REBUILDING, RENEWING AND ENHANCING
THE UNIVERSITY OF CONNECTICUT

JANUARY 2006

FIVE YEAR PROGRESS REPORT

Governor M. Jodi Rell
and the
Connecticut General Assembly

UNIVERSITY OF CONNECTICUT
UCONN 2000
FIVE YEAR PERFORMANCE REVIEW REPORT
JANUARY 15, 2006

UCONN 2000:  2005 YEAR-END UPDATE
In 2004 and 2005, the University identified weaknesses in the administration of the UCONN 2000 program as related to code compliance, building inspection and organizational checks and balances. These issues have been addressed through the Corrective Action Plan originally presented to the General Assembly last April, and through the report and recommendations of the Governor's Commission on UConn Review and Accountability. Implementation of solutions to resolve these issues is underway and was also the focal point of the twenty-first volume (dated October 2005) of the University's semi-annual reports to the General Assembly; that volume, which was forwarded to every Connecticut legislator, also contained a summary of the Corrective Action Plan and copies of related audits. In order to ensure that every member of the General Assembly remains fully apprised of the University's ongoing improvement efforts, this report contains updates on the implementation of the Corrective Action Plan, and the proposed implementation of the Governor's Commission recommendations. Accompanying this report is a companion document which details the implementation status of all related audit recommendations since 1999. The full contents of the report are outlined in the section below.

UCONN 2000:  PERFORMANCE REVIEW REPORT TO
GENERAL ASSEMBLY
In 2002, the General Assembly enacted 21st Century UConn, the ten-year extension of the UCONN 2000 program. As part of this change in the law, the reporting requirements were amended to include two five-year performance review reports to supplement the semi-annual reports which the University submits to the General Assembly every October and April. The new reporting requirement is as follows:

On January 15, 2006, and January 11, 2011, the university shall submit to the Governor and to the joint standing committees of the General Assembly having cognizance of matters relating to education and finance, revenue and bonding, a five-year UConn 2000 performance review report detailing for each project undertaken to date under the program the progress made and the actual expenditures compared to original estimated costs. In addition, the report shall include a summary of programs, services and facilities which the university coordinates with other public and independent institutions of higher education. Not later than sixty calendar days after receipt of said report, such joint committees shall consider the report and determine whether there has been significant cost increases over original estimates as a result of actions taken by the university. If so, the committees may make recommendations for appropriate action to the university and to the General Assembly.

Section 10a-109y
Connecticut General Statutes
This report is submitted in keeping with these requirements. However, in the interest of providing a full overview of performance to date, this report includes details on all projects undertaken in the program's ten years of operation. In addition to individual project descriptions and information regarding collaborative activities with other institutions of higher education, the report contains, in Appendix A, a chart detailing financial information for all projects, from all sources, since the program's inception. This report also contains the University's Corrective Action Plan, updated (Appendix D), and the draft Implementation Plan for the Governor's Commission recommendations (Appendix E).

**UCONN 2000: PROGRESS ON LEGISLATIVE GOALS**

Through UCONN 2000, the executive and legislative branches recognized and addressed the University's need for a comprehensive infrastructure renewal program to attract Connecticut's high-achieving students, to educate a top-notch workforce and to compete effectively for job-creating research grants. The legislative program was designed to rebuild, restore and enhance the University's physical infrastructure, but it was also designed to enhance programmatic excellence by jump-starting the University's private fundraising with an endowment matching grant program. The overwhelming bipartisan support for UCONN 2000 reflected the depth of consensus regarding the goals as articulated in the law's statement of purpose:

The purpose of the University of Connecticut 2000 Act is to promote the welfare and prosperity of the people of the state and the continuation and improvement of their educational opportunities by approving a special capital improvement program for the University of Connecticut and enabling the University of Connecticut to borrow money and enter into financing transactions in its own name, on behalf of the state, to expand the authority of the University of Connecticut to construct projects and to assure a state commitment to support the financing of the acquisition, construction, reconstruction, improvement and equipping of facilities, structures and related systems for the benefit of the educational and economic development needs of the state and the University of Connecticut, all to the public benefit and good, and the exercise of the powers, to the extent and manner provided in the University of Connecticut 2000 Act, is declared to be for a public purpose and to be the exercise of an essential governmental function.

Section 10a-109b
Legislative finding of purpose
The return on the UCONN 2000 investment to date has far outstripped even the most optimistic expectations at the time the law was passed. In the ensuing decade, the University has seen unprecedented growth in the size, diversity and academic skill of its student body, as well as tremendous strides in research activity and private fundraising. The data displayed below tell the story of a remarkable—and remarkably rapid—transformation.

Other Returns On The UCONN 2000 Investment

Educating Connecticut:
Since more than 80% of the University’s undergraduates are residents of Connecticut, the financial investment of UCONN 2000 benefits—first and foremost—Connecticut’s young people and their parents. UCONN 2000, as well as the capital investment in the state’s other public higher education institutions, has been a significant factor in helping to slow the “brain drain”—the exodus of Connecticut’s high school graduates to colleges out of state.
The state of Connecticut and its municipalities together invest an average of approximately $139,000 in a student in the course of that child’s education, preschool through grade 12. To send that investment out of state upon graduation undermines sound economic strategy; simply stated, for every Connecticut student who stays here for college, the state builds on its prior investment and grows its potential workforce.

Jobs for Connecticut:
The University of Connecticut contributes mightily to our state’s economic growth. The numbers tell part of the story: the Connecticut Center for Economic Analysis documents that annually UConn generates nearly 38,000 jobs outside the University, leverages $800 million in private and federal investment, and adds $3.1 billion to Connecticut’s gross state product. UConn also contributes to the state’s well-being by conducting research that enhances Connecticut’s scientific and technological infrastructure, and by improving health care, education and the environment. The UCONN 2000 investment has been a major factor in UConn’s growing economic capacity.

The UCONN 2000 program itself has been a significant job creator. As of October 2005, construction and related contracts for the program totaled $1.218 billion, with Connecticut business receiving $1.071 billion, or 88%, of total contracted dollars. Of the $1.15 billion of projects completed to date, 23% of the total or $262 million, has gone to “set-aside” (women, minority and small business) contractors.

Today, UConn’s role is particularly vital. Our mission, in keeping with the UCONN 2000 statement of purpose articulated by the General Assembly, is to increase Connecticut’s intellectual capital by producing graduates of the highest quality. We know the workplace is responding positively: according to the Department of Higher Education in its recent report on the topic, employer satisfaction with Connecticut’s public college graduates is very high overall, with employers rating UConn grads highest on basic skills (reading, math, written and oral communication, and computer applications). These graduates will go on to repay their state’s investment many times over as they build careers, raise families, pay taxes and contribute in many other ways to enhancing Connecticut’s quality of life.

