**Farm Experience For Teachers**

**SPEECH DELIVERED BY J. R. CASE, ’16, AT JUNIOR-SENIOR BANQUET.**

I received a letter not long ago from a member of last year’s class and it set me to thinking. Now the College advertises that the demand for college-trained agriculturists is greater than the supply, and professors to turn out the finishing pinch of the 1911 men in looking up a job found that the “rubes,” as he called them, with whom he sought actual farm work, were ready and willing to get something for nothing by slaving their help from day-break till dewy eve and re­warding them with patience. So this man took to teaching. No sensible person would ever think of consulting a young medical school graduate until he had experi­enced himself on clinical and hospital unfortunates. No lawyer ever hangs out his shingle until he has worked on tiresome briefs in the law-office and with some reputable attorney. No rising young physician keeps his degree jeal­ously on his cuffs or believes in pedalling his wares. He goes to the slums or on a dairy trip until he has supplied or has done rescue mission work in the slums or elsewhere.

And in spite of this agricultural college men will take a position when fresh from their Alma Mater and expect to succeed. They feel sure that they can make money with their employ­ers consider a college diploma or a degree a sufficient recommendation. Why if one of us went home and could not tell our employer how good a horse was by looking at his teeth, there would be an argument in the corner grocery that evening and the recreation bureau and politicians would decide to their own satis­faction that the state college was worthless for teaching any one how to farm. Do we not then make a mistake in thinking that college finishes rather than prepares us for life and are we not doing the wrong thing in bringing discredit to the profession by imposing ourselves as full fledged scientific agriculturists when we do not know beans? It has been said, “If a man can farm, he does so; if he cannot, he teaches.” I know of several teachers and super­visors of agriculture who have taken their positions with the understanding that they have had actual farm experience but this is based only upon their free labor at their colleges, and in these several instances the men are not making good. There is also the case of a professor who is working hard enough by teaching to buy a farm, and then quit the chair. Somehow these men always make good. It is worthy of note that the county­agents and state leaders have been

**1909**

Morris C. Hull was a recent visitor at the college and will be on the faculty of the College of Agriculture, University of Illinois.

A. B. Sturges is a Doctor of Osteopathy, practicing in New Haven.

D. E. Williams is now engaged in business with his father.

**1915**

Leo Marks has left Glastonbury high school and has accepted a position of teaching agriculture in Carlisle Institute, Carlisle, Pa.

A. W. Morgan now has Sr. Marks’ former position in Glastonbury, teaching agriculture.

W. B. Ackerman spent the latter part of his summer in the Hill.

Frank Hastings is recuperating from an operation for appendicitis.

E. H. Nodine is managing rest-a-week on the farm at Watertown, Conn.

**Dairy Trip**

C. A. C. Well Represented at Hood’s Cattle Sale

On Friday, April 28th, a number of C. A. C. men started on a dairy trip which was completed in the Hood Farm, where they attended the annual Jersey sale held there on Monday, May 1st.

The party was composed of Professor White, Mr. Judkins, and Mr. Musser of the Dairy Department, the junior dairy division, several members of the senior dairy course and a few freshmen from the school of agriculture. From Worcester the party traveled to Spencer, where they visited the farm of Mr. Arthur H. Settendorph, an eminent Guernsey breeder.

Two classes were judged, and after an inspection of the premises, they returned to Spencer and thence to Boston.

Saturday the party went to Brockton and in the morning inspected the Guernsey herd of F. Lothrop Ames, at North Easton. Here they saw Dolly Dimple, one of the prominent cows of the breed, and the great deal of cream from the Langwater herd traced directly to the May Rose family. Langwater Warrior and Langwater Hope represent this breeding and have remarkable performance.

**VARSITY WINS FROM C. C. N. Y.**

New Yorkers Defeated 10-9 in 10-inning Game

In the game with the City College of New York, here at Storrs, on Saturday, May 6th, Connecticut showed some of her old time fighting spirit and an exciting ten-inning contest, succeeded in beating the visitors by the score of 10-9.

