**Big Entering Class at C. A. C. This Fall**

One hundred and three new students have enrolled, representing an increase of twenty-nine per cent. over last year.

One hundred and three new faces appeared on the Hill on September 12th, an increase of nineteen over the entering class of last fall. This is a per centage increase of 22 and an exceptionally good showing for such a year as this. In the past, however, the quality of the Hill has been much greater, and it is to be hoped that the future will be as successful. The entering class is composed largely of freshmen, and a few sophomores and juniors are also present.

**What Others Think Of Our College**

Excerpts from Article in Hartford Courant Written by a Visitor at C. A. C.

In the Hartford Courant for Sunday, August 27, 1916, there appeared an article entitled, "Connecticut's Splendid Agricultural at Storrs," written by the well-known journalist, O. Emil Richter, of Darien, Connecticut. In connection with this article was a picture of the college buildings and farms.

The following is an extract of the article written by Mr. Richter: "Probably ninety-nine out of every one hundred residents of Connecticut are likely to know that for the past five years an international egg-laying contest has been in progress at Storrs, the seat of New England's agricultural college. Ninety-eight out of these ninety-nine persons were to be asked to locate Storrs, or to tell what there is there besides an egg-laying contest, they would probably be perplexed for an answer.

"It is quite likely that for thirty-five years, the State of Connecticut has maintained this college, which at present represents a value of nearly $1,000,000. There are probably a full million of its inhabitants who know nothing about its work, except for that egg-laying contest. Not only has this epoch-making contest proved true, but the 200 eggs-a-year hen is not a dream, but the college has conducted scientific investigations into other phases of agriculture, and also produced some of the finest live stock in the world, and acquired animals for breeding purposes. The college will continue to be the envy of the world.

"The visitor to Storrs, viewing for the first time the handsome college buildings in their attractive setting, 100 feet above sea-level, with encircling hills, some as much as twenty-five miles distant, is impelled to paraphrase the Psalmist's words about Mount Zion, and to shoot 'beautiful for situation,' the joy of the whole state, in—er or should be—be the Connecticut Agricultural College.

"The college is an educational institution although it is not generally known that it has courses for girls since its agricultural laboratories are not open to the public. It is not clear why the college has not taken advantage of the fact that it is a women's college, but this may be explained by the fact that the college is a state institution and the state has not been interested in providing seats for women in the college. The college is in the hands of the Agriculture Department, and the Agriculture Department is in the hands of the State of Connecticut. The college is in the hands of the State of Connecticut. The college is in the hands of the State of Connecticut. The college is in the hands of the State of Connecticut.

THE COLLEGE

To all men who have entered Connecticut as new students this fall the Campus extends a most hearty welcome. That your college days may be of great service both to you and to C. A. C. is our sincerest wish.

The measure of each man's success is regulated by what he does for himself and for Connecticut. Either one without the other bespeaks failure. A determination to do both is the foundation of successful career at "Old Aggie."

The first issue is necessarily late due to the difficulty in providing for a printer. The advance in the price of paper, the higher labor cost, and the installation of the college press at college, were all factors in the delay. With the advance in the price of publishing and the cost of two additional pages it has been found necessary to raise the subscription price from $1.00 to $1.25.

Neither the delay nor the increased price of subscription were matters within the control of the editors, and it is hoped that no student or alumni support will be withdrawn because of them.

The following editorial taken from the Vermont Digest so aptly applies to conditions here that it is worth printing and deserving of consideration.

"The freshmen have not yet the right spirit as a class. They are not anxious and ready to do things. They are not looking for opportunities to do something. They have to be asked or forced. They are not active and they do not realize that they are here to give something as well as to take something. They are not yet acting like college men rather than preparatory school men."

What does it mean? When freshmen pass through a doorway in front of upperclassmen? Why is it that only about ten freshmen were at Centennial Field Wednesday night, to watch the practice? Where are the freshmen at the Student Union? What kind of "freshmen," those ten Freshmen, do you think are not report to work on the Centennial Field when their names were posted? Why do the freshmen wait to be spoken to? "The freshmen are not doing enough. It is up to every one of us to see that they do some work and do it with the right spirit." Drastic action is in order. The cases would set things right for the year and the freshmen class would be in a position to do at least a little good to the rest of us and to themselves. It is time for them to get along as a class and as individuals."

