ANOTHER GOLD STAR FOR AGGIE

MISS M. E. SPRAGUES COUSIN BURIED UNDER ANOTHER NAME

George Bourne, '21, Missing since last July, now Reported Killed.

Word has been received that G. W. Bourne, '21, was killed in action last July, in the Chateau-Thierry battle. Mr. Bourne left college last year to enlist in the 5th Marines. He was shipped across almost immediately, and came through the Battle of Belleau Wood unscathed. In the fall his family received word that he was missing in action, and in February they were notified that he had been shipped to a hospital in this country on December 12. They could find no trace of him in any of the hospitals, however, and lately the report came that he was killed in action last July and had been buried under another name.

After the Belleau Woods fight, he was given a few days' rest, and went back into the lines on July 18, and according to all his family can learn was killed on the nineteenth.

HAVE YOU SEEN THEM?

Three good-sized live rattlesnakes, captured on Somerset Mountain by Joseph Sinnott of the Zoology Department. Two of them are three years old and are about three and one-half feet long, whereas the third snake, the baby, measures two feet. Professor G. H. Lamson has the snakes on exhibition in the laboratory and may wait until after High School Day before chloroforming them and adding the specimens to the collection in the museum.

INVENTION BY AGGIE GRADUATE

LIEUT. ERNEST RASMUSEN IMPROVES MACHINE GUN.

Gun to be Traversed by Gears instead of by Hand, thus Reducing Wastage of Bullets.

First Lieutenant Ernest Rasmussen of the Field Artillery, U. S. A., has submitted to the War Department for consideration an invention which he claims will revolutionize the use of fire by the present Lieutenant Rasmussen has just returned to his post at Fort Bliss, Texas, after having demonstrated his new machine gun to War Department officials on the testing grounds at Washington, and during a brief furlough, spent his residence at Waterbury, said that the tryout had been a complete success and that he was confident that his ideas would be adopted by the Government.

At the present time machine guns are traversed by hand and it is impossible to regulate the dispersion of the bullets to any degree of accuracy.

In the past many a soldier was riddled with machine gun bullets as a result of the traversing of the machine gun by hand. By means of certain gears the gun will be traversed automatically, the principle being somewhat similar to lawn mowers which make one complete revolution and then reverse automatically until they have made another revolution.

In speaking of his invention, Lieutenant Rasmussen said, "It will be possible to adjust the machine mechanically so that it will space the bullets one foot apart at the target, waist high. If this invention could have been put into practice during the war, the trench raids by the enemy would have been impossible, for machine guns set at regular intervals along the trench parapet could be opened up simultaneously, sending a spray of bullets, each on a feet apart, that would eliminate all possibility of a successful raid. The waste of bullets sent in the same line of fire by the present method of traversing would be eliminated and the element of danger now attached to operating a machine gun would be reduced to a minimum."

Lieutenant Rasmussen has been in the service since the start and received his commission in the 20th Infantry, Chicago, at Fort Myer, Washington, D. C. He has been stationed at San Antonio, Texas, for the last year, but previously had been at Honolulu. Lieutenant Rasmussen, a member of the Sigma Alpha Pi fraternity, graduated from the college in the class of 1915.

CLASS DAY PROGRAM IS READY

SPEAKERS OF THE DAY ARE ANNOUNCED.

Reunion Planned for Members and Former Classmates of Class of 1919.

Parts have been assigned for the Class Day Exercises which are to take place in the Armory on Friday, June 29, at 2 o'clock. Because of the small number in the class, there will be four parts to the program.

The Class History will be given by Helen L. Clark, Prophecy by C. R. Brock, the Address to Undergraduates by L. W. Cassell, and the Class Will and Farewell by L. L. Crosby.

Arrangements are being made to hold a reunion of the members of the class of 1919 and an effort is being made to have as many of the former classmates return as possible.

AGGIES LOSE TO SETON HALL

UNINTERESTING GAME LOOSELY PLAYED IN ORANGE.

