Honorary Fraternity Established at C. A. C.

Gamma Chi Epsilon Founded with View Toward Bettering Scholastic Standing of College.

An organization that should tend to raise the scholastic standing of the college, is the honorary fraternity Gamma Chi Epsilon, which has had its beginning during this college year. Membership in the fraternity is granted to a limited proportion of each class, by recommendation of the faculty and election by the fraternity.

The charter members number thirteen, and are as follows:
- Faculty Members—President Charles L. Beach, Professor H. B. Monteith, Professor H. P. Judkins.
- The emblem is a triangular shaped key with the Greek letters for Gamma Chi Epsilon, and a rising sun engraved on the front of it.

In the future all elections will be held at commencement at a meeting of undergraduates and alumni members, and the new men will be chosen at these meetings from the class which is just completing its junior year. One or two men may be elected from the senior class in February, if the full complement was not admitted the previous June. Two men will be elected at Easter from the junior class. The next addition to the fraternity roster of any size will be made from the Class of 1919 at Commencement in 1918. A man or two may be elected from the class of 1918 next February.

The purpose of the fraternity is to encourage scholarship, and especially among undergraduates who are interested in athletics or non-athletic activities on the Hill.

The object is to encourage the athlete to study, and the student to engage in athletics or some other form of college service. Connecticut cannot afford to have any of its students specialize totally along either of these lines. The character of the man is also a point of consideration. Members.

Freshmen Banquet at Hotel Bond, Hartford

First Year Class Make Clever ‘Get-A-Way’—Surprise Sophomores at Mid-Day.

Living up to the old-time tradition of every Freshman class entered at Connecticut, the Class of 1920 held the customary Freshman banquet at the Hotel Bond on Monday, March 19th. The banquet was perhaps the most successful record in the annals of the college.

The “flight” from the Hill was made in six automobiles and everything was carried off in a most systematic manner. The cars were filled at the Main Building and started down the Eagleville road by the Dining Hall. Three of the machines were well off of the campus, before the Sophomores arrived on the scene. Here they were met by the Freshmen “strong arm squad,” which was so very efficient and swift, that the upper classmen succeeded in capturing but one Freshie, before all of the merry-makings were well on their way to Hartford.

The Sophomores chartered cars and followed immediately. On arriving in Hartford they chose a guerilla mode of warfare, but were rewarded by the capture of only one of the “lowlives” before seven-thirty, when thirty hungry but happy Freshmen burst themselves with the dainties and luxuries which the menu afforded. The banquet spirit pervaded the cottage also, and quite a lively time was the result. The Freshmen co-eds were captured early in the day by the Sophomores but succeeded in breaking loose; however, they did not reach the Hotel Bond in time to partake of the banquet.

Miss Tapley and Coach Donovan, honorary members of the class of 1920, were present at the banquet, and were imbued with the same fighting spirit which took possession of their student classmates earlier in the day.

The banquet in every sense of the word was a decided success, and much credit is due the class president, Stanley Shaffer, and the committee in charge.

The upper classmen of Connecticut should feel safe in continuing their ideals and traditions to such a progressive and aggressive class as 1920, and be proud to say that they had (Continued on page 6)

Progress is Feature of Farm Department

By Intelligent Breeding and Buying, the College Has Become Possessed of Some Very Creditable Live Stock.

Now that winter’s icy shackles have been broken, and the March winds have about blown themselves out, the student body, once more emerges from its winter den, to proud about the Hill in search of the rural life. On a bright Sunday afternoon, the ardent scholars, wearied by a morning of study, may be found in groups of two, three or four, strolling about the campus. As a general thing they follow a sort of undefined itinerary visitation of the various places which are undeniably rural.

Usually the first point of call is the dairy barn, after which they “do” the farm, starting either at the horse barn, and finishing up at the present sheep barn, formally the old Jacobson place, or else reverse things, and commence their tour at the sheep barn, and end up at the horse barn.

It may seem to be a rather far fetched statement, but of the whole student body, scarcely more than 15 per cent of them really know how much, and what livestock we have here at C. A. C. Excluding the Dairy herd, about which THE CAMPUS published an article not long ago, and the poultry interests, which were also written up in a recent edition, all of the live stock owned by the college is under the supervision of the Farm Department.

The old Jacobson place, above the poultry building, shelters the sheep, swine and beef cattle, while the barns, east of the dairy building house the oxen and horses.

