The Class Day and Commencement exercises of the graduating classes of 1918 will be held on the Hill the week-end of May 11. As is the custom the examinations for seniors will be over by May 5 and the first exercise for the week will be the Baccalaureate sermon on Sunday, May 5, at 3:00 p.m. in the church. The services of Dr. Eaton and Dr. Parry who were so popularly received at the time he gave his lecture on David Lloyd George, have been secured for this occasion.

On Friday, May 10, the Class Day exercises of the combined College and School classes will be held in the Armory at 10:30 a.m., and the graduates will experience the utmost cooperation between the two graduating classes is being shown. This is due partly to the reduced number in the classes and also to the spirit of the times, but it is chiefly accounted for by the extreme open-mindedness of these classes and a desire on the part of each to offer the least possible hindrance to a most successful graduation. The meeting this year is quite important since the election of officers takes place and prosperous classes. The meeting this year is quite important since the election of officers takes place and the graduating classes. The meeting.

The Commencement exercises proper will take place at 10:30 a.m. George B. Chandler, a member of the State Council of Defense, who was to have given the Commencement Address, has sent word to Dr. T. H. Eaton that he will be unable to speak at Commencement. Mr. Chandler has recently been sent on a tour of the West by the National Council of Defense. Dr. Chandler, therefore, engaged Dr. Warren H. Wilson of Columbia University to give the address. Dr. Wilson is the lecturer in psychology and rural education and is a very interesting speaker.

The following committees are in charge of the activities:—faculty, Professor C. A. Wheeler (chairman), Professor J. N. Fitts, Professor H. L. Garrigus; College Seniors—P. L. Sanford (chairman), D. H. Horton, A. G. Tappert; School of Agriculture—B. E. Callahan, J. B. Stuart, J. F. Wood.

### JUNIOR-SENIOR BANQUET.

The Annual custom of the Junior-Senior Banquet was revived again this year when, on the evening of April 11, 1918, the Class of 1919 gave a banquet to the Seniors in the College Dining Hall. The tables were arranged in the form of a square and were daintily decorated with potted plants and class banners, while the windows were decorated with flags.

Dinner was served at 7:30 and nineteen students and guests partook of the repast. The menu was well gotten up and consisted, in the main, of roast turkey.

After the banquet, C. R. Brock, President of the Junior Class, presided as toastmaster and called for impromptu speeches from members of both classes and the faculty members who were present. Thirty-three former members of the two classes are now in the Service, and many have left College to take up other war work.

The Junior Committee in charge of the banquet were A. C. Bird, A. C. Mallett, and L. W. Cassell.

### RULES TO GOVERN ELECTIVE COURSES

#### 30 HOURS NECESSARY IN MAJOR STUDY SELECTED.

Faculty Give Out Rules for Guidance of Students in Selecting Courses.

At a faculty meeting on April 13, the set of rules drawn up by the Course of Study Committee were presented and passed. The rules govern the actions of students in the College in making their choice of elections, and they will take effect for those who entered in 1917 and succeeding years. The rules drawn up are as follows:

In order to insure wisdom in the choice of elective studies, students will be governed by the following rules. Exceptions, however, will be freely made upon petition to the

(Continued on page 3)
SPRING INFORMAL
HELD IN ARMORY

LAST DANCE OF YEAR ENJOYED

Sixteen Dollars Realized Will be Given to Some War Fund.

The last big dance of the College year was held on the evening of April 12, in the Hawley Armory and was known as the Spring Informal. Although the weather was not such as to give an appearance of spring, the couples who attended the dance seemed to forget that a storm was raging without and entered into the spirit of the dance.

The Armory was tastefully decorated with blue and white bunting and American flags, while a number of the boxes were decorated to bring out the red, white and blue color scheme.

Dancing started promptly at 8.30 and the twenty-dance program which lasted until 1 a.m. went through with no interruption. Pickett's Orchestra furnished the music. The proceeds of the dance amounted to $16.34 and will be given to aid some war fund.

The committee in charge of the dance were as follows: Executive Committee—P. L. Sanford (chairman), A. C. Bird, C. R. Brock, E. E. Brigham, F. Bauer; Decorating Committee—I. W. Case (chairman), G. R. Durham, D. J. Scott, L. R. Moore, E. E. Sherman, B. F. Dibble.

