MILITARY DANCE ATTRACTS MANY

CLOSING EXERCISES HELD FOR S. A. T. C.

Trench Battle and Bayonet Drill Feature End of Training Camp.

The military ball, Friday, December 13, was a great success, over 1,500 couples attending. In fact the whole week-end from Friday until Monday was a great blaze of activity from beginning to end.

Saturday morning at 10:30 o'clock formal closing exercises for the S. A. T. C were held in the Armory, President C. L. Beach presiding. The first person on the program was Sergeant John Kiniry of Company B, who read the prophecy for T. Geant John Kiniry of Company B, who

SATURDAY, DECEMBER 13, 1918.

MILITARY BALL IN HAWLEY ARMS, DECEMBER 13, 1918.

SWAN SONG OF THE S. A. T. C.

The following parody on "Au Revoir, but not Good-bye", was written by Sergeant John J. Kiniry, Co. B, S. A. T. C. The song was sung at the Military Show held in Hawley Armory, December 13, and it represented the good feeling of the army boys for "our college."

Au Revoir, but not good-bye C. A. C. The first college in the land you will be. When we go away from here, Memories will then be dear And we'll hold you ever near, C. A. C.

In time of stress, remember we're true to you Prepared to show the work for you we would do. When your honor comes to test, You will win, because you're best. Au Revoir, but not good-bye, C. A. C.

was going to happen from one day

to the next.

The original plan for the S. A. T. C. provided for three terms of twelve weeks each. With the abandonment of the S. A. T. C., it has been decided to retain for the present, at least, the three-term division. It will be possible to continue the courses of study as published in the current catalog. That is, the first semester's work will be given as the second term and the second semester's work as the third term. There will be a short vacation between the second and third terms.

Although only twenty-four weeks will be available instead of thirty, the courses will cover practically the same ground. This implies the most earnest cooperation of faculty and students, the elimination of non-essentials and the adoption of "highspeed" methods. These are just as essential in our reconstruction policy as they have been in "winning the war."

Some deviation from the elective courses as published in the catalog may have to be resorted to this year in the case of junior and senior students on account of the small numbers that may be registered in those courses, but in so far as possible effort will be made to accommodate all.

SEVEN SPECIAL TRIPS TO EAGLEVILLE.

It Took 560 Worth of Parcel Post Stamps for the S. A. T. C.

Next to November 11, December 17 will probably stand out in the memory of Storrs residents for some time to come. That day the S. A. T. C. left the "hill." Such commotion and confusion as there was in the place! For several days there was an almost continual line of fellows from the barracks to the post office laden with bundles to mail. They weren't any little two-by-four affairs either, those bundles. Why beside all that local mail man could carry for three days, there was enough so that a special coach had to be sent from Eaglesville seven times to get it all. The office here was so full that there was only standing room in it.

How would you like the job of mailing about 560 packages and sticking about $60 worth of stamps on them. Well, that is what Mrs. William Crane had to do in three days besides attending to the other post office work. The first day of the rush the 11

o'clock train was held up at Eagleville about 15 minutes loading parcels. Goodness knows how long it was held up the rest of the time! Do you wonder where the boys got $60 to spend on postage stamps? They had payday just before they left. I had considerable time to drive on the front of the wagons and to see the beautiful country on the entire trip, but I was only able to do so for over two hours. Dr. F. E. Wilcox of this city was sent for. He found Wolfe suffering from a fracture, with his face badly lacerated.

Dr. Wilcox gave what treatment he could and gave orders for Wolfe's removal to Storrs, seven miles away. It was after two o'clock when Wolfe arrived at the hospital and at that time he had recovered consciousness.

The horse and team was standing in the yard near the dairy building, where the baggage was being taken away. Wolfe ran to catch the horse by the bridle, but was struck by one of the front wheels and knocked down.

GARRIGUS BACK FROM BIG SHOWS

WAS JUDGE AT THE AMERICAN ROYAL.

C. A. C. Professor Buys Cattle to be turned from a western trip, the first week of which he judged Hereford cattle at the American Royal Live-Show at Kansas City. This was the largest Hereford show ever held, 500 entries exhibiting. At this exposition he attended also the annual meeting of the American Hereford Cattle Association.