The Aggies lost to Seton Hall by the score of 11 to 4, although the game was exceedingly close until the seventh inning, when Seton Hall cut loose with five runs and sewed up the game. Connecticut drew first blood in the opening stanza, scoring two runs. Murphy walked and Brigham fanned, Mahoney slammed the pill to left for a neat single, sending Murphy to third, and Mahoney stole second, and Murphy and he scored when Eaton laid down a pretty bunt. Ryan cracked out another hit, but Jaudith ended the inning by striking out. Seton Hall tied the score in their half of the inning and jumped into the lead in the third by getting two more tallies. The Aggies lost a couple of runs in the second, when the umpire called Brigham's drive along the third base line a foul, after Savin and Murphy had crossed the plate. The Connecticut boys declare the hit easily fair and were highly indignant at the decision. The seventh proved the big inning for the Seton Hall team, and when the dust around the home plate cleared, they had gathered five runs and clinched the game. In the eighth, the Aggies scored once and Seton Hall got two more. The Aggies ended the game after getting another tally.

WAR CHAPLAIN ON RED CROSS WORK

RED CROSS TO BE THE LARGEST ORGANIZATION IN THE WORLD.

Rev. Leslie Briggs Tells of Service Rendered by our Nurses in France.

At college assembly, Wednesday, May 7, Rev. Leslie Briggs of the Congregational Church, Willimantic, who had been a Red Cross chaplain in the recent war, gave a very interesting and impartial talk upon that branch of the service and its future. Mr. Briggs showed how the Red Cross was first established and rendered service during the Civil War. Its organization was then perfected and carried on until the recent war, where it proved its real value, distributing some $360,000,000 to those in need. Ten countries received money and were ministered unto by approximately 28,000,000 members of the American Red Cross.

NEW PRACTICE HOUSE GROUP TAKES CHARGE.

Bacon Bats Planned by Present Members, if Weather Permits.

The Practice House group which has been at the Valentine House since April 2, completed the course and returned to Cottage May 7. Those in the group were Gladys Goldthorpe, Mable Pinney, Gertrude Eaton, Miss Edith Mason, Miss ·Ruth Buell, Leslie B. Grant, Miss Murphy, Hill, Fallon,cycle, D. A. Evans, P. F. Depue, R. J. Pullen, and P. N. Manwaring.

The following group, the last for this semester, started May 14: Mildred Gay, Frances Bristol, Viola Ericson, Louise Ransom, Olive Lee Chapman, and Gladys Bidwell. All except the last two names have been living in the Practice House and will be able to "board at home" and omit the three daily trips to the Dining Hall.

Rain prevented the baseball game scheduled with Massachusetts Agricultural College at Amherst on May 10. This game, the only one scheduled between the teams, would have been an interesting one, inasmuch as the teams are equal in strength and the Aggies had hoped to defeat Massachusetts Agricultural College in their High School Day.

STORRS HOTEL SOLD ACCORDING TO RUMOR.

Professor Wheeler Denies Report, Which might have made a Girls' Dorm.

There has been a rumor floating about the campus lately to the effect that Professor C. A. Wheeler had bought Borre's Hotel; and many were the conjectures as to what was to be done with the place. When interviewed by the subject, Professor Wheeler stated that this was a false report. He said that he had held a mortgage on the place from the beginning, and that last fall it had been some talk of the college buying the hotel, but that to his knowledge, nothing had ever come of it.

It is understood that the hotel will be opened again this summer for the accommodation of Jewish boarders, under the management of Mr. and Mrs. S. Cohen.

COLLEGE DAIRY HERD FREE FROM TUBERCULOSIS.

Dr. Blake, of the United States Department of Agriculture, was at the college May eighth and ninth for the purpose of testing the dairy herd for tuberculosis. None of the animals reacted to the test, showing that the herd is still free from that disease. The college herd has been tested frequently for a number of years, with the result that there has been only one reaction in the last twelve years.

MAX ABEll RETURNS.

