With the advent of the summer vacation come the inevitable examinations. It is at this season that the probability of passing or flunking exams appears to be the prevailing topic of thought and discussion. The average student appears to contemplate two certainties—examinations and death; and occasionally they occur simultaneously.

Those, however, who have conscientiously and diligently prepared each day's work need have no apprehension for either death or failure.

With this issue The Lookout will have concluded its sixteenth year of existence and the last hour of seven of the old board is shining on the dial. To those men who have taken upon their shoulders the responsibility of publishing The Lookout during the next year we extend a hearty welcome.

We realize fully the difficulties that will confront the new board in editing this publication. And conspicuous among these is the task of preventing narrowness to creep into it, and of exercising judicious care in respect to much of what may occur to the exalted few in the way of crankisms. Such a paper as ours will continue to receive a great heap of inane rubbish, important in the eyes of the writer alone, yet he will often tear his hair if his dream is not seen by the censors as he sees it.

Regardless of any preconceived ideas, regardless of policy, regardless of any possible consideration other than truth, we trust that the new board will fully express their minds in connection with all interests of the College.

In this measure at least the retiring board will continue to expect to see progress and wider usefulness of our beloved paper.

It is recognized by each Lookout board before they complete their work that the wagon to which they are harnessed must be
drawn almost wholly by them. In our experience, boosters are few. But when the load gets heavy, remember that a pessimist seldom wins; but that an optimist seldom loses.

The new Lookout Board has been elected and consists of the following: G. W. Zucker, J. B. Healey, R. C. Avery, F. J. Wolver-son, J. Millar, N. A. Lazarus, G. A. Root, Miss A. O. Dunham. The duties of the respective members of the board have not yet been assigned.

Mr. G. W. Zucker was elected editor-in-chief of The Lookout Board for the year of 1911-1912, and R. H. Barnard was appointed manager, at a meeting of the new board held on Monday, June 5th.

We note with satisfaction the fact that Rev. Harris E. Starr has received and accepted a call to the pastorate of the Pilgrim Church in New Haven; for Storrs, too, has a place in his life and work, and retains an affectionate interest in his welfare. We are in full accord with the opinion of the New Haven Register in its estimate of his ability and fitness to meet abundantly the requirements of the important place he is called upon to fill, and that the Pilgrim Church is fortunate in securing this pastor.

We, however, find our interest in the person and character of the pastor, rather than in the church to which he is called, and we are sure that all Storrs men will join The Lookout in wishing him a long, successful, and happy pastorate.

We quote an editorial article from the New Haven Register, feeling sure that it will interest the readers of The Lookout:

"Congratulations to Pilgrim Church.—The committee and people of Pilgrim Church, it is obvious, have deliberated wisely on the problem of a successor to Rev. Robert E. Brown. The proof is in the announcement, just made, that Rev. Harris E. Starr, of Mount Carmel, has accepted the call which the Church recently extended to him to become its pastor.

New Haven has had occasional limited opportunities to know Mr. Starr, who has for the past five years been a neighbor in Mount Carmel. He has in that time given frequent evidence of his attention to New Haven and his interest in New Haven affairs. He will come here as no stranger, for he has many friends in the city. Of these not a few appreciate how sincerely Pilgrim Church is to be congratulated on securing him. He is a man of excellent ability, sound and broad scholarship, admirable personality. He will continue in his own way, yet in manner not seriously contrasting with
his predecessor, the growing work of Pilgrim Church. He has depths of reserve power as yet unsuspected, save by those who have been very closely in touch with him.

