Alumni Notes.

C. E. Lawton, '12, is doing advanced registry work for the Experiment Station.

M. R. Young, '15, has accepted the position as official tester of the Connecticut Herd Improvement Association No. 1, of Hartford County, made vacant by the resignation of R. W. Whitham, '12.

Sol Sherman, '15, has charge of the Greenhouses at Prospect Park, New York City.

E. H. Geer, Jr., '15, was a recent visitor at the college.

A letter recently received from Dr. Blakelock tells us that at a convention of biologists held at Columbus, Ohio, where he lectured on "Illustrative Material in the Teaching of Genetics," many photos of his first class in genetics here were shown as well as views of the Botanical Gardens. Dr. Blakelock and Mr. Shultz, '13, are doing research work at the Carnegie Institute, Cold Spring Harbor, L. I.

Lawrence Edwin Rutan, '15, was married to Miss Florence Hughson on November 27.

Arthur N. MacQuay, ex-'12, of Wendell, Idaho, visited the college for a few days during the second week of December.

Joseph Linehan was a visitor at the college on December 16. Linehan is a professional poultryman.

L. B. Starr stopped on his way home from Michigan Agricultural College to see the boys, just before Christmas.

Edward Tjarks is now one of the head bacteriologists for the Borden Milk Company.

Alvan W. Howard is bacteriologist with Hood & Sons, Boston, Mass.

Connecticut Beats Trinity Independents.

In an interesting though rather slow game our team scored a victory in the Hawley Armory over a picked team from Trinity, December 18. Our five did not show the usual form until the second half, but then let loose and scored many baskets. The teams were about even in the first half and so the game was very exciting and the many spectators showed their enthusiasm throughout the game. Davis and Norton played especially well for the home team, while Moran and Woolley did the honors for Trinity.

The line-up:

Connecticut Trinity Independents
Shea LF Vierner, Farris
Dickinson RF Moran
Norton C Reiner
Davis LG Tiger
Woolley RG Wooley

Referee, Reed; goals, Shea 5, Dickinson 2, Norton 2, Davis 1, Moran 3, Woolley 2; fouls, Shea 2, Dickinson 4, Woolley 4; score, Connecticut 26, Trinity Independents 14.

In a very strenuous game the fast Springfield team overwhelmed our team to the tune of 46 to 16 at Springfield, December 15. The crack Y. M. C. A. team showed all kinds of form and their passing and shooting was so very excellent that our team did well in holding them to the score as it was. The Springfield team got a lead from the start, and after a safe margin was obtained, many substitutes were used, most of whom played as well as the regulars. Shea had the pleasure of playing against his former team-mate, Taylor, who is now on the "variety stock" in Springfield.

The line-up:

Springfield Y. M. C. A.
Dickinson LF G. Whalen
Newell Shea, Hopwood RF Sorg, Brown
Taylor Davis C. Souder, Shea, Ellis
Norton LG Evans, Bogler
Barlow, Murdock RG Herlemer, Sennoer
Referee, Aspinwall.

In the closest game of the season our team lost to New Hampshire State in Hawley Armory, January 7, to the score of 25 to 23. Both teams started off with the determination to win and played an open passing game, with New Hampshire on the defensive. The teams were evenly matched and the score at the end of the first half was a tie, indicating the closeness of the game, although both teams shot poorly. At the beginning of the second half,

"THE COLLEGE."

SONG OF CHEER.

This year, as no hand-book of the college has been issued, the Campus will print songs and other data of the student-body which will be of interest. The first of the series will be the song below which has not been sung within the last few years. The tune is that of "Let the Lower Lights be Burning," and is familiar to all. Let us learn it and sing it at the next Students' Organization or Athletic Association Meeting.

1—On this far-famed field of battle,
Many a conflict time has been
Here our chosen, bravely ever,
Strive to keep our laurels green.

Chorus:
Cheer them on, our boys forever,
May your valor bring renown;
By your strength and dauntless soul
Win her many a victor's crown.

2—To the College that we cherish,
May your valor bring renown;
By your strength and dauntless soul
Win her many a victor's crown.

Let's go, boys, let's go,
Let's win this crown for you.

3—Onward, then, let no man falter,
Nobly act your glorious part;
Cheer them on, our boys forever,
Springing from these days of trial.