VAUDEVILLE SHOW. (Continued from page 1)

J. N. Fitts substituted for Ernest Carpenter, who was taken ill. "The Kintsey Twins", in which Mrs. Glenn H. Campbell featured, kept the audience in continual laughter. "W. E. Kantact", a squirrel food act, was presented by A. T. Bushby, A. C. Bird, and I. E. Stoughton. S. B. Moras and Miss Mary Dwyer gave many pleasing solos in "A Little Harmony by Our Own." "Much Ado About Nothing; or, A Tragedy of the Future" remove all cause for the use of other property was signed in the name of Whitney Road. This is the legal title according to the contract and will remove all cause for the use of others in referring to it in the future.

L. L. CROSBY.

Lincoln L. Crosby has left College to take up his duties as garden supervisor in Greenwich, Conn. Mr. Crosby showed much interest in student activities while on the Hill, being editor-in-chief of "The Campus" vice-president of his class, chairman of the Junior Hop Committee, secretary of Student Council, and a member of the College Shakespearean Club. He is also an honor student and a member of the honorary fraternity, Gamma Chi Epsilon.

CITY MARKETS STUDIED.

H. B. Price Prepares Maps Showing Different Phases of Marketing in Several Cities.

A considerable study has been made of the markets and marketing conditions about the state by Professor G. C. Smith and H. B. Price. As a result, maps of the cities of New Haven, Hartford, Bridgeport and Waterbury have been made by Mr. Price, who deserves no little credit for his work along this line. On these maps the retail groceries; the wholesale produce markets; the wholesale butter and egg firms; the public cold storage houses; the railroad, trolley and steamship systems are all carefully laid out and designated by various colored dots.

These maps will be used in studying the efficiency of markets in accordance with the transportation and their adaptability as selling centers. At the same time it will enable the locating of new markets, that might be established, at the most desirable places. The students in marketing at the College will be afforded the opportunity to study the conditions and can be trained for positions in marketing lines.

A number of markets have been organized as a result of the movement which enables the sellers to get a better trading basis and at the same time it acts as a guide for placing products on the market.

REV. J. B. PARRY TALKS ON DAVID LLOYD-GEORGE.

Dr. Parry, a Personal Friend of Lloyd George—Grew Up with Him.

On Wednesday evening, April 10, Rev. Dr. Parry, a personal friend of Lloyd George, gave an interesting lecture at Hawley Armory on Premier David Lloyd George of England. He is an intellectual giant and the statesman and he portrayed in an interesting manner some of his peculiarities. Being a Welshman by birth, and, having been educated in Wales and England at the time when David Lloyd George was struggling for recognition in the English Parliament, he was able to give an excellent account of Lloyd George’s rise from a poor boy, without a college education, to Prime Minister of England.

In relating his personal experiences, he mentioned his very young age, when a young man, Dr. Parry showed the conditions under which the poorer classes of people lived at that time. During the course of the lecture, Dr. Parry, as most Europeans do, spoke highly of Theodore Roosevelt, comparing him to a spirited race horse, now turned out to pasture.

RULES FOR ELECTIVES.

(Continued from page 1)

Course of Study Committee in the case of students of maturity and earnestness of purpose who are able to show cause for the changes they desire.

During his Sophomore year, each student shall plan his elective for the remainder of his course. He shall choose a major study under the direction of his advisor, who shall be a designated instructor in the major group. The major study shall consist of not less than thirty semester hours of consecutive work in the major group, but elective courses already taken may be so counted. No course required of all students shall be counted by a student in his major group. The instructor in the major group shall be instructed in military training, which are to be given in the dormitory and to board the students at the College this summer. Each camp will be sent out to smaller camps in the remainder of his course. He shall result as the dormitory and to board the students at the College this summer. Each camp will be sent out to smaller camps in the remainder of his course. He shall result as the dormitory and to board the students at the College this summer.

TO TRAIN BOYS AT STORRS.

Four Training Camps to be Held at College This Summer.

A series of four training camps for high school boys will be conducted at the College this summer. Each camp will be two weeks in length and one hundred boys will attend each of the camps. The members of the camp will be under military discipline and will be instructed in military drill, and elementary farm processes such as hoeing, cultivating, harnessing horses and so on.

