Alumni Attention

It will be the policy of the Campus, so far as is practical, to print the Alumni Notes by classes. For this reason all are requested to send notes and notices for publication to Walter T. Clark, Alumni Editor, who will classify them for printing. An Alumni Department is never successful unless all co-operate to make it so. If each and every one of the Alumni will do his best this feature of the Campus will be a success.

Alumni Notes

'09.
Morris C. Hull was a recent visitor at the college.

A. B. Sturges is a Doctor of Osteopathy, practicing in New Haven.

'13.
D. E. Williams is now engaged in business with his father.

'15.
Lee Marks has left Glastonbury high school, where he has accepted a position of teaching agriculture in Carlisle Institute, Carlisle, Pa.

A. W. Morgan now has Mr. Marks' former position in Glastonbury, teaching agriculture.

W. B. Ackerman spent the latter part of his summer holiday in the state college.

Frank Hastings is recuperating from a recent illness.

'09.
Here they saw Dolly Marks, Mr. Marks' sister. They also visited the home of Mr. H. C. Sturges, who resides in the neighborhood. Mr. Sturges' home is well known as a center of hospitality and culture.

Athletic Notes

VARIETY WINS FROM C. C. N.

New Yorkers Defeated 10-9 in 10th inning Game.

In the game with the City College of New York, here at Storrs, on Saturday, May 6th, Connecticut showed some of her old time fighting spirit and in an exciting ten-inning contest, succeeded in beating the visitors by the score of 10-9.

Connecticut started off well and succeeded in getting a run in the first inning, followed by another in the second. The next two innings followed without either side scoring. In the fifth inning C. C. N. Y. began to show that they were able to bate the bat a little themselves, and when the smoke had cleared at the end of the inning the score stood 2-1 in favor of the visitors. But it was the sixth inning, after getting the visitors out in one, two, three, order, the heavy end of the varsity batting order came up and practically batted Connecticut out of the box. Warner was then in to stem the tide but not before Connecticut had scored three runs. In the eighth it seemed as though the second of the visitor's pitchers would meet with the same fate as the first and Connecticut scored three more runs. At the beginning of the ninth inning, the score stood 8-5 in favor of Connecticut, but in a wild rally the visitors scored one run, tying the score. At the last half of the ninth the varsity was unable to score. The first three visitors that came to the bat in the tenth were struck out by Capt. Crowley. In the same inning with two men out and two on base, it fell to McCarthy to bring in the winning run. After havering two strikes called on him, he knocked out a clean single. Crowley came in on this hit and Connecticut took the game.

C. C. N. Y. 8.
Connecticut 5.

Wesleyan Game

On Friday, May 6th, the baseball team journeyed to Middletown and in a hard fought contest lost to Wesleyan.

Student Notes

JUNIOR WEEK

Well Attended; Socially and Financially a Great Success.

An assessment was made that "perfect days come in June," but all those who attended the Junior Prom in the Hawley Armory on the evening of May 10th are inclined to believe that perfect days also come in May.

Guests began to arrive in the afternoon in autos from Willimantic and at supper time there was quite a large gathering of young ladies in the dining hall. Many who lived near by walked until almost time for the dance to begin. The evening opened in the dining hall. As the dance hour drew near groups were seen flocking toward the prettily decorated ballroom. As the dancers entered the hall it seemed as if they had suddenly stepped into a world of its own, the fairies of the sunny south.

Frangrance of roses greeted them and as they were ushered to the easy chairs in the cozy boxes they found that surely they were enjoying a tropical climate. These boxes encrusted by a white tulle work which was trimmed with green added much beauty to the general aspect. The students themselves had trimmed these boxes to suit their various tastes. Generally a large bouquet hung on the wall in the rear, smaller pendants decorated the sides.