Max F. Abell, instructor in farm management, who left at the end of last year to join the Marines, has returned to his former position. After preliminary training at Paris Island, he was sent to Haiti, where the Marines were doing guard duty. He was stationed there for about ten months and was recently sent back to Charleston, S. C., and honorably discharged. Until recently, Professor W. Slade has taught farm management, but in the future Mr. Abell will have charge of the class.

ANIMAL HUSBANDRY DEPARTMENT ADDS ANOTHER MAN TO STAFF.

Committee on Sheep Meet and Decide Apportionment of Sheep Bill Budget.

On Tuesday, May 13, the Committee on Sheep Promotion met to discuss plans for the carrying out of the sheep promotion bill which was recently passed by the State Legislature. Professor H. L. Garri gus is chairman of the committee, which was appointed by President C. L. Skinner, of which E. L. Jenkins, L. G. Davis, A. G. Skinner, and Henry Dorrance are the other members.

At the meeting the committee de cided on the apportioning of the bud get provided by the bill and laid plans for the work required. These plans provide for experimental work, which will be carried out by Professor G. H. Lamson, who will spend his time entirely with animal husbandry. Thus Mr. Skinner will be able to devote more of his time to instruction work in the college next fall. The new extension man will be provided by the bill and laid

MORE WORK FOR SOMEONE.

Athletic Association Recommends a Board to Handle Publicity of Sports.

At a meeting of the Athletic Association on May 8, it was recommended that the "Campus" appoint a board to handle all newspaper publici ty in the state relative to sports. When interviewed, a member of the staff replied, "As yet we are unable to give a definite answer. Apparently the lack of proper support by the student body does not warrant us taking extra work on our shoulders. We believe that if the students are unwilling to support their college paper, then their interest in advertis ing the college through the "Campus" must be slight, as the "Campus" reaches more persons who might be called "Aggie" students than the newspapers do."

GROVE COTTAGE NOTES.

Gladys V. Daggett, '19, who has been for the past two weeks assistant home economics teacher in the high schools of Norwalk and Stamford, returned to the College of Saturday, May 17, to resume her studies.

The co-eds were "At Home" Friday evening, May 9. A social time was enjoyed and refreshments of ice cream and cake were served.

The sewing room has been painted and now is both very light and attractive.

Gertrude Luddy, '21, spent the week-end of May 10 at her home in New Britain.

Salome Smith, '21, and Rose School nick, '21, spent the week-end of May 10 in Milford visiting her parents.

SMOKER BRINGS SPEECHES.

School of Agriculture Indulges in Social Evening.

Friday evening, April 18, the School of Agriculture held a smoker in the room of the Alpha Phi fraternity, Warren W. Richards, toast master, introduced the three speakers of the evening, John Smith, J. William Fuchs and Walton S. Richdale, who delivered short talks on the "School Spirit", and the "Aims and duties of every school man." The Class Prophecy was read by Merrit Pendleton of the senior school class. Entertainment by members of the school, including songs by the school quartette followed. Refreshments were served and all spent an enjoyable evening. The success of the affair was largely due to energetic work of the social committee, under the supervision of Thomas A. Elocok.

Dr. E. W. Sinnott, and Prof. G. C. White went to New Haven Saturday, May 17, to address the Holstein Friesian Breeders' Association of Connecticut. Dr. Sinnott spoke on "Mendelian in Cattle Breeding", and Professor White on "The Sire Approval Plan as Outlined by Other Associations."

W HEN you buy a pipe bearing the W D C trade-mark, you have the satisfaction of knowing that your purchase could not have bought a better pipe. The W D C is strictly American made. You can choose among a multitude of styles, sizes and grades at the best shops—$6 down to 75 cents.

Look at the Stove of this one. They carry a badge to the eye, from the rich brown of the genuine French briar bowl, through the glowing sheen of the ring, to the jet black lustre of the valentine bit.