UCONN 2000: PROGRAM OVERVIEW
The basic provisions of the UCONN 2000 program have remained the same through Phases 1, 2 and 3 (also known as 21st Century UConn). The law sets forth the following parameters and requirements:

• The submission of the project list and master indenture by the University to the State Bond Commission for its review and approval.
• The State’s pledge to fund the “debt service commitment” bonds for the University of Connecticut ($962 million for Phases 1 and 2 and $1.3 billion for Phase 3, which includes the UConn Health Center for the first time).
• The maximum annual amounts that the University’s Board of Trustees may authorize for debt service commitment bonds to finance projects.
• The authority of the State Treasurer over the sale of University of Connecticut bonds and for setting the terms and provisions for each sale in conjunction with UConn.
• The authority of the University to issue special obligation bonds to fund projects on the project list, with debt service to be paid by UConn with associated and dedicated revenue streams (e.g. residential facilities and parking garages).
• The authority of the General Assembly, upon recommendation by the University’s Board of Trustees, to add or delete projects on the list approved by the State Bond Commission.
• The authority of the University’s Board of Trustees to make material revisions to projects and to determine the budget, scope and sequencing of projects.
• The authority of the University to manage all projects.
• The requirement that all projects comply with state laws pertaining to state public construction projects, including environmental and labor standards.
• The submission of semi-annual progress reports and a mid-term performance review report by the University to the Governor and the General Assembly.

UCONN 2000: PROJECT SUMMARIES
Listed here are all UCONN 2000 projects, completed or underway, as of December 2005. Please note that expenditure data are based on the best available information to date; however, adjustments may still be made in the course of routine audit and review procedures. When the need arises, the University, on a project-by-project basis, makes adjustments as appropriate, from specific project subaccounts all the way through to the amendment of supplemental indentures. These adjustments are made in full keeping with the statutory framework of UCONN 2000 and with the assistance of bond counsel. Modifications will continue to be necessary, both 1) to accommodate the types of ongoing adjustments contemplated by the law as necessary to the administration of a ten-year (now twenty-year) program and 2) to correct any inaccuracies that may be found as part of ongoing financial review and audit.

STORRS & REGIONAL CAMPUSES

Agricultural Biotechnology Facility
A new 46,000 square foot Agricultural Biotechnology laboratory and greenhouse. The buildings house laboratories, seminar and conference rooms, offices for Cooperative Extension Service faculty and outreach specialists, a computer lab, a reference library, administrative offices, and space for a Transgenic Animal Facility, a Plant Biotechnology Laboratory and a proposed Transgenic Plant Facility.
UCONN 2000 funding along with a Department of Energy Grant ($7,770,162) provided for the completion of the Agriculture Biotechnology project. This project allowed for the construction of the second building (approximately 16,000 sq. ft.) and a new greenhouse facility (approximately 14,000 sq. ft.) as provided in the original project and the Master Plan. The facility provides research and incubator space, including the Center for Regenerative Biology.

Arjona and Monteith (New Classroom Buildings)
These two buildings, at perhaps the most highly visible site on campus, were constructed in 1959 with each having 68,600 square feet of space on four levels. Connected to the Monteith building is the Schenker Lecture Hall, which has 4,400 square feet of space. These buildings are the most heavily used classroom facilities on the Storrs campus. They also contain offices for many of the departments within the College of Liberal Arts and Sciences. It was anticipated in the UCONN 2000 program that these buildings would be renovated. However, 1) the cost far exceeded planned allocations and 2) the University could not take this much existing classroom space off-line during a period of skyrocketing enrollment. It has also become clear that even after a renovation of the buildings, the spaces still wouldn’t meet today’s needs. The project now consists of construction of new buildings and demolition of the current facilities.

Deferred Maintenance, Code/ADA and Renovation Lump Sum

In general, projects undertaken fall into one or more of the following categories:

- Safety and code required improvements
- Roof and exterior repairs
- Building mechanical system improvements
- Utilities repairs and upgrades
- General building renovations
- Roads, walks and grounds
- Environmental remediation
- Lump sum funding to supplement named project budgets to cover specified renovation/code activities

The total project budget line now stands at $368.6 million. A complete list of all projects undertaken in the first ten years can be found in Appendix B.

Statutory Estimates (1995 & 2002) $359,000,000
Total Funding (as of 9/30/05) $368,597,360
UCONN 2000 Funding (as of 9/30/05) $368,597,360
Actual Expenditures (as of 9/30/05) $172,487,671

East Campus North Renovations

These projects were part of the University’s accelerated plan for the installation of sprinklers in residence halls as approved by the Board of Trustees in 2001. At the same time this work was undertaken, such repairs as roof replacement, façade repairs, and interior improvements were completed.

Architect SEA
General Contractor Whiting Turner
Project Status Complete
Statutory Estimate (1995) $11,820,000
Total Funding (as of 9/30/05) $8,710,000
  UCONN 2000 Funding (as of 9/30/05) $7,710,000
  Other Funds (as of 9/30/05) $1,000,000
Actual Expenditures (as of 9/30/05) $8,671,574
Completion Date August 2002

Equipment, Library Collections and Telecommunications
The enhancement of the University's infrastructure includes its instructional and scientific
equipment. The equipment replacement category permits the University to replace outmoded
items with state of the art laboratory devices and computers, and to fund other operational needs.
The funding covers seven major categories: Management Information Systems, Computers,
Research Equipment, Instructional Equipment, Furnishings, Infrastructure and Public Safety, and
Library Materials. The total project budget line is $358.3 million. A complete list of expenditures
can be found in Appendix C.

Total Funding (as of 9/30/05) $358,312,000
  UCONN 2000 Funding (as of 9/30/05) $358,312,000
  Actual Expenditures (as of 9/30/05) $164,857,591
The College of Agriculture and Natural Resources has over 100 buildings under its care, many of which have required repairs, remodeling, demolition or replacement. The majority of these buildings are used to support the farm operations. These improvements are important to the instructional program and to the research program of the entire University; UConn must comply with federal requirements concerning animal care in order to remain eligible for federal grants.

