Alumni Notes.

C. E. Lawton, '12, is doing advanced registry work for the Experiment Station.

M. R. Young, '15, has accepted the position as official tester of the Connecticut Herb Improvement Association No. 1, of Hartford County, made vacant by the resignation of R. W. Whitham, '12.

Sol Sherman, '15, has charge of the Greenhouses at Prospect Park, New York City.

E. H. Geer, Jr., '15, was a recent visitor at the college.

A letter recently received from Dr. Blakelesser tells us that at a convention of biologists held at Columbus, Ohio, where he lectured on "Illustrative Material in the Teaching of Genetics," many photos of his first class in genetics here were shown as well as views of the Botanical Gardens. Dr. Blakelesser and Mr. Shultz, '13, are doing research work at the Carnegie Institute, Cold Spring Harbor, L. I.

Lawrence Edwin Rutan, '13, was married to Miss Florence Hughson on November 27.

Arthur N. MacQuivey, Jr., '15, was a recent visitor at the college.

Joseph Linehan was a visitor at the college on December 16. Linehan is a professional poultryman.

R. M. B. Starr stopped on his way home from Michigan Agricultural College to see the boys, just before Christmas.

Edward Tjarks is now one of the head bacteriologists for the Borden Milk Company.

Alvan W. Howard is bacteriologist with Hood & Sons, Boston, Mass.

Connecticut Beasts Trinity Independents.

In an interesting though rather slow game our team scored a victory in the Hawley Armory over a picked team from Trinity, December 18. Our five did not show the usual form until the second half, but then let loose and scored many baskets. The teams were about even in the first half and so the game was very exciting and the many spectators showed their enthusiasm throughout the game. Davis and Norton played especially well for the home team, while Moran and Wooley did the honors for Trinity.

The line-up:

Connecticut
Shea LF Viner, Ferris
Dickinson RF Moran
Norton C Reiner
Davis LG Tiger
Barlow RG Wooley

Trinity Independents
Referee, Reed; goals, Shea 5, Dickinson 2, Norton 2, Davis 1, Moran 3, Wooley 2; fouls, Shea 2, Dickinson 4, Wooley 4; score, Connecticut 26, Trinity Independents 14.

In a very strenuous game the fast Springfield team overwhelmed our team to the tune of 46 to 16 at Springfield, December 15. The crack Y. M. C. A. team showed all kinds of form and their passing and shooting was so very excellent that our team did well in holding them to the score as it was. The Springfield team got a lead from the start, and after a safe margin was obtained, many substitutes were used, more room was played as well as the regulars. Shea had the pleasure of playing against his former team-mate, Taylor, who is now on the 'variety squad' at Springfield.

The line-up:

Connecticut Springfield Y. M. C. A.
Dickinson LF G. Whalen, Newell
Shea, Hopwood RF Sorg, Brown
Taylor Davis C. Souder, Shea, Ellis
Norton G. Evans, Begler
Barlow, Murdoch RG Herlem, Senner
Referee, Aspinwall.

In the closest game of the season our team lost to New Hampshire State in Hawley Armory, January 7, to the score of 25 to 23. Both teams started off with the determination to win and played an open passing game, with New Hampshire on the defensive. The teams were evenly matched and the score at the end of the first half was a tie, indicating the closeness of the game, although both teams shot poorly. At the beginning of the second half, (Continued on page 2.)

Campus Notes.

Gymnasium suits are sold to the students at the Agricultural College for $2.15. This shows that a cooperative store can do, when we think that the Freshmen had to pay $3.00 for their last year. Perhaps a purchasing agent is needed after all.

The old wind-mill and water-tank which have stood since 1905, have been taken down for removal.

The Dramatic Club has scheduled its regular rehearsal nights for Wednesday and Thursday. Other organizations are urged to bear this in mind when calling meetings.

Visitors to the greenhouses have been interested in the poinsettias, bird of paradise flower and pineapple. A fine large addition has been placed on the rear of the Stock Barn at the Jacobson place. It will be used as quarters for the sheep and is thoroughly up-to-date in design and equipment.

The poultry judging team which journeyed to New York during the Christmas vacation to take part in the Intercollegiate Contest consisted of: Dooley, '16, and Shepherd, '17. The team was placed fourth and Weddich was fourth among the individuals.

