ROUGH GAME GOES TO R. I. STATE

CONTEST ENDS 20-16 IN FAVOR OF HOME TEAM.

Superintendent of Buildings attempts to fill The Place of Referee Who Failed to Appear.

Our basketball team journeyed to Kingston where they met defeat at the hands of the Rhode Island State five. The game was delayed an hour because of the lack of a referee. The Kingston coach said that Mr. Aspinwall of Springfield Y. M. C. A. had been hired and was probably delayed. In 1916 and 1917 the same trouble happened, our boys getting on the floor and no referee showing up. Each year a less experienced man has been chosen to officiate. The game was delayed an hour because of the lack of a referee. The Kingston coach said that Mr. Aspinwall of Springfield Y. M. C. A. had been hired and was probably delayed. In 1916 and 1917 the same trouble happened, our boys getting on the floor and no referee showing up. Each year a less experienced man has been chosen to officiate.

Rhode Island started off like a white horse, scoring the first basket. They scored five more baskets by means of holding before Connecticut could get a first goal. At the end of the first half the score was 18 to 6 in favor of Rhode Island. The second half started off with the same referee and his old-style basketball. In the first few minutes Connecticut forged forward scoring three points before Rhode Island could cage one. The opposing team being very much annoyed started to play football. When Lockwood was about to shoot he was seized by the neck and thrown to the floor, no foul being called.

All our boys played a good game, the final score being 30 to 16. The lineup was as follows:

Connecticut: Rhode Island
Lockwood Capt. r. f. Spencer Capt. Manchester
Reid 3, Murphy 3, Goodrich c Nicholls
Preckett f. f. Gadding Moore
Prescott f f. Gadding Moore
Murphy
Baskets from the floor, Nichols 5, Reid 3, Murphy 3, Manchester 2, Goodrich 2, Lockwood 1, Spencer 1, fouls, Lockwood 6, Nichols 4; scorer, Mallett, referee, Whelan.

On Sunday, January 13, the co-eds called a tea. Miss Sprague at her home in Whitney Hall, as a birthday surprise. Miss Sprague was presented with a large bouquet of cut flowers and a cyclamen.

JUNIOR SHORT COURSES IN HIGH SCHOOLS.

To Encourage Food Production—Faculty Members to Lecture.

The College is planning to give two or three days short courses in agriculture to any high school in the state, who may desire it, this spring. The purpose of these courses is inspirational, directive, and to show the importance of meeting the food crisis through the home garden, the home pig, and the backyard poultry flock. Various members of the faculty will give the lectures and will deal with the types of vegetables which are most valuable as foods and for canning purposes, and to show the methods and importance of raising and keeping pigs and poultry products which are ordinarily wasted. This will increase the food supply of the state materially and at the same time will utilise labor which is otherwise wasted.

STUDENT COUNCIL IS APPOINTED

SUGGESTIONS GIVEN FOR A BETTER COLLEGE IN 1918.

Faculty Members Give Their Views on the Matter—Announcements Made.

Three students and two of the faculty gave five-minute talks at the President's Hour held in the Armory, January 9, at 11 o'clock. The hour began with the singing of a hymn, Scripture reading, an invocation ending with the Lord's Prayer. Announcements concerning the mid-year examinations and the changed outline of next semester's courses were made by Professor T. H. Eaton, who occupied the chair in the absence of President Charles L. Beach. The five-minute talks were: "What we, as students, are going to do for our country", by S. B. Morse, '18; "What we, as students, can do to make our College better in 1918", by L. L. Crosby, '19; "What the students can do to make our College better in 1918", by Professor W. L. Sanford, Jr.; "What the faculty can do to make the College better in 1918", by P. L. Sanford, '18; "What we, as faculty members can do to make the College better in 1918", by Professor T. H. Eaton.

F. B. Thompson, '18, has successfully passed his examination for the Aviation Corps and expects to be called for training in about eight weeks.

STUDENTS SPEAK AT PRESIDENT'S HOUR

PRES.BEACH ATTENDS EMERGENCY MEETING

AGRICULTURAL COLLEGE PRESIDENT MEET AT WASHINGTON.