Though Pilgrim Church is beyond the river, and in times past somewhat disassociated from the life of the city, New Haven has abundant reason to be interested in the prospect of Mr. Starr's coming. He will not fail to take an active part, so far as that true loyalty which he will not fail to hold for his church will permit him, in the community life of New Haven. He will exert his power with the common good, and will always be found pulling effectively, and in the right direction. He will be welcomed and appreciated."

\[\text{\textcopyright 1920, The Lookout}\]

The White Duck Hop, held in the New Mechanic Arts Building on the evening of May 29th, was a big success. The good ventilation and large floor space were greatly appreciated by all present who had experienced the close, cramped conditions in the chapel. The committee of arrangements, consisting of Messrs. E. J. Renehan, L. B. Reed, E. L. Deming, M. V. Zappe and R. E. Tomlinson, is to be congratulated upon the appearance of the hall and the arrangement of the programme.

\[\text{\textcopyright 1920, The Lookout}\]

Dannie Williams to Inouye—"Did you hear me wake up this morning?"

Inouye—With his usual keeness perception, "Yes, I heard you but I forgot to wake up."

On the evening of May 25th a lecture was given in the chapel by Professor Bradley, of Wesleyan University. The subject, Liquid Air, was presented in a most interesting and instructive way. The demonstrations were of such a nature as to make everyone sit up
and take notice, for magic and science appeared to have met, and under the spell of liquid air, things were no longer what they seemed. The possibilities of its use as a motive and as an explosive were also shown. It is to be hoped that Professor Bradley will be able to give us another such lecture during the coming year.

We are glad to hear good reports from the Gilbert farm in regard to Mr. Selden, who recently left College to accept the position of herdsman there.

The College Glee Club and Orchestra made a creditable showing at the concert which they gave on Saturday evening, May 27th. The selections were very attractive and well chosen. Miss L. E. Berry, who has had charge of the musical department for the past year, may well be pleased with the results of her conscientious work.

Mrs. Beach entertained the young ladies of Grove Cottage at her home, Wednesday afternoon, May 24th, from four to six.

The Glee Club spent a very pleasant evening at the home of President and Mrs. Beach, Friday, May 19th.

One of the most exciting events of the past month was the mysterious disappearance of a pan of candy from Grove Cottage in the process of cooling, and in spite of the close watch kept by its owners. Those wanting further information may call at Room 10, Grove Cottage.

The Beta Gamma Kappa entertained the inmates of Grove Cottage and several outside guests, Thursday evening, May 18th, in the club parlor.

Intercollegiate Notes

A new society has been organized at the College of Emporia. Only those who have been dishonorably dismissed from other societies are eligible to membership.

Lack of funds at the University of Wisconsin may cause a discontinuance of intercollegiate debating.

One thousand four hundred eighty-two periodical publications are regularly received by the libraries of Michigan.

Violators of the university rules of the Wisconsin University are tried by a student court composed of six seniors and nine juniors.
Alumni Notes

On account of the lengthening of the course of study there will be no graduating class this year and therefore no Commencement Day Exercises, but in response to a request that an Alumni Day be arranged for and in the belief that many of the Alumni will welcome an opportunity again to spend a day at the College, the Alumni officers have arranged for Tuesday, June 13th, as Alumni Day, and hereby invite your attendance at that time.

The following days have been given over to various events and festivities. On Monday the 12th, an open-air play will be given under the direction of Miss Rogers, the elocution teacher. All Alumni are welcome.

The Alumni dinner will be held on Tuesday, June 13th, and several interesting speakers have been secured, including a girl graduate. At four P. M. on the same day, the business meeting of the association will be held. In the evening the Alumni dance will be held in the new dining hall. We hope to duplicate the good time which every one seemed to have at the White Duck Hop.

On Wednesday, June 14th, a ball game has been arranged between the Alumni and the 'Varsity. This game always promotes a good deal of interest and this year no doubt the Alumni team has an excellent chance to win.

In the evening, the Club banquets are to be held at Hartford, and it behooves every Alumnus to attend his respective Fraternity banquet if possible.