In the centre of the hall was a beautifully trimmed platform to accommodate the orchestra. This looked so real that one could hardly believe that it stood on the floor of a dance hall. At the rear of the room lay roses clasped to the post of white birch, and along the base various plants sprang up in a mysterious way. Here and there about the house house flags waved in the gentle breeze. The general shape of the stand was conical, and from the peak streamers of green and white crepe paper branched to all parts of the hall, closely resembling an immense maypole.

The seven members of the Beeman & Hatch orchestra, of Hartford, took their places promptly at 8 o'clock. As the first strains of music floated out from the summer house, there was a gentle rustle in the boxes which lined three sides of the hall, and soon dancers were gazing noiselessly over the smooth floor. It was an ideal evening for dancing, not too warm nor too cold and just air enough to stir the fragrance of the flowers resting on their own dance floor.

The stage was decorated on the same green and white plan as the rest of the hall. This was arranged to accommodate a small dance floor. On either side temporary stairs from the floor to the rostrum had been formed to make it easily accessible. Here the new scenery was used to good ad-

(Continued on page 3)
pointing out to them the many facets concerned our poultry plant, our dairy farm, and dairy, horticultural and botanical buildings and courses.

But why not mention the library, Shakespeare, German, History and English literature, and if they are interested enough, mention Daudel, Schiller, Goethe, Molière and a few others.

Thus, and it is certain to have a favorable effect in some instances. Those upon whom it will have effect are surely desirable to us, for there is plenty of work here for those with literary tendencies.

To the Editor of the Campus: Every student whose name with C. C. V. N. has been many words of praise for our team. That is as it should be, and I am one of those that claim a part in that "talk-up" Yale does not accomplish unexpected results at times and should be practiced to a greater extent.

There was, however, a special feature at that game which should not go by unnoticed, namely, the presence of the boy scouts. So far as I know this is the first organization that has ever attended a game on the hill, giving its support to us to such a degree as to make it evident that they were with us. We appreciate this and want it to continue and build up a host of outside supporters.

I saw a similar demonstration at the Yale-Harvard game at New Haven last fall, where the loyalty of the local organization was so strong for Yale that no power on earth could have kept those lads from cheering, and cheering for Yale. It was a splendid sight to behold, it was good to hear and wonderfully thrilling to feel. It is possible that we may win the loyalty of young Connecticut. Just as Eli has won the support of youthful Yale, Yale men admit that these cheers have won many of their close decision games.

I think we should make it known to that body of Americans, that we duly appreciate their support, and their kind consideration in cheering for Connecticut.

Sincerely,
A. E. ST. GERMAIN.

To the Editor of the Campus: Acting on the assumption that an idea is always acceptable no matter from where it comes, I have gathered enough courage to persuade myself to present one accordingly I will elucidate as follows:

The athletic situation here has appeared to me to lack one vital fundamental; that is, some system of graded training. In the three major sports the college is represented by the first team and the scrubs. Thus, if a fellow goes out and tries for the team and is found not good enough for the first, he is relegated to the scrubs. Because of this, the system resolves itself into one of elimination.

As a rule a great many of the men on the scrub team fail to report after their first try-out and thus some very valuable raw material is lost. The remedy for this seems to be to form a second team on an entirely independent basis. Make it a distinct organization. Establish some incentive such as the awarding of an insignia for meritorious work, and I think that you will get results. The privilege of wearing a "C. A. C. " or "C. A. A." might be suggested as an example.

A three-game schedule with surrounding college teams and perhaps one with a regular college second team might help.

Such a system would, in the first place, tend to bring out more men for the athletic teams. Many who might doubt their ability to make the "talk-up" Yale would go out for the seconds, thinking that they would receive sufficient training to enable them to become "varsity" men the following year. They would stay out all through the season so as to earn their insignia.

Besides aiding material in the development of material it would furnish more competition. The "varsity" would have a separate machine to practice against. There would be separate signal systems, and the tendency to play signals which now harms the "varsity-scrub" practice to a great extent, would be eliminated. This fact would increase the efficiency and the results of such practice fifty per cent. Many other apparent benefits would result.