College Agricultural Experts to be Placed in Class Three.

President Chas. L. Beach attended an emergency meeting of the Association of American Agricultural Colleges held at the Cosmos Club, Washington, D. C., on Saturday, January 12, 1918.

A committee was appointed to confer with the Secretary of War and Secretary of Agriculture regarding the possibility of deferred classification for extension workers and other agricultural experts. General Crowder has since made a ruling authorizing local and district boards to classify in division "F", class three, any necessary highly specialized agricultural expert employed by a state agricultural college, established under federal law and regularly receiving federal funds, who is found to be necessary to agriculture as an industry and necessary to the adequate and effective operation of the service in which he is engaged, and who cannot be replaced without substantial material loss and detriment to the adequate and effective operation of the service.

The board shall proceed to the consideration of a claim for such classification in respect of any registrant only when made in the usual manner and supported by the affidavit of the president or other executive head of the agricultural college by which he is employed, setting forth his duties and particular service, and saying that such registrant is necessary to the adequate and effective operation of the service in which he is engaged, and cannot be replaced by another person without substantial and material loss to the adequate and effective operation thereof. Any registrant when so classified shall stand in all respects under the regulations as other registrants classified in such division and class.

A committee of the Association was appointed to confer with the Secretary of War and Provost-Marshal Crowder, regarding the possibility of securing the same ruling regarding the classification of students of agricultural colleges, that has been made in respect to students of engineering schools and colleges. As yet no word has been issued by the War Department concerning the proposed classification.

Miss Margaret Dodge spent Sunday, January 12, at Camp Devens with her brother who is in the Signal Corps.
COLLEGE TO TRAIN TEACHERS.

(Continued from page 1.)

quired will be practically the same as at present, with electives in Vegetable Gardening, Pomology, Dairy Husbandry and Poultry Husbandry. Students preparing to teach agriculture must have prior to graduation, approved records of nine months of practical farm experience acquired outside of the course. It will also be required, that the prospective teacher have a grade, to the extent of not less than 300 hours in Agricultural schools of secondary grade, under the supervision of the head of the Department of Agricultural Education in the College.

The requirements for entrance and graduation, and the qualifications necessary to teach in both the Agriculture and Home Economics courses, are as follows:

Entrance Requirements.

Students shall not be less than sixteen years of age, shall be graduates of public high schools, or of private schools of secondary grade in Connecticut, having a program of not less than three years and one-half units, approved by the State Board of Education, or of equivalent institutions in other states, or shall have passed the examinations of the College standards in other examinations of like standard, in four and one-half units.

Students Preparing to Teach Agriculture—Requirements for Graduation.

Such students shall complete in conformity with the College standards a group of studies approved by the head of the Department of Agricultural Education. Grouping of studies shall be according to the following plan:

Students Preparing to Teach Home Economics—Requirements for Graduation.

Such students shall complete in conformity with the College standards a group of studies approved by the head of the Department of Home Economics in Agriculture. Grouping of studies shall be according to the following plan:

Military Ball to be February 22

Military Competition on Following Afternoon.

Committees in Charge of Dance are Appointed.

At a meeting of the Students' Organization held recently, it was decided to hold a Military Ball on the first of February 22. This is the first time a Military Ball has been given at the College since 1915, and will be the first one to be held in the Armory. The dance will be informal for those who are not in olive drab, but all students who attend are expected to wear their uniforms.

It is also planned to have a military competition on the afternoon following the dance, similar to the competition held last Washington's Birthday. The competition in the Manual of Arms will be held, as has been the custom in the past, during the intermission of the dance.

College Men Speak at the Dairymen's Convention.