Connecticut started off well and succeeded in getting a run in the first inning, followed by another in the second. The next two innings followed without either side scoring. In the fifth inning C. C. N. Y. began to show that they were able to hit the bat a little themselves, and when the smoke had cleared at the end of the inning, Connecticut had scored four runs. In the next Connecticut tried hard in the last half of the inning and succeeded in tying the score. In the next inning it seemed as though the visitors might make up for lost time and again scored four runs. The inning ended without Connecticut hitting the same stood 8-1 in favor of the visitors. But in the seventh inning, after getting the visitors out in one, two, three, the heavy end of the world batting order came up and practically batted Connecticut out of the game. The batter was then put in to stem the tide but generally a good hit was followed by a easy hit. Warner these boxes to suit their various tastes.

In the game with the It is an ideal climate. These pleasant evenings are followed by a few days of frost which is melted off by the visitors secured one run, roses climbing to the post of white supremacy.

The students themselves had trimmed these boxes to suit their various tastes. Generally a large bonnet hung on the wall in the rear of the cluttered room. The wall itself was painted with green and white, a touch of gold here and there gave it an air of festivity.

In the centre of the hall was a beautifully trimmed insignia of the house, in which each student had placed their favorite flowers, and from the peak streams of green and white crepe paper branched to all parts of the hall, closely resembling an immense May pole.

The seven members of the Beeman & Hatch orchestra, of Hartford, took their places promptly at 8 o’clock. As the first strains of music floated out from the summer house, there was a gentle rustle in the boxes which lined three sides of the hall, and soon dancers were ganging noiselessly over the smooth floor. It was an ideal evening for dancing, not too warm nor too cold and just air enough stirring to make the fragrance of the flowers reach a part of the house.

The stage was decorated on the same green and white plan as the rest of the hall. This was arranged to accommodate the dancers on the floor on three sides of the stage. On either side temporary stairs from the floor to the roof had been made, and to make it easily accessible. Here the new scenery was used to good ad

**Junior Week**

**JUNIOR PROM**

Well Attended; Socially and Finan­cially a Great Success.

An announcement well said that “per­fect days come in June,” but that the Junior Prom in the Hawley Armory on the evening of May 12th are inclined to believe that perfect days also come in May.

Guests began to arrive in the after­noon in autos from Willimantic and at supper time there was quite a large gathering of young ladies in the dining hall. Many who lived near by waited until almost time for the dance to begin before making their way for the evening finery. However, as the dance hour drew near crowds were seen flocking toward the prettily decorated ball­room.

As the dancers entered the hall it seemed as if they had suddenly been strained into the sunny south. Fragrance of roses greeted them and as they were ushered to the easy chairs in the cozy boxes it was evident that surely they were enjoying a utopian climate. These boxes, decorated by a white tablecloth which was trimmed with green, added much beauty to the original aspect. The students themselves had trimmed these boxes to suit their various tastes.

Generally a huge bonnet hung on the wall in the rear of the small rooms decorated the sides.

In the centre of the hall was a beautifully trimmed insignia of the house, in which each student had placed their favorite flowers, and from the peak streams of green and white crepe paper branched to all parts of the hall, closely resembling an immense May pole.

The seven members of the Beeman & Hatch orchestra, of Hartford, took their places promptly at 8 o’clock. As the first strains of music floated out from the summer house, there was a gentle rustle in the boxes which lined three sides of the hall, and soon dancers were ganging noiselessly over the smooth floor. It was an ideal evening for dancing, not too warm nor too cold and just air enough stirring to make the fragrance of the flowers reach a part of the house.

