Dairy Dep't History Shows Progress Made

MANY IMPROVEMENTS MADE IN LAST FEW YEARS IN HERD, BARNS AND CREAMERY.

With the awakening of interest in Dairying it is natural that we turn with interest to what our Agricultural College is doing in the Dairy Department, and its development during the last score of years.

Beginning with 1894 the dairy products were taken care of at the old Farm House standing north of the present dairy barn. From 1911-18 the dairying and butter making were done in the basement of the present Experiment Station. The laboratory work of the students was carried on upstairs in this building. In 1897 a part of what is now the wing of the dairy building was built. Equipment was purchased and the handling of dairy products at the college was started on a firm basis. In 1900 the dairy building was built and frequent additions of modern equipment have been added. The creamery consists of a butter room, engine room, receiving room, pasteurizing room, ice cream room, charning room, testing laboratory, separator room, refrigerator room and sterilization room. All necessary power is furnished by three engines and all labor-saving machinery is used. The equipment consists of the Creamery Packard churn, butter-worker, wagon agitator, and cream ripener, and a pasteurizing machine for milk. The Sharpless and De Lavaj separators and clarifiers, ice cracker and ice cream freezing machine are used.

The new dairy barn was built in the summer of 1912. Previous to this time the present ox barn stood as an addition to the old wooden portion of the present dairy barn. At the time of the building of the present stables, the arrangement of the stables under went a great deal of change. The dairy barn proper was built of fireproof material and is used for stanchioned stock only. The most modern ventilation system was placed in the building and as much labor-saving machinery as possible. The basement of the old barn was fitted to be used for the various other needs connected with dairying.

A milkhandling room, a locker room for the benefit of the help and an office room were (Continued on page 3.)

What C. A. C. Offers To the Young Woman

AN ARTICLE BY PROFESSOR HAYES POINTING OUT THE VALUE OF AN EDUCATION TO THE YOUNG WOMAN.

The Connecticut Agricultural College offers to the young woman of Connecticut an opportunity to prepare for the ever widening vocational field which the woman of to-day may enter. At the end of a high school course the young girl, unless she has had some vocational guidance is often at a loss to know what to do next. She has certain vague ideas of a "career" and usually overlooks the fact that now-a-days careers are not born but made through much training and application.

The demands of modern life for specialized higher education are as insistant upon the young woman as upon the young man whether she goes into the business or professional world or attempts to solve the problems of her own home.

Besides this specialized training for the vocation she may see fit to choose she must have a broad foundation of education in appreciation of the fine things of life. "A loaf of bread for every one and a pot of hyacintus, too," expresses the relation which vocation should bear to education, one is complimentary to the other.

In the four years' course in home economics which is offered to young women by the college an examination of the catalog will show that training is offered in several lines.

The home economics of two decades ago trained teachers of cookery and sewing emphasizing technique. The home economics training of to-day reaches out in many directions; technique has its place but not as an end in itself. Good cook and skilful dressmakers are needed but unless their work is founded upon broad scientific principles, it has little upon which to base its claim for recognition as a profession.

What use is it to understand the manipulation of an emulet unless one knows also the food value of the product, its place in the diet, its cost and market value, its behavior in relation to heat, etc.? Just as the training for teachers of home economics has broadened so (Continued on page 4.)

Connecticut Five Defeats R. I. S. Team

Connecticut's speedy basket-ball five at last managed to shake off the fateful "jinx" which has been following them all the season, and put over a close win against the Rhode Island Five on February 3rd, at Kingston, R. I. This is the third consecutive defeat handed the Rhode Islanders by the Connecticut boys and the second time that it has happened on the Kingston floor. The defeat of Rhode Island in this sport also helps in a large measure to remove some of the sting of the football defeat.

The Nutmeg State boys deserve much credit for the victory as they played against great odds presented in the character of the Rhode Island floor. The floor was small, with both baskets hanging from the ceiling and one basket was at two or three feet higher than the other one. There was also no off side except at the ends, the walls forming the boundary of the court on the sides. The Rhode Island boys being on their home floor, had the advantage and put up a whirl-wind, scrappy fight. The Connecticut lads, however, fought valiantly and at no time was the score more than two or three points in the football defeat.

The score at the end of the first half was 15 to 11 in favor of the home team. Undaunted and determined to win, the Connecticut team came back in the second half and played as well as they had in the first half.

Dickinson, Shea and Norton starred for the visitors while Lawrence and Grey shone for the home team. Dickinson shot 12 goals from fouls out of 16 fouls called on Rhode Island men. With one minute to play in the second half the score stood 26 and 26. Norton then shot a pretty basket and Connecticut took the lead. With but 15 seconds to play, a foul was called on Rhode Island and Dickinson shot his 12th goal from foul. Lucky 13th.