It is planned to have Koons Hall as the dormitory and to board the boys in the dining hall or possibly in a large tent which will be set up near the dining hall.

After the camp the members will be sent out to smaller camps in various parts of the state where labor shortage on the farms. The cost of the movement is covered by a special fund appropriated for the work of the State Council of Defense.

TO TEACH IN HIGH SCHOOLS.

Agricultural courses in the high schools of the state are gradually being adopted by the school boards, the first of these having been started in Middletown, on March 26, John G. Powers of Reading, Mass., and has been placed in charge of the work.

The school boards of New Milford and Willimantic have already asked to have courses instituted in the schools of those cities and towns. It is not known as yet just who will be placed in charge of these units, but the appointments will be made as soon as the plans are completed.

The plans for the courses in teacher training, which are to be given here at Connecticut, include the using of these schools throughout the state for practice training. Seniors in the teachers’ course will be sent out to the schools to act as an assistant teacher for a semester and they will be given credit for the work upon making reports of their teaching.

COME ACROSS.

"Fight or Buy Bonds, in the Third Liberty Loan" confronts us everywhere and the whole present situation could not be better summed up in so few words. We must, all fight or some other before another the Honey is overcome and the world is free for Democracy.

Many of our men are already in the government's service and more of us will be, before the fall session of school begins. Our Honor Roll now contains nearly 200 names of oldie's sons, and it is for us, the stay-at-homes, to back them up with our hard-earned cash. It is true of many of the students are working their way through College, and have only what money they can earn, which barely supplies their needs, but summer va-
cations are coming and you'll be able to earn more. A small bond on the installment plan will not over-tax any of us, and it is up to the students of Connecticut to loan their Uncle Sam every cent they can possibly spare.

It takes vast amounts of money to keep the boys at the front and B. I. l. would like to invest it in hard-earned cash in bonds to equip them- selves, we who are running no danger, certainly should be able to do as much. Let's show the boys at the front that we are behind them. Nobody has ever doubted our patriotism and don't give them the chance to do us harm. Buy Bonds in the Third Liberty Loan, for you may be in the service when the next loan is launched and you'll want to feel that people are backing you.

A PUBLICITY OPPORTUNITY.

The importance of the College press was brought out at the meeting of college press representatives in New York City recently. The Gov-
ernment has recognized that newspapers play an influential part in disseminating news through their students and alumni, and the Bureau of Public Information asked a meeting in order that the colleges might be so brought together that they could organize and work with the government in distributing news.

The readiness of the college press to cooperate was shown at this meeting by the number of colleges that were represented and by the expres-
sion of the various representatives.

The particular lines which were open for this work were publicity war work on such movements and activities as Liberty Loan Campaigns, Red Cross Work and the like. The conference agreed that such publicity was of the greatest importance in the present state of affairs and that all college publications should do their best to promote all Government activities.

Miss Helen C. Bishop, Miss Ger-
trude M. Laddy and Miss Anna Larsen attended a conference held at Smith College, April 13. This con-
ference was held by request of the institutions in New England which are giving food administration courses.

Students' Safety Valve

KEEP THE LIBRARY OPEN.

Dear Editor:

Our organization has been called throughout the College year to the fact that our college library is not available to us, as students; at times we are left with the best make do of the book. In my own case, and in that of many of the fellows with whom I have talk-
ed, Saturday afternoon, particularly, is one of the times when we can best make use of our time in the Library. I find that students who participate in College activities and who take courses which require thesis work are placed to much disadvantage by this condition.

We have a fine library and one well organized, and I believe that students who are desirous of making use of it should be encouraged in so doing and it should open and play it at their disposal Saturday after-
noons in addition to the present schedu-
le of hours.

STUDENTS TO SPECIALIZE.

G. S. Torrey, Registrar of the Col-
lege, spoke at the President's Hour on April 3. His talk was in part as it was the end of the college year and the students will be on their summer vacations, but it is to consider what studies they would like to follow in their College work. Each College Freshman will need to decide what department he wishes to specialize in. It is planned to have a major department, such as dairy, poultry, horticulture, and possibly a combination of the zoology and bot-
any departments into a biological de-
partment. The idea is to have stu-
dents specializing in one department to have so may hours required to be taken, and also it is left to the discretion of the student. He also explained the rules made by the faculty regarding students leav-
ing College before May 1.