As it stands now, anyone may belong to the scrubs. Consequently no one wants to. Attach some little honor to an organization made up of the scrub material and spend a little money on it. The suggestion is worth a trial.

UNIVERSITY.

HICKS PRIZE ORATION. The annual contest for the Hicks Oratorical Prize was held at the Chapel Thursday evening, 8 o'clock. There were three contestants for the prize, all of whom were seniors. The evening was opened with selections from "Katinka," "Pom-Pom," and the "Princess Pat," rendered by Hatch's orchestra. President Blench then introduced the speakers.

James E. Case, the first orator of the evening, spoke upon the "Education of an Agricultural Expert." He urged further specialization, not only in the class room but in the laboratory, but also in the practical experience gained upon the farm itself.

John Hill then spoke upon "Prison Reform." He set forth the prison system and methods in vogue to-day and argued for a system, constructive rather than destructive in its influences.

John W. Rice, the last speaker, had for his subject, "The Marketing of Farm Produce." The necessity for greater co-operation between the producer and the consumer furnished the gist of his theme.

During the intermission following each oration, selections were rendered by the orchestra. The recipients of the contest were Honorable William A. Arnold, Dr. D. Everett Taylor, and Mr. J. M. Shepard. The decision will be announced at Commencement.

FARM EXPERIENCE FOR TEACHERS
(Continued from page 2)
required to show that they have had actual farm experience and we admire those who are doing so, although some will maintain that they are only to be congratulated upon "getting away" with something.

Such a quest is less desirable. Unless we want to see this country-wide movement for agricultural education in the elementary and secondary schools kept up, we must humble ourselves. We must suffer for a little while the dominance of the house-brains. The first twelve experiences on the farm before we set ourselves up as teachers.

"A prophet is not without honor save in his own country"—in other words, our acquaintances are wise to us. Why not give to ourselves such a prophet is not without honor save in his own country—himself? If the author of this little bee before we set ourselves up as teachers.

THE CONNECTICUT CAMPUS AND LOOKOUT

DAIRY TRIP
(Continued from page 1)
ble records to their credit. Here again they hold several classes of cows.

In the afternoon they visited two Holstein herds, one of these, that of the Hills Holstein Company. This farm is operated by two brothers and the blood lines of the herd are the best. There is an idea prevalent that the size of the herd is under-sized, but this does not hold with the animal's at the Field Brothers Farm, some of which easily weigh a ton.

At the second place, Dutchland Farms, the party saw Dutchland Colantha Vale, a cow that will probably beat the world's record for milk production when she comes. She finishes her present lactation period. The manager remarked that this feat on the part of Dutchland Colantha Vale would probably be worth $25,000 to Dutchland Farm, because at present there are over fifty animals at the farm directly related to her, and her record will immediately enhance their value.

At Hoed's Farm, Lowell, Mass., the animals that invited the greatest interest was Sophie nineteen, of Hoed Farm, the champion Jersey cow of the world, whose yearly record is 17,557 pounds of milk, 886 pounds of butter. Sophie's been sold, but with reluctance.

Hoo Farm is the home of the Sophies' Tormentors and practically every animal at the Hoof Farms carries this blood of both sides. Among the bulls are Hoof Farm Poquis ninth, and Hoof Farm Toronto. Hoof Farm Poquis ninth is considered the king of Jersey sires, having more daughters in the Register of Merit than any other bull, living or dead. At present they total 85, and are increasing continually. Hoof Farm Toronto is also one of the great bulls of the breed, having 71 daughters in the Register of Merit.

It is the policy of the management of Hoof Farms not to sell any young stock until the animals have been registered and tested for at least one year.