By a strange coincidence the corn judging team sent to Boston by the Agricultural Club came out with exactly the same results. Kilbride, '17, was individual who placed fourth, Sheldon and Lawrence, '17, were his associates.

The advent of the "short-horns" occurred not without usual ceremonies. Tickets to the standpipe, pins, banners, calendars and all sorts of sub-scription lists were showered upon the "whets" in such bewildering confusion that several became stage-struck and beat it for the huckleberry bushes without trying to learn "farming" as it might be.

Grip has invaded the college community with the return of the boys from their vacation, and the number of sick is considerable.

Washington's Birthday and the at- tempted week-end promises to be of great interest, as Alumni Day, the Military Ball and a play by the Dramatic Club are scheduled for those few days.

In the Inter-Preparatory Bowling Con- test the College Shakespearean Club carried off the cup offered the winner. A league to include all the Frats, the Independents and the Faculty will be formed later in the winter.

It has been unofficially stated that L. H. Bailey, Dean Emeritus of the New York State College of Agriculture, will deliver the Commencement Oration this June. Mr. Bailey was instrumental in securing Mr. Bailey.

The indoor rifle range at the armory has been completed and attracts many of the rifle club men every evening.

“The College.”

SONG OF CHEER.

This year, as no hand-book of the college has been issued, the Campus will print songs and other data of the student-body which will be of interest. The first of the series will be the song below which has not been sung within the last few years. The tune is that of “Let the Lower Lights be Burning,” and is familiar to all. Let us learn it and sing it at the next Students Organization or Athletic Association Meeting.

1—On this far-famed field of battle,
Many a conflict time has been,
Here our chosen, bravely, ever,
Strive to keep our laurels green.

Chorus:
Cheer them on, our boys forever,
Champions of the white and blue;
Loyal ever be our watch-word,
C. A. C., Oh, here’s to you.

2—To the College that we cherish,
May your valor bring renown;
By your strength and dauntless
Win her many a victor crown.

Chorus:

3—Onward, then, let no man falter,
Nobly set your glorious part,
For the Aggies and our honor,
We are with you, mind and heart.

Chorus:

4—Out upon the world’s arena,
Confidence deep be your yield;
Springing from these days of trial,
On this fair old College field—Chorus.

CONNECTICUT BEATS TRINITY INDEPENDENTS.
(Continued from page 1.)

In the New Hampshire town the offensive and secured a lead which they never lost to the end. Norton and Davis starred for Connecticut, who played a good game for New Hampshire.

The Line-Up:

Connecticut
Dickinson RF Sanborn LF
Norton C Steele SF
Davis Bissell LG Brown
Score—goals: Shea 3, Norton 4, Davis 1, Sanborn 2, Prentiss 4, Stee’s 3, Bissell 2; fouls: Dickinson 3, Bissell 3; referee, Aspinwall.

“What of the Business Training of Agricultural College Students?”
(Continued from page 1.)

desire to be misunderstood, for I am a democrat from the ground up, but I do believe that the majority of people judge us largely by our appearance, and they therefore look down upon us as it were, and to those of us who are at all sensitive, this is very unpleasant and humiliating. Personally I always feel more capable and better able to meet and interview people when in a well appointed office, feeling and knowing that I am every bit as neat and clean and well-dressed as any man who may present himself, than when out in the fields, dirty and grimy,

For Some Time

For some time it has been known that soap compounds left unsanitary greasy residues. It has also been known for some time that does easily and does safely the work for which soap is often used—that of washing milk cans and other milk containers.

“Safety First” is a profitable principle to follow in caring for milk.

THE CONNECTICUT CAMPUS AND LOOKOUT

and almost unconscious of it perhaps, but wishing I was a little more presentable.