To the Editor:
Dear Sir,—It has always seemed to me that the Campus has been lacking in one important essential. That is, it is not just another voice but one of the major voices for the expression of student opinion. The College Catalogue refers to the paper as "an exponent of student opinion," reflecting the students' interests, abilities and progress of the students. To my mind it has never measured up to these qualifications. The editorial boards of the past can hardly claim to have aggressively represented the student body in their editorial columns; and the student body itself does not seem to care either not been interested, or has been too timid to take the initiative.

Because of this the Campus has assumed the character of a newspaper merely, rather than that of the progressive spokesman of the students that it should be.

This is a deplorable condition, and it has occurred to me that by writing this article I might be able to "start the ball rolling," so to speak, and assist in establishing a department that would make the paper an official representative of student opinion and student action, and that the catalogue claims it to be.

In the first place there should be an effort made to give the students themselves, of at least three or four topics of important daily interest. Not merely discussions, but criticisms. Critique with the intention of making things better. But don't hesitate over the seeming unpleasantness of the topic. Its very unpleasantness is an indication of its undesirability. And when a thing is undesirable, say so. If you don't, we won't do anything about it. You want to hurt anyone's feelings? Criticize the method, not the man.

For example, we are all interested in college examinations. And there is one phase of examinations as they are given here, that is extremely undesirable. That is, the old-fashioned habit of "catching up" or making "catch quizzes" in the work itself. The idea of trying to "catch a student unawares upon some small point of at least very minor importance, and then when he's unaware, has the subsequent omission of really important queries is incompatible with the idea of the exam itself.

Then it is not possible to succeed or pass even or attain to a very high grade in an exam that would require a thorough knowledge of the subject, rather than a freak memory for small details mentioned causally at one time or another in the closed room, it is very discouraging to be flunked because the instructor has the habit of "catching up."" In a modern progressive institution such as this, we look for more progressive and advanced methods. The current methods are not giving a picture of a high school, but along with the "word for word" system of reciting lessons. Neither practice was intelligent or fair. And it would, without some serious concern, render the practice useless. In fact, if the practice could be wholly eliminated here.

It is of course, many of the faculty who do not practice this system at all and they are the ones from whose classes the students claim to derive the most benefit. But where there are others that still continue it, the desired harmony and unity of purpose between preceptor and pupil is impossible.

Q. E. D., '19.

To the Editor:
Our College has put itself on record in the past by issuing a notice on the old story—the little fellow omitting the big one! Yafes it; Correct, there are those big fellows who have taken the initiative and our College paper as the exponent of student opinion. When a college graduate does not know what a college is, when a college graduate does not know who he is, when a college graduate does not know where he is, when a college graduate does not know why he is, if he studies have not been digested properly! Information accumulated upon information and there they remained, layers upon layers, in his exhausted and un­ responsive brain obstructing the process of churning, absorption and assimilation.

While Sunday is used by students for recreation, visits, walks, personal affairs, the day of Saturday should be set aside by all colleges as a day of reading, thinking and review work.

There is no reason whatsoever for the colleges to change the system being given to our public schools; the five-days-a-week basis should be left unchanged, and schedules arranged accordingly.

And I don't say that my opinion is the only right one. I am only showing the other side of the coin. I am merely opening a discussion.

Dr.

New Department In Education

A new department in education in charge of Professor Eaton has been added to the college deriving from the plan of the department to give courses that will fit both men and women for teaching. Four courses will be given in the Junior year. The first semester's work will cover the Philosophy of Teaching and the second semester, Educational Psychology will be taken up.

The work of the first semester of the Senior year will cover the Principles of Teaching and the second semester will be divided into two divisions, one in Home Economics to be taught by Miss Hayes, and the other in Agriculture taught by Professor Eaton.
Corn and Fruit Show Planned

The third annual corn and fruit show is to be held in the Havelø Farmory on Saturday, December 9th. The committee has just been appointed, with no definite plans being planned.

Rollin H. Barrett, '13, is chairman of the committee and has asked the following to help with the affair: Henry D. Munroe, '17, will look after the poultry; Alfred C. Sheldon, '17, will represent the vegetables, and F. M. Trinder, '17, the horticulture part. These men are specializing in the respective departments, so they will do the job well.

The Department of Home Economics will be represented by Miss Helen Clark. Complete details in regard to the show will be given out in the near future.