The stage was decorated on the same green and white plan as the rest of the hall. This was arranged to accommodate the dancers on the floor on three sides of the stage. On either side temporary stairs from the floor to the roof had been made, and to make it easily accessible. Here the new scenery was used to good ad

(Continued on page 2)
pointing out to them the many facets connected with our poultry plants, our dairy farm, and dairy, horticultural and botanical buildings and courses.

But why not mention the library, English, German, History and English literature, and if they are interested enough, mention Daudet, Schiller, Goethe, Mollierre and a few others. The course, and it is certain to have a favorable effect in some instances. Those upon whom it will have effect are surely desirable to us, for there is plenty of work here for those who have literary tendencies.

To the Editor of the Campus: Ever since my converse with C. C. X. Y., it has been many words of praise for our team. That is as it should be, and I am one of those that claim a part in that "talk-it-up" Yale. It accomplished unexpected results at times and should be practiced to a greater extent.

There was, however, a special feature at that game which should not go unobserved, namely, the presence of the boy scouts. So far as I know this is the first organization that has ever attended a game on the hill, giving its support to us to such a degree as to make it evident that they were with us. We appreciate this and want it to continue and build up a host of outside supporters.

I saw a similar demonstration at the Yale-Brown game at New Haven last fall, where the loyalty of the local organization was so strong for Yale that no power on earth could have kept those lads from cheering, and cheering for Yale. It was a splendid sight, and while it was good to hear and wonderfully thrilling to feel. It is possible that we may win the loyalty of young Connecticut. Just as El has won the support of youthful Yale. Yale men admit that those cheers have won many of their close decision games.

I think we should make it known to that body of Americans, that we duly appreciate their support, and their kind consideration in cheering for Connecticut.

Sincerely,
A. E. ST. GERMAIN.

To the Editor of the Campus: Acting on the assumption that an idea is always acceptable no matter from where it comes, I have gathered enough courage to persuade myself to present one accordingly I will elucidate as follows:

The athletic situation here has appeared to me to lack one vital fundamental; that is, some system of graded training. In the three major sports the college is represented by the first team and the scrubs. Thus, if a fellow goes out and tries for the team and is found not good enough for the first, he is relegated to the scrubs. Because of this, the system resolves itself into one of elimination. As a rule a great many of the men on the scrub team fail to report after fall or two and thus some very valuable raw material is lost.

The remedy for this seems to be to form a second team on an entirely independent basis. Make it a distinct organization. Establish some incentive such as the awarding of an insignia for meritorious work, and I think that you will get results. The privilege of wearing a "C. A. C." or "C. A. A."

A three-game schedule with surrounding college teams and perhaps one with a regular college second team might help.

Such a system would, in the first place, tend to bring out more men for the athletic teams. Many who might doubt their ability to make the first team would go out for the seconds, thinking that they would receive sufficient training to enable them to become "varsity men" the following year. They would stay out all through the season so as to earn their insignia.

Besides aiding materially in the development of material it would furnish more competition. The "varsity" would have a separate machine to fight against. There would be separate signal systems, and the tendency to play signals which now harms the "varsity-scrub" practice to a great extent, would be eliminated. This fact would increase the efficiency and the results of such practice fifty per cent. Many other apparent benefits would result.

As it stands now, anyone may belong to the scrubs. Consequently no one wants to. Attach some little honor to an organization made up of the scrub material and spend a little money on it. The suggestion is worth a trial.

UNDEGRADUATE.

HICKS PRIZE ORATION.

The annual contest for the Hicks Orations Prize was held in the Chapel Thursday evening, 8 o'clock. There were three contestants for the prize, all of whom were seniors.

The evening was opened with selections from "Katinka," "Pom-Pom," and "The Princess Pat," rendered by Hatch's orchestra. President Brench then introduced the speakers.

James E. Case, the first orator of the evening, spoke upon the "Education of an Agricultural Expert." He urged further specialization, not only in the class room but in the laboratory, but also in the practical experience gained upon the farm itself.

John Hill then spoke upon "Prison Reform." He set forth the prison system and methods in vocum to-day and argued for a system, constructive rather than destructive in its influences.