The sheep industry was first taken up by the college in the year 1899. The flock then was a mixed one, consisting of a few Shropshires from Hamilton, N. Y., Dorsets from Middlebury, Conn., and Jerseys from Middlebury, Vermont. Professor Phelps was then in charge, and the sheep business promised to be a profitable one. However, about two years later, the barns were burned, and circumstances came up which made it necessary to close out the sheep work.

From that time until 1915 the college raised no sheep. In that year, however, the Experiment Station started a flock of Shropshires, and four years (Continued on page 6)
THE CONNECTICUT CAMPUS AND LOOKOUT

later (1900) transferred them to the farm. This flock formed the basis for the present flock. Later, Dr. H. S. Nielsen presented a few Shropshires. At about the same time an imported Inge ram was used to improve the flock. In 1912 two ewes were obtained from White Horse Farms, and added to the growing flock. At present the flock consists of about two hundred and fifty pure-bred Shropshire ewes, headed by the imported Nock ram, bred by Frank Nock. This ram, a grand champion at the Toronto Exposition in 1915, was added by an imported Shropshire ram, in the fall of 1916. There are also two Dornet ewes, two Southdowns and a few Hampshire in the flock, but these are merely kept to show the students the different breeds.

It is now just about the height of the lambing season, and Mr. Pitchard, the shepherd, is kept very busy, day and night, seeing that the little fellows get a fair start. At present there are about eighty lambs at the barn and more expected every day.

The sheep at C. A. C. have never been in any better circumstances than at present. Housed in a new barn, receiving the very best of skilled care, the college flock lowers its flag to no flock in this part of the country.

In the orchard in the rear of the sheep barn, we find the swine herd. Professor Garrigus is a Berkshire man, and one has but to look over his collection of Berkshires to see that he is a believer in good Berkshires.

The herd consists of two aged sows of Harpending breeding, one aged boar sired by Lord Premiers Successor, the most noted boar of the breed; one boar by Schoolemaster 2nd, which came from New Jersey. A sow, Brantford Farms Rival Duchess, was recently purchased, and the rest of the herd, about twenty head was bred and raised at C. A. C.

The beef industry was commenced in 1916. A carload of heifers was bought at Chicago. They consisted of grades of three breeds. These heifers were gradually disposed of, and their places filled by pure bred stock, only two grades now remaining in the herd.

The present beef herd is made up of Hereford and Short horn cattle, with the two grade Angus cattle mentioned above, which are descendants from the initial earl oad lot.

The Hereford herd was started with two imported calves, which were brought from Georgetown. A heifer and a bull were later purchased at Tuleyries Farm, Virginia, in 1912. These Tuleyries cattle were of Arduino Forthisher and Beag-Donald breeding. In the spring of 1915 this herd was replaced by a grandson of Perfection Fairfax, one of the most noted bulls of the breed. With the one exception, of the purchase of a heifer calf, by Prince Real, Junior Champion of the International Live Stock Exposition, the satisfied that the horned horses certainly earn their salt, on this, and in fact on nearly any real New England farm, where feed is not essential but where the price of feed is apt to be high.

Last, but not least, in this article comes the horse industry of C. A. C. Flock in 1912, Artimon (4297) an imported French Coach, three-year-old stallion, was purchased, and in 1916, Gaitly, a French Coach mare was added to the inventory. Both of these, however, are still on the farm, and the got of Artimon may be found all over this part of the state. He has reputation, and he certainly lives up to it, for although nearly seventeen years old, the old horse holds his head as

by Victoria, who also sired Pink, a twice grand champion at the International, was purchased from W. H. Monroe, of Virginia. That same season a weaning colt, Dragon Jr., was bought from W. L. Simpson, of Virginia.

Dragon Jr., was sired by Dragon, a proven sire; whose get have reached a higher average placing at the International than that of any other sire.

The dam of Dragon Jr., is by Eluladian, a grand champion at Paris. Dragon Jr., has won a grand championship at Leesburg, Virginia, as a yearling. He took second at the National Dairy Show at Springfield last fall. Good judges have conceded him to be one of the best Percheron types.

The generosity of Mr. S. D. Wicks, of Pomfret, a former C. A. C. man, Carbon 2nd, a son of Carroz (6666) stood at the college farm, for the year 1915, leaving behind him, three registered daughters and one registered son.