A number of the men connected with the College gave lectures at the Dairymen's Convention, which was held in Hartford this week. These talks did not pertain strictly to dairy farming, but were general. Among the speakers were:

Dr. E. H. Jenkins, on "Cows Breeding in Connecticut;"
Professor H. F. Judkins, on "Scoring of Butter;" and "Variations and Compositions of Milk and their Relation to Milk Standards;"
Professor G. C. White, on "Sterilizing Milk Utensils;" and "Recent Experiments and Investigations on Contagious Abortion;"
Professor W. E. Eaton, on "Results of Experiments in Farming with Bacteria;"
B. G. Southwick, on "Raising More Grain on Dairy Farms."

The Dairy Department has received a simple home-made sterilizer from the United States Department of Agriculture. The sterilizer consists of a tank heated by means of an oil stove. This tank is filled with water, which is converted into steam, and the utensils to be sterilized are placed over a steam jet. This apparatus has been at the New Jersey Experiment Station, where it was used in connection with the short course. Professor G. C. White took the sterilizer to Hartford where he exhibited it at the Dairymen's Convention.

Dairy Short Course Ends.

The Short Course in Dairy ended January 17, with a smaller enrollment this year than in previous years, there being but four that took the course. Those that enrolled were E. C. Atchison of Waterbury, C. G. Beaumont of Rocky Hill, A. W. Grear of Middlesex County, and Percy Atchison of Boardman, who has had considerable experience in dairying, being the owner of a fine Holstein herd with which he took a great many prizes at the Hartford Fair a few years ago.

There is one consolation in living up holy in the wilderness. We at least have plenty of wood even if it is green.

W. S. Battis Impersonates Characters from Dickens.

Prominent People Portrayed in a Real and Life-Like Manner.

The third program of the Entertainment Course was presented by William Sterling Battis at Hawley Armory on Saturday evening, Jan. 12. Mr. Battis portrayed several of Dickens' more prominent characters, giving the impersonations in costume and make-up and reciting a monologue with each character taken from the book in which the character appeared. Mr. Battis is one of the most prominent of the country's impersonators and is the man who makes the Dickens' records for the Victorian.

His impersonations were made the more real by his "making-up" before the audience, thus allowing the character to grow before them. The most striking impersonations were those given of Charles Dickens, Captain Dombey, Micawber, Uriah Heep and Bill Sikes.

Received a Bad Cut.

Miss Mary Dwyer, '21, received a deep cut over her left eye from a fall on the ice near the Horticulture Building on Saturday, January 12. Miss Dwyer was attended by Dr. Simonds of Willimantic, who found it necessary to take two stitches to close the wound. Miss Dwyer, with Miss Rose Schoolich, had been putting sand on the walks around the cottage just before the accident.
COLLEGE MEN MUST AVOID SLOUCHINESS

OFFICER GIVES REASONS FOR FAILURES AT PLATTSBURGH.

Many men do not make good Officers Because of Inaccuracy.

The President, Connecticut Agricultural College, Storrs, Conn.,

Dear Sir:

Believing it might be interesting and helpful to schools and colleges in the present emergency, your attention is invited to the following observations of a candidate at one of the Reserve Officers' Training Camps, as to the probable causes of the considerable number of rejections of candidates for reserve officers at the training camps.

Perhaps the most glaring fault noted in aspirants to the Officers' Reserve Corps and one that might be corrected by proper attention in our high schools and colleges, might be characterized by the general word "Slovenliness." I refer to what might be termed a mental and physical indiscipline. I have observed at camp many otherwise excellent men who have failed because in our school system sufficient emphasis is not placed upon the avoidance of this mental and physical handicap. In the work of the better Government Military Schools of the country this weakness is thought, presentation and bearing is not tolerated, because the aim of all military training is accuracy. At military camps throughout the country mental alertness, accuracy in thinking and acting, clearness in enunciation, smoothness and ease of carriage and bearing must be insisted upon, for two reasons: that success may be assured as nearly as human effort can guarantee it with the material and means at hand, and that priceless human lives may not be criminally sacrificed. Only by the possession of these qualities referred to does one become a natural leader.