Miss Moss Begins Extension Work.

Miss Eleanor S. Moss, formerly of the junior class, returned April 1, from Washington, D. C., where she received training in demonstrating the uses of cottage cheese as a source of using the surplus milk on the farms. Miss Moss left April 11 on a trip to the Connecticut College for Women, the Vocational school at New Haven, the State Normal at Danbury, and New Haven for the purpose of making arrangements for demonstrations and the securing and training of ladies in this line. In addition Miss Moss will visit the trade schools in Hartford, New Brit-

tian, Waterbury and New Haven, to make arrangements with the economics teachers for instruction in the making and the uses of cottage cheese.

A son, John Lee, was born Thurs-
day, April 11, at St. Joseph's Hospi-
tal, Willimantic, Conn., to Mr. and Mrs. K. B. Musser.

TO SELL MUCH TOBACCO.

Prof. Smith Assists in Forming Co-
operative Selling Organization.

The work of forming cooperative tobacco selling organizations in the tobacco sections of the state has been progressing rapidly under the supervision of Professor G. C. Smith. Organizations have been perfected in Windsor and East Windsor and meet-
ings are being held in several other towns for this purpose. The mem-
bers of these local bodies sign a con-
tract not to sell any of their tobacco, but to leave it in the hands of the manager of the organization. This contract is made good by each mem-
ber who gives a promissory note. Already over $1,000,000 worth of to-
acco will be, before the fall session of the year, in the hands of the organizations formed they will be federated into a state body.

SHORT COURSE IN GARDENING.

The short course in home garden-
ing at the College begins April 16 and will be conducted under the su-
 pervision of Professor A. T. Stevens. The purpose of this course is to in-
struct amateurs in the principles of gardening. Methods of soil prepara-
tion, planting, cultivation, varieties of vegetables best adapted for our conditions, and the insects and diseases common to vegetable plants and their treatment will be studied. In addition the preparation and use of sprays will be discussed and dem-
onstrated.

Twenty persons have applied to take the course and among these are a number of women who will be leaders in the Women's Land Army. The north section of the farm will be, before the Fall session of the year, in the hands of the organizations formed they will be federated into a state body.

ETA LAMBDA SIGMA.

Organized officially last Autumn, Richard T. Plumley, '16, has re-
cived his commission as first lieut-
enant.

Henry D. Jewett, '13, of the Cana-
dian Over-Sea Battalion, after spend-
ing three years fighting, has returned to this country and has enlisted in the United States Army and is now at the Texas Flying School.

R. C. Nesmith, '09, of the Reading Mark Gardens' Association, is planning to go into hog raising this spring.

NEW POULTRY BULLETIN.

The poultry department is prepar-
ing a new bulletin which will soon be available. The subjects treated in this bulletin are "The Normal Growth Rate in Rhode Island Reds and White Leghorns", and "Brooding." This will show what the normal growth should be at this season and that one may determine if the flock is doing as well as it should. The subject of brooding will be more fully covered than ever before. Many important details that are often omitted in oth-
er bulletins will be carefully explain-
ed. It is planned to have it of great value, not only to the small poultryman, but also to the experi-
enced poultry breeders.
RED CROSS TO GIVE ENTERTAINMENT APRIL 20.

Proceeds go to Surgical Dressing Fund—Official Pictures of Battle of Verdun to be Shown.

The Storns chapter of the Red Cross will present an entertainment and motion picture in Hawley Armory on the evening of April 20. The entertainment is to be given in conjunction with the National Surgical Dressing Committee of America for the purpose of raising funds for surgical dressings for use over there.

The first part of the program will consist of a playlet which depicts a concert in a French hospital at the front, the outlines of which will be furnished by the national committee. The characters consist of a doctor, internes, nurses, wounded and convalescent soldiers who are located in the hospital. Following this program there are to be shown four reels of motion pictures which were taken by the French Government at the battle of Verdun. These pictures are authentic and show with wonderful clearness the magnitude and awfulness of this battle. All four reels to be shown are as follows:

1. Battle of Verdun and wounded soldiers.
2. Work of the Red Cross.
3. Convalescents and the work of the Red Cross.

Proceeds will be formally presented to the National Red Cross Society by Major Charles B. Fuller, 1916, who expects to take up his position in France.