In response to circulars sent out on the Hawley portrait, a considerable number of pledges and payments have been made. To date the following Alumni have responded: C. S. Francis, J. W. Pincus, Clinton T. Smith, C. S. Chapman, R. J. Averill, H. G. Manchester, A. J. Pierpont, M. E. Pierpont, H. L. Garrigus, C. A. Wheeler, E. C. Weldon, S. B. Hollister, Earl Bemis, W. W. James,
F. R. Comber, G. W. Simon, E. F. Weed, Charles Pierpont, Mark Bishop, E. T. Beard, F. A. Miller, I. E. Gilbert, T. H. Desmond, Merrill E. Brown, and James B. Ashcraft. About one-half of the amount needed is now in sight. The contributors have subscribed liberally, but there is need of a much larger number taking part. The Alumni are urged not to overlook the matter, but to return subscriptions and pledges at once to the Treasurer of the Alumni Association.

'85. A son was recently born to Mr. and Mrs. Archer C. Ford, of Grant's Pass, Oregon.

'88. C. H. Savage has purchased several daughters of Lady Lity's Victor and is starting with pure-bred Jerseys.

'98. H. L. Garrigus judged at the sheep sheering contest of the Connecticut Sheep Breeder's Association at Ellington, May 11th.

'01. Dr. W. W. Dimmock, of Ames, Iowa, will spend his vacation this summer at the home of his parents at Merrow, Conn.

'02. Mr. A. B. Clark wishes to have his engagement to the best girl in the world announced through these columns. "Abe" does not divulge the name of the lucky lass, but we are patiently awaiting further reports.

Ex. '05. Frank S. Koons spent a few days, including Memorial Day, on the hill, and attended the White Duck Hop.

'03. Wilbur F. Stocking, at present Forester for the Bridgeport Hydraulic Company, is the proud possessor of a small Stocking.

'05. S. P. Hollister, horticulturist at the Hampton Institute, Va., is making a northern visit.

'07. Edward J. Buchtenkirch has started a floral establishment of his own at Glen Cove, L. I.

'07. Roger Sperry is working as a nurseryman in New Canaan, Conn.

'07. Wallace Lynch spent a few days, including Memorial Day, at the College. While here he attended the White Duck Hop.

'09. J. H. Conzelman, at present pitching for Brown, tied the world's record for strike-outs during a nine inning game. He struck out twenty-one men in the game with Columbia on May 20th, and on the following day struck out fifteen during eight innings against Yale, and permitting only one scratch hit.

'09. W. O. Hollister left on June 1st to accept a position with the Parke, Davis Co., Detroit, Mich. Mr. Hollister will be in the
Miss Mamie Costello has won a scholarship offered by the State Board of Education for efficiency in rural school teaching. It provides funds for a two-year course in a State Normal School. Miss Costello intends to enter the Willimantic Normal School next fall.

Wayne Storrs recently purchased an automobile, and is doing a brisk business conveying people from Storrs to Willimantic and neighboring towns.

Lewis W. Rich is at present on a farm in North Salem, N. Y.

Erwin H. Forbush attended the White Duck Hop on May 29th. Mr. Forbush is assistant editor of the Connecticut Farmer, the office of which is situated in New Haven.

The goal of the year's military work was reached on Tuesday, May 16th, when the cadet battalion was inspected by Captain B. T. Simmons, General Staff Corps, U. S. A. The drill lasted about an hour and a half. Almost perfect unison and precision were features of the work. As the battalion swept by the reviewing officer, at double time, it was observed that the lines were perfectly straight. Throughout the entire drill the results of Lieutenant Churchill's untiring efforts to build up a creditable battalion could easily be discerned. Beyond a doubt this year's military work has reached a higher degree of perfection than that of any previous year in the history of the College.

On Memorial Day the usual ceremonies were observed. An impressive address was delivered by our new Chaplain, Rev. L. C. Rogers. After rendering the customary honors to the dead, a brief drill was given, and the officers for next year were announced by Adjutant Downs. The list is as follows:

- C. T. Senay, Capt., Co. A.
- J. F. Ketcham, Capt., Co. B.
- J. B. Healey, 1st Lieut. and Adj.
- J. A. Geehan, 1st Lieut., Co. A.

- W. S. Ford, 1st Lieut. and Quartermaster.
- R. A. Storrs, 1st Lieut., Co. B.
- G. H. Harvey, 2nd Lieut., Co. B.
Dairy Department.

