
er of this house there dwells another race,
with other customs and language, called
the Amorlarmalipflops.
We, the mighty Umaslopagaitonites have
declared war, and require your aid."
To be continued.
"COLLEGE NOTES"

Right! Right! Right!—Johnson.
Mr. H. L. Garrigus, '98 has been chosen President of the Y. M. C. A.
The Junior class was hospitably entertained Thursday evening, April 30th at the residence of Pres. and Mrs. Koons.
The lador lists have been changed and "Seldom" works at the barn.
A reception was given in honor of the Seniors by Prof. and Mrs. Phelps, Monday evening, May 18th.
Mr. Clarence Reed a former member of the '98 class spent Sunday with his classmates.
The work of grading and turfing in front of the Cottage has been pushed along rapidly.

An interesting lecture on "Athletics" was given in the College Chapel, on Friday, April 29th, by Dr. Anderson of Yale University.
While catching a swift ball Beardsley, '97, put his thumb out of joint. He is rapidly recovering from the injury.
The Trustees have excused the Seniors from work, when they present a written request from their parents.
The inmate of No. 13 N. D. has procured a small black snake which he hopes will intimidate the lady matron, and thus prevent inspection.

Military drill will be at 6:25 o'clock P. M. on Mondays and Thursdays, and at 4:30 o'clock in the afternoon on Wednesdays.
The surveying class had its picture taken lately; thus another plate is added to Prof. Peebles' collection, to await further developments.
A geological party, compose of members of the Senior Class, spent a very pleasant and instructive day, studying the rock formations in the vicinity of Bolton Notch.

Following the example of the '98 Class the '97 Class have purch. ed class canes with "S. A. C. '97" engraved upon the handle.
A Phonograph was brought to the last base-base game by an enterprising man, and his voice in clear resonant tones advertising his novelty could be heard far above the coaches voice.

At a meeting of the Students Organization, held in the Chapel recently, the "Lador Question was very thoroughly discussed and a committee appointed to confer with the Trustees upon this vital subject.

The band celebrated the victory of the home nine over Vinton's Combination Team on Saturday by turning out in full force and heading a procession of students.
The procession marched down to Bingham Bro's store and back again. The music given by the band was very good considering it was the first time that they had played for some time.

The War Department in compliance with the request of Senator Hawley and Congressman Henry, issued the following order; "By direction of the President, Capt. C. H. Murray, Fourth United States cavalry, is relieved from duty at Brown University, Providence, R. I., to take effect June 30, 1897, and is detailed after that date as Professor of military science and tactics at Storrs Agricultural College Conn.

In the rhetorical contest between the Junior and Sophomore classes, the former were given the first place by the Judges. In the Junior class the decision of the Judges between the individuals was as follows: Mr. Pineus was given the first place, Mr. Bancroft the second, and the third place was a tie between Messers Webb and Shaffrath.—In the Sophomore class Miss Eaton was first, Mr. Bingham was second and Miss Hobby third.

The Seniors had their pictures taken by Townsend, Willimantic, May 14.

The Farmer at the Capitol can joke, and have his fun.
And laugh and holler, "Storrs School's no better school'n none!"
Ef Yale College suits you better, w'y hits where you'd orto' be.
But the little College at Storrs' is good enough for me!
S. A. C. DEBATING CLUB.
WRITTEN BY J. W. PINCUS
FOR THE S. A. C. D. C.

As the movement to form a debating club at Storrs Agricultural College has met with success, it seems fitting to let the readers of S. A. C. Lookout know of its object and work.

On April 9, 1897, the five charter members by adopting a constitution and electing officers, brought into existence the S. A. C. Debating Club.

The principal object of the Club as stated in the preamble of the constitution is "To educate the young men at S. A. C. in the art of debating."

The chairman and the critic are appointed at each meeting, in alphabetical order. Besides the report of the critic for the evening, the members in turn offer criticisms which are interesting and helpful. Roll-call at each meeting is responded to by a two or three minutes talk on some interesting current event.

A debate is held at each meeting.

The debators are usually given from three to five minutes time

So far, the following subjects have been discussed: Resolved, That the Dingley Bill Should be Passed. Resolved, That Labor Organizations are Injurious to Civilization. Resolved, That the Civilized Powers Should Assist Turkey in the War with Greece. Resolved, That the President of the United States Should Hold an Honorary Office in the Senate for Life, at the same Salary.