Complete PROTECTION

Pure, wholesome and unadulterated milk and milk products are very nourishing foods. And as such require adequate protection from harmful bacteria and infections. Upon the food value of these products depend the price and the demand, consequently no nutritive quality should be lost. The sanitary cleanliness evolved by Wyandotte insures separators, milk cans, churns and milking machines free from objectionable and injurious matter, and a milk product of the same original high quality produced by the cow.

Dry Goods and Groceries

OUR MOTTO: To give our customers the very best goods and to make the prices as low as is consistent with good quality.

A BUSINESS PROPOSITION.

A newspaper, as the "Connecticut Campus" for example, is a business venture selling news as a commodity. Do you realize that you are a member of the firm which publishes the "Campus" inasmuch as you are a student and the masthead we have the words "published by the students of Connecticut Agricultural College." We, the managing board, trust that you take pride in being a member of the firm; but we, as directors, believe that if the work of the News Bureau was unfurling were you totally responsible for the publishing of the paper. Do you realize that in our High School edition there were nearly 18,000 words in the news section? What percentage did you contribute towards the success of this issue? The largest ever published?

Could you increase the percentage by thinking more of the work a few must do in order that they may say "Yes, this paper is the one I help to publish?"

SUGGESTION TO THE FACULTY.

It is needless to state that the scholastic standing of the students this year is below that of last year. The A. S. T. C. course did not encourage hard study and as a result the spirit left by this organization has been hard to overcome. This next fall will see the college back to the normal basis and many improvements in the scholastic standing are insured. This would naturally come about in the process of time, but why wait when plans now for a system to be followed from the first day of the next semester, rather than wait until the first of November?

New Hampshire State College of Agriculture and Mechanic Arts has a cup which is given each year to the fraternity having the highest scholastic standing. The average grade is greatly increased and the difference is not only monthly and considerable rivalry exists. The benefits of such a contest are numerous, but the chief advantage is the competition aroused between the fraternities, which results in better work by all concerned in an educational fight for the cup. Would it not be well for the faculty to give this matter consideration during the next meeting in order that, if approved of, plans may be perfected before this semester is over with?

FOUR ROOMS TO RENT.

The "Campus", which for a year has been without an office, has moved into the tower of the Armory formerly occupied by Lieutenant H. R. Brown. Last year the "Campus" office was in the room now occupied by Coach Roy C. Gayer, but during the present college year the work of publishing the "Campus" has been carried on in various rooms in Route Hall, Grove Cottage, and even in the Dramatic Club room. Now with the office furniture and equipment centered in the room the "Campus" will be carried on in a much more efficient manner.

The managing board is grateful for the use of the north end of the swimming room in the Cottage as a "supply room", but regret the rush of the High School issue.

SAFETY VALVE

Dear Editor:

This year has been an unnatural one and many of the student organizations have not been what they were before the war. It is the desire and intention of the upperclassmen that next year the Connecticut Agricultural College back to normal schedule. This laxity of enforcing freshmen rules and traditions must be kept toward the end. Honor men may be laid to the S. A. T. C., for during that period the new men, placed on an equal basis with upperclassmen, became insubordinate. When freshmen rules appeared, and the homophores failed to enforce them, the proper order was disturbed. The activities of the students have not been as thoroughly performed. Examples of inefficiency are shown in the Student Council, which last year was a powerful mediator between the faculty and the student body in settling questions of mutual interest. What has it accomplished this year?

The College Assembly is not up to the standard of last year's, although exceptions are admitted.

Pardon, me, Editor, if I include the "Campus" in my list. Has the paper come out as regularly as heretofore? I admit that much of this inefficiency may be a result of the changes in management.

Trust that this letter may receive space in your columns, I am, A. KRABER.

(Editor's Note)

Editorial criticism given above is appreciated, and although the managing board is heartily in favor of a return to pre-war conditions and customs, accompanied with better organization of many of the student activities, nevertheless it wishes to make it clear on the subject of the management of the "Campus". Nothing but praise can be said of the "Campus" when managed by the present editor, a new man on the job, has had his difficulties with the prompt delivery of several issues, but promises a more efficient performance. Better cooperation is given by the student body.