It may be said that the blood of the best American Percherons flows through the veins of our college stock, because Dragon and Carroz (6666) are credited as being the two best Percheron stallions in the country.

In 1916 an American bred filly was purchased from George Treadwell, and she bids fair to prove a success at C. A. C.

In raising the standard of the college Percherons, several stallions were used. Albermarle, from Senator White, of Leesburg, Virginia, was the pioneer, followed by Midnight, who incidentally was out of Susie. Then came Carbon 2nd, and now Dragon Jr. heads the stud. At present Kurie, an imported six-year-old, owned by Mr. S. D. Wicks, is on loan to Dragon Jr., because of the latter's lack of age.

This article may show the reader that C. A. C. has not been backward in the livestock world, because in every line she has the best that can be had and unless the untiring efforts of Professor Garrigus go unrewarded, she always will have.

Prof. Esten Lives on Eight Cents a Day

(Continued from page 1)

result. Cancers, appendicitis, colds, apoplexy, gout, hardening of the arteries, etc., are mostly due to errors in diet. The most common cause of these troubles is in selecting foods seriously lacking in essential minerals.

The American people select as their staple articles of diet the five foods: meat, potatoes, flour, sugar and fats. It would be impossible to select five foods with a smaller mineral content. The sugar and fats are practically free from any mineral compounds. Meat is deficient in lime and phosphorus;
phorus, the two most important in animal nutrition. Flour has less than
three-quarters of the minerals in the wheat grain, which is removed in
the bran and middlings for cattle feeds.

In 100 pounds of wheat there are 2 pounds of minerals.
In 100 pounds of flour there are 64 ounces of minerals.
In 100 pounds of bran there are 5 pounds 12 ounces of minerals.
In 100 pounds of beef there are 1 pound 4 ounces of minerals.
In 100 pounds of beans there are 3 pounds 8 ounces of minerals.
In 100 pounds of oats there are 2 pounds 24 ounces of minerals.
In 100 pounds of milk solids there are 5 pounds 4 ounces of minerals.

The selection of the whole grains was to furnish the needed minerals not
furnished in the foods and meals sold on the market. Skim milk was chosen
for it contains all the minerals of the whole milk, and the milk solids con-
tain nearly as much mineral matter as wheat bran.

The cheapness of this ration is ex-
plained by the fact that the milling in-
terests exact a heavy toll for milling
the grains into flours and meals.
Sometimes the retail price of milled
products is 250 per cent. higher than
the price paid the farmer for his grain.

The cost of preparation and fuel of
this diet is not included.

If fuel is used for a cook stove and
also helps heat the house, the cost
of fuel for cooking would be negligible.

The grinding of the grain for a day's
ration takes about five minutes, and
the sniffing about two or three min-
utes. A fine sieve of about 20 mesh
is required for separating the coarse
and fine meals. Skim milk can be used
more liberally than in this experi-
mental diet by mixing the breads with
skim milk in place of water.

The butter, sugar and maple syrup
were included in the diet to add flavor
and palatability. With a good appetite
or lack of appetite one can learn to
eat cereals without sugar and to ac-
quise the natural taste of the natural
foods which is one of the pleasures
of eating, that only a few people have
ever realized. The diet contained all
the food necessary for the average in-
dividual and all the materials for main-
taining the health and vigor of the
body indefinitively. But fruit and vege-
tables contain certain principles,
which it would not be advisable to
omit from the dietary. As the diet
was used to show what could be done
it might not be wise to make it per-
mance. To meet the high cost of
living it is advised to select those
foods which are cheapest and at the
same time furnish all the needs of the
body requirement. For the coming
season every foot of ground that would
grow a plant should be utilized for
producing food. The world's supply
of food is short and we must resort to
this method if we desire to pre-
vent starvation among the unfortunate
people.

The conditions of the experiment re-
quire the use of a small hand grinding
mill, similar to the No. 8 mill manu-
factured by the Wilson Bros., of
Easton, Pa. The grains selected were
whole corn, wheat, rye and rolled oats.
When these were ground the fine part
was sifted out for the making of
bread. The coarse part was used for the
preparation of cereals. Those re-
quired long cooking which would make
the fireless cooker ideal for the prep-

mation of this material. The fine
wheat and rye meals can be made into
either raised bread or sour milk or
butter milk bread and muffins.