The number of members at present is not large, but they are taking great interest in the club, and are trying to do good earnest work.

Any male student of Storrs Agricultural College, upon receiving the unanimous consent of the club, may become a member of the Debating Club, provided he signs the constitution, and pays his initiation fee.

It is hoped that by next Fall, membership will increase sufficiently to enable the club to invite other debating clubs, to public debate.

THE COMPULSORY LABOR QUESTION.
WRITTEN BY H. L. GARRIGUS,
FOR THE C. S. C.

The question of compulsory labor has been agitated among the student for a few weeks past and the general opinion of the body of students will I think be found in the following.

The question is, Would it be more desirable to have the labor optional with the students or is the present method the best? Now there are a number of graduates of this institution, who have all worked their three hours a day the same as we do at the present time, and I am quite sure that if any one of them were asked how they enjoyed their course here at Storrs, they will answer that some of the pleasantest days of their lives were spent here, and I presume that most of them enjoyed the labor as well as any of it.

Nevertheless this is the age of advance ment, and as our college becomes better equipped and our course more thorough our studies must necessarily require more of our time.

We also need more time for athletics.

There is, of course, some educational work that the students would be required to do even though the labor were optional. Probably all the work would be educational to a certain class of students who never handled a hoe, held a plow, or drove a team.

However this may be there are a great many of our students who are well able to pay their way without the aid of the work and they would be glad to have the time to devote to athletics, and possibly some would study more if they had the time. I think that in this case they would enjoy the time spent here much more, and perhaps get just as much good out of it. On the other hand there are those who really need the help of the work that they can do outside of class work and most of the latter class are willing to work and would do so in any case.

The present system, it has been stated, is more expensive than it would be to
hire ordinary help to do the work if such be the case. I think that it could be helped by allowing those who do not wish to work, and who, while working do as little as possible to pass away the time, to spend their time in some other way, giving those who would do honest work little more pay thus stimulating them to do better work.

I personally believe that a student can do just as well in his class if he works three hours a day as he can if he does not do anything, still the time could doubtless be spent profitably in other ways and I think the time is not far distant when there will be so much in the regular course at S. A. C. that a student will hardly find time to work outside were he so disposed.

ATHLETICS.

The first practice game of the season was played with a mixed combination of Eagleville and College players.

Bushnell's side got the score.

STORRS vs BALTIC.

This was the first regular game of the season, at Storrs.

The Baltic team arrived at 1:45 and the game was called at 2:15. Storrs won the toss and took the field. At the end of the first two innings it looked as though the Storrs boys were going to be snowed under, as the score stood 10-2 in Baltic's favor. After this Bushnell got down to his usual form and pitched good ball for the rest of the game, and held them down to five runs for the next seven innings.

The Baltic team showed that they had had practice by their excellent field work.

At the middle of the ninth inning the prospect looked pretty dark for Storrs but by a wonderful effort they started the ball rolling and when the third out was called the score-keeper had registered seven runs for the S. A. C. boys in that inning.

The principal features of the game were, a double play in the first inning for Baltic; a splendid catch, by Clark, the right fielder for Storrs.

Score by Innings.

Struck Out, " 8; " 7.

EAGLEVILLE vs STORRS.

The second regular base-ball game of the team was played at Eagleville with Vinton's combination team, Saturday, May 15th.

The game was an interesting one, as the score was very even.

The game was a pitchers game throughout. Bushnell pitched the best game of his life. The Eagleville team had Dick Turner, an ex-substitute pitcher of Lehigh University, who is one of the best and swiftest pitchers in this part of the state.

The Storrs team has never before been able to conquer the Eagleville team which is composed of the best players of Tolland County.

The batting was not heavy on either side; Foskett and Comber each made a two base hit for Storrs. Hall made a three base hit, and Prue and McFarland each made a two base hit for Eagleville.

In the sixth inning Turner and Prue changed places.

ATHLETIC MEET.

Arrangements have been completed for the Athletic Meet between Storrs and Amherst. The meet will be held at Willimantic fair ground May 31st, at 10.30 A.M.

The following events have been selected.

100 yards Dash; 220 yards Dash; 440 yards Dash; 120 yards Hurdle Race; Running broad jump; Running high jump; Pole Vault; Shot Put; Hammer Throw; Mile Run; Mile walk; Mile Bicycle.
TRIFLES.
WRITTEN FOR THE A. L. S.