Two Jersey cows have recently qualified for the Registry of Merit. They are Copper Butterfly, #187093, with 9,983 lbs. of milk and 527 lbs. of butter fat, and Copper Robin Butterfly, #187092, with 9,623 lbs. of milk and 490 lbs. of butter fat.

A Jersey bull calf has been added to the herd. He was secured from the herd owned by the Pratt estate at Glencove, Long Island. E. H. Waite, a graduate of the class of 1896, who has charge of the herd, reports that this youngster is exceptionally well-bred.

A Reid pasteurizer was recently purchased for the creamery. This is a much needed addition, as a large amount of the cream received contains many undesirable germs. When the cream is pasteurized all of these will be destroyed and the cream will then be ripened by the use of pure culture starters. By this method a much higher grade of butter will be manufactured.

Horticultural Department.

A large force of men is working on the road that runs past the new cottages. It is being extended in order to make the cottages more accessible and will meet the main road at a point immediately north of the Snow field.

The grading of the new cottages is rapidly nearing completion and will greatly enhance the landscape beauty of that part of the campus.

Where once the ugly horse barn reared its unsightly form near
Horticultural Hall, a beautiful plantation will soon appear. The old cellar has been filled at a cost of several hundred dollars and is now ready for planting.

Of late the ripening papaw trees in the greenhouse have attracted considerable attention. Finally, when they were fully matured, many were given the opportunity of enjoying this luscious fruit for the first time.

The blossoming season for all fruit trees has been very favorable this year in the vicinity of Storrs. Although it is not expected that the College orchard will produce as great a quantity of apples as they did last year, yet it is certain that a greater number of varieties will be represented.

FARM DEPARTMENT NOTES.

The Farm Department has cleared about ten acres of new land this spring, and will have it planted to corn by the end of May. Four acres of this land are on the east hill, extending north from the present cultivated tract. The remaining six acres are on the adjoining Green farm.

A new wall is being built around the old cemetery. There has been a bad custom of saving time by crossing the ancient graves, but the improvement should forevermore prevent the sacrilege.

One of the Percherons has a promising foal—a filly.

The Jack has finally given up the ghost. He caused considerable annoyance to various members of the community, but his loss is much deplored.

EXPERIMENT STATION.

Bulletin No. 60 entitled “Bacillary White Diarrhea of Young Chicks,” by Dr. Rettger and Prof. Stoneburn, and recently issued by the Experiment Station, is of vital interest to all energetic poultrymen. The authors of the bulletin have worked for several years to discover the cause, and if possible, the remedy for this disease. The results of their experiments have been gratifying. They have clearly demonstrated the cause of this dreaded scourge. The disease was traced back through the young chicks and embryos of varying ages until the source was found to be in the hen. It is a common occurrence for poultrymen to have an epidemic of this disease in which they lose from 10% to 90% of their season’s hatch. It, therefore, can be easily seen that knowledge of the subject will be eagerly sought.
The United States Reclamation Service

Of all the public works undertaken by the United States during the last decade, there is probably none of more fascinating interest, and of greater importance to future generations than the reclamation of the vast arid and semi-arid lands of the West.

President Theodore Roosevelt was the first executive to realize that the barren and valueless deserts of the western states needed only the magic touch of water to be transformed into regions of wonderful fertility. Through his active and untiring agency, the Government decided to apply its resources to the problem, and in 1902 Congress created a bureau in the Department of the Interior known as the Reclamation Service, which was charged with the enormous task of making fruitful and habitable, 30,000,000 acres of waste land.

A law was enacted by Congress which provided that the money received from the sale of public lands in the thirteen western states and three territories should be set aside as a reclamation fund to be used in surveying, constructing and maintaining the huge reservoirs, dams, tunnels and irrigation canals that were essential in reclaiming the arid regions and restoring to the people the heritage which they had received from their forefathers.