The summary:

Shea ........... 7 ...... Lawrence
Dickinson ........... 6 ...... Grey
Spencer ........... 3 ...... Pratt
Sheard ........... 2 ...... LeHorne
Traurig ........... 1 ...... Malloy
Barlow ........... 1 ...... Player
Score--Conn. Aggies 29, R. I. State 26

Varsity Five Defeats Pratt in Fast Game

VANQUISH BROOKLYN INSTITUTION 35-30--LOSE TO STEVENS AND SETON HALL ON NEW YORK TRIP.

Connecticut's basket-ball team left on Wednesday, February 7th, for a New York trip of three days. On each of these days a game was played, the first at Seton Hall, South Orange, N. J. On the 7th The others were against Stevens Tech., Hoboken, and Pratt Institute, Brooklyn.

SETON HALL.

The Aggies' team, having traveled all day to reach their destination, was tired and so did not seem able to put up the peppery fight needed to bring victory to their side.

Another disadvantage to the Aggies was that the court was netted and was about one-half the regulation width.

The game was fast and well played, but Connecticut's breaks were few and far between. Setan Hall, on the other hand, were on the floor which they were accustomed to and their breaks came often.

Shea, Connecticut's right forward, ran into a Seton Hall player in the second half and suffered a broken nose as the result. Norton was having ill luck in getting the jump at the toss-up. Shea, therefore, ran in to get the ball and the collision resulted. Musser then went in at Shea's place.

Dickinson jettared for Connecticut and Somers and ige played good games for the home team.

Summary:

C. A. C. Seton Hall.
Shea, Musser .......... Somers
Dickinson .......... Brennan, Igoe
Norton ............... McCarty
Barlow ............... Heine, McDonald
Traurig, Seign ... Sullivan
Score--Seton Hall 34, Conn. 19.

STEVE'S TECH. GAME.

The game with Stevens on February 9th was poorly played by both teams and it was only the lucky break and

"THE COLLEGE"

Editorials

Owing to the absence of the Editor-in-Chief, this issue of The Campus was put out by the Managing Editor. Considerably difficulty was experienced in getting the material and editing it. If the issue is a little late in coming out the above will explain the reason. To take the editor out of the board without any warning means quite a lot to the welfare of the paper. The reason for his absence from the college will be found in another column. It is hoped, however, that he will soon be able to return to his duties.

Well, mid-year examinations have come and gone and as usual some students have fallen by the wayside. So let bygones be bygones and set ourselves for the race that is before us. The second semester has already started and is well on its way and with it comes lessons to prepare, laboratory exercises to do and work to hand in. Perhaps a piece of advice at the beginning of the semester might help some one from "funking out" in June. Start the semester right, do your work well each day and when the final examinations come at the end of the college year, you will have nothing to worry about. It does not mean so much where just a little of hard studying is done each day, but if you wait and try to do a whole semester's work in each study a week before the finals, it means much. Of course, such things have been done ever since education started and will continue to be done, by a few at least, as long as education is promoted at all.

Do not try to fool yourself, or relive your own conscience by saying, "I will begin tomorrow," but begin today, for if you keep putting lessons aside you soon find out that the semester is drawing to a close and no studying has been done. Perhaps this advice refers more to the lower classes, but we observe that even Sophomores sometimes fail to reach the required marks and are forced to leave college. So, remember, start the semester right, do good consistent work each day and final examinations will lose much of their horrors.

Our College Paper

To the Editor of The Campus:
As good as "The Campus" is this year, I have a criticism to make. I do not wish to criticise the board or the printer but rather the readers. And I mean by readers, not so much the Alumns as the under-graduates, the readers that are here at C. A. C.

The news of the paper as well as all other articles are written by a comparatively small per cent. of the present student body. The way that I feel about it is, that a man does not necessarily have to be a member of the board before he can write anything for his college paper. I have talked to the editor and he seemed to be willing to have any body write articles for The Campus. Of course he could not guarantee to publish every thing that is written by different students but I am sure that he would at least consider the article.

And let me add right here in case the article was not published the writer should not get "peved" and say that he would not write any more for the paper; but he should go around and see the editor and find out the real cause. This would do away with all misunderstandings and would help much towards the advancement of "Our College Paper."

We support our athletic teams in other ways than just by paying our A. A. dues and by showing our interest in the games. In the fall we go out to the games and support our team by yelling till our throats are sore. The same thing takes place in the winter and spring at the basketball and baseball games.

So why not support our college paper by doing a little more than just paying $1.25 a year; write an article for the Campus even if it is a whole. There are plenty of men in your college that have ideas or have had experiences that could be published in The Campus and would perhaps help some other student. Not only the C. A. C. students but boys in the high schools of the state. I say, "boys in the high schools in the state" because I understand that the college takes 75 copies of each issue and sends them to the different high schools of the state. An article by some student might mean the coming to C. A. C. of some boy that has never seen the place. It might help more than we realise in making good the college slogan—"400 students by 1926."