Varsity Does Well With Hard Schedule

(Continued from page 1)

CONNECTICUT vs. WESLEYAN.

The second game of the football season was played with Wesleyan at Midtown Field in Wesleyan's first game. The game was bitterly and evenly fought and it was only a "fluke" which gave the Red and Black the 7 to 6 victory.

Connecticut defended the north goal with the wind against it. Wesleyan kicked off, the ball being on their forty-five-yard line. The ball was contests, due to lack of knowledge of signals. Wesleyan repeatedly stalled for time and seemed to be afraid of Connecticut's "playful" but light team.

The Aggies were considerably cheered up by the presence of about 75 tourists from Connecticut and the roosters stood by the Blue and White team tenaciously.

- Summary:

**MASSACHUSETTS "AGGIES" vs. CONNECTICUT "AGGIES."**

On October 7th Connecticut's gridiron heroes travelled via the dangerous C. Y. to Amherst where they went down to an honorable defeat at the hands of the heavy Massachusetts Ag. Team, by the score of 12 to 0.

Massachusetts Aggies outweighed the Connecticut Aggies by 20 pounds per man, but when the game was ended, the Massachusetts boys knew they had been in a game. Connecticut went into the play stronger on the side lines or absent, and this weakened the team considerably.

C. A. C. kicked off, rushed the ball for the two first downs, then lost it on downs and an incomplete forward pass. In this quarter Hopwood made a corks-complaining thirty-five-yard run on a fake kick, and then tried for a field goal which fell short. The quarter ended with the ball in Massachusetts' possession.

In the first few minutes of the second quarter "Hoppy" again tried a drop kick but failed to get the ball over the crossbar. In the second quarter the heavy M. A. C. backs and penalties on the Nutmeg State boys put the ball on the thirty-yard line, from where Ford carried it over on the next play. Captain Grayson failed to kick the goal. The half time was up with the ball in the visitors' territory and in the possession of the opposing teams by the heavy M. A. C. backs and penalties on the Nutmeg State boys put the ball on the thirty-yard line, from where Ford carried it over on the next play. Captain Grayson failed to kick the goal. The half time was up with the ball in the visitors' territory and in the possession of the opposing teams.

Connecticut again kicked off and the ball was rushed and passed to the twenty-five-yard line when a fumble gave C. A. C. the ball. Clark recovering it. Connecticut fumbled on the next play but soon recovered the ball on an unsuccessful forward pass. The third quarter ended with the ball in the middle of the field.

On the first play Connecticut Aggies were penalized fifteen yards for side-line coating. Then gains again carried the ball to the twenty-yard line. Weeks then took the ball for the second touchdown. Massachusetts again failed to kick the goal. "Hoppy" kicked off again but M. A. C. soon punted to C. A. C. and a thirty-yard forward pass gave the boys new life. The game ended, however, before a score could be made.

Summary:

**M. A. C.**

- Weeks... Schafer... Pullback
- Score... Massachusetts Aggies, 12; Connecticut Aggies, 0. Touchdowns... Pond, Weeks... Time—Twelve-minute periods. Referee—Carpenter, Umpire—Pynn. Linesman—Kennedy.

UNIVERSITY OF VERMONT vs. CONNECTICUT.

The game at Burlington against the University of Vermont was one played under adverse conditions. The Vermont team was considerably heavier than Connecticut's, both on the line and in the backfield. And then it seemed as if the Connecticut boys were playing both the Vermont team and the official.

In the third quarter Dickinson ran 35 yards for a touchdown which was nullified because of a choice violation and "Dick" had run off-side. McCarthy, later in the same quarter, ran 55 yards for another touchdown but this was not allowed for the same reason.

The Green Mountain Boys scored first when Connecticut held them for downs on the shadow of the latter's goal posts.

C. A. C. fumbled or the first play and Vermont recovered the ball on the goal line. Vermont was allowed a touchdown and then kicked the goal.

With the ball in the home team's possession Dickinson intercepted a later pass and gave Vermont 55 yards for Connecticut's first score. It was just after this that "Dick" and "Mac" made their runs but the touchdowns were not allowed. Dick and Mac claimed they did not run off-side but to no avail.

Vermont's speedy quarterback scored the second touchdown in the second quarter. He made a run of 55 yards, running off-side and then back in again but the officials did not see it, hence allowed the touchdown. Hopwood made three points for Connecticut in the third quarter when he booted the ball over the crossbar from the thirty-yard line. This finished the

RHODE ISLAND, 13—CONNECTICUT, 6.