At the auction 95 animals were offered for sale, some of them of exceptional quality. The average cow averaged over $750, and the average of the whole sale was over $450. The high figure was $5,000, which was paid by Sophie's Bertha. This cow went to the Ayerdale Farm, of Barnger, Maine. The daughter of this cow, a two-year-old, sold for $1,000, and there were several other animals that went at a price well over $1,000. Sophie's Emily brought $1,355, Successful Queen, a broken color Jersey, brought $8, and Sophie's Ada brought $1,300.

The party returned to the college Monday night all well satisfied with the trip.

JUNIOR WEEK
(Continued from page 1)
advantage. The garden scene, dropped for this special occasion, gave a very pretty background. The patrons and patronsesses of: Beach; Mr. and Mrs. Edmunds; Professor and Mrs. Lamson; Professor and Mrs. Wheeler; and Professor and Mrs. Newton.

There was an intermission held at 11:30 during which refreshments were served, consisting of dainty sandwiches cut in various shapes to suit: also iced tea and coffee. At twelve o'clock the music started again, and those who intended to go home were provided to remain and have "just one more dance to the music and song. And so there was move music and more dancing until the early hour of two had been reached. The orchestra then ceased and the dancers slowly left the hall—but with reluctance.

JUNIOR SMOKER
Junior Week opened Wednesday evening, May 10th, with a class smoker at the Phi Epsilon Pi House, rented by Russell Harris, president of the class, president and called upon each member of the gathering to give a short talk. All responded with a few words about the events that were to be held during the rest of the week, and about future plans.

Later in the evening refreshments were served. During this time several classes were played on the Victrola.

The smoker broke up at a late hour and the Junior walked slowly back to the et, talling chiefly about the dance that was to come.

ATHLETIC NOTES
(Continued from page 1)
by a score of 13-1. The varsity took the lead in the fourth inning by scoring four runs. In the fifth inning they added three runs more to their score and held this advantage until the seventh period.

The varsity started off well and scored a run in the first inning on a two base hit driven to right field. However, Western came right back managing to score three runs before the end of the inning. Western scored another run in the third, but Connecticut pulled together in the fourth and with one down McCarthy knocked out a home run, then with two on base Anderson knocked out a two base hit and capped the inning by stealing home, making a total of four runs for the inning. Again in the fifth with two men on bases, McCarthy knocked out his second homer, giving us three more runs. This however, ended the scoring for C. A. C.

The seventh inning was Connecticut's hard luck inning and by bunching a few singles and being helped along by errors Western scored five runs. In the eighth again the Western nine proved their prowess with the stick and managed to score three runs.

WORCESTER TECH. GAME.
Worcester Tech. showed a slight superiority over Connecticut in a closely contested game played in Worcester on Wednesday, May 18th. Connecticut true to form started off well in the first inning, plugging up three runs, Worcester followed with one run in the first. Neither side scored again until the third inning, when Worcester made its second run. Connecticut scored a fourth run in the fifth inning and in the sixth Worcester brought in one run. The next proved to be the "lucky seventh" for the home team, and when the third out was finally called they had piled up four runs, making the total score, Worcester 7, Connecticut 4.

Fraternity Notes
ETA LAMBDA SIGMA.
Mr. Frank Nolan, who recently registered in the college course, is now playing for the freshmen team. Several alumni returned to attend the Junior Prom and to enjoy open house at the Fraternity.

COLLEGE SHAKESPEAREAN CLUB.
An open meeting was held in the club room after the Glee Club concert on May 13th. An interesting program was rendered and refreshments were served.

SIGMA ALPHA PI.
An entertainment was held in the fraternity room after the concert Saturday evening, May 13th.

ALPHA PHI.
An open meeting was held on May 13th. After the meeting a program was given and refreshments served. Many of the new members have ordered their fraternity pins.

PHI EPSILON PI.
The following members of the fraternity were guests of the local chapter at the Junior Prom: J. Nathan, of Harvard, H. Kline, of Pittsburgh, H. Tennis, of Trufes, D. Tabitsky and S. Shapero, of Pennsylvania, and R. Phelps, of Yale.