**Farm Buildings Repairs/Replacement**

- **Architect**: Various
- **General Contractor**: Various
- **Project Status**: In design & construction
- **Statutory Estimate (2002)**: $6,000,000
- **Total Funding (as of 9/30/05)**: $6,000,000
  - UCONN 2000 Funding (as of 9/30/05): $6,000,000
  - Other Funds (as of 9/30/05): $0
- **Actual Expenditures (as of 9/30/05)**: $1,991,229
- **Completion Date**: Various

**Gant Plaza Deck**

This project corrected serious long-standing leaks through the concrete plaza deck of the Gant Science Center and abated water leakage in administrative offices, general student work areas, hallways and the mainframe computer operations areas by installing a new waterproof membrane and by enclosing the deck area to create 14,000 square feet of classroom and office space.

- **Architect**: Allan Dehar Associates
- **General Contractor**: Whiting Turner
- **Project Status**: Complete
- **Statutory Estimates (1995 & 2002)**: $0 (Pre-UCONN 2000 bond authorization)
- **Total Funding (as of 9/30/05)**: $9,229,174
  - UCONN 2000 Funding (as of 9/30/05): $7,287,174
  - Other Funds (as of 9/30/05): $1,942,000
- **Actual Expenditures (as of 9/30/05)**: $9,229,174
- **Completion Date**: January 2000
Gentry Renovation & Completion
Additions and alterations to Gentry Building were designed to consolidate all the programs of the Neag School of Education into one facility with state-of-the-art classrooms and space for faculty offices. The building houses 82,000 square feet of floor space, including 24,000 square feet of new construction, interior renovations and exterior modifications. The first stage of this project was completed in May 2004. The remaining work will be undertaken in Phase 3 of UCONN 2000.

Architect Svigals Associates
General Contractor Gilbane
Project Status In design & construction
Statutory Estimate (1995 & 2002) $19,299,000
Total Funding (as of 9/30/05) $20,896,335
  UCONN 2000 Funding (as of 9/30/05) $20,000,000
  Other Funds (as of 9/30/05) $896,335
Actual Expenditures (as of 9/30/05) $10,437,395
Completion Date TBD

Grad Dorm Renovations
This project was part of the University’s accelerated plan for the installation of sprinklers in residence halls as approved by the Board of Trustees in 2001. At the same time this work was undertaken, other repairs such as roof replacement, façade repairs, and interior improvements were completed.

Architect In-house
General Contractor Whiting Turner
Project Status Complete
Statutory Estimate (1995) $7,548,000
Total Funding (as of 9/30/05) $3,000,000
  UCONN 2000 Funding (as of 9/30/05) $3,000,000
  Other Funds (as of 9/30/05) $0
Actual Expenditures (as of 9/30/05) $2,594,672
Completion Date August 2003
Heating Plant Upgrade
This project provides for the upgrade to the University's Heating Plant, including replacement of boilers and associated systems, new central chilled water plant and upgrade of systems to current technologies. The total scope of the utility upgrades includes three named project categories – Heating Plant Upgrade, North Superblock Utilities and Underground Steam and Water Upgrades.

Architect                   Stone & Webster
General Contractor         Precision Power
Project Status             Complete
Statutory Estimate (1995)  $10,000,000
Total Funding (as of 9/30/05) $11,157,272
  UCONN 2000 Funding (as of 9/30/05) $9,969,000
  Other Funds (as of 9/30/05) $1,188,272
Actual Expenditures (as of 9/30/05) $11,157,272
Completion Date            May 1999

Hilltop Dormitory Renovations
This project was part of the University's accelerated plan for the installation of sprinklers in residence halls as approved by the Board of Trustees in 2001. At the same time this work was undertaken, other repairs such as roof replacement, façade repairs, and interior improvements were completed.

Architect                   WASA
General Contractor         Whiting Turner
Project Status             Complete
Statutory Estimate (1995)  $3,141,000
Total Funding (as of 9/30/05) $8,979,635
  UCONN 2000 Funding (as of 9/30/05) $8,700,000
  Other Funds (as of 9/30/05) $279,635
Actual Expenditures (as of 9/30/05) $8,979,635
Completion Date            August 2001
Ice Rink Enclosure
This project enlarged the rink footprint to 50,000 square feet, enclosed the rink, air conditioned the building, and added locker rooms, spectator capacity and support facilities, and meeting/office space.

- Architect: The Design Forum
- General Contractor: HRH/Atlas
- Project Status: Complete
- Statutory Estimate (1995): $2,616,000
- Total Funding (as of 9/30/05): $4,021,594
  - UCONN 2000 Funding (as of 9/30/05): $3,280,000
  - Other Funds (as of 9/30/05): $741,594
- Actual Expenditures (as of 9/30/05): $4,021,594
- Completion Date: October 1998
International House Conversion/Museum of Natural History

This project was the first phase of a three phase program to create a vibrant Natural History Museum. The project converted vacant space to accommodate the museum’s relocation from the Wilbur Cross building, and provided for exterior façade restoration, utility upgrade and creation of an office and exhibit area.

Architect                      Arbonies King Vlock, P.C.
General Contractor             MCC Construction
Project Status                 Complete
Statutory Estimate (1995)      $800,000
Total Funding (as of 9/30/05)   $800,000
  UCONN 2000 Funding (as of 9/30/05) $800,000
  Other Funds (as of 9/30/05)     $0
Actual Expenditures (as of 9/30/05) $800,000
Completion Date                December 2000
Intramural, Recreational and Intercollegiate Facilities

This project will construct facilities to meet a broad range of activities, including scholastic support to student athletes, indoor practice space for intercollegiate and intramural team sports and individual recreational activity, and outdoor athletic and recreational fields (soccer, football and softball). The first major undertaking is the indoor practice facility currently under construction. This facility will house the football program including offices, training rooms, locker rooms, dining facilities, lounge, strength and conditioning room and an indoor practice facility. When not used by athletic teams, the indoor facility will be used by the recreational programs. The building will contain 170,000 square feet of space. Funding for the project includes $31 million from Phase 3 of UCONN 2000, and the remainder from private fundraising and Division of Athletics funds.

Architect: Jeter, Cook & Jepson
General Contractor: Dimeo Construction
Project Status: Construction
Statutory Estimate (2002): $31,000,000
Total Funding (as of 9/30/05): $36,350,470
UCONN 2000 Funding (as of 9/30/05): $31,000,000
Other Funds (as of 9/30/05): $5,350,470
Actual Expenditures (as of 9/30/05): $11,229,466
Completion Date: July 2006
Lakeside Renovation

The Lakeside Apartments were constructed in 1931 to serve as a facility for overnight guests at the University. The building has a total of 15,000 square feet on three levels. With the completion of the Nathan Hale Inn, the privately owned hotel on campus, the use of this facility to house overnight guests has been discontinued. This project will renovate the building for the operations of University Communications, Governmental Relations and University Events. Renovation activities include roof replacement, ADA changes, systems upgrades and asbestos removal.