John W. Rice, the last speaker, had for his subject, "The Marketing of Farm Produce." The necessity for greater co-operation between the producer and the consumer furnished the gist of his theme.

During the intermission following each oration, selections were rendered by the orchestra. The results of the contest were Honorable William A. Arnold, Dr. D. Everett Taylor, and Mr. J. M. Shepard. The decision will be announced at Commencement.

by a score of 19-1. The varsity took

the lead in the fourth inning by scoring four runs. In the fifth inning they

added three runs more to their score

and held this advantage until the

seventh period.

The varsity started off well and

scored a run in the first inning on

Singh’s drive to right field. However,

Wesleyan came right back

managing to score three runs before the

end of the inning. Wesleyan scored

another run in the third, but Connec-

ticut pulled together in the fourth

and with one down McCarthy knocked out

a home run, then with two on base

Anderson knocked out a single, and

capped the inning by stealing home,

making a total of four runs for the

inning. Again in the fifth with two

men on bases, McCarthy knocked out

his second homer, giving us three

more runs. This however, ended the

scoring for C. A. C.

The seventh inning was Connec-

ticut’s hard luck inning and by bunch-

ing a few singles and being helped

along by Sophie Wesleyan scored five

runs. In the eighth again the Wes-

leyan nine proved their prowess with

the stick and managed to score three

runs.

50 Church St. - New York
The annual spring judging contest will be held Saturday, May 27th. All students who have had a course in Cattle Judging are eligible to enter this contest, save those who have won first prize in former contests.

The four different breeds, Holstein, Jersey, Ayrshire, and Guernsey, and a class of bulls of one or more breeds will be judged. Where the contest is to be held will be kept a secret for the present. This is done so that no contestant will have the advantage in knowing the cows before hand.

The prizes will consist of five dates. One calf from each breed is awarded to the winner of that breed, and the student that has the highest total will be given the choice of a calf of one of the four breeds. The latter will be a sweepstakes prize. No student can win two prizes, that is, if he wins one of the individuals and the sweepstakes also he will have a choice of a prize for the breed or for the highest total prize. These prizes have been secured by the Agricultural Club.

The trip will be made in autos and will cost each student $2.95. Details in regard to it will be arranged later.

Next September there will be contests at the Hartford Fair at which money prizes will be offered. Also the New England contest will be held at Brattleboro, in which a silver loving cup is awarded to the team winning highest honors. Undoubtedly the most important of the year will be the National contest held at Springfield, where teams will be entered from fifteen or more agricultural colleges. There is offered as prizes half a dozen silver loving cups and as many scholarships worth $450 each, if used for graduate work in some agricultural college.

Fraternity Notes

EPA LAMBDA SIGMA.

Mr. Frank Nolan, who recently registered in the college course, is now placidly enjoying his fraternity.

Several alumni returned to attend the Junior Prom and to enjoy open house at the Fraternity.

COLLEGE SHAKESPEARIAN CLUB.

An open meeting was held in the club room after the Glee Club concert on May 13th. An interesting program was rendered and refreshments were served.

SIGMA ALPHA PI.

An entertainment was held in the fraternity room after the concert Saturday evening, May 13th.

ALPHA PHI.

An open meeting was held on May 13th. After the meeting a program was given and refreshments served. Many of the new members have ordered their fraternity pins.

PHI EPSILON PI.

The following members of the fraternity were guests of the local chapter at the Junior Prom: J. Nathan, of Harvard, H. King, of Pittsburgh, B. Tennis, of Tufts, Dr. Tabbitts and S. Shapero, of Pennsylvania, and R. Post of Yale.

A reception was enjoyed Saturday, May 13th, after the Glee Club.

COMMONS CLUB.

A chapter of the Commons Club has been established at Western Reserve University, Cleveland, Ohio.