J. H. Hildring, '18, has arrived safely in Havre and will report to his unit in France. At the time he has been in a French hospital at the battle of Verdun to be used as an emergency hospital in which he is furnishing his services in agronomy and farm credit work in the other states, particularly New Hampshire, which is distributing the bulletin and the agricultural credit statements throughout that state.

The pedigree of the calf comprises:

- Breed: Guernsey
- Sire: Taconic Farms, of Taconic, Conn.
- Dam: a Guernsey bull calf from the Ed Alam Dairy, of Taunton, Mass.
- Pedigree due to be published in the Bulletin of the American Guernsey Cattle Club.

The dairy department has purchased a Guernsey bull calf from the Grassland Farms, of Taconic, Conn. The pedigree of the calf comprises some of the best families in the Guernsey breed and as a future herd sire of the College herd his success is very promising.

F. W. DUFFEE ACCEPTS NEW POSITION IN WISCONSIN.

F. W. Duffee has accepted a position at the University of Wisconsin where he will have charge of the extension and research work as well as being instructor in farm machinery.

Mr. Duffee obtained his B. S. A. degree at the Ohio State College in 1915. Since then he has been connected with this institution as instructor in agronomy and farm machinery. He expects to take up his new work September 1.

COLLEGE SHAKESPEAREAN NOTES.

T. B. Schmidt, '16, spent the week-end of April 10 at the College.

Lieutenant Louis Collin, '18, was on the Hill over the week-end of April 10.

Frederick Bauer, '20, and Lincoln Crosby, '19, have left the College to take positions as garden supervisors. Bauer is to have charge of the garden in West Haven and Crosby those in Greenwich.

An open meeting of the fraternity was held on the evening of April 13. Word has just been received that J. H. Hildring, '18, has arrived safely in France.

CREDIT WORK RECOGNIZED.

The bulletin by Professor G. C. Smith on "A Plan for Short-term Loans in Connecticut," has met the approval of the Executive Committee of the Connecticut Bankers' Association and the Board of Trustees of the other states, particularly New Hampshire, which is distributing the bulletin and the agricultural credit statements throughout that state.

Articles concerning this plan have recently appeared in the "Bankers' Farmer" of Champaign, Illinois; "Trust Companies," New York City; "Bankers' Monthly" of Chicago; and "Financial News" of Los Angeles. These journals are some of the leading publications in the field of the agricultural credit associations of the other states, particularly New Hampshire, which is distributing the bulletin and the agricultural credit statements throughout that state.

These journals are some of the leading publications in the field of the agricultural credit associations of the other states, particularly New Hampshire, which is distributing the bulletin and the agricultural credit statements throughout that state.

The dairy department has purchased a Guernsey bull calf from the Grassland Farms, of Taconic, Conn. The pedigree of the calf comprises some of the best families in the Guernsey breed and as a future herd sire of the College herd his success is very promising.

A number of the Faculty were in Hartford last week doing statistical work. The individual agricultural census returns of the four counties of the state of which a survey was recently made. Among others the various breeds of live stock were coded, so that a state census of live stock, classified by breeds will be available. The State Librarian, S. R. Godard, will set these tabulations into actual operation.
Important Business Transacted at Meeting of "Campus" Board.

The Honor Awards were given to deserving members of the "Campus" Board at a meeting held in the "Campus" office on April 13.

R. H. Barrett, who made a reputation for himself the first part of last year with the up-to-date paper put out by his fellow Gibraltar of honor "C" and L. L. Crosby, who worked with Mr. Barrett in developing the "Campus" early in the year and who took over the job of editor-in-chief when Mr. Barrett left College, was the other man to receive the honor of the Greek letter Psi, which is suitable for wearing on sweaters, and which is given as a minor award to three members of the staff, were given to C. R. Brock, E. D. Dow, and S. B. Morse.

This is the first time the awards have been made under the present system. The men eligible to receive these awards are named by the faculty adviser and the news board then selects a ballot from the list of nominees, the candidates who shall be given the coveted honor.