Law School Renovations/Improvements
In May 2000 as part of a plan to undertake a renovation of the Starr building (former Law Library building) a facility program was developed for all original campus buildings. The planned use of each building is:

**Starr Hall:** Starr Hall will be developed as an administration and special function building. In addition to all administrative offices, existing and new facilities will house meetings, conferences and moot court sessions, the public safety office and facilities; operations office. The lowest level will house an independent suite of seminar rooms and lawyering process classes.

**Knight Hall:** Knight Hall will become the central student support building. The lowest level will house the campus branch of the UConn Co-op. The other floors will contain large and medium classrooms, seminar rooms, student lounge, student mail room and student organizations.

**Hartranft Hall:** Hartranft Hall will house specialized student and faculty functions, large classrooms, graduate programs, student journals and faculty and independent offices.

**Hosmer Hall:** Hosmer Hall will continue its present use as a faculty office and special function building. The cafeteria will remain on the ground floor. Other functions will include the faculty lounge, conference rooms and legal clinics.

In Phases 1 and 2 of the UCONN 2000 program, a major renovation of Starr Hall and other deferred maintenance projects were completed. The remaining buildings, formerly a seminary, have extraordinarily beautiful exteriors with severely outdated and cramped interior quarters; many student organization and outreach activities, as well as faculty offices, are in closet-like warrens never renovated. In Phase 3, $1 million of the $15 million project line was committed to cover the cost of an elevator to make Hartranft Hall handicap accessible. This particular project was completed in November 2005.
Litchfield Agriculture Center – Phase 1
This project entailed the construction of a new 7,000 square foot facility for the Cooperative
Extension System. The Litchfield Agriculture Center contributed a $465,000 grant toward the
cost of the new building.

Architect                                    TLB Architecture
General Contractor                          Hayes Corporation
Project Status                               Complete
Statutory Estimate (1995)                   $1,000,000
Total Funding (as of 9/30/05)               $1,519,543
    UCONN 2000 Funding (as of 9/30/05)     $1,000,000
    Other Funds (as of 9/30/05)            $519,543
Actual Expenditures (as of 9/30/05)         $1,519,543
Completion Date                             August 2001
Mansfield Apartments Renovation

This project provided for installation of smoke detectors, conversion of two units to handicapped access, replacement of oil-fired furnaces and hot water heaters with gas units, installation of pitched roofs and roof canopies, kitchen improvements and site improvements.

Architect: John Ruffalo  
General Contractor: Conn-Strux, Inc.  
Project Status: Complete  
Statutory Estimate (1995): $2,612,000  
Total Funding (as of 9/30/05): $2,626,935  
  UCONN 2000 Funding (as of 9/30/05): $2,071,000  
  Other Funds (as of 9/30/05): $555,935  
Actual Expenditures (as of 9/30/05): $2,625,553  
Completion Date: August 1997

Mansfield Training School Improvements Phases 2 & 3

This project, in its two phases, will stabilize the facilities that comprise the former Mansfield Training School. Funding to date has been used for renovations in the Longley building (for Engineering research functions) and the Thompson building (for Fine Arts functions). Additional renovations, electrical improvements and demolition of uninhabitable buildings will be included in Phase 3.

Architect: Clohessy Herlands Harris  
General Contractor: PDS Engin/Construction  
Project Status: Phase II complete, Phase III funding available in FY10  
Total Funding (as of 9/30/05): $29,500,000  
  UCONN 2000 Funding (as of 9/30/05): $29,500,000  
  Other Funds (as of 9/30/05): $0  
Actual Expenditures (as of 9/30/05): $3,472,487  
Completion Date: Various
**Monteith Renovation**

The Arjona/Monteith (See Arjona and Monteith: New Classroom Buildings) project, now authorizes the replacement of the two most utilized classroom buildings on campus. Originally, in the early phases of UCONN 2000, the project was envisioned as a summer-time renovation due to the importance of the buildings to meet classroom needs during the school year. An architect was hired to investigate the feasibility of the renovation concept. The study determined that the work could not be accomplished over the summer, and furthermore, that the original design of the buildings was sufficiently outdated to preclude an upgrade to a modern classroom facility. However, limited renovation activity was undertaken to keep the facility operational pending construction of a replacement.

**Music Drama Addition**

This project provided for renovation to the Music and Drama/Music Building as well as additions to the Fine Arts quadrant including a new Band Orchestra Building, music library and studio/classroom building. This project was originally undertaken with a general obligation bond authorization; it was transferred to and completed by the University in keeping with the provisions of the law.

Completion Date September 1999

**Natural History Museum Completion**
The State Museum of Natural History will serve as home to the new Connecticut Archaeology Center, which provides support for UConn graduate and undergraduate students and to operate archaeology field schools. The Center will also provide services to Connecticut’s elementary and secondary schools and municipalities, as well as access to maps, collections and an archaeology library. This phase of the project (see International House conversion, above, for the first phase) will cost $976,775, with $500,000 from UCONN 2000 and $476,775 from private donations. The renovation project will create work and display space appropriate for these activities.

North Hillside Road Completion
Design and permitting activities are underway on the North Hillside Road completion project. This project will extend Hillside Road by 3,400 linear feet from its current terminus to Route 44 and will include related utilities such as gas, electrical, water, sewer and telecommunications. The new extension will allow enhanced access to campus and sorely needed relief from traffic congestion on Route 195. Also, the road and accompanying utilities will permit future development of this key parcel. The University’s Master Plan envisions the North Campus as a critical area for expansion of the main campus, permitting new science buildings, recreational residential capacity, public/private partnerships (including incubator space) and other initiatives. Federal funding of $4.0 million was appropriated for this project in the federal FY 2005 budget.

Northwest Quadrant Renovation – Phase 1 & 2

Work on these residential facilities included renovations and improvements to superstructures, roofs, exterior walls, HVAC, electrical systems, plumbing, and interior areas; asbestos abatement, code required improvements, and development of a new dining hall.

Architect                          Herbert Newman
General Contractor                Whiting Turner
Project Status                    Complete
Statutory Estimate (1995)         $17,875,000
Total Funding (as of 9/30/05)      $32,124,843
    UCONN 2000 Funding (as of 9/30/05)  $32,001,000
    Other Funds (as of 9/30/05)          $123,843
Actual Expenditures (as of 9/30/05)  $32,124,843
Completion Date                    May 2001
Parking Garage – North
This project provided a new five story, 1027-space parking garage adjacent to the Technology Quadrant on the north side of the campus. It represented a significant step in moving parking toward the outer perimeters of campus in order to establish a pedestrian campus core as outlined in the Master Plan.