Aggies' Triumph in Everything Except Game.

Fighting nip and tuck as only old rivals can, Rhode Island State defeated the Nutmeg boys, 11 to 6, before the largest audience that has ever witnessed an athletic contest at Kingston. The Little Rhodies got the jump early in the same and after the first touchdown acted mostly on the defensive.

The visitors came back determinedly in the second half. Three times they carried the ball to R. I.'s ten-yard line
and failed to score. On the third try they gave up straight football after a few rushes, chipped in with a well-executed forward pass on R. L.'s forty-five yard line and won for a touchdown, Smith scoring. The attempt at the goal was said to be a failure, the official claiming that the ball did not touch the ground before being kicked. O'Brien, who scored the Kingstonites' first touchdown was also responsible for the second, making a dash through the entire visiting team for a score. This clinched the victory.

The contest had all the attractions of a headline event. The Aggies brought a rooting section of 150 students on a special train and the two contingents alternated between the halves in singing songs and making the Kingston plains reverberate with cheers.

The summary:

Connecticut Aggies, R. I. State:

Ryan, Left End, Right End.

N. F. A. vs. SECONDS.

In a game which was characterized by shaky playing and injuries to players, the Aggies' Scrubs outscored the Norwich Free Academy, 19 to 12. Wilson's plunging stood out as the feature of the game. The contest will probably be remembered as the game in which Arthur Probst, the speedy end, suffered a slight concussion of the brain and left the field unconscious for twenty-four hours. Mr. Warner and Mr. Ackerman were the officials.

SECONDS LOSE TO MUNSON.

The second team opened its season against Munson on October 11th at MUnson with defeat with the time of 15 to 6. As a team the boys played well, but they didn't get started in good shape until the last half and on Munson re-
ceived the kickoff and was held for down on the forty-yard line. After a few more plays the scrubs were held for downs, and a poor pass to Marry, who was kicking the ball to Munson. DeMarsh then took the ball over for a touchdown. Throughout the first half DeMarsh circled the sec-
ond's end and almost at will and another touchdown soon resulted.

During the second half Connecticut repeated its offensive and several times brought the ball within the very shadow of their goal, but couldn't push it over. For Munson, DeMarsh was the star of the game, while in this championship, Beebe and Whipple did excelent work for the second.

Judging Teams Get Some High Scores

C. A. C. DOES WELL IN LIVE STOCK AND BUTTER JUDGING, WIN CASH PRIZE AT SPRING FIELD.

A live stock judging team, repre-
senting Connecticut, competed in a judging contest at Brookfield, Mass., which was open to all New England Colleges. A team consists of three men and one alternate, and awards are made for team scores as well as in-

dividual records. In this contest the Connecticut team received first place on AYRISHIRE, second on horses, and was tied for second place on Holsteins. C. A. Barnes, of Mystic, made the highest score in the contest on AYRIRSHIRE, and A. C. Sheldon, of West Suffield, was second highest on this breed. S. M. Mead, of Greenwich, Conn., made the second highest individual score on Holsteins. J. A. Kuebling, of Brooklyn, N. Y., accom-
panied the team as alternate.

This same team competed at the Na-
tional Dairy Show, in which the com-
petition was much stronger, there be-
ing eighteen teams competing. The scores for all teams and contestants were very close. The best score was made by S. M. Mead, who stood sec-
ond in AYRSHIRE, in a field of fifty-

four, and a team was also sent to the National Dairy Show to judge butter. The members of this team were A. C. Sheld-

on, West Suffield; O. T. Call in New Haven; J. R. Ayer, North Franklin, and J. A. Kuebling, Brooklyn, N. Y., as alternate. Nine Agricultural college teams competed in this contest, and the Connecticut team ranked fourth, win-
ning a cash prize of twenty-five dollars.

Cottage Notes
Miss Corinne R. Tagly, of Water­town, New York, who is a graduate of Pratt Institute, has been appointed in­structor in Home Economics to fill the place of Mrs. Cousley, whose resigna­tion takes place this fall.

The former gymnasium in Grove Cottage is being transformed into a cooking laboratory. New equipment, such as porcelain sinks, electric stoves, and many larger store-room facilities will greatly improve the conditions under which the students work.