There is offered as prizes half a dozen silver loving cups and as many scholarships worth $450 each, if used for graduate work in some agricultural college.

Ancient Farming

Herodotus, in the year 450 B.C., said that good cultivation yielded two-hundredfold in the Valley of the Euphrates. Ever in that land of Eden, poor cultivation yielded but fiftyfold.

In 1898, the average Wheat yield per acre in New York State was 21.2 bushels; in 1907, 17.3 bushels per acre; in 1912, but 16 bushels. This does not speak very highly for our Farmers.

Average American yield per acre of Agricultural Produce is at present about Eleven Dollars. European yields are more than double.

Isn't it time for our farmers to get down to business methods?

The Smoke of Men Who Win

A fresh-rolled "Bull" Durham cigarette almost says "Speed up!" right out loud. Keen-eyed, clear-headed young fellows smoke "Bull" Durham because it has the sparkle and the "punch"—the youthful vim and vigor. Every time you "roll your own" with "Bull" Durham you open the door to Hustle.

"Bull" Durham
SMOKING TOBACCO

"Bull" Durham is unique among the world's tobaccos. It is distinguished from all others by its wonderful mildness, its delicious mellow-sweet flavor and its distinctive aroma.

That's because it's made of the choicest of rich, ripe Virginia-North Carolina "bright" leaf—the smoothest and mellowest tobacco in the world.

You get a lively smoke and a satisfying smoke when you "roll your own" with "Bull" Durham.

Ask for FREE package of "paper" with each box.
second, silver medal; third, bronze medal.
2. Running broad jump, open to any high school senior. Prizes—Medals as in 2.
A declaration contest is being arranged for boys who are bona fide high school students. The preliminary trial will be held in the afternoon, beginning at 2:30. Those who are selected from the preliminary trials will compete for prizes at 7:45 in the evening. First prize $15, second $10, third $5.
Following the declaration contest, visitors will be entertained in the Freshmen room.

Department Notes

DAIRY.
Thirteen cows and a bull, all registered shorthorns, have arrived from the Gilbert Farm, Georgetown. This makes in all five breeds in the College herd, and increases it to approximately eighty-five head.
Operations will begin next week on the new stucco tile and cement bull barn which will be built a little to the north-east of the present shed.
Copper Butterfly, the oldest Jersey in the barn, gave birth to a bull calf, May 6th. She was the first Jersey cow in the State to give over 600 pounds of butter. She will be thirteen years old on May 20th.

BACTERIOLOGY.
There are prospects of having a colonist at Connecticut next year. It will probably be set up in the Chem building but will be used in connection with the bacteriology department.

NEW MAJORS.
Because of the increased demand, and splendid facilities for it, the Course of Study committees have recently decided to include Bacteriology and Zoology as major studies. This change will go into effect in the fall of 1917.

MILITARY.
Military shirts and shoes are being sold by the department at cost.

The Blue Pencil

Friend—"How do you decline man?"
Spinster—"I wouldn’t decline. I’m prepared to take the first one offered."

She—"I never could see much in these shadow skirts to cause so much comment."
He—"Oh, yes, my dear, but you don’t look at them in the right light."
Are you hungry, France?
Yes, Sir.
Well Russia long, and I’ll PJI with Turkey.

John—"I can’t help stuttering old man. It’s one of my p-peculiarities."
Hohmy—"Hm."
John—"Don’t you stir your tea with your right hand?"
Hohmy—"Yes."
John—"Well, that’s your peculiarity. Most people use their spoon."

Flows—"Is he interesting?"

Some folks are so peaceable they won’t even use military brushes.

"Have you seen Bertha?"
"Bertha who?"
"Berthaization.""

Your teeth are like the stars; he said;
The maiden’s face grew bright.

"Your teeth are like the stars," he said.
"They all come out at night."

"Kiss me good-night, remember just once!"
He forgot what she said and took ten.
"I only promised you one," she said.
"Now you’ll have to try over again."