Architect: Macchi Engineers, LLC
General Contractor: O & G Industries
Project Status: Complete
Statutory Estimate (1995): $10,000,000
Total Funding (as of 9/30/05): $9,658,000
UCONN 2000 Funding (as of 9/30/05): $9,658,000
Other Funds (as of 9/30/05): $0
Actual Expenditures (as of 9/30/05): $9,658,000
Completion Date: April 1998
Pedestrian Spinepath

Conversion of the former Fairfield Road to plazas and walkways was a key part of the transformation of the campus core to a pedestrian mall. The project provided for surface improvements from the intersection of Hillside Road to Mansfield Road and construction of 600 feet of underground utility tunnel for domestic water services, chilled water and steam, electrical services, and sanitary and storm sewers to serve the campus core.

Architect: Earthtech
General Contractor: Precision Power, Inc.
Project Status: Complete
Statutory Estimate (1995): $5,789,000
Total Funding (as of 9/30/05): $6,074,000
UCONN 2000 Funding (as of 9/30/05): $6,074,000
Other Funds (as of 9/30/05): $0
Actual Expenditures (as of 9/30/05): $6,074,000
Completion Date: January 1999

Residential Life Facilities

This named project represents the overarching authorization to undertake activities to provide housing and dining facilities for the University’s students. The difference between the statutory estimate and the total funding amount reflects the availability of special obligations bonds (to be repaid by the University with fee revenue) to finance projects in whole or in part. The limited expenditures to date funded the sprinkler project for the West Campus residence halls in the summer of 2004.

Architect: TBD
General Contractor: TBD
Project Status: In design & construction
Statutory Estimate (2002) $90,000,000
Total Funding (as of 9/30/05) $60,000,000
  UCONN 2000 Funding (as of 9/30/05) $60,000,000
  Other Funds (as of 9/30/05) $0
Actual Expenditures (as of 9/30/05) $750,000
Completion Date TBD

School of Business
This 101,000 square foot building is the new home of the University’s School of Business. The new facility provides necessary space as well as modern teaching media, case rooms, and skill labs needed for one of our most sought-after academic majors. Private donations augmented UCONN 2000 funds.

Architect Centerbrook
General Contractor FIP Construction
Project Status Complete
Statutory Estimate (1995) $20,000,000
Total Funding (as of 9/30/05) $27,821,725
  UCONN 2000 Funding (as of 9/30/05) $25,652,366
  Other Funds (as of 9/30/05) $2,169,359
Actual Expenditures (as of 9/30/05) $27,821,725
Completion Date September 2001
School of Pharmacy/Biology Completion

This project provides for a new 220,000 square foot facility to replace two existing Pharmacy buildings as well as to provide space for Ecology and Evolutionary Biology and Physiology and Neurobiology programs. The facility’s original design was expanded to include a Vivarium (animal care) facility to serve these research departments as part of the University’s need to address the USDA audit recommendations for research animal care.

- **Architect**: Davis Brody Bond
- **General Contractor**: Gilbane
- **Project Status**: Complete
- **Statutory Estimate (1995)**: $41,450,000
- **Total Funding (as of 9/30/05)**: $94,609,000
  - **UCONN 2000 Funding (as of 9/30/05)**: $94,609,000
  - **Other Funds (as of 9/30/05)**: $0
- **Actual Expenditures (as of 9/30/05)**: $89,128,681
- **Completion Date**: June 2005

Shippee/Buckley Renovations

This project covered the installation of sprinklers, code improvements in Shippee/Buckley and repairs to existing service lines in the Shippee dining hall.

- **Architect**: WASA
- **General Contractor**: Whiting Turner

- **Completion Date**: August 2002
South Campus Complex
This new 674-bed dormitory complex replaced the seven buildings that comprised the former South Campus. The three gothic style, state-of-the-art residence halls are adjacent to a new dining hall facility, which also serves other residence halls in the southern part of the main campus. Funding for the project included UCONN 2000 state debt service commitment bonds plus proceeds from the University’s first special obligation bond issue.

Stamford Campus Improvements

This project provides for the first of several needed repairs to the Stamford campus parking garage. The parking structure is constructed of a steel super structure. One of the interior ramps is corroded and must be replaced. This project removes and replaces the ramp.

Stamford Downtown Relocation – Phase 1

The University relocated its Stamford campus to the downtown area to establish a full four-year undergraduate institution focusing on business, communication sciences, mathematics and biology; and to expand programs in psychology, economics, English, general studies, and graduate/masters programs in computer sciences and economics, including the CITI program, a major expansion in information technology capacity. Unanticipated costs were incurred for abatement of significant amounts of asbestos in the original structure, as well as the costs of legal fees and additional construction management expenses resulting from the bankruptcy of the general contractor, Walsh Construction.

In 1998, the City of Stamford purchased the former Scofieldtown Road campus from the University for a price of $2,000,000. These funds were applied to the project.

Student Union Addition

This project represents additions and alterations to provide space and facilities needed in the Student Union, a unifying force enhancing the student campus life, as well as that of the entire University community. The project includes 76,500 square feet of new construction and 99,399 square feet of renovation to existing facilities. This project was designed as a complete rehabilitation and addition to the Student Union to make it a focal point for student life on campus. When the remaining work is complete, the combined project will double the amount of space available for student use.

Construction continues on the second phase of the Student Union Addition project. This phase of the work includes the demolition of the south end of the building and construction of a new facility, which includes a food court, retail space, cultural center facilities and a ballroom. The project is scheduled for completion in June 2006. The first phase of the project, now complete, included a 500-seat theater, student activity offices and meeting spaces, cultural centers and offices for student organizations. It also included space for the student-run radio and TV stations.

Technology Quadrant - Phase 1A

This project, also known as the Biology/Physics building, was key to the University’s Technology Quadrant initiative, which centralizes most major scientific activity. It provided for construction of an 111,000 square foot Biological Sciences facility for Electron Microscopy, Biotechnology, Ecology and Evolutionary Biology, labs, office and support space. The project also included a 22,000 square foot Physics addition for accelerator and laser technology research.

This project suffered delays due to the poor contractor performance and threat of contractor abandonment by HRH/Atlas, the General Contractor. The University terminated its contract with HRH/Atlas in February 2000, and in March 2001, contracted with Turner Construction Company to complete the project. The University simultaneously demanded fulfillment of the performance bond from Liberty Bond Services, and Liberty tendered payment of $25.3 million while retaining its rights to recover.