The test commenced on the first day
of March and terminated on the seventh.
The materials and amounts of each
were as follows:

<table>
<thead>
<tr>
<th>Ingredient</th>
<th>Amount</th>
<th>Cost</th>
</tr>
</thead>
<tbody>
<tr>
<td>Corn</td>
<td>1 lb.</td>
<td>2.50</td>
</tr>
<tr>
<td>Wheat</td>
<td>4 lbs.</td>
<td>15.40</td>
</tr>
<tr>
<td>Rye</td>
<td>1</td>
<td>2.50</td>
</tr>
<tr>
<td>Oatmeal</td>
<td>5</td>
<td>2.50</td>
</tr>
<tr>
<td>Skim milk</td>
<td>3.2 qts.</td>
<td>16.60</td>
</tr>
<tr>
<td>Brown sugar and maple syrup</td>
<td>7 oz.</td>
<td>7.00</td>
</tr>
<tr>
<td>Butter</td>
<td>7</td>
<td>7.00</td>
</tr>
<tr>
<td>Yeast cake</td>
<td>2</td>
<td>2.00</td>
</tr>
<tr>
<td>Pork fat</td>
<td>1</td>
<td>1.00</td>

</tbody>
</table>

Total for the week: 51.76. and 1.00 for a day.

The calories of energy in the above
foods are as follows:

| Cereals            | 6.179 |
| Milk               | 5.085 |
| Butter             | 3.704 |
| Oatmeal            | 2.466 |
| Total              | 14.901 |

The average of 2,151 calories per
day. As the average person requires
from 2,000 to 2,500 calories depending
brown sugar or three of maple syrup,
and three or four grams of butter.
The whole wheat bread was made of oat-
meal and whole wheat meal ground and
sifted fine and raised with yeast. The
corn bread was made out of buttermilk
and baking soda. The cold corn meal
cereal was often fried in a little pork
fat, and eaten with maple syrup. This
made a very tasty dish and one that
cannot be exceeded but by very few
articles of food.

One of the finest New England
dishes, unknown today, is ginger cake
made out of rye meal and served with
whipped cream. This obviously was
not included in the diet list on account
of the expensive cream required. The
delicacy of flavor in this combination
cannot be surpassed. Rye is so easily
raised that it would be marked eco-
omy to use it more commonly in place
of the white flour which are ex-
pensive and demineralized.

The Pierce's
Entertain

On Saturday evening, March 17th, the
last entertainment of the winter
season was given by the Pierces, in
impartiality of characters from popu-
lar books and people they had met.

There was a liberal touch of humor
in all of the sketches that kept the
audience in an uproar most of the
time. Most of the characters imper-
sonated people they had met in dif-
ferent parts of the country. Two of
the sketches given by Mrs. Pierce were
taken from the books "Mary Cary" and
"The Princess." The program which
consisted of two discussions and four
sketches, was well chosen and one
that appealed most to a college audi-
ence. Each of the numbers was given
in costume, which gave a touch of re-
ality to the members.

The entertainment course this winter
has been one of the best, and well
worth the price of admission. Not a
little credit is due the entertainment
committee who had charge of it. Such
a course is worthy of the best support
the students can give it.

“The College”

Editorial

No matter how loyal an Aggie or how fervent a Connecticut booster a student may be, there exists in the corner of his heart a feeling of displeasure for the system engaged to measure out the coercion that accompanies his misleanons. This is no reflection upon the personnel of such a system, for regardless of the justification of its acts, the fact that but one party is represented in its councils overshadows all else.

Connecticut is one of the very few colleges that is not dispensing justice in some cooperative manner. Trinity, Wesleyan, Massachusetts Aggies and Rhode Island are exemplary of the smaller institutions where a Student Senate metes out the just rewards for the lawless. It is proving mutually satisfactory to those and in large colleges. If a student-call enroll would not be acceptable to begin with; a joint board of seniors and faculty might be adopted tentatively to test out the practicability of a purely student committee. They would be able to act in a number of other ways in regard to undergraduate activities, and as a go-between for both faculty and students.

This is not a new thought nor the brain-storm of a few, but rather the expression of a unanimous student body. The suggestion is made at a time when every effort is being expended to bring Connecticut spirit to the fore, to increase the enrollment of the college and to bring Aggie enthusiasts into closer bonds for a common purpose. The indifference of a large part of the student body in regard to this campaign is astounding, and it is in an effort to enlist the support of this Doubting Thomas element, comprising some very active undergraduates, that the matter is mentioned. As far as the campus has been able to ascertain the members meet chiefly in the expressions: "no say" and "a slave's life." One of the most potent factors in bringing new students to Connecticut will be a contented student body, and it is with this thought in mind that the suggestion is made.