A great number of men have failed at camp because of inability to articulate clearly. A man who cannot impart his part to his command in clear, distinct language, and with sufficient volume of voice to be heard reasonably far, is not qualified to give commands upon which human life will depend. Many men disqualified by this handicap might have become officers under their country's flag had they been properly trained in school and college. It is to be hoped, therefore, that more emphasis will be placed upon the basic principles of elocution in the training of our youth. Even without prescribed training in elocution a great improvement could be wrought by the instructors in our schools and colleges, regardless of the subject, in insisting that all answers be given in a loud, clear, well-rounded voice; which, of course, necessitates the opening of the mouth and free movement of the lips. It is remarkable how many excellent men suffer from this handicap, and how almost impossible it is to correct this after the formative years of life.

In addition to this physical disability and slovenliness, is what might be termed the slovenliness of mental attitude. Many men fail to measure up to the requirements of the Officers' Reserve because they have not been trained to appreciate the importance of accuracy in thinking. Too many schools are satisfied with an approximate answer to a question. Little or no incentive is given to increased mental effort to coordinate one's ideas and present them clearly and unequivocally. Insistence upon decision in thought and expression must never be lost sight of. This requires eternal vigilance on the part of every teacher. It is next to impossible to correct this after the handicap, and how almost inevitable men suffer from this handicap, and how almost impossible it is to correct this after the formative years of life.

The opening of the mouth and free carriage with the bearing of a natural leader.

Reforming Athletics.

Dr. Sargent, in his speech at the annual meeting of the Athletic Research Society, found himself forced to an honest admission that we are not yet—unless we are capable of being—anything like what might have been. We have, perhaps, learned that we cannot, with any degree of assurance, be relied upon to credit anything good—without having brought to our university and college authorities a belated realization of the fact that for many a long year they have been cultivating, honoring, and rewarding a kind of physical training the benefits of which were confined to a small fraction of the student body.

Sargent, from his much knowledge, Dr. Sargent condemned the system that does, indeed, produce a few athletic specialists of remarkable ability, but does next to nothing for the bodies, and probably a lot less than nothing for the ethics, of the boys, who because they cannot "make the teas", have their participation in athletics reduced to the sorry role of howling spectators of gladiatorial combat. Now, the reason why this sort of training are that the army and navy get from the colleges is relatively small number of highly developed men, and relatively large number of men whose physical powers are far less than what they could and should be.

The trouble with our collegiate athletes is that they have been viewed as an end instead of as a means. The truth is, this hasn't been, in practice, whatever it may have been in theory, the winning of games, the creating and retaining of records, and, worst of all, the "earning of money for use in winning more games and creating and retaining more records."

According to Dr. Sargent, things are better now. The old mistake has been recognized, and a form of training that is extensive instead of intensive, has been adopted—at least at some of the colleges. But real and complete reform will not be effected until the student athlete recognizes the money and money's wages—has been abolished. (Editorial in "New York Times", December 29, 1917.)

A Step Ahead.

It is gratifying to the student body at large, to see steps taken toward a form of student self-government, which is going to bring the students and faculty into closer touch with each other, and harmonize the movements of the College. Nearly all colleges of good standing, have some form of student government, and it is certainly none too soon to make such a move here.

We believe that the committee, which has been appointed to represent the different classes, is going to be an efficient and desirable means of expressing the opinions of each body, and in the same way bring the views of the College headquarters before the students. We are going to make a much closer link between the two bodies, and at the same time do away with a great deal of confusion and misunderstanding.

We hope that eventually there will be a fully organized form of student self-government here at Connecticut, for after all, it is to a great extent, the students that make the College.
Since I wrote my last letter we have moved to an entirely new camp in a section of France. The people here are about the same though, glad to see the Americans, but they speak with a different accent due to their habits, but I suppose to the fact that they are more countrified. We are in a smaller town too.

This is one of the most interesting parts of France. There is a church here over a thousand years old—L'Eglise Saint-Michael—and a few ways from this town there are ruins of the old castle from which the old town is named. We are going out to see it this afternoon. The houses too are of the quaintest style, plain with red-tiled roofs.

* * * Officers are billeted in homes in this town. We are living with a family with a schoolhouse. The building was originally a theater. We are sharing a room with four other officers. We are fairly high in the town, but we are all collecting and will have a big line to show when we get back. F—and I have decided to start a diary today.