Lieutenant: "If while on the march a stream impeded your progress and you wished to determine which of the current flowed, what steps would you take to determine this factor?"
Mike (returning from dreamland): "Throw my hat in.

It costs less to buy a DE LAVAL than to buy experience

EACH year some 48,000 farmers, who have bought at one time or another, “cheap” cream separators, discard the inferior, cream wasting machines and replace them with clean skimming De Laval.
These men bought the “cheap” machines because they thought they were “good enough” or “just as good” and that by purchasing such machines they could save a little money. They actually would have been better off in most cases had they bought no separators for they lost most of the money they spent for the “cheap” machines, besides all the cream these machines have failed to get out of the milk.
No one ever saved money using a “cheap” cream wasting separator or an old or half worn-out machines. No one ever got back the money spent for such a machine by continuing to use it. Those who bought “cheap” machines and got out of the difficulty best are the ones who quickly discovered their mistake, discarded the inferior machines and put in real cream separators—De Laval.
There are nearly 2,000,000 farmers who have bought De Laval, and every one of these had just as many opportunities to buy “cheap” separators as any one else. They did not do it and are now money ahead. They have avoided paying the high cost of experience, and their De Laval have paid for themselves many times over. It always pays to buy a separator of proved, known superiority.
We will be glad to send one of our handsomely printed and illustrated new catalog to any farmer or student interested in dairying, upon request.

CHARLES LEWIS BEACH, President.

Settle the Silo Question

—and settle it for good. Do away with repairs, with tightening of lugs and adjusting of chains. Flow that your silo won’t blow over. Be sure of perfect silages at all times. Build the silos, rack them out with a National Silo Wall. It’s worth your looking into it.

Nasco Imperishable Silo
"The Silo that Lasts for Generations"
In hollow, metal silos, the dirt and moisture that cause the slings to decay and rot away. In the Nasco Silo, the dirt and moisture are driven out of the silo at the manner and time the owner desires. The continuous, side-by-side arrangement of the silo walls is another feature. The silo is built in sections of 200 feet, making it possible to erect the silo in as short a time as the owner desires. The Nasco Silo is made of corrugated metal, the corrugations being spaced to prevent the formation of the slings that cause the silo to rot away.

Nasco Silo Wall

For strongest, lightest, most permanent silo walls, Nasco Silo walls. They will resist shrinkage, and prevent the formation of the silo walls. The Nasco Silo Wall is made of corrugated metal, the corrugations being spaced to prevent the formation of the slings that cause the silo to rot away. The Nasco Silo Wall is made of corrugated metal, the corrugations being spaced to prevent the formation of the slings that cause the silo to rot away.

The Blue Pencil

Friend—"How do you decline man?"
Spinster—"I wouldn’t decline. I’m prepared to take the first one offered."

She—"I never could see much in these shadow skirts to cause so much comment."
He—"Oh, yes, my dear, but you don’t look at them in the right light."
Are you hungry, France?
Yes, Sir.
Well Russia long, and I’ll PJI with Turkey.

John—"I can’t help stuttering old man. It’s one of my p-peculiarities."
Hohmy—"Hm."
John—"Don’t you stir your tea with your right hand?"
Hohmy—"Yes."
John—"Well, that’s your peculiarity. Most people use their spoon."

Flows—"Is he interesting?"

Some folks are so peaceable they won’t even use military brushes.

"Have you seen Bertha?"
"Bertha who?"
"Berthaization."

Your teeth are like the stars; he said;
The maiden’s face grew bright.

"Your teeth are like the stars," he said.
"They all come out at night."

"Kiss me good-night, remember just once!"
He forgot what she said and took ten.
"I only promised you one," she said.
"Now you’ll have to try over again."

Lieutenant: "If while on the march a stream impeded your progress and you wished to determine which of the current flowed, what steps would you take to determine this factor?"
Mike (returning from dreamland): "Throw my hat in.