The next week of his trip he spent in the counties of Waukesha, Jefferson and Racine, in Wisconsin, where he bought a carload of Guernsey cows for Geo. M. Hendee of Suffield, Conn., at the International Livestock Show in Chicago.

Standing feature of his trip, however, was the few Eastern men to be called upon as judges for the big beef cattle shows both Kansas City and Chicago is a surprise to the men attending the In-ternational were afflicted with the "flu." The men attending the military week on the hill.

Professor Garrigus is one of the American Berkhame Association. At Chicago Professor Garrigus as-sisted in the selection of two carloads of purebredHerefords. The out-standing feature of his trip, Professor Garrigus said, though not related to cattle, was the fact that practically 100 per cent of the 14 men attending the In-ternational were afflicted with the "grove." Professor Garrigus is one of the few Eastern men to be called upon as judges for the big beef cattle shows of the west. His invitation to visit both Kansas City and Chicago is a recognition by the west of his work in Connecticut.

BOYS USE GROVE COTTAGE.

Anyone visiting Grove Cottage, December 10 to 13, might have mistaken the dance hall for Company B orderly room. The rush in writing discharge letters was so great that permission was obtained to come to the cottage 790 use "The Campus Typewriter". It was not uncommon to see a fellow perfectly at home in an easy chair reading a magazine, with two or six fellows grouped around the typewriter, apparently enjoying themselves. For some of them it was probably the first time they had been in a real house in several months. Some one was heard to remark that Grove Cott-age was serving the purpose of a Y. M. C. A. but.

NOTES.

Mrs. Walter Stemmons and two sons arrived here December 12, from St. Louis. They will live for a time in a house at the home of S. P. Hollister while the Hollister's are on a vacation. From the Hollister home Mr. Stemmons and family will move to the house recently vacated by Julius Hauschild.

Henry Dorsay, William Rhea, Allen Manchester and Maud Hayes are teaching in extension schools that have been organized throughout the state.

Two of our college trustees are newly elected presidents of Farm Bu-reaus: Joseph Alson of Newburg County, and Everett Brown of Windham County.

Several new pieces of machinery have been installed in the Extension building, mainly an Automatic Rotary Mimeograph, which will print from two to three hundred copies a minute, a new Addressograph, and a classified mailing list.

Ellsworth Langdon returned from Fort Monroe, Virginia, December 18, and expects to resume his old job in the Extension office soon.

Miss Dorothy Buckley has been judging at the corn shows throughout the state.

Miss Anna M. Wallace spent the week-end of the military week on "the hill."

Miss Helen C. Bishop, who taught the classes in cockery here last year, sailed December 5 for overseas canteen work.

"Very Well, and Good."

This expression is frequently heard coming from those engaged in some phase of the dairy industry, when the results of doing this or that just as well and better are of the day. It is not at all infrequent that such is like-wise their expression, when, after times they observe how positively clean, sweet smelling and sanitary a thing is made when washed by the use of Wyandotte Dairyman's Cleaner and Cleanser.

They realize a much greater benefit than even this, however, for but little common sense is needed to see in plainly that milk and its products coming in contact only with sanitarily clean surfaces will retain their original purity and freshness for a much longer period of time. This has been conclusively proven time and again by scientific experiment, few realize until they use Wyandotte Dairyman's Cleaner and Cleanser just how valuable it is when put into practice.

You may, therefore, be confident that you are making the safest kind of investment in placing an order with your supply house for this cleaner. It Cleans Clean.

This cleaner has been awarded the HIGHEST PRIZE wherever ex-hibited.

When You Buy a Tractor—

REMEMBER, it's the plows, disks, drills, binders, ensilage cutters, feed grinders, threshers and the like that do your farm work. The tractor is useful only as it furnishes cheap, dependable power for all the other machines.

That's why we say, if you need a tractor, you can't make a mistake in buying an International kerosene tractor.