College Loyalty

To the Editor of The Campus:

When Daniel Webster was arguing the Dartmouth case before the Supreme Court, he uttered these words, in a voice broken with emotion: "It is fair, as I said, a small college, but there are those who love it." The college is not small now, but it is still the object of love, and what is true of Dartmouth is true of every college, large or small, in the country.

Recently while returning for Xmas, I had as a seat-mate a fellow who kept calling to my attention the need of reforesting the lands of New England, and used as his text views, from time to time, as seen from the train window. Said subject being major part of the wherewithal for bread and butter, the author answered his questions in the affirmative, to which he replied: "Where did you attend college, at Cornell or Yale Forestry?" and I answered, "Connecticut." "Humph," said he, "I am a Massachusetts graduate myself; hm, Connecticut, hm, let's see; 600 acres with nothing on it." "Yes, my friend, but lets in it." Deep silence for a number of miles, then from him, "We defeated you at football last fall: funny thing about you C. A. C. guys, you seldom come across in athletics, but usually win in minor things, as stock, fruit and poultry judging, and now and then clean up on corn." "Men and women of Connecticut, we are a young college with the majority of our alumni alive. To-day the college is known by her practical men in dairying, fruit growing, poultry farming, teaching, engineering, forestry and in business. Each morch as the blue and white banner of matter is unfurled on the Hill, it looks proudly down upon the campus, because alma mater has not one failure among her sons and daughters in business and domestic life. Each and every one is fighting life's daily battle from ideals gleaned from mater when a student. Her worthy president and able faculty are known in their departments by the men and women who have turned into the world, and are known also for their own personal endeavors in science throughout the land.

Undergraduates, think and act Connecticut! Forget Wisconsin, Massachusetts, Michigan, etc. Have the Connecticut spirit, be Hawley, Storrses, Connellem, Lawloris, Aubrey, Deming, Howards, Bothfields, Lovelands, Manchester, Senays, Treadwells, Hales, McDonoughs, Hatfields, Hanks, Osmans, Henriettas, Lamson, Edmonds, Stockings, and Marks; these gave their best for Connecticut as undergraduates and in too fried of business are doing their bit to make matter ideal come true, which is, New England, agricultural. The faculty are doing their part in the class room and Coach Donahue has his best with you on the field of sport.

Connecticut gave us her best and what are we giving her in return? Who of us would give up his college friendships, which are most lasting, outside of the family ties. Webster, so history has it, won his case, and so should each one of us.

Alumni, get out and attend the games; send a check each year to the A. A., a check for your Connecticut Campus; and make it possible for the Glee and Dramatic Clubs to know in your town or city annually. "Hit the Trail" for commencement each year and see what President Deach and others are doing for alma mater. Alumni citizens of the Nutmeg state, see that every state legislature has your man there on his toes for Connecticut. President Deach and a few others are doing their share; what about you? enere high and prep school students in Connecticut. Take a day off and bring him with you, introduce him to President Deach, faculty and students. At commencement meet the head to whom you are going to give a business start in life on your farm, or in your office. Then Connecticut will become even greater each year.

"Pop" Eaton.

To the Editor of The Campus:

First impressions are often very definite, and lasting ones. All students remember their "first day" at school or college! How many colleges have you on your record? It has been a sort of hobby, in our family, whenever we have been about the country, together or singly, to visit all the educational institutions possible on our route. I have been fortunate, therefore, to count, up to the present time, sixteen colleges, including my own, Brown University, on my list. So I speak from experience when I say that my visit to the Connecticut Agricultural College was one of the most delightful of all.

Though the ride from Norwich was taken after dark, in one direction, and with the rain pouring in torrents in the other, it was impossible for one alert to natural beauties, to miss the scenery along the way. Each hill, such glowing maples in autumn dress, and such distances! Seen again, in the early morning tramp across the fields, or as a reward for the climb to the top of the tower, they cannot soon be forgotten. To one accustomed to more level country, the hills were a treat indeed, when, as we watched, their lights and shadows leaped out at us, from those distances as the sun appeared for a moment from behind the clouds. When a brief, mental picture can make such lasting impression on the mind of a visitor, what a powerful picture must be the result of a four-years' exposure, for those who are, in photographic parlance, "sensitized."