A reception was enjoyed Saturday, May 13th, after the Glee Club.

COMBINS CLUB.
A chapter of the Commons Club has been established at Western Reserve University, Cleveland, Ohio.

Stock Judging Contest
DATE OF CONTEST SET FOR MAY 27TH.

The annual spring judging contest will be held Saturday, May 27th. All students who have had a course in Cattle Judging are eligible to enter this contest, save those who have won first prize in former contests.

The four different breeds, Holstein, Jersey, Ayrshire, and Guernsey, and a class of bulls of one or more breeds will be judged. Where the contest is to be held will be kept a secret for the present. This is done so that no contestant will have the advantage in knowing the cows before hand.

The prizes will consist of five calves. One calf from each breed is awarded to the winner of that breed, and the student that has the highest total will be given the choice of a calf of one of the four breeds. The latter will be a sweepstakes prize. No student can win two prizes, that is, if he wins one of the individuals and the sweepstakes he will have a choice of a prize for the breed or for the highest total prize. These prizes have been secured by the Agricultural Club.

The trip will be made in autos and will cost each student $0.95. Details in regard to it will be arranged later.

The object of this contest is to bring an interesting climax to the regular second semester judging work, as well as to give students some real experience in judging strange cattle. It also gives good training for the State contest and the Inter-Collegiate contest.

Next September there will be contests at the Hartford Fair at which money prizes will be offered. Also the New England contest will be held at Brockton, in which a silver loving cup is given to the team winning highest honors. Undoubtedly the most important of the year will be the National contest held at Springfield, where teams will be entered from fifteen or more agricultural colleges. There is offered as prizes half a dozen silver loving cups and $250 in scholarships worth $450 each, if used for graduate work in some agricultural college.

Wheat and Hay 1928-1929

"Natico On The Farm"

In the title of our book that every farmer who takes pride in his farm buildings should have. This book includes a picture of the famous "Natico Hay Wagon," a history of Natico, a discussion of the hay business, with many tips and practical advice for all classes of farmers. This is the most complete and practical book of its kind ever offered. You cannot buy your grain binder this spring, no one will dispute, at least not one who has ever given it a thorough and fair trial. You owe it to yourself to investigate the wonderful Dairymen's Cleaner and Cleanser if you have not already done so.

Ancient Farming

Herodotus, in the year 450 B.C., said that good cultivation yielded two-hundred bushels of corn in the valleys of the Euphrates. Ever in that land of Eden, poor cultivation yielded but fiftyfold. In 1908, the average Wheat yield per acre in New York State was 21.2 bushels; in 1907, 17.3 bushels per acre; in 1912, but 16 bushels. This does not speak very highly for our Farmers.

Average American yield per acre of Agricultural Produce is at present about Eleven Dollars. European yields are more than double.

Isn't it time for our farmers to get down to business methods? Check Fertilizer Analysis. Only through modern methods can you make the most of the crops you produce. A binder is useful for one purpose only—to get all the grain cut and bound in the short time allowed for the harvest. That is no time to risk experiments, especially when you do not have to. Choose your binder from one of the old reliable, yet up-to-date in every way, International Harvester binders sold under the trade names—Champion Deering McCormick Milwaukee Osborn Plano.

International Harvester Company of America
Incorporated

Why Take A Chance?

When you buy your grain binder this spring, do not make the mistake of experimenting with an untried or cheap machine. You cannot make money that way. A binder is useful for one purpose only—to get all the grain cut and bound in the short time allowed for the harvest. That is no time to risk experiments, especially when you do not have to. Choose your binder from one of the old reliable, yet up-to-date in every way, International Harvester binders sold under the trade names—Champion Deering McCormick Milwaukee Osborn Plano.