Great principles underlie everything a man learns or does. The simplest things have relations that extend beyond our sight. "The boundaries of knowledge recede like the horizon, as we advance," but there is always an unknown beyond. It must be so when finite minds are related to the infinite. The simplest facts of science are in their last analysis, beyond our reach. Everything begins in mystery and ends in mystery. The tiny rivulets of knowledge here, spread out into a boundless ocean hereafter, and the ability to know increases with every truth learned. One truth flashes its light upon a second; the two combined form a brighter beam on the third; and thus through the ages lesser lights gather into sun and suns into systems until a blaze of glory fills the mental firmament.

Accident does very little towards the production of any great result in life. Though sometimes what is called a happy hit may be made by a bold venture, yet the old common highway of steady industry and application is the only safe road to travel.

Although there are discoveries which are said to have been made by accident, if carefully inquired into, it will be found that there has really been very little that was accidental about them. For the most part these accidents have been opportunities carefully improved by Genius. The fall of the apple at Newton's feet has often been quoted in proof of this class of discoveries. But Newton's whole mind had already been devoted for years to laborious and patient investigation. The circumstance of the apple falling before his eyes was suddenly apprehended only as a genius could apprehend it, and served to flash upon him the brilliant discovery sought for. It is the close observation of little things which is the secret of success in business, in art, in science and in every pursuit in life.

Human knowledge is but an accumulation of small facts made by successive generations of men, the little bits of knowledge and experience carefully treasured up by them growing at length in a mighty pyramid. Though many of these facts and observations seem in the first instance to have but slight significance. They are all found to have their eventual uses and to fit into their proper places.

When Galvani discovered that a frog's leg twitched when placed in contact with different metals, it could scarcely have been imagined that so apparently insignificant a fact could have led to important results. Yet therein lay the germs of the Electric Telegraph which binds the intelligence of the continents together. The gigantic machinery employed in pumping our mines, working our mills and manufactures, and driving our steamships and locomotives in like manner depends for its supply of power upon so slight an agency as little drops of water expanded by heat. That same familiar steam, which we see issuing from the common tea kettle spout, when put within an ingeniously contrived mechanism displays a force equal to millions of horses and contains power to rebuke the waves, to set even the hurricane at defiance. The art of seizing opportunities and turning even accidents to account, bending them to some purpose is a great secret of success. Doctor Johnson has defined genius to be "a mind of large general powers accidentally determined in some particular direction."

Men who are resolved to find a way for themselves will always find opportunities enough, and if they do not lie ready at hand they will make them.

It is not those who have enjoyed the advantages of colleges that have accomplished the most for science and art, for necessity oftener than facility has been the mother of invention. It is a note of upstart greatness to observe, and watch for these poor trifles, which the noble mind neglects and scorns but "Think not a trifle though it small appear; Small sands the mountains moments make the years; and Trifles - life."
EXCHANGE.

So far, we have not received many exchanges to acknowledge in this issue.

We gladly welcome two new ones, "The Lake Breeze," from Sheboygan, Wisconsin, and "The Climax" from Beloit, Mich.

"The Lake Breeze," illustrates what a Western High School is capable of producing in the shape of a paper.

It is edited in the best of shape and shows that much care is bestowed upon it.

"The Climax" is an interesting paper and we hope to see it again.

HEADQUARTERS
Storrs Agricultural College

OFFERS to both young women and young men, a liberal course of instruction in English, Mathematics, Chemistry, Physics, Agriculture, Horticulture, Botany, Physiology, Veterinary, etc.
In Domestic Science, Cooking, Sewing, Home Sanitation, etc.
Tuition free. Board, books, and other necessary expenses at cost.
For further particulars address,
President, Storrs Agricultural College,
Storrs, Conn.

EXTENSION DEPARTMENT

A two years course of home studies for people old or young who are interested in Agricultural and Scientific matters. The text books for the first year are;—Course A, for ladies; ‘Vick’s Home Floriculture’, ‘Easiest Ways in Housekeeping and Cooking’, ‘Realm of Nature’, ‘Story of the Plants’. Course B, for gentlemen; ‘First Principles of Agriculture’, ‘Practical Farm Chemistry’, ‘Realm of Nature’, and ‘Story of the Plants’.