We have had over 75 years' experience with farm machines. We know the kind of power they require—all of them. For over twelve years we have sold tractors that supplied that kind of power. We know from experience that the size and styles of tractors we sell today will work with the machines you depend upon for your success and prosperity. And—our tractors all operate successfully on cheap kerosene.

When you buy an International kerosene tractor you buy with it the benefit of our long farm machine experience and all the advantages of dealing with a service organization which brings a well stocked branch house or a live, wide-awake retail dealer within telephone call of you. It may surprise you to know that an International tractor, plus these advantages, which no one else can give, costs you less per year of active service than any other tractor sold in anywhere near the same numbers.

"The Campus" this year is being edited entirely by the women of the college, since the men are all in the service.

Subscription Price, $1.00 per year. Adverting Rates on application.
Entered as Second-Class matter at the Post Office, Enfield, Conn.

Green We Are" and other appropriate songs for the benefit of the inhabit­ants of Grove Cottage and assembled spectators. Due to the introduction to the college of a large number of men this year, the showing of the flag and for what it stood for. It was not until after the United States had entered the war that the flag stood for everything that we hold dear. Let us see to it that the ideals represented in the flag do not become clouded or obscured by any actions on our part.

To those who have had an opportunity of seeing a wonderful impression of military etiquette has been demonstrated in the formation known as "return," when in the formation the university naturally stands—the national flag is lowered. When the numerous regimental bands have played and the bugle-call known as "call to the colors," all enlisted men and officers give the prescribed salute. Even men not in formation stop any work and salute the flag, or if the flag is not in sight, the nearest band. It has often occurred to the writer that a more dignified ceremony should accompany the lowering of the flag on our campus. During the last semester a feeble imitation of the re­treat formation has been practiced but it has not been respected as it should have been. Let us see to it that with the reinstating of the R. O. T. C. we may have a new and better ceremony daily. When our bugler sounds the "retreat," each one of us stop our work and pay our respects to the flag. In these military postures we think also of the men who have so valiantly followed that flag, especially in this war. Let us remember the faculty members, alumni, and former students who have left C. A. C. for the rights of a world made safe for democracy.

Inasmuch as the college flag indicates a military post the prescribed ceremony is theoretically demanded. Let us start the coming semester with a new and larger respect for our flag! Respectfully.

THE MAN WITH THE PEN.

1918 "R.US."

The following are some of the members of the Faculty Extension Service staff, and the Experiment Station staff, who are in the new 1918 Hills. H. J. Baker, C. L. Beach, A. J. Brun­dage, E. H. Eaton, W. L. Hlate, G. C. White, W. F. Kirkpatrick, H. L. Gar­rard, L. M. Inman, G. S. Hils, E. W. Dode, S. P. Hollister, E. J. Jenkins, D. S. Sullins and G. C. Smith. M. F. Abell who resigned to enter the service is also in it.

COLEGE CUSTOMS.

With the return of colleges throughout the country to their former scholar schedules, every true spirited collegian gladly welcomes the prospect of the return of former cus­toms, some of which date in origin back to the days of the first classes to be graduated from these institutions. This fact is very true of Con­necticut, if the expressed thoughts of former students, members of the facul­ty and alumni, may be considered a fair evidence of the underlying spirit at C. A. C.

Due to the introduction to the college of a large number of men this fall in a manner which, while very effective from the military standpoint, did not meet at all the require­ments of the traditional "Freshman Reception" graciously tendered by the sophomore class, a number of pro­blems naturally arise which, for the sake of old honored customs, must be successfully solved. To gain the vol­untary respect of the students, and for their upper classmen is a point, which gives an opportunity for the exhibi­tion of open and fair-mindedness from the freshmen, and from the up­per classmen, the showing of the ben­efits and privileges derived from a year or more of college training. In­stead of the usual decidedly concen­trated required course in college cus­toms, which freshmen invariably take upon their first night at Storrs, and in which they convincingly sing "How

THREE WAR PHRASES.

When the historian of the war comes with the proper procedure to review the dramatic phrases of the more than four years' conflict, two words will stand out clean and distinct. They will form appropri­ate companion-pieces to the famous words by General Grant: "Let us have no more war.