But, of course, other phases of college life, besides the natural beauties of the campus, and its surroundings, claimed our attention. We spent considerable time visiting laboratories and watching milk tests, and we listened with great interest to Dr. Sinnott's lecture in the Eugenics Class; we also found time to roam about the wonderful systematic garden, and visit the conservatories, where the caryophyllas were luxuriant in their beauty, and the banana tree called forth excited comment.

Did we enjoy our brief stay at Storrs, is not the question, but, shall we ever forget our pleasure while there. Not least among our memories was the delightful spirit of hospitality which we met on all sides.

E. W. M.

Editor's Note:—The above is a letter written by a graduate of Brown University who is at present Assistant Curator of Park Museum, Roger Williams Park, Providence, R. I.

Dickinson '18, Elected Captain of Basketball

At a meeting of the basketball men, of the season just completed, on Saturday, March 17, the captain for next winter's quintet was chosen. Since the majority of the men who played this season are to be graduated in June, there was but one logical choice as to the man who should pilot the team of 1917-1918. E. N. Dickinson, '18, was therefore elected to the captaincy. This is the second time that Dickinson has held this position, having served during the season of 1915-16.
Department Notes

DAIRY NOTES.
Mr. G. H. Campbell went to Danbury on Thursday, March 22nd, to give a lecture before the Connecticut Holstein Breeders’ Club.

Prof. G. C. White went to Hartford, Wednesday, March 28th, to deliver an address at the Connecticut Yorkshire Breeders’ Club banquet. The subject of the address was “Developing the Dairy Heifer.” Mr. Simpson, manager of the Eastern States Exposition for the next Springfield show was also a speaker.

POULTRY NOTES.
Mr. H. H. Carrey, who has been superintendant of the laying contest, has recently resigned to accept a position on a large commercial plant at Hightstown, N. J.

Fraternity Notes

COLLEGE SHAKESPEAREAN CLUB.
I. F. Harvey, ’92, has recently been appointed county agent for New Haven county.

R. H. Barnard, ex. ’95, was a visitor on the hill from March 8th to 12th.

H. L. Garrigus has recently been appointed official judge for the American Percheron Horse Breeders’ Association for New England.

R. L. Clark, ’12, has recently taken a position in a munition factory at Toronto, Canada.

SIGMA ALPHA PI.
J. H. Loverin, ’13, has recently been appointed milk inspector of the town of Shelton, Conn.

H. H. Tomlinson, ex. ’12, is managing a farm in Woodbridge, Conn.

George G. Kinear, ex. ’20, who has joined the Ambulance Corps of the Continental Troops of Canada, expects to leave for France in the near future.

Cottage Notes

The basketball season for the Co-eds has closed without many victories, but with hopes for the future. Girls’ basketball is a new sport here and the girls are grateful to all who have helped to make their season a success.

It is hoped, this year, to establish an Annual Poole’s party, to which as at Halloween everyone will be invited.

The Co-eds accompanied by Miss Tapley and Miss Costello went to the Poultry Plant last Thursday to see Mr. Warner kill and dress a chicken. They will go to see a chicken boned next week. These demonstrations are very helpful and instructive and are appreciated by the Domestic Science students.

Through an oversight, Miss Isabel Long’s name was omitted from the list of those who prepared the vegetable luncheon, reported in the last CAMPUS.

Commission Awards New Thing at C. A. C.

COMMISSIONS, WARRANTS, AND MARKSMANSHIP MEDALS PRESENTED AFTER COMPETITION DRILL.

Following the exhibition drill, held recently, came a baton parade with the awarding of the commissions, warrants and medals. The companies were formed on two sides of the hall. Co. C along the north end of the hall with the band on their right and signal corps on the left. Co. B formed along the east side of the hall with the colors between them and Co. A. During the ceremonies the commissioned and non-commissioned officers were given front and center, and the commissions awarded to thirteen officers and warrants to thirty-six non-commissioned officers. Marksmanship medals, won on the outdoor range this fall, were given to Lieut. Weidlich and Privates McGuire and Homer.

Freshmen Banquet at Hotel Bond, Hartford
(Continued from page 1.)

The committee of arrangements which so successfully staged the event was composed of Stanley Shafter, chairman, Crawford, Griswold and Cyril Peeney. John Donahue of the faculty was elected as honorary member of the class of 1929 and Miss Tapley was selected as patroney.