So let each man take it on himself to write something for the college paper, then we can no more call it "The College Paper," but rather "Our College Paper."

This is one of the things that we can do to help the advancement of our Alma Mater. Then "Our College Paper" would be a little more like what the catalogue claims it to be, "An exponent of College life, reflecting the feelings, interests, abilities, and progress of the students."

C. A. P.

To the Editor of The Campus:
On Saturday evening, December 30th, about sixty active and former students and Alumni of the College of Hartford County, met at the Hartford Y. M. C. A. and organized the Connecticut Agricultural College Club of Hartford County. The organization meeting was preceded by a supper which was followed by talks by President Beach, Professors Eaton and Thwing, and several of the alumni and students.

Records show that there are some two hundred in this county eligible for membership in this Club and prospects are bright for a healthy organization, whose purposes are, "to promote fraternal and friendly relations and social intercourse, to keep informed of the needs of our Alma Mater and to assist in every possible way to advance her interests."

The officers elected were:
President, James B. Thwing, Hartford.
Vice-President, George H. Hollister, Hartford.
Secretary, Harry G. Hanks, Hartford.
Treasurer, Thomas H. Desmond, Hartford.

Executive Committee, the officers and William Chamberlain, of Rocky Hill, and C. H. Barnard, of Bloomfield, both of whom credit should be given Professor Judkins of the College Publicity Committee, for his invaluable work in making this organization a possibility and for the keen interest he has taken in it. At the present time work has been started on forming organizations in other counties throughout the state, and there is no doubt but what such organizations, if properly carried on, can do a great deal of good for the College and for the members of the club.

At the second meeting of the Hartford County Club, which was held in the form of a Smoker at Harry Bond's restaurant, January 27th, Professor G. C. Smith of the faculty, and a member of the College Publicity Committee, was the speaker for the evening. Professor Smith's talk was along the line of publicity work and was intensely interesting.

A general discussion followed the meeting and several interesting and important matters were brought up. Some of which would certainly be worthy of publication in The Campus.

At the suggestion of one of the members a vote was taken to ascertain from those present, how many had entered Connecticut from the city, and who are now directly engaged in agricultural work. Of the forty-five men present, eight had entered Connecticut from the city, and of those eight, two are now engaged in agricultural work. Out of the forty-five present, twenty-three are directly engaged in agricultural work, and six indirectly interested along agricultural lines.

During this discussion the fact was brought out that about 75 per cent. of the present students at Connecticut come from the city.

Probably the most interesting discussion of the evening was that pertaining to the College paper, "The Campus," and it should be stated right here, that this Club voted unanimously to support the paper and expressed their faith therein, so whatever may be written in the following paragraphs, even if in the way of criticism, is written with the hope that the Connecticut Club of Hartford County may, in more ways than one, be able to assist in strengthening and renewing the interest in the College publication.

There is no doubt but that a strong, well-edited and managed College paper is one of the greatest advertising mediums an institution can have. It is the link between the College and the Alumni, and certainly any college must have the support of the Alumni and former students to be successful.

It is true that there has been, and is, a great deal of "knocking" for The Campus, and it is no doubt true that many of these "knocks" have been deserved. Of course it is very easy for the man on the "outside" to find the faults and overlook the good work of an undertaking of this kind. I am not in a position to write on what the present Campus board are up "against" in the matter of issuing their paper, but know that a statement from them would be appreciated by our Club, and given due consideration by its members. In fact, we hope later in the year, to have the pleasure of entertaining some of the Campus Board and hearing their "troubles" direct.

It is reported that the majority of the Alumni do not subscribe to the College paper. Why? Certainly not
because they have lost interest in Connecticut, but I believe, mainly, for the following reasons. For the past two or more years the paper has been issued at almost "any old time," so when received by the subscribers the news is ancient history. Anything of this sort is certainly not a drawing card for renewal subscriptions. But I think the most important reason, from the standpoint of an alumnus, is the neglect, and, I think I might say, entire omission of the Alumni Notes. This column in the paper should be its feature. It will take time and hard work to make it so, but it can be done, and until this is accomplished I doubt very much whether any paper published by the students of the College will be a success.

It does not seem fitting for me, in this article, to take up the troubles of the paper from the standpoint of the Bantam, but definitely it is not being properly supported by them. Two or three men alone cannot run a college paper. Certainly Connecticut has plenty of material and there is no reason why every issue of THE CAMPUS should not be full of interesting reading. On the other hand, it is doubtful whether the Faculty have supported the paper. I doubt whether, until very recently, they have given much thought or attention to it. It may be true that the paper should be run entirely as a Students' publication, but as such it is deserving of support, financially and otherwise, by the College faculty.