There are twenty students, resident and day, taking work in Home Economics.

There will be an informal dance at the Cottage every Tuesday evening from six-thirty to eight. Everyone is cordially invited.

Miss Hayes was instructor in House­hold Arts Education at the Columbia University summer session.

Miss Costello attended the summer session at Columbia University, taking courses in Educational Psychology, Household Arts Education and Design.

Connecticut Second In Judging Horses
SECOND ONLY TO M. A. C. IN NEW ENGLAND—COLLIE HORSES DO WELL WITH DRAGON JR. SECOND.

The standing of the Connecticut team in the horse classes at the New England Contest in Breton is as follows:
Massachusetts, 387.5.
Connecticut, 322.5.
Maine, 321.5.
Rhode Island, 327.5.
New Hampshire, 268.0.

The horses judged were particularly hard classes as they averaged over a ton in weight, were all the same color, and practically the same age and in high condition. Both classes were shown at the same time in a small ring, and only a short time was allowed for placing, all of which tended to confuse.

The horses shown by the Animal Husbandry Department at the Na­tional Dairy Show caused much favor­able comment, and were beaten only by J. Crouch & Son, of Indiana.

That Dragon Jr. was entitled to win in his class is the consensus of opinion of all who were close observers. This would have given him a championship in Percheron stallions and while it is no disgrace to stand second to a Crouch entry, it was very disappoint­ing not to get the championship.

The comment of the Breeder's Gazette of Chicago follows:
"The class for stallions, two years old and under, four brought out by the Connecticut Agricultural College, a splendid speci­men of the breed. 'Ideal,' a horse with a little more scale was placed over Dragon Jr. as was popularly pro­nounced superior in conformation, quality, action and set of legs and feet. Dragon Jr. is a black, weighing 1,759 pounds; as a two-year-old, he was the popular choice for champion­ship honors."

John Buckler, superintendent for Mr. John A. Spoor, ex-president of the Union Stock Yards, Chicago, said:
"There is no question about his super­iority over the other colts. Dragon Jr. should have easily won in his class and been champion of the show."

Mr. Buckler examined Dragon at the Inter­national Live Stock Exposition at Chi­cago in 1907, when he won grand championship. He states that in his opinion the colt is equal to his sire in every respect and superior in the stiles. His opinion was voiced by many of the leading stock men of this country and Canada.

Carbon II, who through the kindness of Mr. R. D. Wicks, of Pomfret, stayed at the College barn last year, was third, and the Crouch farm stood fourth, with their second entry in this class.

In the three-year-old Percheron maro class, Crouch secured first and second, and Queen Victoria, shown by the College, won third, and a Massachusetts entry fourth.

Alumni Notes
R. C. Ackerman is employed by the International Agricultural Co-opera­tion of Buffalo, N. Y.
H. T. Averey, Jr., has charge of the field experiments in plant genetics at the Carnegie Station of Experimental Evolution, Cold Spring Harbor, Long Island, N. Y.
M. R. Cahill is superintendent of the Connecticut State Agricultural College and says he ex­pected to stand on this farm.

Department Notes

DAIRY.

Millicent Fay Pieterse, a Holstein cow in the cow herd, has just finished a year's test record, having produced 28,827.7 pounds of milk and 347.47 pounds of butter fat, equivalent to 214.3 pounds of butter. She was born in 1919 and had for her first year's record, last year, 17,019 pounds of milk and 552 pounds of fat.

The first student butter judging contest was held this fall in Springfield at the National Dairy Show. There were ten college teams represented with three men on each team. Pennsylvania won the contest while our team took fourth prize. The members of the team consisted of A. C. Sheldon, G. T. Cannon and J. E. Aver.

At the stock judging contest at the National Dairy Show our team was represented by C. Farnese, B. Sheldon, with Suelting as alternate. There were 18 teams in the contest. We secured fifteenth place. The four leading dairy breeds, Holsteins, Jerseys, Guernseys, and Ayrshires were scored in two classes consisting of four bulls and four cows. S. Mead was second high man in the Jerseys. Nearly all the prizes were taken by the Western College. Eight successive hours of work were required to complete all the breeds.

EXTENSION.