THE FRESHMAN BANQUET AS SEEN BY

S. D. D.

Senior—A most during getaway car" carried out in A No. 1 shape. We take every thing we said about the rebellious class of '29," which was not to have a banquet."

Junior—Wonderfully executed! We thought it impossible.

Sophomore—If you hadn't taken us completely at our word? (We wonder if we had been the only ones to come at our word?)

We prevented many of them from attending. We were heartily welcomed by the students. If we were unattended, we made sure that we were successful.

First Year Student—Excellent! Very cleverly done!

First Year Student—Simply amazing! Thrilling!

Second Year College Economics—Too bad! They had to fight for it.

First Year College Economics—They said it couldn't be done, so we went ahead and did it.

Second Year College Economics—Too bad!

First Year College Economics—Too bad!

Mechanic Arts—Same as Freshmen (see below.)

Freshmen—A stupendous success! The excellent geniality of our president, Stanley Shafter, and the hearty cooperation of the class, especially the "strong arm squad," made possible the great event. Practically unblemished, thirty of the thirty-two sat down at the stroke of seven to a banquet which always will be remembered by the class of 1929. May the banquet be a "bond" uniting the class of 1929 into a more determined and harmonious body.

Basketball Cs Awarded

The Athletic Council held a meeting on Monday, March 12, and awarded Cs to those men who had won them in the recent season. Out of the large number of men who represented the Blue and White in the games of the season, but seven were awarded their letters. Those who received the award of the Cs as follows:

Captain Norton, Shea, Traurig, Dickinson, Barlow, Musser, Harris, Manager.

Honorary Fraternity Established at C. A. C.
(Continued from page 1)

The highest prize wherever exhibited.

The Connecticut Agricultural College Independents journeyed to Stafford Springs on Monday, March 16th, and visited the Stafford High School quintet. The Independents were in the first place and the second half of the second place of the competition.

The Independence Award is presented by the fraternity to the best high school in the country. It is given annually.

The highest prize wherever exhibited.

The Metropolitan Store of Willimantic

The Metropolitan Store of Willimantic represents an idea worked out along scientific principles, and it is backed with the knowledge that certain materials will accomplish the desired results in dairying, creamery and cheese factory cleaning. Time and time again Wyandotte Dairyman's Cleaner and Cleanser have demonstrated that it not only produces better cleaning results, but better results with less labor, less time and less expense for material.

These statements are facts, and as you know, are backed with a money in Circles back guarantee. You assume no risks whatever in asking your dealer or supply man to furnish you with Wyandotte Dairyman's Cleaner and Cleanser.

WILLIMANTIC. - CONN.

IT TAKES 400,000 cars to carry American Farmers to Farmers and Planters every season. Forty per cent. of this is useless Filler requiring 100,000 cars! Insure buying less Filler and all high grades with Available Nitrogen, namely:

Nitrate of Soda

and thus cut freight bills.

Crop production from such Fertilizers means greater return on your investment for roads and bigger purchasing power for Farmers. Railroads and everybody will benefit.

Larger crops thus grown will give increased prosperity to all. It is up to you, Mr. Farmer.

Send for "Cost of Available Nitrogen".

The Last
Cream Drop
Does Not Escape

These days of high-higher-
highest dairy prices, small cream
losses count. A bit every milk-
ing time—soon the skim milk
steals cream enough to pay for a
high grade separator.

Primrose and Lily separators
have proved beyond all question
that they get all the cream, down
to the final drop. Good dairymen
have come to depend on it.

The president of the Iowa Federa-
tion of Cow Testing Associa-
tions says that of all the sep-
harators in use in his association, and they are many, the
Primrose skims closest. It leaves less than one-hundredth
of one per cent. of the cream in the milk.

The Lily skims just as close. Neither one wastes any
cream. With prices of everything as high as they are now,
to waste cream is little short of a crime.

Yes, it is possible to buy separators for less money. One
can also pay more. But no one can find a closer skimming
machine, one that runs easier, or one that will skim clean
for a longer time. The longer a dairyman puts off buying a
Primrose or Lily cream separator, the more he loses. A
Primrose or Lily installed, and separator troubles disappear
as if by magic. Drop us a card for catalogues and full in-
formation.