Not long after the arrival in France of General John Jacob Pershing, with the vanguard of the American Expedition­ary Forces, he was detailed to represent the United States at the anniversary ceremonies at the tomb of General Lafayette. Standing with uncovered head before the tomb of America's great friend, the modest American soldier did not make an elaborate address. He simply said:

"We have come, Lafayette." When the reinforced armies of the Mad Monarch, as he will henceforth be known, moved back on the Marne, and the gloomy stage of the war had been reached, General Pershing turned upon his army from across the sea, adopted the algo­lan of Verdun, and reannounced: "They shall not pass.

"Their" flag has not passed is already gravely inscribed on the pages of his­tory. In the hour of the utmost de­pression, with the French capital un­der the fire of the long-distance can­non of the Huns, secreted in the forest of St. Gobain, the Americans who had been trained followed General Pershing turned the tide and held the bridgeheads at the critical moment. In the longest and most bitterly con­tested field of all military history, the Americans gallantly aided the Allies in bringing Germany to its knees.

Three of epigrammatic phrases of exactly four words each, "We have come, Lafayette." "They shall not pass," and "Let us have peace," utter­ed by two of the world's greatest, though modest, captains, should, and doubtless will, henceforth adorn the text-books of every free nation within the circumference of the globe.

Rochester Democrat-Chronicle.

REPAIRS GERMAN DAMAGE.

Beauregard Witnessed Damage Done
By Huns at Valenciennes.

Louis J. Beauregard, formerly a student at the college, and whose home is at Spring Hill, writes from France as follows:

Dear Professor:

Glad to get your letter of October 25 enclosing list of the boys who have enlisted and from the length of the list, C. A. C. can hold up its head with pride.

Many of the boys are no doubt dis­appointed that the war ended before they had an opportunity to receive service in France, but you can take it from me, that I'm not disappointed about it. The thing that is in my mind most of the time is the day when I shall be starting for home again.

Just now our company is at Valenciennes repairing the standard gauge track of the road, which the enemy blew up. There was a beautiful sta­tion building here, but what with Ger­man dynamite and our bombs, there isn't much left of it.

Professor in Home Economics Class in Physics—"Young Ladies, if you will pardon my familiarity in working on your shirt sleeves, I will allow you to do the same."
LETTERS FROM FORMER C. A. C. STUDENTS

The editorial staff of "The Connecticut Campus" believes that the readers of this paper are interested in what former students and faculty members are doing. Especially those who have had a part in the great war. If you have a letter from a friend that you believe would be of interest to others, send it on, or at least extracts from it.

"The Campus" will carry as much news of interest to alumni and former students as it can obtain. The staff feels that the paper can perform no more important mission than in helping tie the graduates some more solid to the institution, by carrying to them not only the current news of the campus, but information concerning their friends of college days. If you have any information about graduates or former students or former faculty members, send it on.

HOW THE ARMY RECEIVED THE NEWS.

C. M. Pfennig Tells of Events Connected with Armistice.

Professor Wheeler has received a personal letter from professor Pfennig, indicating that he may be in the army of occupation now on German soil. A letter printed in a Berlin, Conn., newspaper gives an interesting account by Private Pfennig of the way in which news of the armistice was received:

November 17, 1918.

Have just received your note of last week again after getting straightened out from the relax of the "11-11-11." That was a glorious time for us all right. I am glad I have this opportunity of going on, as only sixty out of ninety in this section have been selected to go. The rest will go back to mobilization and do all kinds of drilling and detail work till we come back, so it does not mean the States any sooner. I expect to hit the States before Easter Sunday.

C. M. PFENNIG,

Co. D, 29th Engineers, F. R. S., No. 2,
American Expeditionary Force.

Tells of Celebration.

Nantes, November 17, 1918.

Professor Wheeler,

Dear Sir:

I was very much pleased in hearing from the Alumni Association this morning, and will very gladly fill out the enclosed blank and send it immediately.

The Honor Roll was of great interest to me, because I was particularly anxious to get the address of some of my classmates. Since reading the Roll I have an idea where most of the A. E. F. men are located.