During the nine years which have elapsed since the organization of the reclamation service, 2,000,000 acres have been reclaimed in sixteen western states and territories at a cost of $70,000,000. The work already accomplished represents merely the beginning of the vast enterprise which contemplates the recovery of 30,000,000 acres of non-productive land.

The 2,000,000 acres that have been reclaimed, which a few years ago formed parts of dry and tractless deserts, are now supporting 21,000 people on farms whose fertility is astonishing.

Not only do the reservoirs, dams and canals irrigate the land, but their storage capacity is so immense that they are capable of holding in check the annual spring floods of the respective rivers on which they are located, thus eliminating the vast losses of property and life that have occurred so frequently in the past. The dam situated on the North Platte river is noted for its beneficial effect in curbing the antics of that river, which, it has been estimated, did at least $1,000,000 damage each year.

Unlike all other operations of the Government, the money invested in this vast public work is returned to the treasury to be used over and over again. Nothing is given away except the land, which unless reclaimed has little or no value. The reclaimed land is divided
into tracts of from 40 to 160 acres and disposed of under the rules of the Homestead Act, which requires actual cultivation for a period of five years. The Government requires that a settler, however, pay for the outlay made in the reclamation of his land, and this payment is made in ten annual installments. The money received is returned to the Reclamation Fund to be used for the maintenance and improvement of works, and the building of dams and reservoirs in other sections.

The Government receives no profits, its benefits being indirectly derived from the creation of agricultural communities and towns upon the reclaimed lands. It furnishes opportunities for the development of forests, grazing and agricultural wealth, and is exerting a beneficial influence upon the manufacturing and transportation interests of the country. It is proving to be moreover a happy solution of the problem which has caused economists and scientists so much agitation; that of the alarming decrease in food production in proportion to the steadily increasing population.

The Reclamation Service is adding millions of acres of highly productive soil to the wealth of the nation; soil not won by foreign conquest, but by subduing and regulating the waste waters.

ATHLETIC NOTES

TENNIS.

Our tennis team was defeated by the Mass. Aggies on their home courts by a score of 5-1. Capt. Eaton, owing to a sprained ankle, was unable to play singles, but Amrheim, who substituted, played a strong game, although defeated. Deming played the best game for the home team defeating Roberts two out of three sets.

On May 13th, Williston Seminary suffered defeat at the hands of
our tennis team by the score of 5-1. The playing of Deming and Amrheim was especially brilliant.

Singles:
Zellar defeated Capt. Hubbard ...................... 6-1 6-0
Deming " Roberts .................................... 6-3 6-4
Penny " Mason .......................................... 6-2 6-4
Amrheim " Thompson .................................... 6-2 6-0

Doubles:
Capt. Eaton and Deming defeated Thompson and Roberts, 6-4, 6-0. Zellar and Mason defeated Penny and Hubbard, 6-2, 7-5.

Connecticut lost its first game on the northern trip to Dartmouth College by the score of 6-0. The best and closest set was in the singles between Capt. Eaton of Connecticut and his brother of Dartmouth. The visit to Dartmouth was an enjoyable one and will be long remembered.

Tufts College defaulted the tournament of May 29th to Connecticut, owing to the fact that they were unable to keep the date.

The Auburndale County Club and our team played a tie game on May 20th. The tournament was played on the Lasell Seminary Courts and was witnessed by a large crowd. The best match of the afternoon was one played between Deming and W. C. Eaton, a brother of "Choate".

Dr. Godfrey defeated E. C. Eaton ............... 6-1 6-4
Deming " W. C. Eaton ............................. 6-4 5-7 7-5
Capt. Lisbe " Zellar ............................... 6-0 6-3
Mason " Ryder ...................................... 5-7 6-4 6-3

Godfrey and Lisbe defeated Capt. Eaton and Deming, 6-0, 6-3. Zellar and Mason defeated W. C. Eaton and Ryder, 6-1, 6-1.

Springfield Training School defeated Connecticut 5-1 at Storrs. Capt. Eaton and Deming starred in doubles. The games went to deuce many times but our men were slightly out of form.

BASEBALL.