Mr. J. E. Gifford has recently been elected county agent for Tolland County and Mr. B. N. Ellis for Windham County. At present the demand for county agents far exceeds the supply. It would be well for any student who has not as yet decided what he wants to do to look into the matter, as there is a big opportunity here for college graduates.

Messrs. Baker and Davis of this department will represent this state at the conference of county agents to be held in Washington.

ANIMAL HUSBANDRY AND FARM.

Two head of short-horn cattle consisting of the New Hampshire breed of cattle, were taken by the Hampden Normal and Agricultural Institute at Hampden, Va., and are now being cared for by C. A. and now at Hampton are Charles K. Graham, Director of Agriculture, who was professor of Dairy at Mora for five years, and James R. Cuno, '06, now a teacher in the Agricultural Department.

James H. Gamble, '93, is at Washington, D. C., working for the U. S. D. A.

A. V. Osmun, '02, has recently been appointed to take charge of the Botanical Department at Massachusetts Agricultural College.

J. Clark, '95, has resigned as assistant state leader in farm demonstrations for the state of New Jersey.

Professor (in genetic class as he wrote on the board 1,000,000-400,000-500,000—You see we are just dealing with round numbers.)

Student (in back of the room)—'Eh, yes, naturally.'

Titan 10-20

$900 Cash f. o. b. Chicago

THERE is hardly a farm with a hundred acres or more of tillable land but what has belt work enough to keep a 20-H. P. engine busy when not doing field work. This belt work alone will in most cases pay twenty five cents a year fuel bill of a Titan 10-20 tractor. Add to this the deep plowing, diskimg, harrowing, seeding, fallowing, harvesting and hauling the Titan will do during the year, at less than horse cost, and you see at once what a gilt edged investment this tractor is.

Power, strength and economy as combined in the Titan 10-20, mean everyday usefulness. If has power and strength to take care of the everyday work of the farm. It is small enough to run light machines with economy. It works successfully on kerosene. It reduces the number of work horses needed. It saves so much in so many different ways, and does so much that it cannot help but pay for itself long before it is worn out.

Write for full information about this Titan 10-20—the tractor that pays for itself, that furnishes power at kerosene cost (less than half the price of gasoline), and that is just the right size, weight, and style for farms of 100 acres or more.

Tangage

"A man who'd maliciously set fire to a barn," said Deacon Jones, "and burn up a stable full of horses and cows, cuss'd to be kicked to death by a jack- ass, and I'd like to see the one to do it."

A subscriber asks, "How long cows should be milked"
The same as short ones, old top.

Bill Brown asked for an opinion on late plowing—"We find Bill, that as a rule, nothing should not be continued later than eleven o'clock at night. It gets the horses into the habit of staying out late, and it unduly exposes the plow."

"What I want," said a noted college professor, pointing at one of his pupils, "is a good, common sense."

"Exactly," said the student, "That's just what you need."

Professor—"What is found in suit water besides chloride of iodine?"

Sophomore—"Herrings, sir."

Stoors Definitions.

Aggie—Any bright young man who comes here to Stoors to learn how to be a stockbroker or an insurance agent.

Gooster—A person who believes that farming will pay.

Decresed—The fellow that sold the best thing about Stoors was the road to Wille.

(East student watching goal posts being set up)—"What are those for, the running high jump?"

Wyandottes Win 5th Egg Laying Contest

C. G. KNIGHT, OF BRIDGEPORT, R. I., TAKES FIRST PRIZE—S O M E NEW RECORDS ESTABLISHED.

October 29th marked the end of the fifth international egg-laying contest held at Stoors, conducted by the Connecticut Agricultural College, and the Stoors Experiment Station, O. G. Knight, of Bridgeport, R. I., captured first place with a pen of White Wyandottes, hatching a total of 3,265 eggs for the year. A pen of White Wyandottes, owned by Tom Barron, of England, with 2,188 eggs, took second price, and Oregon's from the Oregon Agricultural College with 2,122 eggs third prize. A pen of Red Sussex, owned by Tom Barron, of England, with 2,188 eggs, took second price, and Oregon's from the Oregon Agricultural College with 2,122 eggs third prize. A pen of Red Sussex, owned by Tom Barron, of England, with 2,188 eggs, took second price, and Oregon's from the Oregon Agricultural College with 2,122 eggs third prize.

The highest individual record was obtained by a White Leghorn owned by A. F. Robinson. She laid a total of 294 eggs, establishing a new record for contests held at Stoors in which ten birds have been used in a pen. A White Wyandotte owned by O. G. Knight was second with 287 eggs.