Today is a day of great American celebration. It is now noon and the streets are crowded with people. We expect to have two or three bands in the parade and soldiers of every branch of the Army will march. The airplanes and dirigibles have already started to glide through the air and attract much attention.

This is a very gay city with a population of about 350,000. There are several places of interest here; one is the old "Chateau." I was guided through it by a Frenchman, who certainly had the history of the "Chateau," and no doubt had been to and from there, to the Rhine, as the Americans are going to Cologne.

We wonder if it may be, but maybe not. At any rate, C. M. Pfennig of F. R. S. No. 2 is included in the Fourth Corps, and I happen to be in it. It's funny that I didn't let some of the boys from the rear come up, instead of leaving it for those who did the trick to say they went into Germany and to the Rhine.

Well, I just went out to look at the weather. The stars were shining and the moon was high—and ideal night, all right, and good and brisk, take it from me—but I love the outdoor life. I am glad I can stay here, the air is invigorating. I do not say we never lived in a dugout, for at F. R. S. No. 2 it was the most comfortable for all concerned. It sure was hell on earth for the poor least;

It was a glorious time for us all.
MAKING OF MAPS IS A WAR STUDY

S. A. T. C. RECEIVES VALUABLE TRAINING.

Prof. Wheeler had Charge of Course, Aided by Six Assistants.

We are all accustomed to think of the S. A. T. C. as an entire departure from the regular college curriculum, and perhaps were surprised when we saw the names of many familiar courses. Although the names were familiar, the courses were quite different, as they emphasized points which are of military value and covered the subject in an extensive rather than in an intensive manner.

This was true of the course in Surveying and Map-Making, in which 254 students were enrolled. The course had just one point in view—to give the men a working knowledge of maps. Professor C. A. Wheeler had charge of the course and had six assistants in the field work. Professor S. P. Hollister gave the lecture work, which covered the making and use of map scales and slope scales, contours, lettering, and the marking and reading of maps. These points were taken up in as much detail as the two lecture hours per week permitted.

In field work, the time was spent in actually making maps. Three different types of sketching boards were used. Professor S. P. Hollister had charge of the work with a Portable sketching board, on which a map was made of the road between the Valentine House and the south Eagleville road. Lieutenant W. B. Babcock was the strong man for the Valentine House and the south Eagleville road. The Naval team was working under difficulties in that one of their star players was injured only the day previous to the game. Shadrick and Babcock were the strong men for the visitors, while Pullin's shooting and Prescott's splendid work as left guard, were the noticeable features of the home team. The lineup:

Company A
Pullin LF Pickett Wallace RF
Goodrich LF Kallgren Ryan RG Barry
Robert LF Richards

Company B
Pullin RF Pickett Wallace LF
Goodrich RF Kallgren Ryan LG Barry
Robert LF Richards

ALUMNI NOTES.

Captain T. H. Beich, ’18, and Lieutenant W. J. Ungetheum, ’17, who are stationed at Camp Devens attended the military ball, December 13. Frank P. Miller, ’16, has returned from the west where he was sent by Professor H. L. Garrigus to bring back stock.

Ernest S. Ely, ’19, spent December 13 on the hill. Lieutenant W. B. Smith, ’17, of the American Expeditionary Forces was slightly wounded in action on October 1. In a letter received on the “hill” from “Cutie” he states that a piece of shrapnel tried to spoil his good looks and that his nose was the victim.

James R. Case, ’16, Second Lieutenant, who has been across is going back to his old job at Hampton Institute, Hampton, Va.

Y. M. C. A. NEWS.

The evening entertainment of December 7, was opened by the orchestra with a musical selection. In the absence of Professor Wheeler, Mr. Gauld led the singing. The picture was “The Tiger Man”, featuring Wm. S. Hart. Between reels, the orchestra played a medley of selections and this was followed by a violin solo by William Feinblum. The movies were followed by dancing.

On December 11 a class in house-hold arts from Willimantic Normal School visited the Dairy on a tour of inspection.

LETTER FROM CLARK A. BARNES.