On May 9th the baseball team left for a trip through Vermont, New Hampshire, and Massachusetts. The first game was played with Norwich University and the Vermont sluggers won for a second time. On May 11 we lost to St Anselm's College, and left directly after the game for Durham, New Hampshire. The following morn-
ing we played the New Hampshire boys and lost, which result was due to one-sided umpiring.

The scores for the trip were as follows:

Norwich University .................11-0
St. Anselm's College ...............21-0
New Hampshire State .............. 9-6

The trip was one to be remembered by all the team, to personal experiences as well as failure to meet with victory.

The team played Boston College on May 20 and lost 11-1.
On May 27th the team journeyed to Monson, Mass., and played Monson Academy, losing 4-1.

They concluded the season with a clear record of non-victorious games. Lautenberger has been pitching good ball and helped to fill the box in good style. The team has had the hardest schedule in years and would no doubt have concluded with better results had we had the team of '09. Let us all hope for the best for next year. The team needs good men, and by speaking a good word for the college we may get a few good athletes to do honor for C. A. C.

BIG GAME OF THE SEASON.

Wooden Nutmegs vs. Out-of-State.

The game was played on Inspection Day, May 16th, at 2 o'clock, and lasted for about three hours. The Nutmeggers thought that they had the game all their own way, but the comeback of the Outlaws surprised them exceedingly. In the ninth inning the score was 9-9, but the Nutmegs won out in the tenth by the score of 12 to 11.

A Short Course at Storrs

The first impression of Storrs in February was one of pleasure in rediscovering winter. A long succession of city winters had dulled the memory of clean snow and the sparkle of air free from smoke and dust. Breakfast at seven in the morning had seemed Spartan in the anticipation; but that morning walk to the dining hall is one of the pleasant memories of Storrs.

Here, set among the Connecticut hills, is a truly American college, where theory and practice, ideals and deeds go hand in hand;
and where everybody believes in education, even though not agreeing as to what education may be.

No one could be pessimistic about America in the midst of such a sturdy group of students. A member of the classes in a short course can only partially know the place. But with such a group of trained instructors closely in touch with the students, as is possible only in the smaller college, no one can doubt the strength of the influence upon the State. Storrs is alive and growing. One carries away a strong impression of sincere work that will tell; of a kindly atmosphere in which good things must grow; and a feeling that one must go back again for more of the same sort. It is a place that makes for democracy and progress.

Miss Kinne.

This is an adventure of my uncle, George Boswell, who was gold prospector in the early days of California. He left his home, en route for California in the year 1849—the year of the gold strike. Accompanied by his elder brother, Lewis, he remained in the West until 1859—the year of the discovery of the Golden Eye—when they returned home enormously rich.

After many hardships, they at last reached their destination. They separated, George going south and Lewis north. The former had good luck for about two years during which time he amassed quite a pile. But after this lucky streak, he was not so fortunate. However, his pile enabled him to keep up prospecting for eight years more. His money was nearly gone in the spring of 1850, and he was in doubt as to what to do. He thought at first of returning home but at last changed his mind. At this time he was working in the southern part of the State near the cañon of the Colorado river. No one had ever fully explored this region, so he resolved to strike out alone toward the cañon to see what he could find.

One night he had a terrible dream; he dreamed that he was going down a perilous path on the cañon wall and that far below was the roaring river. The path seemed to grow steeper and steeper, and the mules stumbled several times. At last he found that the path led him to a ruined cliff dwelling in a niche in the cañon wall. Much surprised he started about to explore. He found his way into a large room which appeared to be a council chamber or something of the sort. He groped forward a step or two and then there burst out shining in the wall ahead a great yellow Eye which seemed to stare him through and through. He awoke with a cry. He thought little of this dream, and when day came, he went about his work prospecting as usual. That night, however, he dreamed the same dream again; and the next night again. On the day following the third appearance of the Eye in his dream he started out as usual, skirting the cañon wall. He went along until nearly 11 o'clock in the morning, when the sun began to be very hot, causing him to take shelter with his mules under the shadow of a huge rock. Falling asleep, the vision appeared to him again, and on awaking he was struck with the resemblance of the place to the scene of his dream. Hunting around he found a narrow path, and saddling one of the mules, of which he had eight, he started down the path. Down, down, down went the path, overhanging the water far below, until at last rounding a sharp turn my uncle saw before him the ruined dwelling of the dream. He searched out the large chamber and rushed in. Before him was the great yellow Eye. Running up to it
he chipped a piece out with his knife and took it into the sunlight for examination. It was pure gold. He loaded all his mules down with this precious ore and by good luck found his way unmolested to civilization.