The average egg production for broilers for the year was as follows: Plymouth Rocks 162.4, Wyandottes 162.4, R. I. Reds 158.7, White Leghorns 164.4, and miscellaneous 117.2. The average for all was 142. Nineteen varieties of birds from fifteen states and three countries were represented in the contest.

The eggs laid during the whole contest weighed about 10 tons and sold for an average of $40 per ton. The death rate this year was slightly lower than the year previous, being 112 and 126, respectively. At present it is estimated that the returns from sale of eggs and cost of entering pens will total a little higher than the cost of conducting the contest, although the official report has not been given out.

The sixth international egg-laying contest will begin on November 1st. There are only nine varieties being represented this year. Nearly half of them are Leghorns. There are forty-three pens of Leghorns, two of Campines, two of Orpington, two of Barred Rocks, three of White Rocks, two of Buff Rocks, fourteen of White Wyandottes, two of Buff Wyandottes, and the remaining pens out of the 106 are R. I. Reds. Only one pen arrived out of condition and those were English birds. The new birds are laying heavier so far this year, and appear to be a better set than those of former years.

A Labor Day for C. A. C.

We of the East are accustomed to look to the West for big things. We carefully peruse the annual catalogs of certain institutions in the land of the setting sun and envy the men who have been fortunate enough to obtain or finish their higher education there. We speak with pride of the men of our faculty who have graduated from colleges in the West and call attention to the fact that the departments with which they are connected are our biggest and most progressive. Fifty years ago Horace Greeley said, "Go West, young man, go West," and we cannot get away from this advice.

California, perhaps, of all the states in the Far West has been "boosted" the most, and she holds the topnotch place for progressivism only because she has earned it. The Golden Gate commonwealth boasts of many universities and colleges of exceptionally high rank. The University of California, to take a particular example, is one of the largest and most progressive of any of the institutions supported entirely or in part by State funds. That statement means that in the number of students, size of faculty, breadth of study and investigation possible, in elaborateness of equipment and in character of the work turned out, California is nearly at the head of the list. Nor are these things all.

"Cal," as the students affectionately denominate their Alma Mater, has student body without parallel for the work they do or the way they do it. To tell of all its customs, exploits, and plans would take a book, but on occasion which they celebrate every year is noteworthy indeed.

With hundreds of acres of land on campus, the students look far to find various little imperfections and wrongs, but instead of sending the advisory committee to Paris, they let them be. Presby to remedy their grievance they make an application to fix it themselves.

A Labor Day is designated annually and on this holiday all the students gather to do their particular stunt. Many miles of walks about the grounds have been made in this way and various other improvements are credited to the co-operation of the students.

A few years ago a mountain which

Ready!—"Roll Your Own!"

A fresh, lively "roll your own" cigarette of "Bull" Durham is as quickening and inspiring as the roll of drums or the "get busy" notes of a bugle call. "Bull" Durham is the smoke of the red-blooded—the bright and breezy smoke that goes with youthful enthusiasm and energy.

Genuine "Bull" Durham

SMOKING TOBACCO

No other tobacco in the world has the unique, mellow-sweet mildness or the delightful aromatic fragrance of "Bull" Durham.

Made of rich, ripe Virginia-North Carolina leaf, "Bull" Durham has that distinctive, exclusive quality which has made it the favorite smoke of three generations.

Only by "rolling your own" with "Bull" Durham can you get a cigarette with the individuality and personality that give such perfect, lasting satisfaction.

Study Your Wheat Before You Harvest It

If the yield and quality are bad you must do better. If they are good it will pay you to make them better. A better fertilizer will do it. The usual wheat fertilizers do not contain enough

POTASH

Use 6 to 8 per cent. Potash, instead of 1 to 2, and balance the phosphoric acid of the bone or phosphate.

GERMAN AMERICAN WORKS, INC. 100 Broadway, New York

Chicago, McMurrich Block

Atlanta, Eagle Block

New Orleans, Whaley Central Bank Bldg.

Artemus, Bank & Trust Bldg.

San Francisco, 32 California St.
was plainly visible from all parts of the campus, was decorated with a large "C" made of concrete. It was a three-mile journey from the University grounds to the letter, but the whole was completed in one day, and a big celebration came every year on that date when the anniversary was renewed by the Freshman class.