You will find practical farmers, who know what particular harvesting difficulties they must overcome each year, urging the use of some binder with an HHC name. Years of building and betttering have resulted in these machines that insure as complete a harvest as it is possible ever to get, even under worst field and grain conditions.

Look for the same high-grade workmanship, the same famous HHC quality in HHC twine. Make the most of your crops. Your local dealer can furnish you with HHC binder repairs and twine. See him or write to us for information.

An Equitable Adjustment

As to there being an equitable adjustment of cleaning service and cleaning cost in Yellowdette Cleaner and Cleanser, no one will dispute, at least not one who has ever given it a thorough and fair trial.

You owe it to yourself to investigate the wonderful Dairymen's Cleaner and Cleanser if you have not already done so.

Ask your dealer or write you regular dairy supply house.

**Commencement**

The following program has been arranged for the Commencement and Class day exercises:

**COMMENCEMENT JUNE 13th**
- Orchestra
- Prayer—By the College Chaplain
- Address—Rev. W. H. Bailey
- College Diplomas Awarded
- School Certificates Presented
- Orchestra—The Alma Mater.

**THE CLASS DAY EXERCISES JUNE 12th**
- Address—R. C. Ackerman
- Class Poem—G. Horton
- Address—Professor Montieth
- Class Prophecy—H. Persky

**Spur Track From Eagleville**

The College has finished a preliminary survey for the branch railroad that is to be built from Eagleville to Storrs, and will endeavor to secure a right-of-way at once. Mr. Dennison, an engineer from the Central Vermont Railroad, is helping to select a course for the new track. As yet no appropriation has been received but it is thought that there will be no difficulty with this when the State realizes how much it will save having the railroad go directly to the College.

At present, 1,000 tons of freight are hauled to the College every year at a cost of $1.25 a ton. The Central Vermont Railroad offers to haul the freight from Eagleville to the College at a charge of twenty-five cents a ton, providing the State will build the road.

An appropriation of $4,000 will be asked for, as the amount necessary to complete this spur track, and it is believed that the legislature will look upon the proposition with favor.

**High School Day**

**ELABORATE PROGRAM ARRANGED FOR JUNE 3rd.**

High School Day this year will be held on Saturday, June 3rd. Arrangements are being made for a greater and even more successful event than that of last year. The students and faculty are working hand in hand and with such co-operation High School Day can not be anything but a success.

The visitors will be met at Willimantic and will be the guests of the students and faculty during their stay at the College. The battalion is to give an exhibition drill followed by a sham battle at 1:30 p.m. The athletic events will be held on Storrs field at 2:35 p.m. The following events and prizes have been arranged for:
1. One half-mile relay race for four men teams, from the high schools.
2. Two and one-half mile cross-country run, open to any high school student.

**What Can Be Done With Swamplands**

Swamplands can be reclaimed and made profitable by intelligent fertilization. They will produce good corn, onions, potatoes and hay. Their productivity is not only increased, but maintained.

**By Using POTASH on Them**

Use 100 to 200 pounds of Muricate per acre for corn, and the same amount of Sulphate for onions, potatoes or celery. Drill in 75 pounds of Kainit with seed to drive away root-lice or cutworms.

**The Smoke of Men Who Win**

A fresh-rolled “Bull” Durham cigarette almost says “Speed up!” right out loud. Keen-eyed, clear-headed young fellows smoke “Bull” Durham because it has the sparkle and the “punch”—the youthful vim and vigor. Every time you “roll your own” with “Bull” Durham you open the door to HUSTLE.

**“Bull” Durham Smoking Tobacco**

“Bull” Durham is unique among the world’s tobaccos. It is distinguished from all others by its wonderful mildness, its delicious mellow-sweet flavor and its distinctive aroma.

That’s because it’s made of the choicest of rich, ripe Virginia-North Carolina “bright” leaf—the smoothest and mellowest tobacco in the world.

You get a lively smoke and a satisfying smoke when you “roll your own” with “Bull” Durham.