SAFETY VALVE

Dear Editor:

Why not have a Trophy Room at Connecticut Agricultural College? Though one would never know it, this college has many trophies scattered throughout the different buildings. Standing as a memorial of the days when things were not as they are today. Would not it be a good idea to collect them into one room and call it a trophy room? The lecture room in the armory, doubt, would be the proper place, but President Beach says that this room will have to be used as a regular classroom next year. There are, however, possibilities of having a trophy room in the new dining hall which is expected to be built this summer. In the meantime let us locate the trophies so that they can be collected, if we do get a room?

A. G. D.

Dear Editor:

Douse the letters and numeral's! The fellows this year do not seem to realize how absurd it looks when the wearing of prep, school and high school numerales have upon the standard of the college. There is a college lower rule before, which forbids this, and also a "thou shalt not" on the freshmen rules. Why not enforce them, or is there nothing but a "C", or a set of numerals that have been earned here?

Yours truly,

NO ONE IN PARTICULAR.

SOLDIER'S LETTER.

Irish, Germany.

Professor Charles A. Wheeler,
Storrs, Conn., U. S. A.

Dear Sir:

I have been a letter enclosing the questionaire just received, and I am returning it now. Was mighty glad to hear how the old place was standing with us. I believe it is in better shape than at any time we certainly appreciate it. Surely would like to be back and hear things in your columns, I am, A. KRABER.
EXTENSION STENOGR
AT WORK IN PARIS

FORMER OFFICE HEAD WITH AMERICAN RED CROSS.

Miss Pauline Corey writes of trip across the Atlantic and of visits in Spain.

Miss Pauline Corey, formerly occupying the post for the Extension Service now held by Miss Elizabeth Tapley, has sent the following letter telling of her trip across the Atlantic Ocean and of her visits at Gibraltar and Paris. At present Miss Corey is stationed at the headquarters of the American Red Cross in Paris. A portion of her letter is as follows:

As you will observe, I was able to buy some paper in Genoa. Incidentally, I had to pay one shilling (25c) for a pad of this cheap stuff. It's not half-past nine yet. I'm sitting on the armor deck on the shady side, and a sweater is sufficient wrap. I marvel and rejocie mere day each to think we could come this way and have it so delightfully warm and pleasant and calm all the time. The Spanish coast is in plain view, barren just now, with mountains—some of them apparently snow-capped—in the distance. Occasionally we see a sailboat over near the shore.

I never could do justice to the exquisitely charming feeling I've formed in my eyes upon since midnight. Saturday morning we were getting into the Bay of Gibraltar, and I was to get to bed at the usual time, but after an hour or so got up and looked out of my port-hole and saw lights on the shore and on boats nearby with a lighthouse flashing in the distance ahead. My curiosity finally conquered my laziness, and I slopped a few clothes and came on deck. The African coast was in view and soon the lights on Tangiers. I never could tell you how beautiful it all was and how thrilling to think of being here between Spain and Africa, with the Atlantic Ocean back of us as it were. I never in my life lived up to the famous outline of the "Rock" loomed against the sky. Searchlights from men-of-war were flashing out across the water. Soon after I got to bed the engine stopped, after going steadily for over ten days.

Visit to Gibraltar.

Saturday everyone went into Gib­

tar. Small launches came up to the Verdi and took us over to Gibrat­
tar. We passed boats of every des­

cription—small fishing craft with oriental-looking sails, Spanish and Portuguese coal barges, British and American battleships, and German ships flying the Stars and Stripes. Of course, we waved and cheered everyone as we passed.

Gibraltar was the most interesting place I have visited in a very long time to tell a connected story of our doings, but will probably digress to give some facts, and then when I finish I know I'll be cut of a lot more things I've left out.