As stated in the beginning, this article does not mean to unduly criticize anyone in particular. Possibly the present CAMPUS Board is doing the best it can under existing conditions, but the aim of this article is to make an appeal to every Connecticut man, to support and assist in building up a paper that will prove worthy of our Alma Mater. This can only be done by cooperation and hard work on the part of the Alumni, the faculty and the student body.

In closing this article I might add that all members of the Connecticut Club of this county are to become subscribers to THE CAMPUS by an arrangement made with THE CAMPUS Board.

Yours very truly,

HARRY G. HANKE,
Secretary, Connecticut Agricultural College Club of Hartford County.

---

Dairy Dept. History Shows Progress Made
(Continued from page 1)

put in. Three large calf pens were built and two box stalls for convenience.

To accommodate the increased size of the herd which is at present 79, all animals included, it is planned to build a new addition soon similar in size to that built in the summer of 1915.

The dairy stock like the building had rather a lowly beginning. Previous to 1897 the herd consisted of 23 grade cows and were bred to low sire. The stock at the present time in the dairy department consists of 79 animals nearly all of the cows being registered stock and valued at a sum of over $12,000.00.

The Holstein herd which is the largest consists of 13 cows, 6 heifers, and 4 calves. The herd has descended from two advanced registry cows purchased by President Beach, then Professor of Dairying. They were purchased from the farm of Gregory, of Bynacuse, New York. One of them, Fay, had a yearly milk record of 16,600 pounds and a seven days' test record of 13.6 pounds of butter. The other Altonanna Pieteterje A had a yearly milk record of 17,900 pounds of butter. Both these cows were sired to De Kol Burke and their calves formed the material foundation for the Holstein herd. The first Holstein sire to be purchased was a yearling, Hubbard Netherland De Kol and was bought from C. O. Darby, of Vernon Center, for $35.00 delivered. This bull came from an extremely high producing herd which is at present built up in the dairy department of the College faculty. This can only be done by cooperation and hard work on the part of the Faculty, and the present sire is Joly Oxford bought of L. V. Walker, of Sothington, Conn. Daughters of this bull have stood first and second at Hartford and Brockton, and some of the western shows in 1915. He is typical of Jersey type and many Jersey men think he would have stood high at the western shows this fall. The Jersey herd as a whole is uniform and of good ability, many of them having produced over 500 pounds of butter and one, Victor Prephpo, having produced over 11,600 pounds of milk in a year.

GERMANY.

The Guernsey herd originated from two cows purchased from Penn and one heifer and a bull from New Hampshire. Royal Rose, a bull bred by H. E. Dineol, of South Coventry, was added to the herd and proved himself a successful sire. In 1903 additional cows were purchased from C. T. Gill, of New Jersey, completing the list of purchased cows in the herd. The present Guernsey sire, Messei Scovil Eviel Sequel (a son of Messer Sequel heading the Grassland Herd) was presented to the college by Cheeney Brothers, of South Manchester, Conn.

Ayrshire.

The Ayrshire herd with the exception of "Stell Barratt" came from the herd of Well of Wethersfield, two descendants of whom are in the present herd. In 1903 two Ayrshires were purchased from Sir Robert Ruxford, of St. Anne, Quebec. The daughter of one of these Ayrshires, Snowdrop, is in the herd at present. Other Ayrshire cows were purchased at intervals but were not bred into the present herd. Manchlin, of Storm, a descendant of the Canadian bought Ayrshires, and from whom Stella Monarch of the present herd descended, has also produced a good cow. The Ayrshire herd has the nucleus for a very good herd and has one cow with three consecutive records of 9,358, 8,506, 11,507 pounds of milk and a last butter fat record of 577 pounds. The dam of her sire recently made 15,000 pounds and a half sister who made 17,600 pounds of milk. Her last

JERSEYS.

Only two of the original Jersey herd are represented in the herd to-day, Copper Butterfly being the descendant through the sire Copper Storrs. Storrs Golden Lady succeeded Copper Storrs as the sire of the herd and was purchased as a calf for $20.00. Jolly Village Boy was purchased later from P. B. Duffy and was replaced by the present sire Jolly Oxford bought of L. V. Walker, of Sothington, Conn. Daughters of this bull have stood first and second at Hartford and Brockton, and some of the western shows in 1915. He is typical of Jersey type and many Jersey men think he would have stood high at the western shows this fall. The Jersey herd as a whole is uniform and of good ability, many of them having produced over 500 pounds of butter and one, Victor Prephpo, having produced over 11,600 pounds of milk in a year.

milk production. The herd consists of one roan and two red polled short horns imported from England.