Professor Wheeler has received a letter from Clark A. Barnes, '17. Mr. Barnes reported for service November 13, 1917, at Camp Devens, Mass., and was transferred from the Depot Brigade to the Aviation section of the Signal Corps and went to Kelley Field at San Antonio, Texas. He returned north late in December and sailed January 31, 1918, for England where he was in training until August, when he was transferred to France. On November 15 he was promoted to chauffeur. His letter follows:

Received your letter and the list of C. A. C. men in the Service and was very pleased to get it. It sure seemed good to know that there were so many of the boys doing their bit. Hope I have done mine. We are permitted to say where we are, so will say that I am at Mannonville, about fifteen miles northeast of Toul. Not much more I can say, I have tried to give the most interesting points in my history as a soldier.

CLARK A. BARNES,
168th Aero Squadron.
A. P. O. 775, A. E. F., France.

IN POSTAL EXPRESS SERVICE.

Ralph Rising Griffin, '14, sends the following account of his military record:

Was sent to Camp Devens and assigned to Company A, 303rd Machine Gun Battalion, September 20, 1917. Was made corporal and company clerk, November 21, 1917. Appointed regimental menstrual sergeant in First Provisional Machine Gun Regiment August 11, 1918. When regiment was sent to First Depot Division for reclassification November 8, 1918, was sent to Company E, 164th Infantry, with rank of corporal. Transferred from Company E to Military Postal Express November 20, 1918.

RAN CATERPILLAR TRACTORS.

Pulling Big Guns through Mud was Patchen’s Duty.

Waggoner Ernest H. Patchen, '15, sends the Alumni Association the following account of his war record:

Enlisted in November, 1917, with the 28th Company at Fort Wright, New York. Was transferred to Battery E in December, 1917. We left for overseas service the last of March, 1918, and finally located at Oradore and Training School at Clermont Ferrand, France, where I took six weeks’ schooling and was qualified as a gas engine expert. After school I was attached to the ordnance department as instructor on the big Holt caterpillar tractors. When it came time for my battery to go to the front the latter part of July I turned down an offer of transfer to mechanic in the ordnance department and left for the front with the battery as head driver and mechanic on the Holt tractor. We sure went through hell, fire and water and mud and I have pulled through with only one scratch. We were in some of the important drives and won distinction more than once. My work was to oversee the work of maneuvering the big guns and keep the tractor in running condition. We used the 155 m. m. long range rifle and the Holt 75 H. P. Caterpillar tractor, both of which weighed fifteen tons. Although none of the men in the battery was seriously injured, the tractors and guns received some awful bashing up. Our battery was the only one in the regiment not to lose a man. We went through the game in great style and we went into every strife behind a man who was a white man,—our captain, Charles H. Metalfe. Our major, Major Payne, was a prince. I have not had an opportunity of meeting any of the alumni, except Fred Lyon and Raymond Risley, who are in the sanitary detachment of the 58th Artillery. These men have proven themselves every time.

RECORD OF I M B E R T F. FELLOWS.

Following is the war record of Imbert F. Fellows, 1916:

Enlisted in infantry, December 15, 1917. Entered Headquarters Co., 38th infantry, December 22. Was made corporal January 10, 1918. Was sent to Camp Devens and embarked at Brest, April 7. Trained at Arc grange, Henry Fineman was nominated as gatekeeper. When in need of sporting goods try The Jordan Hardware Co.

H. W. STANDISH
JEWELRY OF QUALITY
Special Order Work and Repairing a Specialty.
Kodaks and Supplies.
725 Main Street, Willimantic, Conn.

NOTES.

J. R. Salabury, '16, is traveling for the Essex Fertilizer Co. of Boston.

At a recent meeting of the local group, Henry Fineman was nominated as gatekeeper.

The Storrs Branch Red Cross has discontinued the making of surgical dressings. Monday evening was formerly devoted to this work.

Miss E. J. Rose, has been visiting Hartford and South Manchester high schools, in behalf of home economics work.

Miss M. E. Sprague was on the program for Hartford, New London and Middlesex County farm bureau meetings.

Merlin G. Ward, a former student, paid a visit to the college recently. He had just been recommended for a commission as Second Lieutenant. Mr. Ward carried the college express to and from Eagleville in 1915, and in 1917 he served as rural mail carrier for a short time.