Our first objective was the post­

office, so we hurried past the mar­

ket, the British barracks and turned up the Main Street. Sidewalks are very narrow, so almost everyone walks in the street, running the risk of being a "coupe" driver's dinner. I saw two or three Fords, Dodge's and motor­
cycles. To state a fact in true Irish style, all the horses are mules or donkeys. Donkeys 20 miles out with water jags or garden truck are a common sight. I shall not attempt to describe the buildings, except to say that they are about the same in Spanish and picturesque-looking. The signs on the shops are usually in the English and Spanish languages. The people in the streets are of various shades, nationality, and in costumes ancient and modern, western and Eastern. Some of them are English, some French, others German. There are British soldiers, American sailors, English women, Jews of the usual type, Gibraltarians—native Spaniards—and here and there a Mor­

corean in his red turban, black or white domino and sash, and yellow wooden shoes.

Difficulty in Shopping.

We had been told that our American money would be all right, but at the post-office only English money would be accepted, so we had to go out and hunt an "Exchange" where you can get English, Spanish, Ameri­
can and I presume, other kinds of money. Most of these are run by Jews who close Saturdays on account of their Sabbath, but we found one right with the aid of a soldier with a delightful Cockney accent. At the post-office once more we sent our cards we bought from a boy standing there. Can you imag­
ine flower-women and souvenirs sell­
ers crowding around you in an Ameri­
can post-office? All the cards I bought there were of Seville. The boy said they were not allowed to sell views of Gibraltar. Be that as it may, I later bought some very good views of Gibraltar which I shall keep. I had started out in a party of ten, but by the time my cards were bought there was only a Miss Harker and I were together. We decided to get something to eat before doing any sightseeing. A British consul officer recommended a restaurant where we got good food at a very reasonable price. There was little and extravagant from and amitary.

WHY RELIABLE JAR RUBBERS SAVE LOSS IN CANNING

The Old-fashioned Open Kettle Method
In the early days of canning in glass jars the old-fashioned “open kettle” method was used exclusively with the fruit packed thoroughly cooked and boiling hot into jars. The ring served only as a cushion to prevent the passage of air between the top and shoulder of the jar.

Then, as now, we were the largest jar ring makers in the world. Home canning was increasing, principally because people wanted to can fresh vegetables as well as fruits, but only the most skillful were successful. Better methods of sterilization and sealing were needed. We could do little to reform methods, but we could provide a ring strong and elastic enough to make a perfect seal. So, eleven years ago we produced the GOOD LUCK RED RUBBER and offered it to the housewives of America. For several years it was not widely appreciated. It was higher in quality, and therefore higher in price than most people were willing to pay. It was considered better than necessary, but gradually housewives found that this ring could be trusted, and the circle of GOOD LUCK users widened from year to year. They found it paid to buy a reliable rubber.

"Blow Out" with Ordinary Rubber. Perfect Seal with Good Luck Rubber.

Modern Methods Require Live Elastic Rubbers
Then came “cold pack” canning. The new gospel spread rapidly. In homes where the amount of canning was large, or for community work, steam pressure canning was introduced, to save time, BUT ORDINARY RUBBERS WOULD NOT DO—they “blew out.” The long boiling in the water bath and the steam pressure softened the rings, made them swell and “bulge.” This meant broken seals and necessitated re-sterilizing, with loss of time and fuel.

Demonstrators and teachers found the answer to their problem in GOOD LUCK jar rubbers, already widely distributed and known to progressive housewives. Then the real growth of GOOD LUCK began. Today the GOOD LUCK jar rubber is the largest selling brand in the world. Millions of packages are used annually to conserve the country’s food supply, fruits, vegetables, meats and jams—whatever is plentiful at one season and scarce at another. Home canning has become practically universal since danger of spoilage has disappeared. The GOOD LUCK RUBBER is recommended wherever canning demonstrations are given, because it is known by name as the one reliable ring for hot pack, cold pack, or steam pressure canning.

Don’t Pay too Little — Don’t Pay too Much
With modern canning methods established, the rubber ring question becomes of utmost importance. As is always the case, the market is flooded with competitive rubbers—some cheaper and some more expensive. Home canning is done in the interest of economy. GOOD LUCK rubbers cost 15c a dozen, about 13c to insure the safety of each jar of food. To pay less is to take an unnecessary risk. To pay more is to incur an unnecessary expenditure. GOOD LUCK RUBBERS are thick, strong and pure elastic, with plenty of live rubber in them — a standard rubber at a standard price—tried and tested for any method of canning.