**Genuine Durham Tobacco**

**The American Tobacco Company**

“Bull” Durham is a registered trademark of The American Tobacco Company, Durham, N. C.
second, silver medal; third, bronze medal.
2. Running broad jump, open to any high school senior. Prizes—Medals as in 2.
A declaration contest is being arranged for boys who are bona fide high school students. The preliminary trial will be held in the afternoon, beginning at 2:30. Those who are selected from the preliminary trials will compete for prizes at 7:45 in the evening. First prize $15, second $10, third $5.
Following the declaration contest, visitors will be entertained in the Fraternity rooms.

Department Notes

DAIRY.
Thirteen cows and a bull, all registered shorthorns, have arrived from the Gilbert Farm, Georgetown. This makes in all five breeds in the College herd, and increases it to approximately eighty-five head.
Operations will begin next week on the new stucco tile and cement bull barn which will be built a little to the north-east of the present shed.

Copper Butterfly, the oldest Jersey in the barn, gave birth to a bull calf, May 6th. She was the first Jersey cow in the State to give over 600 pounds of butter. She will be thirteen years old on May 20th.

BACTERIOLOGY.
There are prospects of having a colonist at Connecticut next year. It will probably be set up in the Chemistry building but will be used in connection with the bacteriology department.

NEW MAJORS.
Because of the increased demand, and splendid facilities for it, the Course of Study committee have recently decided to include Bacteriology and Zoology as major studies. This change will go into effect in the fall of 1917.

MILITARY.
Military shirts and shoes are being sold by the department at cost.

The Blue Pencil

Friend—"How do you decline man?"
Spinsters—"I wouldn't decline. I'm prepared to take the first one offered."
She—"I never could see much in those slight shadows to cause so much comment."
He—"Oh, yes, my dear, but you don't look at them in the right light."
Are you hungry, France? Yes, Sir.
Well Russia long, and I'll Fijji with Turkey.
John—"I can't help stuttering old man. It's one of my pe-peculiarities."
Everyone has his peculiarities."
Holmby—"I have none."
John—"Don't you stir your tea with your right hand?"
Holmby—"Yes."
John—"Well, that's your peculiarity."
Most people use their spoon."
Floose—"Is he interesting "
John—"No, all he does is sit and talk."
Some folks are so pescceable they won't even use military brushes.

"Have you seen Bertha?"
"Bertha who."
"Bertha fuscination."

"Your teeth are like the stars," he said.
The maiden's face grew bright.
"Your teeth are like the stars," he said.
"They all come out at night."
"Kiss me good-night, remember just once!"
He forgot what she said and took ten.
"I only promised you one," she said.
"Now you'll have to try over again."

Lieutenant: "If while on the march a stream impeded your progress and you wished to determine which is the current fluid, what steps would you take to determine this factor?"
Mile (returning from dreamland): "Throw my hat in."

Settle the Silo Question

—and settle it for good. Do away with repairs, with tightening of lags and adjusting of doors. Know that your silo won't blow over. See that perfect silo at all times. Build the worry, effort, time, and cost into a machine.
Nateo Imperishable Silo
"The Silo that Lasts for Generations."
In hollow, rusted steel, silos are imperious to air and moisture—they preserve the silage forever and always. The dead air spaces in the wall resist the slightest pressure. The dead air spaces in the wall, the all around roofs, the all around solid sides, the all around solid roofs. The entire machine is a cylinder. It is a cylinder with a solid top and solid bottom and a solid floor. Not a single hinge or screw or nail. Every part is solid and complete. The entire machine is a cylinder.

National Fire Proofing Company

Nateo Silo Wall, Ruth, Imperial Silo, Nateo Silo, and other Nateo Silos are of all solid, all round, solid roof, solid floor. The complete Nateo Silo is complete in all ways. The entire machine is a cylinder. The entire machine is a cylinder.