In summer 2001, with backing of Liberty as a “party of interest,” HRH/Atlas filed a demand for arbitration against the University seeking more than $45 million for alleged wrongful termination. In early January 2006, the University was notified that the arbitration panel found in the University’s favor, i.e., that the University properly terminated HRH/Atlas. Given the challenging and complex nature of construction litigation, this represents a major victory for the University and the UCONN 2000 program.

Technology Quadrant – Phase 2 (Engineering)
This new Information Technology and Engineering Building (ITEB) is located between Babidge Library and the new School of Business along Fairfield Way. It houses the computer science and electrical engineering programs in the information technology field. 94,000 square feet of space is provided for classrooms, offices, computer labs and research labs. As part of the effort to address the campus-wide need for large lecture hall space, the project also included a 350-seat lecture hall.

Architect: Burt Hill, Kosar Rittlemann
General Contractor: O & G Industries
Project Status: Complete
Statutory Estimate (1995): $72,000,000
Total Funding (as of 9/30/05): $34,240,635
  UCONN 2000 Funding (as of 9/30/05): $34,120,000
  Other Funds (as of 9/30/05): $120,635
Actual Expenditures (as of 9/30/05): $34,137,454
Completion Date: June 2003
Torrey Life Science Renovation & Completion & Biology Expansion
This project will provide a replacement facility for the programs in the Torrey Life Science building. It includes new research and teaching laboratories, classrooms and offices for all of the Biology Departments. Architects have been selected for the Torrey Renovation completion and Biology Expansion project that includes research labs, classrooms, and office spaces for Ecology and Evolutionary Biology programs and Physiology and Neurobiology Departments. The new building will be constructed in the area of the current site of the Torrey Life Sciences Building. The preliminary program for the building has been developed and will be finalized prior to start of the schematic design.

Architect: Hillier Architects  
General Contractor: TBD  
Project Status: Planning and Design  
Statutory Estimate (1995 & 2002): $65,000,000

- Actual Expenditures (as of 9/30/05): $12,000,000
- Completion Date: December 2002
Waring Building Conversion

This project converted the former Waring Chemistry Building into a general classroom building. Along with the interior reconfiguration of the 1959 building, HVAC and electrical system upgrades, correction of fire code violations, interior lighting and finish improvements, asbestos abatement, and exterior improvement were also addressed.

Architect: Herbert Newman
General Contractor: Turner Construction
Project Status: Complete
Statutory Estimate (1995): $7,888,000
Total Funding (as of 9/30/05): $11,452,000
  UCONN 2000 Funding (as of 9/30/05): $11,452,000
  Other Funds (as of 9/30/05): $0
Actual Expenditures (as of 9/30/05): $11,452,000
Completion Date: August 2001
Waterbury Property Purchase
This named project was intended for the acquisition of an existing three-floor, converted single-family residence with garage, parking and greenhouse to use as office, storage and parking space. After appraisals, the owner of the property, located at 47 Buckingham Street, accepted the University’s offer of $200,000.

West Hartford Campus Renovations/Improvements
The majority of these funds will be used to support major renovations/additions in keeping with the Master Plan for the campus. The amount expended to date (described below) was to cover a small project of $850,000, of which $500,000 is from UCONN 2000 Phase 3, to repair and resurface the West Hartford parking lot in the summer of 2006. $350,000 in funding for the project will be supplied by the Town of West Hartford, which leases from UConn ball fields adjacent to the lots and uses the lots for game parking.

HEALTH CENTER

CLAC Renovation Biosafety Level 3 Lab
In anticipation of the planned FY 2009 renovations, the planning study for the Health Center’s Center for Laboratory Animal Care (CLAC), is complete. The planning document evaluates the existing vivarium facilities including conditions and capacities, projects volumes based on expected research growth, and recommends short and long term actions to provide adequate vivarium facilities and the creation of a Bio Safety Level 3 containment facility to support current and expanded research programs. The planning study for the vivarium portion of the facility was prepared by FLAD & Associates of Stamford, CT.

Deferred Maintenance/Code/ADA/Renovation Lump Sum – Health Center
The University of Connecticut Health Center is a large modern complex, housing the University’s School of Medicine, School of Dental Medicine, John Dempsey Hospital and related support services. It contains two million gross square feet in 35 buildings and is located on a 162-acre campus. It was designed and built in the mid 1960’s, and has seen very little capital improvement since.

The majority of the identified needs are the result of deferred maintenance, required program and facility upgrades, and normal plant deterioration. The majority of the buildings on the Farmington campus are more than 30 years old and require upgrades to extend their life and meet code requirements. In general, projects fall into one or more of the following types of work:

- Roof and exterior repairs
- Code required improvements
- Building mechanical system improvements
- Utilities repair and upgrades
- Classroom renovations
- Roads, walks and grounds
- Environmental remediation
- Lump sum funding to supplement named project budgets to cover specified renovation/code activities
Please see Appendix B for a detailed list of expenditures to date.

**Dental School Renovation**

The School of Dental Medicine has facilities in the “C”, “L” and “A” Buildings totaling 103,118 square feet. Most of these areas remain the same as when they were originally constructed in 1975 and are in need of major renovations to bring the facilities in line with current code and accreditation standards. It is extremely important that we have up-to-date facilities and equipment to properly train our students in the most modern dental techniques utilizing equipment that is appropriate for private practice, keeping in mind that the Health Center is the primary provider of new dentists for the entire State of Connecticut. This project would provide general renovation to all dental teaching and support space and the installation of new dental equipment to meet current and future needs. The FY 2006 authorization of $330,000 will fund upgrades to the preclinical labs.

Equipment, Library Collections and Telecommunications-Health Center
Funds are needed to support the Health Center's equipment, library collections and telecommunications infrastructure. Outmoded items must be replaced with equipment that is necessary to support research and instructional activities, maintain building compliance, conserve energy, and provide a safe environment for the students, staff, and hospital patients. It is essential that the equipment be current in the laboratories and student learning environments for the institution to remain competitive for research dollars and top faculty and students. Equipment startup packages are key elements in attracting talented new faculty to the Health Center. Library acquisitions are also integral to the support of academics and research. The medical resources in the library require continual updating to ensure rapid access to print and electronic documents. For FY 2006, the allocation is $7.58 million. The project total is $75 million. Please see Appendix C for a detailed list of expenditures to date.

Main Building Renovation
The Health Center's enormous main building includes access areas used by the general public as well as research, academic and clinical space. This renovation's primary focus would be the building's research facility, but would also include major systems and public areas. The 518,145 square foot Research Laboratory was built in the late 60's to provide laboratory and support areas for ongoing research programs. The facility consists of seven floors, which house over 200 research labs and support space, and five floors of mixed use that include classrooms, student support spaces, operations support and mechanical spaces. Over the life of the building no substantial renovations or upgrades have been undertaken.