The news board also selected Chas. E. Broel as editor-in-chief for the remainder of the year. S. B. Morse is to be managing editor and Miss Helen Clark is advanced to a place on the news board to fill the position left vacant due to the advancement of Mr. Morse.

The handing over of the reins of the "Campus" management to Mr. Brock marks the beginning of the third editor-in-chief to the College paper this year. R. H. Barrett being the first editor and L. L. Crosby being the second. The editorship of the "Campus" seems to carry with it lucky charm, which brings about an immediate offer of a good position. Mr. Barrett is now Assistant County Agent of Hartford County and has charge of publicity for the Hartford County Farm Bureau. Mr. Crosby has taken up work as garden supervisor in Greenwich, Conn., which is one of the most difficult jobs of the kind in the state.

GIRLS VISIT HARTFORD.

Classes See Markets and Department Stores—Textiles and Furniture Studies.

The junior class in house furnishings and the second-year school class in cookery and sewing, with Corinne R. Tapley and Helen C. Bishop, instructors in these subjects, went to Hartford on Friday, April 12, and spent the day in the stores and markets.

Most of the morning was passed in G. Fox & Company’s new department store on Main Street, becoming familiar with the styles and prices of furniture suitable for completely fitting a house. Brown, Thomson & Company was also visited, where dress goods and faces were inspected. After luncheon at the Bond Annex, the prices of foods and vegetables were obtained at the Hartford Market and here also the various cuts of meats in the refrigerating plant were explained to them. At the bake shop at the Boston Branch, they watched the process of baking and making candy, many being especially interested in the making of doughnuts by an expert.

VALUABLE ANIMAL DEAD.

Dairy Department Loses Pure Bred Cow—Was Entered in Coming Holstein Sale.

On Friday evening, April 6, the dairy department lost one of its best animals, Fay Burke Piertjer, 205-189, sired by a former herd bull, Minnie bark Piertjer Burke, 74746, and out of one of the oldest cows in the herd, Fay M 2nd, who as a four-year old, made a seven-day record of 488.2 pounds of milk, and 22.5 pounds of butter, and as a yearling made a very creditable showing of 15,201.8 pounds of milk, and 653.5 pounds of butter.

Her death according to the college veterinarian, Dr. Dow, may be attributed to internal hemorrhages which occurred when she was freshened on Wednesday, April 4, dropping a strong, bright heifer calf. This calf is sired by the present herd bull King Segis Inka Payne, and if ancestry counts for anything in dairy qualities, should develop into an excellent member of the College herd.

Fay Burke Piertjer was entered, by Professor G. C. Waite in the Holstein sale which is to take place at Brattleboro, Vt., in the near future, and was expected to bring a very good price, as she was in very good condition and showed indications of bettering her former record. Holstein men will undoubtedly recall that the dam of the dead cow, Fay M 2nd, held for a long time the one-day record in the state of Connecticut, by producing in the twenty-four hours, 98.6 pounds of milk.

MEET ME AT THE Thread City Restaurant

Value is on Page 1 of Our Book of Business Principles

Value is a term found near the last in the Dictionary of Words, but which belongs first in the Dictionary of Commerce. It has always been at the top of page 1 in our book of business Principles.

We are giving greater intrinsic values than ever in Horstall Suits and Overcoats. We are selling at an even closer margin of profit than ever. We are more firmly insisting than ever upon pure wool, the cornerstone, and hand-tailoring, the coping-stone, of genuinely good clothes.

Our principle and practice is to give the fullest value in clothes for money's worth at $30.00 and upwards.

Sunday Parties by Hour or Trip at Reasonable Rates. Telephone 279-16.
LETTER FROM MANWARING.

Camp Devens, January 16, 1918.

Dear Grandmother:

Time and time again when I could have written to you just as well as not, I put it off, and now when I ought to be in bed, I am writing. I ought to be in bed because I was on guard last night and got about four hours of sleep (with my clothes on). I am an acting sergeant now and I was sergeant of the guard for the first time. Of course I was a little nervous about doing everything just right and there were so many things to think about that I was quite wide-awake most of the time.

We have a crack gun squad in the battery, made up of the non-commissioned officers, and I am mighty glad to be on it. We get gun drill about four hours a day and we are getting ready for actual firing. In the morning we have standing gun drill out doors, slipping and sliding around on the ice at double time. After that we spend an hour inside on firing data, an hour on the care of the horses, and an hour on the parts, working and care of the guns.