The College:

Nobly act your glorious part,
Cheer them on, our boys forever,
Springing from these days of trial,
On this fair old College field—Chorus.

CONNECTICUT BEATS TRINITY INDEPENDENTS.

(Continued from page 1.)

the New Hampshire team took the offensive and secured a lead which they never lost to the end. Norton and Davis starred for Connecticut, who played a good game for New Hampshire.

The Line-up:

Connecticut: New Hampshire State
Dickinson RF Sanborn PF
Ranney LF Prentiss F
Norton C Steele GS
Davis R Bissell BS
Barlow LG Brown P

Score—goals: Shea 3, Norton 4, Davis 4, Sanborn 2, Prentiss 4, Steele 3, Bissell 2; fouls: Dickinson 3, Bissell 3; referee, Aspinwall.

“WHAT OF THE BUSINESS TRAINING OF AGRICULTURAL COLLEGE STUDENTS?”

(Continued from page 1.)

desire to be misunderstood, for I am a democrat from the ground up, but I do believe that the majority of people judge us largely by our appearance, and that they therefore look down upon us, as it were, and to those of us who are not sensitive, this is very unpleasant and humiliating. Personally I always feel more capable and better able to meet and interview people when in a suit that soap compounds left unsanitary greasy residues. It has also been known for some time that

This year it has been known that soap compounds left unsanitary greasy residues. It has also been known for some time that

For Some
Time

does easily and does safely the work for which soap is often used,—that of washing milk cans and other milk containers.

“Safety First” is a profitable principle to follow in caring for milk.

Do Fertilizers Pay?

The Government and Educational “Authority” spend considerable public money in printing contradictory statements on this point.

Great fortunes have been made in manufacturing fertilizers. They evidently pay the make-up.

Farmers continue to increase their fertilizer use, indicating that they are profitable to the farmer.

But are the kinds which the manufacturers prefer to sell the most profitable to the farmer? Do they give the greatest profit consistent with maintaining the productiveness of the soil? Or do they merely supply the element most needed at the moment and reduce the available supply of the other elements?

The average fertilizer contains 4 times as much phosphoric acid as Potash. The average crop takes from the soil 3 times as much Potash as phosphoric acid.

You can guess the answer. Use more Potash, for Potash Pays.

Send for FREE pamphlet on Profitable Farming, containing system of rational fertilizing and soil testing.

(Continued from page 2.)

able position where you will have a chance to shift about and learn all the work, and not merely how to do one thing, as would have been the case ten chances to one had you elected to start in the field at the very beginning.

I am prompted to write as I do, because of my own experience since graduating from the Connecticut Agricultural College in 1914—a year which I spent at the Oregon Agricultural College, where I got my bachelor's degree in 1914, not having changed my ideas on the subject in hand in the least—and I want you to know that I am no “old fogey,” for I am little older than most of you, and anyone who knew me when in college will tell you I was far from being a “stick” or a “stick”. I am just like you, boys, except that I have had a little more experience, and I am trying to give you a pointer or two, that will, I trust, save you many hard knocks and discouragements after you get out of college; and prevent your wasting valuable time by starting at the wrong end. Of course, you understand, I am speaking from the standpoint of the business man, and I write for the benefit more particularly of the large majority of you who will probably go into business rather than professional lines.

(To be continued.)

Welcome News on Engines

INTERNATIONAL Harvester Mogul and Titan engines work successfully on kerosene, running on light or full loads. They use the least expensive of oil fuels. You are not limited to one kind of fuel, as with a gasoline engine, but can use any kind that is most convenient or least expensive. That is a very real advantage.

You know something about H C engines. You have heard of their thorough reliability, the good material and workmanship that goes into them, the ease with which owners get repairs and service when needed, the years they last—and the other points that have sold a quarter million H C engines.

But do you appreciate what real kerosene-burning means—what it saves you in money—how it assures you an unlimited supply of cheap fuel? You need Mogul or Titan kerosene-burning engine power to be sure of always having power at a price you can afford.

Ask the H C dealer to show you a Mogul or Titan engine—sizes from 1 to 80 H. P. If you prefer to write us, we will tell you where you can see our engines and send you catalogues at the same time. Drop a card to the address below.