The herd as a group are growing rapidly and with the new addition to the barn, should show the development of some still better cows in the next few years.

New Members in Freshman Class

E. P. Sawin a graduate of Peterham Agricultural High School in 1914 and the Vermont State School of Agriculture in 1915, entered the Freshman class at the beginning of the second semester. After graduating in 1915, Mr. Sawin was Assistant County Agent in Orange County, Vt., and later principal of the Junior High School at Lowell, Vt.

Poultry Short Course

The last of the winter short courses, that in Poultry, began February 6th with an enrollment of 16. Among those enrolled were E. M. Buckingham, of Watertown, and Donald Dunham, of Hartford.

Mr. Buckingham graduated from Yale in 1899 and later from a Law School. After he graduated from Harvard he practiced law up to within a year and a half ago. Since that time he has given his full attention to his large dairy farm just outside of Waterbury.

Mr. Dunham graduated from Yale in 1903 where he was a member of the Phi Gamma Delta fraternity. At present Mr. Dunham is assistant secretary of the Travelers Life Insurance Company of Hartford.

Two of the features of this course were lectures by two men prominent in poultry circles. On Thursday evening, February 8th, Judge W. H. Card, of Mansfield, lectured on chickens. On Tuesday evening, February 11th, Professor H. E. Lewis, of New Brunswick, N. J., who is at the State College of Agriculture there, was present for a short talk.

College Book Store Doing Big Business

SALES HAVE INCREASED STEADILY FOR THE PAST TWO YEARS

—MORE BUSINESS, BETTER PRICES CAN BE GIVEN TO STUDENTS.

Four years ago the college book store was of very little importance, both in amount of space taken up and in amount of business transacted. At that time it sold only the books needed and theme papers used. Many changes have taken place in the past few years.

Not only text-books and paper are carried but stationery supplies of all kinds can be bought. In addition to these, college jewelry and various other articles are carried in stock.

The amount of business carried on in the last three years is shown by the figures given below:

Sales for year ending September 30, 1914. $1,433.20
Sales for year ending September 30, 1915. 6,027.81
Sales for year ending September 30, 1916. 6,913.50
Sales for first quarter of 1917. 2,399.94

By comparing these figures it will be readily seen that this year there will be about twice as much business done as there was four years ago.

One of the aims of the book store is to do more business so better prices can be given to the students. A firm will give bigger discounts if $2,000 worth of business is given it a year than if only $900 worth is done.

By the amount of expense that the book-store is under, it is able to sell to the students books, etc., below the ordinary retail price. Some stock is being sold very cheap because it was bought before the prices advanced.

The business of the book-store is getting too large for the present quarters. More room is needed for storage so larger quantities can be bought, thereby saving a large amount of money on each shipment.

Some day the book-store will be incorporated and run by the students.

ALUMNI

Mr. D. V. Dooley and Mr. W. H. Allen, graduates of the class of 1916, visited the college on February 7th, a visit of a few days’ duration. Mr. Dooley, who has been working as a herdsman in Westport, is now contemplating the pleasant task of owning John D. from his position of supremacy in the oil business. That is to say, he is expecting to leave shortly for Southern California where he has been informed that his presence is desired in the momentous task already mentioned.

What C. A. C. Offers to the Young Woman

(Continued from page 1.)

there have arisen other vocations depending more or less upon the fundamental training in the problems of the home. There is a demand for the hospital or institutional dietitian, the assistant or manager of school lunch rooms, tea rooms, etc.

The home economics extension worker, the county agent, the boys'
and girls' club worker are new phases of work encouraged and financed by the Federal Government and the Agricultural College. There are offered to the young man besides receiving a thorough education in home economics. She may return to her home with a better knowledge of canning and outside of the farm house and in so far as she sees the possibilities of a high type of country home she may become an influence in her community toward the improvement of farm and home life.

The courses offered in the college are planned to help each student find herself and to render definite educational, "first aid," to the individual who puts herself under its direction.

Cottage Notes

A molasses candy pull was held at the cottage on Saturday evening, January twenty-seventh.

The Co-Eds remaining on the hill between semesters were entertained at supper by the Misses Beebe on Monday evening. A very enjoyable time was spent all by.

The girls were entertained also by Miss Leila Esten on Tuesday evening. Games were played and refreshments were served. Prizes were taken by Miss Pierce and Miss Clark.

Basketball practice was necessarily given up during examinations. The team was rather broken up but it hopes to resume practice soon.

The G. C. A. met on February second and elected Miss Mari Pierce as chairman of the committee for the coming semester.

The first year school girls expect to go to Hartford to attend the annual meeting of the Connecticut Pomological Society. They will demonstrate preparing apple desserts and winter vegetables.

The Sophomores will help in the preparation of the exhibit of fruits and vegetables.