GOOD LUCK RUBBERS are sold throughout the country by grocers, hardware dealers, department and general stores, and are furnished as a standard equipment with Atlas E. Z. Seal jars.

MORRISON AT ASSEMBLY.
Says America Copies European Educational Systems.

At the college assembly on Wednesday, April 23, Henry Morrison of New Britain, gave a clear and concise talk on the value of an education and the methods of using it. He stated that the educational system of America was modeled very much after the systems of education in Germany and England, and that sometime in the future the American system would be organized.

Another point that he brought out was the freedom and liberty that the American system provides its students. Many European countries have acquired these valuable rights as a result of the war, but do not know how to use them. It is the business of educated people to lay down the principles of liberty so that these newly-free people will know how to appreciate these privileges.

GRAGE BUYS REO TRUCK.
The Storrs Garage purchased a new REO truck this spring, which was used to help out the old Pierce truck which has been of great service in delivering mail at the college. The truck has been used extensively because of the poor condition of the roads, but it is expected to be of service soon. It was removed from this post for the Quartermaster Department about a month ago and also delivering goods at the dining hall.

The chassis consists of a four cylinder, forty horsepower REO engine, three speeds ahead transmission and pressed steel frame hung on semi-spherical springs in the rear. The platform body, which is 12 feet long and 8 feet wide, is equipped so that side boards may be used for heavy material or stakes may be used for bulky freight. It is a chain drive and has a wheelbase of 156 inches. The tires are of 3-inch solid rubber, single in front and double in rear. The capacity is 2 ton, and when loaded the total weight will not exceed 8800 pounds. It is not built for speed, but for service, the rate of speed being 12 miles per hour. The gray and black body is without a cover, but the driver's seat is covered by a cab which is equipped with side curtains for stormy weather.

GRANGE OFFICERS INSTALLED.
At the meeting of Mansfield Grange, No. 64, P. of H., Monday evening, May 12, a class of candidates received the third and fourth degrees. Maurice H. Lockwood was elected assistant steward, to fill the place left vacant by C. R. Brock. Frank P. Miller, recently elected master, and Mr. Lockwood, were installed in their respective offices. The lecturer's program consisted of a short talk on "Some Interesting Facts about Bees," by Lloyd B. Watson, and two vocal selections by J. A. Manter, accompanied by Mrs. G. H. Lamson.

THE MAN WHO BUYS A
DE LAVAL
Is taking no Chances

Any time you buy a cream separator—no matter who makes it or what claims are made for it—that has not behind it a long record of satisfactory service, a record known to all, a record that is in itself a guarantee of satisfactory service, you are taking a gamble with all the odds against you.

Why take chances at all when you come to select a machine that may mean so much in increasing the profit from your cows? There is one cream separator that has been the acknowledged world's standard for over 40 years. It's the one cream separator that is used by the creamerymen almost exclusively. Dairy farmers the country over know the De Laval and its sterling quality. Experience has shown them that It is the Best Cream Separator that money can buy.

OVER 2,325,000 DE LAVALS IN DAILY USE
FACULTY BASEBALL TEAM WINS OPENING GAME.

Defeats School of Agriculture Team by Score of 6 to 0.

As in previous years, the faculty has played in a nine on the field, to compete with the other teams in the inter-class baseball series. In the first game with the School of Agriculture the "Professors" experienced little difficulty in defeating the students. The final score was 6 to 0. Although it has been some years since most of the faculty had played baseball, nevertheless they clearly demonstrated that they have lost none of their old-time pep.