He divided his fortune with his brother Lewis, who had been less fortunate in the north, and they returned back to Connecticut enormously rich.

Wheeler. (Signed) M. A. WADHAMS, Business Manager.

HAVE YOU EVER TRAVELLED FOR BUSINESS OR PLEASURE?

WHY NOT COMBINE THE TWO?

Our proposition assures your expenses and you can make a considerable sum for next college year. The work is the most valuable training a young man could have. Physicians are the best class of men to do business with and are accustomed to buying from salesmen.

Later on you will be tied down by your chosen occupation. A season on the road will be something pleasant to look back on. There is nothing that broadens the young man and puts an edge on a keen mind like road work.

Write us for details.

We carry the largest Stock of everything needed in a Laboratory.
IF BACTERIA WERE AS EASILY SEEN AS GNATS.

If bacteria were as easily seen as gnats no one would need to tell you how much superior

WYANDOTTE DAIRYMAN'S CLEANER AND CLEANSER

was to other washing materials. But because bacteria cannot be seen by the unaided eye, and because you have always believed things to be clean that looked clean, you do not appreciate how Wyandotte Dairyman's Cleaner and Cleanser does an immense amount of cleaning that you are apt to overlook.

To every dairyman, be he the owner of one cow, or the owner of many, a dairy cleaner is a necessity and it should be one that will not only remove the dirt and objectionable matter that can be seen, but the invisible bacteria as well.

Ask your dealer for a small sack or order a barrel or keg from your dairy supply house. Give it a trial and know for yourself how well it does what you want done.

The J. B. Ford Company, Sole Mfrs., Wyandotte, Mich., U. S. A.

This Cleaner has been awarded the highest prize wherever exhibited.

There is no need of taking a chance on your next wagon. You will be sure to get a good wagon if it bears the I H C trade mark. It is the seal of excellence—the guarantee of quality—it stands for an established reputation—and utmost wagon value. It is your assurance of getting a good wagon—one that will be a source of pride and profit—one that will give you excellent service for years to come. Choose any one of these—

**Weber**

New Bettendorf

Columbus

Steel King

Look these wagons over carefully. They are built to meet every condition—to fill every requirement—and whether you buy a Weber, Columbus, New Bettendorf, or Steel King, you will get the same satisfactory service.

Only the toughest, most carefully selected, air dried and perfectly seasoned wood is used in the Weber construction. Weber wagon boxes and gears are protected by paint and varnish of the best quality, applied by workmen who have made wagon painting a life-long study. For 66 years the Weber wagon has been king of the wagon world.

Columbus wagons are favorites with exacting farmers. The gears are made of selected oak and hickory, strongly ironed. The wheels have oak rims and oak and hickory spokes. The wheel is properly tired and banded. Superior workmanship and high-class material, assures the durability and light-running qualities which characterize every Columbus wagon.

The New Bettendorf has given general satisfaction because it has exceptional strength, light-running qualities, and is very durable. It has a one-piece tubular steel axle, and the wheels are the same quality as those used on the Weber.

The Steel King is a new I H C wagon and it is up to the I H C standard. It is the only steel gear wagon on the market having an axle and skein with internal reinforcements and a bolster having an adjustable stake.

Visit the International local dealer and let him point out the many features and advantages of wagons bearing the I H C trade mark. Get booklets and all information from him, or if you prefer, write direct for the information you desire.