On our trip here we passed through French towns of every size and description. We are on a high hill or bank we would see the ruins of some old castle or possibly an old one still standing and some even in use. There were beautiful French chateaux, and some of the gardens and vineyards were certainly wonderful.

The grapes and fruit here are fine anyhow and I spend quite a bit of time buying those big white grapes that we usually get in Thanksgiving time. * * * * *

Yesterday we bought an alarm clock. Those French feather beds are so soft and deep that we can almost sink into them.

Yesterday we bought an alarm clock. Our Base Hospital is also very large, and is composed of 29 buildings. The wards hold 30 men each, and are finely equipped. I was fortunate enough to get an appointment as a ward-master in charge of one of the wards. It is of course a very busy job and I'm on the jump every minute, but expect to get a sergeantcy out of it.

Very truly yours,
CRAWFORD GRISWOLD.

Base Hospital,
Camp Hancock,
Augusta, Ga.
THE CONNECTICUT CAMPUS

TEAM LOSES TO N. H. STATE.

Fast Game Ends 33 to 24 in Favor of Visitors—Captain Lockwood Scores 20 Points.

Our basketball team lost to New Hampshire State in the Hawley Armory by a score of 33 to 24 on Friday, January 11. The game was fast and exciting throughout. During the first half it was anybody's game, but the Granite State quintet took advantage of our team's poor defense and made eight field goals and four goals in the second half. Captain Lockwood starred for the home team, scoring 20 of the 24 points, while Prescott played a good passing game. Captain Cahaline played a fast game for the visitors. The lineup was as follows:

Connecticut New Hampshire
Lockwood Capt. rf. Cahaline Capt.
Manchester lf. Butler
Goodrich c Anderson
Ryan rg Shuttleworth
Prescott If Davis
E. Moore rg

Baskets from floor: Lockwood 4, Davis 3, Cahaline 3, Manchester 2, Anderson 2; fouls: Lockwood 12, Cahaline 11; time, 20 minutes; scorer, Morse, referee, Cooper.

J. G. WATSON SPEAKS.

J. G. Watson, field man for the Ayrshire Breeders' Association, with headquarters at Brandon, Vt., spoke January 11, on the points, and evolution of different types of livestock. He told how the Ayrshire breed originated in the town of Ayrshire, Scotland, and mentioned the conditions in the islands of Jersey and Guernsey, where he has visited. Mr. Watson especially emphasized the keeping of a good bull in the herd and the making up through selection. In conclusion, he said that the Ayrshire breed had a promising future before it because of the fact that they are hardy, easy feeders, and have not as yet reached the height of their productiveness.

POULTRY DEPARTMENT BUYS CALCULATOR.

The Poultry Department has just received a new $800 Monroe Calculator. This is the most modern calculating machine on the market and can be applied to all kinds of mathematical work. It not only gives the results of calculations but also shows each step of the work, so that a check may be easily made. The Department will use the machine.

H. R. MONTIETH GIVES TALK.

Explains Diplomacy and Causes of Great War.

Professor H. R. Montieth in his talk on “The Diplomacy of the Great War,” at President's Hour, Thursday, January 17, explained very clearly the causes for the European conflict. Although Professor Montieth did not in any way contradict himself, he left no doubt in the minds of the audience as to where the blame for the war should be laid. He expressed the belief that America, with the assistance of the Allies would bring this great struggle to a close.

PUBLIC AUCTION HELD.

Charles Rosebrook sold his registered Shorthorns and farm tools at public auction on Wednesday, January 16. Mr. Rosebrook recently sold his farm to the College, and as he intends to retire from farming he will have no more use for his equipment. The tools were sold in the morning, but the seventeen head of stock were not put under the hammer until afternoon. The animals were all registered, but were in poor condition, consequently the bidding was not at all spirited. The prices ranged from sixty to eighty dollars for the most part, and twenty-five dollars a head, which in most cases was what they were worth for beef. C. E. MacFarland of Willimantic acted as auctioneer.