International Harvester Company of America
(Incoporated)

CHICAGO

U. S. A.
Tankage

Mr. Julkins (at dinner)—"I hope that this piece of veal is not as tough as the last we had."

Amy K.—"Maybe it won't be. I don't think that it came from the same sheep."

"No, Will, we haven't got one on you this time. that is not yet."

Mr. Warner, to Ryan (18)—"Ryan, how do you tell a male from a female pigeon?"

Ryan (at once)—"Put a worm in the coop with the two doubtful birds."

Mr. Warner—"Put a worm in the coop? How is that going to help you?"

Ryan—"Well, you see, professor, it's like this: If he eats it, he is a male; whereas if she eats it, she is a female."

News Item.

Capt. Barrett came pretty near inspecting the first section of Koons Hall, on Sunday, April 1st. (Note) After fifteen minutes of deep thought he decided to let Inspector Lawrence do it, as usual.

Obituary.

The wild-man of 46A has kept himself so busy with his new banjo that we have no news for this column this issue.

Had a letter from our last year's editor, tither day—"Fifty (50) mils reward to the man who can decipher it in less than three days."

Our chief went to the city of Hartford this week to get enlightened on certain matters. Personally we think that he stopped at Delton Notch.

Bi-monthly Dissertation.

The Doctor.

Pause a moment and meditate on the medicos. He is a most welcome being when we are sick, but when we are well we would not even recognize him on the street. He might dun us for what we owe him. His is a glorious life at best, for he can never wish anybody well. It wouldn't be good business.

Most doctors have no steady customers—they never come back. As often as not the doctor is in league with undertaker. He has to be sure of his fee, one way or another.

Bring your sons up to be doctors. It is a great profession.

There is one wailer who actually practices the rule about no eats after ten minutes past. Strange as it may seem, he is the same one who believes that extra butter sign.

Unclassified.

Mr. Noyes Dennison Wheeler, '19, is now acting as herdsman for Mr. Richard Mason of Storrs. Mr. Wheeler reports that his herd is improving every day and that he will probably run a seven-day test on her as soon as the weather gets a bit warmer.

A subscriber asks, "What kind of chickens lay the longest?"

"Dead ones,?" reports A. J. H. of the Poultry class.

Local Debucantes.

"Buzz" Mattison, and A. the B. S. beauty.

Bill Brown (not our Will) was a cattle dealer. One day he heard that his father had a fine cow for sale, so he pitched on a load of hay and drove down to the old man's place. He happened to arrive just as the old man was about to milk the cow in question and he saw his father draw nearly four quarts of milk from her capacious udder.

"What'll you take for her, Dad?" he asked.

"Not a cent less than $125.00, boy."

"Give you $95.00 and this load of prime alfalfa."

"Done," said the old man, and he chuckled as his son led his purchase out of the yard. Even after his hired man told him that the load of alfalfa was more than half bog hay he still chuckled audibly.

About three days later his son, Bill, came around sort of sheepishly and said, "Dad, how is it that I can't milk more than three quarts out of that cow at a milking?"

"Guess you milk her too often, son."

"I only milk her twice a day."

"Well, that's about ten times as often as I milked her for the whole month before you bought her, son."

Agricultural Club.

At a recent meeting of the club the following committees were appointed:

Committee for the Fourth Agricultural Exhibition to be held next fall: Geo. H. Durham, Chairman.

1918, Horl, R. N. Dickenson.

1918, Dairy, W. H. Diven, Jr.

1918, Poultry, P. L. Sanford.

1919, W. B. Gerhardt.

1920, R. C. Lucas.

1918, W. L. Marsh.

Home Economics.

Miss Helen L. Clark.

Miss Edith Anderson.

Nominating Committee.

J. G. Shirley.

W. C. Edwards.

W. B. Gerhardt.

Attention, Housewives

The College Book Store has catered largely to students and college departments. We do, however, carry in stock supplies which are used by housewives, and on which you can effect a considerable saving if you buy from us. We refer to Ivory, Japco and Armour Soap, Gold Dust, Armour's Light-house Cleanser, Bon Ami, Bird's Eye Matches, Safety Matches, Mop and Mop Handles and Brooms. You will also be interested to know that we sell

Colgate's Tooth Paste, 25c size at 23c

Colgate's Talcum Powder, 20c size at 15c

Kolynos Tooth Paste, 25c size at 23c

Pompeian Massage Cream, 50c size at 47c

Silson's Cold Cream, 25c size at 19c