As college men we have reason to think well of ourselves. We have—most of us at least—put in eight years of study over and above the grammar grades. We have a perfect right, and owe it to ourselves and our Alma Mater, to present ourselves at the "front-door", and enter a business that way, if possible. I speak particularly to those who have not yet graduated. You will find there is an almost unlimited number of young men crowding to get into the various lines of business through the practical, or field end, which we may call the "back-door". Men who have not had our advantages—men who are not nearly so well fitted as we are to do things, generally speaking—and must, enter that way. It will pay you college men to at least learn how to handle a typewriter efficiently before going after a position upon graduating. And learn something about general office work, if possible, for you will find it useful in any line. Know at least the general principles of book-keeping, and if you can, pick up shorthand. Look about you and you will see that the man who climbs to the top in any line invariably finds himself in an office, with correspondence to handle and executive work to do.

You certainly intend to get to the "top", so instead of wasting valuable time working at the so-called and much over-emphasized "practical end", you may never attain the attention of those higher up, start first in the office—and if you have the stuff you want it, will not be long before (if you need to) you will be given a chance to "put in six months or a year in the field at the practical work, and not as a "rubber" either, but if some responsi-
Do Fertilizers Pay?

The Government and Educational "Authorities" spend considerable public money in printing contradictory statements on this point.

Great fortunes have been made in manufacturing fertilizers. They readily pay the make-up.

Farmers continue to increase their fertilizer purchases, indicating that they are profitable to the farmer.

But are the kinds which the manufacturers prefer to sell the most profitable to the farmer? Do they give the greatest profit consistent with maintaining the productiveness of the soil? Or do they merely supply the element most needed at the moment and reduce the available supply of the other elements?

The average fertilizer contains 4 times as much phosphoric acid as Potash. The average crop takes from the soil 3 times as much Potash as phosphoric acid.

You can guess the answer. Use more Potash, for Potash Pays.

Send for FREE pamphlet on Profitable Farming, containing system of rational fertilizing and soil testing.

GERMAN KALI WORKS, Inc., 42 Broadway, New York

(Continued from page 2.)

 وعلى position where you will have a chance to shift about and learn all the work, and not merely how to do one thing, as would have been the case ten chances to one had you elected to start in the field at the very beginning.

I am prompted to write as I do, because of my own experience since graduating from the Connecticut Agricultural College, where I got my bachelor's degree in 1914, not having changed my ideas on the subject in hand in the least—and I want you to know that I am no "old fogey," for I am little older than most of you, and anyone who knew me when in college will tell you I was far from being a "stick" or a "stick". I am just like you, boys, except that I have had a little more experience, and I am trying to give you a pointer or two, that will, I trust, save you many hard knocks and discouragements after you get out of college; and prevent your wasting valuable time by starting at the wrong end. Of course, you understand, I am speaking from the standpoint of the business man, and I write for the benefit more particularly of the large majority of you who will probably go into business rather than professional lines.

(To be continued.)

Welcome News on Engines

International Harvester Mogul and Titan engines work successfully on kerosene, running on light or full loads. They use the least expensive of oil fuels. You are not limited to one kind of fuel, as with a gasoline engine, but can use any kind that is most convenient or least expensive. That is a very real advantage.

You know something about I H C engines. You have heard of their thorough reliability, the good material and workmanship that goes into them, the ease with which owners get repairs and service when needed, the years they last—and the other points that have sold a quarter million I H C engines.

But do you appreciate what real kerosene-burning means—that it saves you in money—how it assures you an unlimited supply of cheap fuel? You need Mogul or Titan kerosene-burning engine power to be sure of always having power at a price you can afford.

Ask the I H C dealer to show you a Mogul or Titan engine—sins from 1 to 80 H. P. If you prefer to write us, we will tell you where you can see our engines and send you catalogues at the same time. Drop a card to the address below.

International Harvester Company of America (incorporated)

CHICAGO, U.S.A.

FOUR YEAR COURSE in Agriculture designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements four year high school course. B. S. degree.

TWO YEAR COURSE in the School of Agriculture for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who have completed the work of the common school.

TWO YEAR COURSE in the School of Mechanic Arts. Four years of high school work required for entrance.

FOUR YEAR COURSE in Home Economics. Open to young women who have completed the work of the common school.

SUMMER SCHOOL of Agriculture and Nature Study.

Recent appropriations have provided additions to lands, buildings and equipment valued at $650,000. Expenses low. No tuition charge to residents of Connecticut. Military instruction. A catalog will be sent upon request.

CHARLES LEWIS BEACH, President.