Professor Albert Moss, the mainstay of the team, showed that his pitching arm was still in the best of trim. Coach Roy C. Guyer behind the bat needs no introduction. "Dave" Warner held down the initial sack in big-league style, while Prof. G. C. White scooped up all the hot ones around the keystone sack. At short, Physical Instructor Barlow, not only putting the finishing game box proved a regular "Ty Cobb" at the bat. "The dizzy corner" was ably taken care of by Captain Cranston, who also showed up well with the willow. Professors Lamson and Hollister, and Fraser who played in the outfield, got everything that came their way and made up the remainder of the well-balanced team.

The faculty has not been beaten in years, and without a doubt this year's team will uphold the reputation made in previous years. Professors and students scored the big hit of the game by making a home run.

LEAGUE OF NATIONS ADVOCATED BY CAPTAIN.

At College Assembly, May 14, Captain Thomas G. Chamberlain spoke, presenting as a part of the campaign of the League to Enforce Peace, the facts about the League of Nations. This campaign is for the purpose of turning the minds of senators opposing the League of Nations by the influence of public opinion favoring it. Captain Chamberlain said that American men had seen the job through and had won the war. "But all the peace never comes if with that peace there is no provision made for the prevention of the crimes, such as those against the small nation, which were perpetuated by Germany during the war. The League of Nations will give us the necessary machinery for preventing war in the future."

He emphasized the fact that delay is an all-important element in preventing the outbreak of hostilities between two disputing countries, for if diplomatic machinery can be set up and matters put before an arbitrator before it gets too serious, in the majority of cases it can be settled peaceably. "The League would be worth establishing if it had in it only this one provision of delay," said Captain Chamberlain.

By utilizing the ideals and opinions of the doughboy, Captain Chamberlain showed how, now that the war is over, our men who "went through hell of Chateau-Thierry, St. Mihiel, and the Argonne, now look to us for the assurance that their ideals will be realized."

Professor H. L. Garrigus is planning to attend McCray's Hereford Sale in Indiana, on May 21 and 22, where he has been asked to speak at the banquet of Hereford breeders. An attendance of 5000 is expected at the sale, and the manager promises to beat the Hereford Sale Record, which is an average price of nearly $4,000 a head.

E. H. Waite, '96, of Morristown, N. J., has been appointed county agent for Ocean County, New Jersey. Mr. Waite has had wide experience as a farm manager in Connecticut and Long Island. Besides a fruit farm of his own in Amherst, Mass., Mr. Waite developed a tree surgery, pruning and spraying business, but the war forced him to give this up and he has since been a farm manager at Morristown.

A. G. Skinner, instructor of animal husbandry, recently bought a young milking Shorthorn bull, from the College Farm, at Georgetown, and has shipped it to his home in St. Mary's, Ontario, Canada, where Mr. Skinner's father has a herd of milking Shorthorns.

MISS COREY'S LETTER.

(Continued from page 5)

at the gate every night. He has got a good many Germans there and only a few days ago caught one who will be imprisoned for two years. To return to the view. We could look away over into Spain and see, the Sierra Nevada mountains in the distance. Could see a place where they have bull-fights every Sunday. It was all perfectly wonderful. I'll never forget the experience. I have a piece of the Rock which has been polished and would make a pretty brooch or cuff links. My nice guide gave it to me. He gave me special attention. I have his autograph and have promised to send him another of the officers postal cards. They seemed to enjoy showing us around. One said it was good to have decent women to talk to. The man from Oklahoma said this was the only time the second year in a year he had talked with American women. A group of Red Cross nurses went across on this boat three months ago. Oh, I forget to say before that in a subterranean chamber of the Rock were found thirty-six bodies in a perfect state of preservation.

A Spanish Sunset.

We got back on board in time to see the most glorious sunset. You could walk all around the deck and from every point get a picture as beautiful as any you had ever seen in your life. Three views I remember particularly—one was the black mountains of Africa rising out of a gray mist of fleecy clouds; another was a stretch of flat white Spanish houses with just a bit of green and brown landscape, and above were low-lying, rosy layers of fluffy clouds; while still higher up was just the right blue to make a perfect combination with the pink; last of all was Gibraltar itself, its grey rock at first faintly pink and then dull green.