In order to increase the interest in food conservation, the Farm Bureau have decided that one town in each county shall hold a food fair during the last week in January. Manchester has already held one of these fairs. It is hoped that other towns will copy the example and by means of lectures, displays and circulars the importance of food conservation will be brought into the minds of more people.

PEAR TREES SPRAYED.

S. B. Hollister, instructor in Horticulture, sprayed the pear trees in the College orchards January 18, for pear psylla. This is an insect enemy that winters beneath the scales of the bark. The best remedy, Mr. Hollister says, is a prepared scalicide, which can be sprayed on at any time when the temperature is above freezing. He prefers to do it in winter rather than in spring, when more pressing work is at hand.

Due to the fact that classes were not under the personal direction of Col. J. S. Parke, the Commandant, until so late in the semester, he has deemed it advisable for all classes to take examinations. In all probability, those having a satisfactory average next semester will be excused from the final examination.

COLLEGE IS NOW WITHOUT COAL

A PORTION OF GREENHOUSES ARE VACATED.

Boilers Fired with Wood—1500 Cords have been Bought.

Word has been received at the College that the Coal Administrator would not help us to secure coal, as we are not expected to burn wood. Wood has been used for heating some of the buildings for considerable time, but none but housetops as well as both dormitories and some of the faculty houses are required to use it. To keep the fires going in the greenhouses and dormitories last Sunday, it was necessary to have two teams hauling wood all day. On January 16, G. C. Frazer, superintendent of the greenhouses, ordered his men to move all the plants to the palm house, which will be kept at minimum temperature. The cucumbers and tomatoes are being taken out and lettuce put in their places, as the latter requires only a very low temperature. By this means the furnaces can be run very low and yet the houses will not have to be closed entirely, which would mean a very considerable loss.

R. I. Longley, Treasurer of the College, said recently: "In the first place we did not make any contracts for coal because we did not know whether we would need soft or hard coal. If the central heating plant had been finished we would have had to have soft coal, as it is now we need hard coal. Most of the college families are fairly well supplied, so there is no trouble there, but they will have to look ahead for next year. Last Sunday Messrs. Judkins, Downs, Moss, Whiter, Hollister, Terry, Card, Frazer and myself spent the day chopping wood for our own use. The faculty can buy the wood as it stands and cut it at their own convenience. We have very little coal on hand, but I have bought 1,500 cords of wood, which, of course is green, and probably not more than 500 cords of it will be used this winter. We are also using some wood from the college land and I am asking now for authority to buy more wood. The coal consumption here at the college was 1,800 tons last year. This year so far we have had only 806 tons, but I expect to get 300 tons more, making a total of 1,109 tons. At this rate we are cutting our coal consumption about 40% at present."

PEACH BUDS BLASTED.

The Connecticut peach crop for the year 1918 is likely to be very small, according to S. P. Hollister of the Horticultural Department. All over the state the unusually long and severe period of cold has killed practically all the fruit buds on the peach trees. The senior class in horticulture has cut open a hundred or more buds and found every one dead. This means that here at least there will be no peaches this year.

FRESHMEN DEFEATED BY WINDHAM HIGH.

Take Small End of 20-13 Score in Fast Game.

Handicapped by the loss of four regulars who represented the team in last year's games, the freshmen were defeated in Willimantic on January 9, at the hands of Windham High by a 20-13 score. The game was fast and exciting, there being many spectacular plays, and it was not until the final whistle, that the contest was decided. When halftime was up the score was 10 to 5 in favor of the home team. During the second period, Olds, who was playing a fast floor game had the misfortune to lose a tooth and retired in favor of Downs. A. Lamoouex starred for the winners, while Gromwoldt and Knott carried off honors for the losers. The teams will probably meet again in the near future.