NEWSPAPER MAN BACK FROM CAMP.
(Continued from page 1)

horses. His spare time was spent in attending school offering other subjects to young officers. A large percentage of the men there were negroes. While in camp Lieut. Campbell met two former Storrs men, Lieut. Spencer W. Barlow, '17s, and Lieut. Charles Neuman, ex-'21, who did excellent work at the camp. Both men were in the Field Artillery.
land skyscrapers are not here—plenty of room to spread out without going up.

3. The topography of the country, which the New Englander is prone to think as very flat, is in general rolling. While the New England mountains are missing, there are many parts of Iowa that have their "Spring Hills." In short, the country is varied. There are stretches of level country and other places that look exactly like New England. This fact of course, afforded me a pleasant surprise. There is very little land, but there are plenty of trees left standing in groves on the farms. One can always see trees, but never a stone wall and very few stones except in the extremely hilly portions of the state. Lakes and rivers are very scarce. The soil is a black clay loam—black as coal in most places.

4. The Iowa roads cause the New England tourist to lose his temper more than he ever did before. They are for the most part surfaced with the same black soil of the fields and when wet are actually impassable in an auto. It is of no use for me to tell you any more about the roads, as I had heard stories about them from Professors White and Slate, and they did not make it out half bad enough, so I won't try.

5. Contrary to general New England opinion, the farms are small in acreage—80 to 160 acres being common size. Practically all this land is tillable, however, and it is getting to be worth its weight in gold. Common land prices here range from $200 to $300 an acre, and I read last night that 30 acres located near a town not far from Ames sold for $800 an acre. I may possibly get to be enough of a financier to purchase a bag full of this land to bring to Storrs on my first visit, but it is doubtful.

6. The type of farming is different from New England, principally in that most every farmer here does the same thing, namely, raises corn, oats, barley and some wheat, and turns these over into beef and hogs. Pigs are everywhere and this really expresses the sanitary conditions on a quite a large percentage of the farms.

7. The greatest surprise to me was to find that the cows supporting the 450 creameries in the state, representing a great dairy manufacturing business, were practically all of the milking shorthorn type. The cows are bred primarily for beef and their milk is a side line. There are, of course, many fine dairy herds, but most of these are owned by people who sell breeding stock.

A Wonderful School.

Iowa has a truly wonderful state college offering all kinds of buildings and equipment for all kinds of courses. About 2500 men and 700 women have been enrolled this fall. The development of the S. A. T. C. will drop some of the enrollment, as in most institutions.

I should like to correct a false impression that might be had from reading the November 29 issue of "The Campus", quoting me indirectly as stating that the dairy courses at C. A. C. were as good if not superior to those here. Such a statement was not made. What I would say, however, is that the undergraduate dairy courses at C. A. C. are similar and on a par with those here. I say this because it is good for the students in the smaller institutions to realize it. I can well remember when a student at New Hampshire, of thinking how much better a course the boys in the big western colleges must be getting than it was my privilege to enjoy. Vera Lee during the Military Ball gaities.

Among the guests stopping at the Valentine House over the week-end of the Military Ball festivities, were Misses J. Dunham, of New Britain, M. Lawrence of Norfolk, E. Scanlin and C. Holbrook of Winnet.

Mrs. H. A. Rogers of New Haven was a guest at the Valentine House December 16. She was in quest of a woman farm superintendent and also an assistant teacher of home economics for the Connecticut Farm for Women situated at Niantic. Miss Louise Gould will take the position of assistant teacher, the first part of January.

Private John Griggs, of Hartford, a member of the R. O. T. C. at Yale, was the guest of Miss Helen Maxwell, December 16.

The College Book Store.

IN THE MAIN BUILDING.

STUDENT SUPPLIES

A complete line of Text Books, Loose-leaf Covers, plain and ruled Fillers, Notebooks, Fountain Pens, Pencils, large and small Blotters, etc., needed for the term beginning December 31st, will be ready on that date. Also Pies and Crullers will be on sale after January 1st.

The Connecticut Agricultural College

Storrs, Conn.

FOUR-YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B. S. degree.