After dinner we work on the guns in the gun shed for two hours. We have to be ready for action in fifteen seconds. Then we work out firing problems using a dummy shell to load the piece with. My job is to work the fuse-setter, which regulates the height of burst of the shrapnel.

There is a rumor that we will go to Fort Sill, Okla., for our practice firing, but I presume it is only a rumor, as it is not at all reasonable.

I am not anxious to move as I have become quite enamoured of this place. I am quite as contented here now as I was at Storrs. Of course it is rather tiresome to do the same things over and over, but there is plenty of revision and our work is very interesting. It is a good deal like college just now, partly lectures and partly practice work. The only thing I don't like about the present program is that I don't get any work on the horses at all. I have not been near the stables in two weeks. I sure would like some work on horses as I am interested in them and have always liked them.

We have had some cold weather and a little snow. The thermometer went down and down and we had a cold snap, which I think was a little worse than I ever experienced before. There were several frozen cars and noses around camp. None of them were on me, I am thankful to say. At one time of the coldest weather we were marching when it rained, but now we have caps which pull down over the ears.

We had our first experience with gas last week. We went through the gas chamber which was filled with "tear" gas. It wasn't supposed to bother our breathing, but it did most decidedly! And weep--I never cried so much before since I reached ma-

Dear Brothers:

Fellows, I am just now realizing what a man gives up when he leaves a Mormon city, as Salt Lake City, for such a place as Little Rock! The cops watch you all night long. For a while off Salt Lake City treated us fine by inviting us to supper, entertainments, etc.

I enlisted the 4th of June and was placed in the post hospital at Fort Douglas. From the next morning I was official dish washer until July 4th when I was appointed to outside police duty. After three days of this I was made corporal. Then I was changed to orderly in the hospital. Shortly afterwards I was made assistant surgeon, and remained as such until I was transferred to the 4th and left Fort Douglas. I have no comments fit to print to express my idea of Camp Pike. I have been assistant in the dressing room since I came here. The army life is great if you don't weaken and even if you do. My best regards to all. Tell them I shall write soon regarding the life here.

JOHN MUSSELM. D. 43d Infantry, Camp Pike, Little Rock, Ark.

The Connecticut "Campus",

M. C. EDDY, Major, Coast Artillery Corps.

The issues of the "Campus", I must say, are most interesting to me. I am present on the artillery staff here in the Canal Zone, but of course cannot write for publication. Received my promotion to Major, Coast Artillery Corps, in November, with rank from August 5, 1917. I am under orders to proceed to Ft. Washington, Maryland, so if you will change my address I will be pleased to hear from the College.

ROBT. C. EDDY, Major, Coast Artillery Corps.

Two Holstein cows, DeKol Hubbard Piettertje 2nd and Dorinda Storrs DeKol, owned by the College, have just completed a seven-day official test. The first named, a matured cow, with twenty-eight pounds of butter to her credit, and the last, a junior four-year-old and not fitted for her best, yielded 22 pounds.

Miss Elizabeth Tapley has accepted the position with the Extension Service which Miss Hazel Puffer made vacant.
STUDENTS INSPECT DAIRY PLANTS

OPPORTUNITY GIVEN TO SEE ACTUAL OPERATIONS.

Ice Cream and Market Milk Plants in New Haven and Bridgeport Visited.

The classes in ice cream making and market dairying made a trip to New Haven and Bridgeport on April 6, for the purpose of studying the construction and practical methods employed in the operation of some of the large market milk and ice cream plants. The managers and men in the plants were anxious to answer any questions the students might ask and placed no restrictions on the extent of their inspection.

The first plant visited was that of the Semoa Ice Cream Company of New Haven, which is one of the most up-to-date plants in the country. John Semon, the president, related the history, the business policies, the actual work of the plant and guided the party through the entire plant. Opportunity was given to see the methods used in freezing and storing all types of ice cream, cutting and packing brick ice cream, and the decorating of fancy moulded ice creams.

At the New Haven Dairy Company's plant in New Haven, Manager C. Morris proceeded through the plant, which was in operation at the time, and explained the processes in handling the market milk. This offered the students a chance to see the manner in which a retail and wholesale market plant operated, as well as to see the "in bottle" method of pasteurization. The ice cream department was also studied.