Student—"There was a big buncher fellows on the corner——"

Professor—"Oh, please use more elegant English."

Fraternity Notes

ETA LAMBDA SIGMA.

Frederick G. Pierce, ex. '13, has graduated from the Harvard Dental College and is now a practicing dentist in Worcester, Mass.

Charles G. Senay, '12, has received his commission as Lieutenant in the Twenty-second Infantry U. S. Army. He is now training in the army school, Fort Leavenworth, Kan.

Edwin C. Eaton, ex. '11, recently spent a week-end at the college.

Robert C. Eddy has been promoted to the rank of captain. He is stationed in the Canal Zone.

Stanton B. Reed, Clinton, Conn., visited the college recently.

Lloyd C. King, '19, who is now in the Boston Hospital has been compelled to discontinue his studies for the present on account of sickness.

Mr. McDonald of the Extension Service wishes to contradict the statement made in a previous issue.

Mr. Harry Godin Hanks, '04, wishes to confirm a statement made in the issue of January fifteenth.

SIGMA ALPHA PI.

Edwin M. Luther, ex. '19, who is taking a Post Graduate Course at C. L. I., spent the week-end of January 20th on the Hill.

E. H. G eer, '15, has accepted a position in Brooklyn, New York.

George G. Kinnear of the class of 1929 has withdrawn from college to enlist in the Colonial Troops of Canada.

H. Butterworth is engaged in executive work at Columbia University.

Wilfred H. Wright, '16, is taking a course in Mechanical Engineering at Pratt Institute, Brooklyn, New York.

ALPHA PHI.

Daniel G. Horton, '14, was a recent visitor on the Hill. He is now working on his home farm.

Imbert F. Fellows is on his home farm at Norwich Town, Conn.

Frank J. Rimoldi, '13, is studying at Cornell University.

COMONS CLUB.

Installation of officers for the second semester was held in the Club Rooms, Tuesday, February thirteenth. The installation was in charge of Simonott, honorary member of the club. Other honorary members present were H. R. Monteith, C. L. Beach, and C. A. Wheeler.

The reception room has been finished off in mahogany stained wood-work and brown burlap.

The National Convention of Commons Club is to be held at the Alle.

ghany Chapter, Meadville, Pa., on March 1st, 2nd, 3rd.

The local chapter will be represented by R. H. Barrett, Jr.

Owing to various reasons the following members have left college:

McAuliff, Tomy, Wilson, Barnes, St. Germain, McLay, McKay, Ude.

GLEE CLUB.

On Friday night, February the second, Messrs. Moore, Collins, Bridges and Bailey, representing the C. A. C. Glee Club, ventured forth on a trip to Hampton to participate in an evening's entertainment, given under the auspices of the local grange. Miss Thompson, director of the club, accompanied the following members have left college:

March 1st, 6

the evening's entertainment, given under the auspices of the local grange. Miss Thompson, director of the club, accompanied the party, while Miss Hallock, Miss Guilfoyle, and Mr. Bauer attended as listeners.

The evening was an enjoyable one despite the cold ride over and back. Two plays were given by some of Hampton's fair sex, which proved very entertaining. The quartet's part in the evening program came before and after the plays, and also during the intermission, several pleasing numbers being rendered.

After the entertainment, Miss Helen Cartright acted as host to the C. A. C. delegation and warmly welcomed them all to the alluring warmth of her home. After refreshments were served and some time spent in conversing with each other, courage was finally found to depart in the cold for Storrs.

Tuesday, February the sixth, saw the quartette of the College Glee Club again leave the Hill to fill an engagement. A four-piece orchestra accompanied the singers. The destination this time was none other than Hartford, where they performed for the Connecticut Pomological Society which was holding its annual meeting there. The program for the evening commenced at seven o'clock with music by the orchestra. This continued until seven-thirty when an address was given by Miss Flora Ross of the New York State College. Following this, the quartette rendered some songs and later, after an address by Professor F. C. Sears, of Massachusetts Aggie, they again sang. A source of pleasure to the performers was the fact that there were so many familiar faces seen in the audience.

Messrs. Moore, Collins, Bailey and Bridges made up the quartette as usual, while Miss Thompson and Messrs. Gerhardt, Marsh and Duffy constituted the orchestra.

DRAMATIC CLUB.

An all-star production of "Brown's in Town" is to be given in the armory on the night of February the twenty-second as has been previously announced. It is hoped that a large audience will be present as such famous actors as William Collier and Sam Bernard and their contemporaries are not accustomed to performing for small gatherings.

POMOLOGICAL MEETINGS.

The Pomological Society held its annual meeting in Hartford on February 6th, 7th and 8th. Many interesting subjects were discussed by speakers of national reputation on such matters. C. A. C. was well represented by members of the faculty and the student body.