The building's original design resulted in inefficient spaces that lack flexibility. In fact, the curved design makes virtually all renovation work more costly than otherwise would be the case. This project will provide for a total renovation and upgrade, including new electrical, HVAC and lighting systems, of the existing laboratories and offices and support areas to meet current and future needs.

Architect TBD
General Contractor TBD
Project Status Pre-planning
Statutory Estimate (2002) $75,000,000
Total Funding (as of 9/30/05) $75,000,000
UCONN 2000 Funding (as of 9/30/05) $75,000,000
Other Funds (as of 9/30/05) $0
Actual Expenditures (as of 9/30/05) $17
Completion Date TBD

Medical School Academic Building Renovation
The Academic Building was built in the late 1960's to house the Schools of Medicine and Dental Medicine. The 181,880 square foot facility includes classrooms, laboratory space, lecture halls, bookstore, and academic and administrative support areas for both schools. The Health Center has received bond funds to support only very limited renovations. Additional funds are required to appropriately address building renovation needs. This project will provide for renovations to approximately 60,000 square feet of the existing Academic Building and support facilities. Renovations will focus on lecture halls, classrooms and student support spaces. The lecture halls will be converted from theater seating to tables with computer stations to incorporate information technology into the teaching environment.

This year’s authorization will fund construction activities for the renovation of the teaching auditoria.

Architect Svigals Associates
General Contractor TBD
Project Status Planning
Statutory Estimate (2002) $9,000,000
Total Funding (as of 9/30/05) $9,000,000
Research Tower
This project will provide a new state of the art medical research facility. The facility, approximately 200,000 square feet, will include 30 new research lab modules, lab support space and space for a Nuclear Medicine Research Program. The project also includes provisions for new laboratory equipment to ensure the facility is fully equipped to support the academic mission of the University.

Demand for new and modern laboratory facilities is required to support the dramatic increases in research grant activity at the Health Center. This is demonstrated by the fact that all existing laboratory space in the 196,000 square foot Academic Research Building built in 1999 (the first of two phases as identified by the 1986 Master Plan Study) is completely committed. Additional research laboratory space is essential to continue to expand research activities and secure grant increases.

UCONN 2000 Funding (as of 9/30/05): $60,000,000
Other Funds (as of 9/30/05): $0
Actual Expenditures (as of 9/30/05): $94,675
Completion Date: TBD

OTHER PROJECTS UNDER UCONN 2000 AUTHORITY

Heating Plant Upgrade (Cogeneration Chiller Facility)
The University is currently bringing its new cogeneration plant online. This project is a lynchpin of the University's efforts to maximize energy efficiency. This plant produces both steam and electricity and chilled water for the Storrs campus allowing the plant to utilize energy released during combustion. It includes:

• 24.9 MW electricity capacity from 4 generating units
• 200,000 lbs/hr steam capacity from 3 heat recovery steam generators
• 6,300 tons chilled water capacity from 3 chillers
• direct connection to natural gas transmission line
• campus steam, electric and chilled water metering, and
• a classroom for engineering education

Although not financed by UCONN 2000 funds, the project is treated as a UCONN 2000 project in all other respects because it appears on the statutory project list (Heating Plant Upgrade).
Funding is from a capital lease-purchase arrangement with Caterpillar Financial. The financing is comprised of two parts, with a combined average annual interest rate of 4.5% over 20 years.

Hilltop Dormitory New
The Board of Trustees approved in 2000 the second Supplemental Indenture which authorized the issuance of Special Obligation Bonds (to be paid off by the University) for the construction of the new Hilltop Dormitory as part of the overall strategy for meeting the housing demand on the Storrs campus as enrollments increased. Part of this plan was the construction of suite type dormitory housing at the Hilltop complex. The project created an additional 654 beds in suite-style dormitory housing at the existing Hilltop complex.

The Hilltop site was selected for these dorms for several reasons, most importantly the space available to site the project, and an existing dining facility with the capacity to feed 400 to 500 additional students and community spaces for student activities. $6,323 from the deferred maintenance budget was also allocated to this project.

Hilltop Student Apartments
The Board of Trustees approved in 2000 the second Supplemental Indenture which authorized the issuance of Special Obligation Bonds (to be paid off by the University) for the construction of the Hilltop Student Apartments. An integral part of the University’s housing plan was the construction of this apartment style housing across the street from the Hilltop Dormitories. The facilities consist of 13 residential buildings and a community building with a total of 961 beds. The apartments are rented to University students with one student occupying each bedroom.

Completion Date: August 2001
North Campus Renovation (including North Campus Suites & Apts)
This project covered the construction of suites (486 beds) and apartment style (504 beds) student housing in a complex consisting of seven residential buildings and one community center. The project was funded by special obligation bonds to be repaid from fee revenues. $226,163 from the deferred maintenance budget was also allocated to this budget.

Parking Garage – South
The main campus' parking needs were further addressed by this project, which resulted in a net increase of 1,320 parking spaces at a site next to Gampel Pavilion. The new facility also houses the UConn Co-op. The project was funded by Special Obligation bonds which the University pays off through parking fee and rental revenue.

Towers Renovation (including Greek Housing)

This project was to replace old and non-code-compliant fraternity houses with a new “Greek” housing complex located adjacent to the Towers residences and served by the Towers dining facility. The project includes twelve units in 6 buildings with a free-standing unit for a resident adviser. Housing is provided for more than 300 students. Capstone Building Corporation led the design/build team.

Funding for this component was through special obligation bonds to be repaid from revenue from rents paid by students residing in the facilities.

Gampel Pavilion Seating Expansion
This project provided for the addition of nearly 2,000 seats to the Harry A. Gampel Pavilion in Storrs. Additional seating has helped UConn meet ticket demand, particularly for the men's and women's basketball games. The project was funded through a self-liquidating pre-UCONN 2000 bond.

  Other Funds (as of 9/30/05): $2,500,000
Actual Expenditures (as of 9/30/05): $2,500,000
Completion Date: December 1996
**Precision Manufacturing Enterprise Building**
This project was for the construction of a 2,000 square foot building for fuel cell research at the Mansfield Training School. Space was used to accommodate industrial-type high-bay manufacturing, labs, incubator space, entrepreneurial activities and administrative offices. The project was largely funded by a $2 million U. S. Department of Commerce Grant, augmented by state bond funds and operating dollars.