Not satisfied with this large testimonial to their abilities the student body last year decided to construct a wall on the top of the mountain where the letter was. The College of Law attended to the lease and right-of-way, the Engineers surveyed the land, the Civil grade and the Fencers promised a dinner. When the Labor Day came each class had a section to complete and even the Faculty was allowed to play. The few hundred yards that each class must grade, drain and surface were soon finished and benches conveniently placed told the tale of the workmen.

After eating the Co-eds' offering the Judges placed the sections in regard to the quality of workmanship. Of course the Engineers were first and the Faculty—way down. Then with the band at the head, the students marched to the top of the hill above the letter, sang their Alma Mater and shouted their cheers of triumph and self-congratulation. That night the letter and walls were lighted up and ever since the locality has attracted many visitors.

Now, here at Storrs there are many things to be desired, but there is one particular way in which the student body would do well in imitating our far western friends. Our poultry building is the only one of its kind in New England and the equal of any in the country. It is, however, situated at a distance from the dormitories and main buildings and should be of easier access. And

Noves In Faculate

SOME WORTHY ADDITIONS TO THE FACULTY ROSTER.

PROFESSOR EATON.

Professor Theodore H. Eaton, secretary of the faculty and professor of Education, was graduated from Harvard, in 1906, with an A. B. Degree. The next year he spent in graduate work at the Massachusetts Agricultural College. He received his Masters degree in Education at Columbia in 1915 and expects to get a Doctor’s degree at the same university in a few weeks. His thesis on "Organization and Methods in Agriculture in Secondary Schools" has already been submitted.

Professor Eaton comes here well-qualified for his work, having been a dairy farmer for six years, principal of a high school, from 1906-09, a poultry farmer from 1909-12, instructor in Animal Husbandry at Cornell in 1912-13, professor of Agricultural Education at the Central State Normal School of Michigan from 1913-14, and instructor in Agriculture and Rural Education at Columbia from 1915 until he came here.

PROFESSOR SMITH.

Professor Guy C. Smith, who takes Professor E. O. Smith’s place as head of the Department of Economics, also has charge of co-operation in regard to the marketing of farm products in the extension service. He was graduated from the Michigan State Normal College, in 1906, where later he was assistant librarian for two years. He has held the position of principal of the High School at Evart, Michigan, and superintendent of schools at Homer, Michigan. He received his bachelor’s degree at the University of Chicago, in 1911, where he also spent one year at graduate work. In the fall of 1911 he became associate professor of Economics at New Hampshire State College and head of that department in 1913. Last year Professor Smith conducted an investigation in New Hampshire on the condition of farm mortgage credit and published a research bulletin on that subject.

Annual Rope Pull

Some of the real old life and pep was seen at C. A. C. at the annual Sophomore-Freshman Rope Pull held early in the fall. As is usually the case the Freshmen disturbed the silliness of Swan Lake by their presence therein but it was by no means a walk away for the Sophs. For the first six minutes it was nip and tuck and at one time the Freshmen had five or six feet of rope to spare. Gradually, however, their footing in the sand and sawdust on the south side of the lake gave way and this disadvantage, together with the system and experience of the Sophs, finally proved too much for the Freshies. The whistle blew at the end of the allotted ten minutes with the Freshmen in the middle of the lake still clinging to the rope.

As the Freshmen began to emerge from the water depths at the other side of the lake they were met by the victorious upperclassmen who deemed it necessary to give them one more ducking while the "kettle was boiling," but much to their surprise they found more than they had anticipated and after the rush many of the Sophmores as well as the Freshies were participating in a much needed shower bath.

The committee in charge were: Edward E. Newmanner, 17; Henry A. Weidlich, 17; Arthur R. Watson, 17. Officials—Professor Judkina, referee; Coach Donahue, starter and timer.

The College Book Store

is not conducted for profit. It is run for the convenience of students, college departments and employees. Such student and office supplies are carried in stock as are usually in demand. These are sold at ten to twenty-five per cent. below regular retail prices.

The store will also buy for you any article not carried in stock. To our way of thinking this service is simply applying the Golden Rule to a business transaction. We aim to serve you as we ourselves would like to be served. We believe we shall realize our aim in every detail.

We Save You Money

We Give Service

It will pay you to buy ALL your stationary supplies at this store.