Tankage

Some names are not deceiving—"Noyes" (noise) Wheeler, is very appropriate.

Why is Dragon, Jr., like the Book Store?

Because he pays no rent.

Student—"But, 'Professor—A man cannot know everything."

Prof. — "Huh, you are mistaken young man—I do."

Bill Brown (placing his hand upon the rump of Manchin Snowdrop 2nd) — "I still contend, Professor, that this cripple's loin here is very sloping and narrow."

Minnie—"But, dearie, your father is so small."

Derriel—"You should worry, yours is bigger."

Confidential to the class of 1919—The Freshman banquet will be held on the night of Feb. 1st, in the dining hall, between 8:45 and quarter of nine.

Louise and I went to sleep in Dairy 5 today, but the other half of the class stayed awake.

"Sandy: what is your opinion of traveling by railroad and steamboat?"

Sandy—"We'd, man—that's a lot of difference. When you on the railroad and an accident happens, you are kept there, but when you are on a steamboat and she blows up, where are you? That's the question. I tell you man, you are nowhere at all."

Prof.—"Nothing inanimate can move itself."

Student—"I beg to differ with you, professor. I have seen a watch spring; a rope walk; a match box; a mill dam; a brandy mash; also a stone fence; a cane brake, and a bank run. Once I heard the bark of a tree; I saw the tree bark; saw it 'holier' and begin to leave; the tree held on to its trunk, which they were trying to seize for food."

GET POSTED ON THE SPREADER QUESTION

The man who uses a Low Cloverleaf Low Corn King or Low 20th Century spreader these days is taking advantage of the newest efficiency in spreader building. His land increases in value and his crops grow better in quality and larger in yield because of all the spreaders on the market, these come nearest to working as spreaders should work. It is a long jump from the ordinary machine to the modern low spreader with its double beater and wide spread. Every farmer who knows the value of good spreading is buying one of these wide spread machines. As a matter of fact, no farmer can afford to buy any other kind, because the saving of time and labor and the better job of spreading done by a Low Cloverleaf, Low Corn King or Low 20th Century makes them worth more than ordinary spreaders.

Complete information about these machines is worth money to you. Drop us a line at the address below and we will show you very plainly the advantages to be found in Low Cloverleaf, Low Corn King and Low 20th Century spreaders. You will find this interesting.

The Apollo Quartet Of Boston Entertains

LARGEST AUDIENCE OF THE SEASON PRESENT—AUDIENCE WELL REPAID FOR COMING OUT IN THE COLD.

The fourth number of the entertainment course was given in the Armory, on Friday evening, February 9th, by the Apollo Male Quartet, of Boston. The program included seven numbers and three solos, and from the applause that was given it was quite evident that the audience appreciated the singing. Although most of the numbers were familiar to the audience, they were rendered in such a way as to appeal to the listeners all the more.

The quartet was composed of William Whittaker, first tenor; Loyman Hemeway, second tenor; manager; John Smallman, first bass, and Alexander Logan, second bass. The accompaniments were played by Mr. Smallman, and the solos were rendered by other members of the quartet.

Program

Quartet—

"Twilight is Lovelight"—Rubenstein Solo—

"The Arrow and the Song"—Balfour Mr. Hemeway

Quartet—

"Magnolia of Tennessee"—Hay Solo—

"Can't You Hear Me Calling"—Cutler Quartet—

"The Garden of Your Heart"—Rogers Mr. Whittaker

Solo—

Alex Smallman, Quartet—

Solo—

Biennial Reports Out

The reports of the college for two years, ending September 30, 1916, have recently been received and are ready for distribution. The reports, which are in catalogue form, show the work done in the different departments, financial report of the college, work of the experiment station and the report of the extension service station.

Also some very interesting data is given of the student enrollment. This includes the ages of the students, occupation of the fathers, farm experience, record of students and length of time actually engaged in farm work.

C. A. C. Men Injured In Railroad Wreck

JACKMAN OF FRESHMAN CLASS HAS A LEG BROKEN—FOUR OTHER CONN. MEN RECEIVE MINOR INJURIES.

On January 27th, the Boston express, which arrived in Waterbury late, was crashed into by a runaway locomotive of the new type. No one assumes the responsibility of having started the locomotive, but as it gilded down the grade from the round-house toward the station it naturally gained much momentum. The train was just leaving the station when this locomotive crashed into the rear coach, which was the smoker. The smoker was knocked off the track, and in fact, had the accident occurred 20 feet further the coach would have fallen into the Naugatuck river. About forty persons were injured. Five "Connecticut" men, returning after mid-year exams, were badly shaken up. Rex Knight, Harry Hopwood, "Skip" Cassel, and John Hildring were all in the wreck, but sustained no serious injuries. George Jackman was the only C. A. C. man who was seriously injured. Jackman, who was badly shaken up and whose left leg was broken, is at present in the St. Mary's Hospital, in Waterbury. He is improving daily and it is expected that within a month or so he can leave the hospital.