On Saturday morning the Rubber Ice Cream Company's plant at Bridgeport was visited. Mr. Hubber, the manager, proceeded at once to make the fellows at home and a tour of his plant showed up-to-date construction, methods and equipment, and his liberal servings of ice cream convinced the men of the high quality of his product.

The party then proceeded to the Farmers Dairy Company, also in Bridgeport, which is a wholesale milk plant operated by farmers. The milk is brought to the plant, clarified, pasteurized, bottled, refrigerated and sold directly to milk dealers. The surplus is made into Italian cheese. This plant afforded an excellent opportunity to study the operations in these various processes by seeing them in actual working operation.

Some of the party visited the Mitchell Dairy Company plant in Bridgeport also, which handles market milk exclusively.

A 15-horsepower motor has been installed in the creamery to run the compressor for the refrigeration system. At present the refrigeration is being accomplished by circulating air, which has been cooled by passing through a small ice shed through the rooms.

GRANGE MEETS.

The local Grange held its monthly meeting on Monday evening, April 8, in the Second Congregational Church of Mansfield. At this meeting the following members took their third and fourth degrees: Miss Eleanor Moss, Miss Corinne Tapley, Mrs. L. Crane, Miss Helen Bolan, C. R. Brock, H. E. Fieneinan, M. H. Lockwood, C. D. Prentice, J. B. Pritchard, Carl Small, G. S. Stewart, C. F. Williams.

Following the administration of the degrees a harvest supper was enjoyed by all those present. After the supper a short program was rendered. Vocal solos were given by A. Roberts of the Wolf Den Grange, and later a debate was heard. The subject for the debate was: "Resolved, That Connecticut should Ratify the National Prohibition Amendment."

Those upholding the affirmative side were Professors W. E. Esten and G. H. Lamsom, Jr., and those upholding the negative side of the argument were Professor W. L. Kirpatrick, and E. S. Savage. The debate was decided in favor of the affirmative.

Remarks were heard from visiting patrons and F. K. Haines, also of the Wolf Den Grange and deputy of the State Grange was present at the meeting as an inspector. He examined the books and the conditions of the local Grange, which is an annual custom of the Grange.

Faculty Tennis Club Hold Meeting.

A meeting of the Faculty Tennis Association was held in the Faculty Club Room on April 13, for the purpose of electing officers and deciding on the matter of keeping the courts in condition during the coming summer. Last year's officers were re-elected and it was decided that the courts would be put into playing condition within a short time, to allow those members who care to play a chance for recreation.

The association also adopted a new plan for membership which allows a faculty member to become a playing member without becoming a fully active member until after five years as playing member. This plan, it is presumed, will benefit some of the instructors and others who are here for a short time only.

Students Leaving for Garden Work.

The College is sending out students who have been trained along agricultural lines to supervise garden work in the cities and towns about the state. Last year twenty-four men were placed in such work, and from all indications, the number will be as great this year as last. Those who have already been assigned to the work, and who left College this week are: L. L. Crosby, who goes to Greenwich, L. W. Cassel, to Manchester, F. Bauer to West Haven, and R. E. Fairchild to Plainfield. L. M. Chalmers, '17, will be stationed at Stanford. The work in Manchester and West Haven will be largely the supervision of boys' and girls' gardens.

We Want You to Bear in Mind

Our very Complete line of College Jewelry. We have recently placed an order for additional stock which will arrive before Commencement Week

Bring her in and make a selection which will be a reminder of a very pleasant occasion

The College Book Store

IN THE MAIN BUILDING.

The Connecticut Agricultural College

Storrs, Conn.

FOUR-YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B. S. degree.

TWO-YEAR COURSE in the School of Agriculture, for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who have completed the work of the common school.

FOUR-YEAR COURSE in Mechanic Arts. Four years of high school work required for entrance. B. S. degree.

FOUR-YEAR COURSE in Home Economics. Open to young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture.

Recent appropriations have provided additions to lands, buildings and equipment valued at $650,000. Expenses low. No tuition charge to residents of Connecticut. Military instruction. A catalog will be sent upon request.

CHARLES LEWIS BEACH, President.