**Student Recreation Facility Renovation (Field House)**
This project renovated approximately 128,685 square feet in the Green Field House and Guyer Gymnasium, and refurbished the Brunndige Pool. The renovation addressed students’ recreational needs for weight training equipment, mat floor, athletics, racquetball, volleyball, swimming, track and other activities. Locker and shower facilities were upgraded and office, storage and support space were provided. The pre-UCONN 2000 bond authorization was $9.6 million; the remaining funding was from private gifts and operating dollars.
Visitor’s Center/University Programs Building

Occupancy of the University’s new Visitors Center took place in September 2000. This project, funded through a generous gift from alumni Philip and Christine Lodewick, includes a center for visitor tours and information about the University and events. $921,965 from the deferred maintenance budget was also allocated to this project. (Audit review raised concerns about this allocation, and revised policies and procedures for the use of deferred maintenance funds have been put into place.)
Waterbury Campus Relocation

A state general obligation bond funded the construction of a new downtown facility for the Waterbury campus. The relocation from the old Hillside campus was completed upon the opening of the new 105,872 square foot facility in the Fall of 2003. The state bond funds were augmented by private gifts and operating funds.

UCONN 2000: Higher Education Collaborations

*With the Community College System*

The regional campuses have significant partnerships with the community colleges. Stamford has articulation agreements with Norwalk Community College for the BSBT (Bachelor of Science, Business and Technology) and Psychology majors. Avery Point participates with Three Rivers in the Southeastern Connecticut Higher Education Consortium, as does the Greater Hartford campus in the Hartford Consortium of Higher Education. The regional campuses are working to extend the Guaranteed Admission Agreement from Storrs to the regionals, so that community college students could articulate to CLAS majors at the regional campuses as well as at Storrs. The Torrington campus partners with Northwestern Community College in the use of their facilities: some Torrington biology and chemistry laboratory classes are taught at Northwestern teaching laboratories, and Northwestern stores some equipment for its Motorcycle Safety course at the Torrington campus. Capitol Community College has been a tenant at the Avery Point campus.
The School of Business and the College of Liberal Arts and Sciences are pursuing articulation agreements with the community colleges. CLAS has the Guaranteed Admission Agreement which will include all the community colleges over the next few years. The School of Business has finalized agreements with Norwalk and Housatonic and is developing agreements with Asnuntuck, Capital, Naugatuck Valley, Northwestern, Middlesex, and Tunxis.

The School of Nursing participates in the Nursing Pathways Collaborative with Naugatuck Valley Community College and Western Connecticut State University to provide seamless education to Registered Nurses with associate degrees who wish to complete a Bachelor of Science at WCSU and a Master’s degree in nursing at UConn.

The College of Agriculture and Natural Resources (CANR) participates in the CT Tech Prep program which is coordinated by the Connecticut Community College System. In addition, CANR provides information and guidance to students at Manchester Community College and Northwestern Community College interested in transferring to UConn. In conjunction with Gateway Community College, CANR offers the Physical Activity and Nutrition for Youth programs. CANR collaborates with Manchester, Quinebaug Valley, and Three Rivers Community Colleges on the STRONG-CT (Science and Technology Expansion Program). As part of the turf program, CANR offered two classes at Three Rivers Community College in the Fall of 2005, as well as speakers and presentations at Naugatuck Valley Community-Technical College, Tunxis Community College, and Three Rivers Community College. CANR recently received a $1.5 million National Science Foundation grant in conjunction with Manchester Community College, Quinebaug Valley Community College, and Three Rivers Community College to help prepare minority students to receive a bachelor’s degree in the sciences.

With the Connecticut State University (CSU)

The College of Agriculture and Natural Resources (CANR) participates in the Environmental Impacts of Aquaculture Extension Program with Central Connecticut State University; in the Family and Youth Communities Program with Eastern Connecticut State University; and in Youth United, a youth leadership program, with Western Connecticut State University. With ECSU (and Yale University), CANR provides educational materials on promoting healthy eating and physical activity. Also with ECSU, CANR participates in the Ragged Hill Woods program, including classroom presentations in area schools. For the past five years, CANR has provided a lecture on food safety for a summer nutrition institute at Southern Connecticut State University.

The School of Nursing participates in the Nursing Pathways Collaborative with Naugatuck Valley Community College and Western Connecticut State University to provide seamless education to RNs with associate degrees who wish to complete a BS at WCSU and a Master’s in nursing at UConn.

With Independent Colleges and Universities

The College of Agriculture and Natural Resources (CANR) participates in forestry and wildlife projects with Connecticut College, with the Chronic Disease Extension Initiative with St Joseph College, and with the Redesign Project for Unionville Village in Farmington with Yale University.
CANR researchers collaborate with researchers at Yale, Connecticut College, Wesleyan, the University of New Haven, and St. Joseph College on projects that include graduate student education, healthy eating, plant production, studies of the loss of agricultural lands, sea grant initiatives, lobster research, tidal marshes, and seaweed. The College of Continuing Studies offers a Mediation Certificate in conjunction with Quinnipiac Law School.

Additional Collaborations

The University Libraries participate in interlibrary loan services and works collaboratively with other higher education institutions’ libraries, faculty, staff, and students.

The Greater Hartford Campus and the Storrs campus partner with the UConn Health Center, Central Connecticut State College, and Wesleyan University in the Health Professionals Partnership Initiative (HPPI). HPPI provides access and preparation for students interested in health professions who come from backgrounds where they are the first in their family to earn a four-year degree, come from modest family means, and/or are from backgrounds traditionally underrepresented in healthcare. Jumpstart has two components: a six-week summer program and a twelve-week academic year program.

In addition, the Health Center and the Storrs-based program participate in the Biomedical Engineering Alliance & Consortium (BEACON), a collaborative which includes Trinity College, the University of Hartford, Drexel University, Springfield Technical Community College, Asnuntuck Community College, and a number of area hospitals.

With regard to operational matters, the University is a member of the Connecticut Colleges Purchasing Group, a purchasing consortium of colleges and universities statewide. Many of the large dollar volume contracts used by fellow members of the Connecticut Colleges Purchasing Group are UConn contracts; the University takes every opportunity to share its buying power with other institutions for the combined benefit of all.
UCONN 2000 IN CYBERSPACE

Information about UCONN 2000 is available on the World Wide Web via the UCONN 2000 homepage. The address is: www.uc2000.uconn.edu/

The website contains all previous legislative updates to the Governor and the General Assembly, the four year progress report, the original UCONN 2000 proposal and UCONN 2000 project updates from the homepages of the University’s Facilities Management Department.