The Great American Smoke

Fall in line with hundreds of thousands of red-blooded smokers of the good old U. S. A. Smoke the cigarette tobacco that's been an American institution for three generations—"Bull" Durham. The rich, relishy, star-spangled taste of "Bull" Durham puts the national spirit of get-up-and-hustle into your hand-rolled cigarette. "Bull" Durham is the freshest, snappiest, liveliest of smokes.

Genuine "Bull" Durham Smoking Tobacco

"Roll your own" with "Bull" Durham and you'll find a far greater satisfaction in smoking your cigarette than you ever did before.

Made of the richest, milkest leaf grown, "Bull" Durham has a delightful mellow-sweet flavor found in no other tobacco.

Men who never smoked cigarettes before are now "rolling their own" with "Bull" Durham.

FREE An Illustrated Booklet, showing current "Bull" Durham Own Cigarettes, and a package of cigarette papers, will be mailed, free, to any address in U. S. on request. Address "Bull" Durham, Durham, N. C.

THE AMERICAN TOBACCO CO.
Professor Gulley's Farm

In 1902 Professor Alfred Gulley and Mr. Walter Warren, '94, bought a farm in South Windsor and went into the fruit growing business. Mr. Warren lived on the place until his death in 1908. Mr. Bonner, '98, purchased from the estate of Mr. Warren the part owned by Mr. Warren. After Mr. Bonners' death, in 1915, Professor Gulley bought out the part owned by the Bonner estate. Now his son, Roy Gulley, '95, is living on the place and managing the farm. The farm includes 45 acres of fruit, mostly apples and peaches, and also an acre of grapes and plums.

Connecticut Five Defeats R. I. S. Team

(Continued from page 1)

STEVENS TECH. GAME.

(Continued from page 1.)

the one-sidedness of the referees which caused Stevens to win.

Shen, who had broken his nose in the Seton Hall game, played but wore a nose guard which was a great hindrance to fast playing.

Connecticut had seventeen fouls called, twelve of which were shot by Valentine, while Stevens had but six fouls called, five of which Dickinson shot for points.

Reisenger played the best game for the Stevens aggregation, while Dickinson and Shen divided the honors for Connecticut.

Summary:

Conn. Stevens
Shen, Musser....rf. Reisenger
Dickinson ...... If. Van Leyen
Norton .........e. Leinbach
Barlow .......rg. Esholm
Traurig .........ig. Troubman
Score—Stevens 32, Connecticut 17.

PRATT INSTITUTE GAME.

The last game, played Saturday evening, February 16th, was supposed to be the hardest game of the series, that against Pratt Institute. Here the Aggies came back strong and with wonderful playing nosed out the Pratt team, winning 35 to 30.

The game was fast from the start and the score of neither side lagged far behind that of the other, usually one or two points separating the teams.

The floor was good, but with no off-side boundaries, except on the sides, and the referee was fair in all his decisions.

Numerous fouls were called on both teams and herein, the shooting of the fouls, by Connecticut's big advantage. Esholm, of Pratt, shot but 12 out of 24 chances, while Dickinson shot 21 out of 25 chances.

Barlow scored the first basket for the Aggies and started the ball rolling, for the death of the Connecticut "jinx." Dickinson was in top-notch form and feeding the ball up to him kept the Connecticut team busy. With the exception of the one basket by Barlow, all other points for the Aggies were scored by Dickinson. During the game be scored 12 points, more than all the other players of both sides put together.

With the team playing as they did Saturday night, Connecticut should easily win all the games remaining on its schedule.

Van Leyen and Esholm played the best games for Pratt Institute, scoring 24 points between them.

Summary:

Musser. .......rf. Burns
Dickinson ...... If. Van Leyen
Norton .........e. Leinbach
Barlow .......rg. Esholm
Traurig .........ig. Troubman
Score—Connecticut 31, Pratt Inst. 38.

Meeting of State Fairs' Association

The annual meeting of the State Fairs' Association is to be held in Hartford, February 14th. C. A. C. Agricultural Club is now a member of the Association and is therefore eligible to send delegates to the convention. The club will be represented by Leslie Lawrence, '17, President of the Agricultural Club, and Rollin B. Barrett, '18, Chairman of the Agricultural Exhibition which was held last December in the Hawley Armory.

English Student—"I ain't got no paper."
English Teacher—"Correct him, James."
James (looking over his neighbor's shoulder)—"Yes, he has."

Old Joe Lorrach once said—"No man can die of hunger. Some weaklings may have died learning how to go hungry, but no one ever died of hunger."