The lineup: 1921:

Windham
Olds, Downs If L. Lamoouex
Carpenter rf Howie Osborne
Gromwoldt e A. Lamoouex Knott lg Tighe Maier, Carpenter rg Lunner

The score: Windham High 20, 1921, 13; field goals; Gromwoldt 2, Howie, S. A. Lamoouex 3, Carpenter 2, L. Lamoouex 1, Lummie 1, Tidge 1, Osborne 1; foul goals: Gromwoldt 3, A. Lamoouex 2, referee, Chaffer; score: Richards; time: 35 minutes. About fifty of the student body attended the game and enjoyed dancing after the contest until 11 p.m.

A. T. BUSBY INJURES KNEE.

A. T. Busby had the ligaments torn from his right knee by falling from a horse on Saturday, Jan. 19. Mr. Busby had just started on a horse, which he was delivering for the farm department, when the horse bucked and caused the saddle to slide. In an attempt to save himself, he jumped, but slipped on the ice, thus receiving his injury. As a result of his fall, Mr. Busby is confined to his bed.

WADHAMS—STRONG.

Dwight B. Wadham, '13, was married to Miss Ruth A. Strong on Tuesday evening, Jan. 15, 1918, at the home of the bride, 53 School Street, West Hartford. After a short wedding trip, Mr. and Mrs. Wadham will reside in Bloomfield.

Miss Ethel Earle of Hartford, Conn., was the guest of Miss Marion Nutting at the Cottage, January 12. Miss Earle is a junior at the Northfield Seminary, Northfield, Mass.

Samuel Graithwell, the National Prohibition lecturer of Cincinnati, Ohio, was the guest of Miss Helen Bishop from January 2 to January 11.

50,000 Branches and Local Agencies the World over.

THE DE LAVAL CREAM SEPARATOR

Is a Winner!

WHY DON'T YOU LET IT WIN FOR YOU?

At the great national and international expositions, the juries have invariably acknowledged the superiority of the De Laval. They awarded the Grand Prize—the highest possible award—to the De Laval at the Panama-Pacific Exposition at San Francisco in 1915, as also at Buffalo, Chicago, St. Louis, Paris, Brussels, and all the great world expositions for more than 35 years.

De Laval Produced Cream Makes Best Butter

At every convention of the National Buttermakers' Association, butter made from cream separated by a De Laval Separator has scored highest—a 100 per cent. record for the De Laval, which only unusual merit has made possible. The superiority of De Laval Separators and of De Laval produced cream is no longer questioned. It is an accepted fact.

ETA LAMBDA SIGMA.
We wish to announce the marriage of Brother Harry G. Hanks, '06, and Miss Ethel Griffin on Saturday, January 12, 1918, 6 o'clock, at Best View, Quaker Hill, New London, Conn. The brothers present were Richard Starr, '16, Lawrence Cassel, '19, Ernest Carpenter, '21, Alton Horno, '18, and Frederick Maier, '21. Mr. and Mrs. Hanks will reside at 171 Wethersfield Avenue, Hartford, for the winter.
Richard Starr, '19, is on the U.S. Shawmut, care of Postmaster, New York City.
Edward Sherman, '21, left College Saturday, January 12, for two weeks, having been exposed to the mumps.

CO-EDS GIVE LINEN SHOWER.
A linen shower was given the Misses Corrine Tapley and Helen Bishop by the co-eds on Thursday afternoon, January 10, at Grove Cottage. Miss Tapley and Miss Bishop were invited to one of the rooms for a spread, where two white parasols had been suspended upside down from the ceiling, and contained part of the gifts, the rest of which hung from the tips of the ribs. After the presents had been opened and inspected by everyone, refreshments were served. Among those present were Mrs. Irving Davis, Miss Eleanor Moss, and Samuel Grathwell, Miss Bishop's fiance.

SUNDAY INSPECTION HELD.
The First Sunday Inspection was held January 14, 1918, by order of the Commandant, primarily as a check on the inventory of ordnance and equipment, although the rooms were also given attention. Major S. B. Morse and First Lieutenant A. T. Busby of the Cadet Battalion, inspected Koome Hall, while Adjutant D. H. Horton and Quartermaster-Sergeant T. F. Murphy inspected Storrs Hall.

Of Interest to College Automobile Owners.
