JUNIOR-SENIOR BANQUET HELD

DINING HALL SCENE OF DINNER GIVEN SENIOR CLASS.

Dr. H. D. Newton as Toastmaster and President C. L. Beach and Professor Monteth Speaks.

The annual Junior-Senior Banquet was held May 28, in the College Dining Hall with Dr. H. D. Newton as toastmaster and President C. L. Beach and Professor Monteth as the toastmasters. The hall was decorated with pretty trimmings of 1919 and 1920 banners set off with ferns. The affair started with a buffet supper of caviar for the guests and the students.

Harry Lockwood gave the address of welcome on behalf of the Junior Class, of whom there were seventeen members present. Donald Hirsh, for the senior class, gave the response. After an interesting speech by Prof. C. L. Beach spoke to the classes and the program was completed with a talk by Professor H. R. Monteth on Americanism. The guests were President and Mrs. C. L. Beach, Dr. and Mrs. H. D. Newton and Professor H. R. Monteth.

The committee which planned the banquet consisted of Margaret Dodge, Dwight Scott, and Herbert Wright.

DAIRY DEPARTMENT TO CONDUCT EXPERIMENT.

Prof. G. C. White and his assistants are planning to carry on an experiment with raising and feeding of calves. It has always been a problem with dairymen of New England, that farmers can readily obtain them. It has always been a big problem with dairymen of New England, that farmers can readily obtain them.

The anachronistic idea will be those commonly found on the wholesale market. The hall will be those commonly found on the wholesale market. The hall will be those commonly found on the wholesale market. The hall will be those commonly found on the wholesale market.

The big problem with dairymen of New England is that farmers can readily obtain them. It has always been a big problem with dairymen of New England.

The experiment will probably start by May 28, in the College Dining Hall with Dr. H. D. Newton as toastmaster and President C. L. Beach and Professor Monteth as the toastmasters. The hall was decorated with pretty trimmings of 1919 and 1920 banners set off with ferns. The affair started with a buffet supper of caviar for the guests and the students.

SECOND TEAM TIES PUTNAM HIGH SCHOOL TEAM 5 TO 5.

The Connecticut Aggies second team tied Putnam in a nine inning game played for the most part in a drenching rain. Wenzel assayed the mound for Connecticut and had the visitors eating out of his hand until the eighth inning when he was caught napping and held his place on account of the wet condition of the ball, and Putnam scored three runs. The first half of the game was a pitching battle between Wenzel and Dobson with the odds in favor of Aggies. Wenzel and Brow hit heavily for Connecticut.

TRINITY GAME.

(Continued from page 1)

the seventh inning but it availed him nothing as Trinity was unable to break through the iron defense of the Nutmeg Staters. In the sixth Reynolds paved the way for another easy throw from Shepherd. The seventh proved the hard luck inning of the game for the Aggies. Sawin was the first man up and he fanned. Jaquith was thrown out at first but Marsh walked and chained himself on Reynolds' third error. Murphy smashed the pill into center field for the Aggies' first hit of the game but Marsh was caught napping and held his place on second until it dropped safe when he dashed for third and ran toward home. It was tagged out by Nordlund and tagged out by Nordlund but the Trinity catcher dropped the ball and Marsh shot for home. In order to reach there he ran out of the base line to avoid Shephard who had the ball. The umpire called him safe and in the mix-up Putnam crossed the plate with a second tally. Trinity protested the play and the Aggies showed their sportsmanship by allowing the decision to be changed without further argument and Marsh was called out at the plate. Hits by Murphy and Ryan in the eighth gave Connecticut their last run,Curry allowed Trinity only three safe hits and fanned twelve of their batters.

The score:

Connecticut.

The Story of Your Study Lamp

If you were studying by an old smoky oil lamp and suddenly a modern, sun-like MAZDA lamp were thrust into the room, the contrast would be dazzling. That instant would unfold the result of thirty years' development, research and manufacturing in electric lighting.

And this development commenced with Edison's first lamp—hand-made, when electricity was rare.

The General Electric Company was a pioneer in foreseeing the possibilities of Edison's invention. Electric generators were developed. Extensive experiments led to the design and construction of apparatus which would obtain electric current from far-away waterfalls and deliver it to every city home.

With power lines well distributed over the country, the use of electric lighting extended. Street lighting developed from the flickering arc to the great white way. Electric signs and floodlights made our cities brilliant at night, searchlights turned night into day at sea, and miniature lamps were produced for the miner's headlight and automobile.

While the making of the electrical industry, with its many, many interests, was developing, the General Electric Company's laboratories continued to improve the incandescent lamp, and manufacturing and distributing facilities were provided, so that anyone today can buy a lamp which is three times as efficient as the lamp of a few years ago.
SAFETY VALVE

To the Editor of the "Campus:"

Things are rapidly being put on their pre-war basis and it is the writer's opinion that a great many former conditions can well stand improvement. This can well be applied to our college conditions and activities.

The scholastic year for 1916-17 at this institution lasted from September 12 to June 12 with two days' vacation at Thanksgiving, eight days at Christmas, and three days at Easter. In 1917 our year opened about October 15 and ended May 10, with very short recesses. Now which of these years was most beneficial to the students? Mostly everyone will admit that the year 1917-1918 benefited the students more than the preceding year, because we were kept busy during the winter months and were free during the warm weather. Isn't it better to have to do work in the winter and be free in the spring and summer than to have a long drawn out year with little or no studying done during the latter part of May, June and July?

To obtain a degree from this institution one must have had some practical farm experience. What good is a master home gardener, or a home gardener who does work at planting or harvesting? This is practically impossible with a long school year.

The writer does not know what our school calendar is for next year. Probably it is to be similar to that during the war, and if it isn't it should be. Let us have a short school year, small recesses, and four or five months' vacation and see if practical farming isn't better than book farming.

M. W. F.

"SHALL I BE A FARMER?"

There has been recently published by request of the Council of Defence, a bulletin which is primarily for the returning soldier, called "Shall I be a Farmer?" It outlines the opportunities and condition of Connecticut. It is a plain straightforward statement of the situation throughout the State of Connecticut.

DEATH OF FORMER RESIDENT.

Word has been received from Floyd Duffee, formerly instructor in farm machinery, stating that his mother, Mrs. Duffee, who was at her home in Richmond, Indiana, was preparing to move to Madison, Wisconsin, where Mr. Duffee, is instructor in farm machinery at the University of Wisconsin. While Mr. Duffee was on the "Hill" his mother lived here and her many friends here were surprised at the news of her sudden death.

Dear Editor:

Your editorial in the recent issue of the "Campus," about the change of name of the good old college on the "Hill" to one more fairly indicative of its character, should be of compelling interest to all who hold in heart its broader interest and welfare.

The institution was established under the Morrill Act as a College of Agriculture and Mechanic Arts, not solely as a college of agriculture. Undoubtedly in the past there have been good and sufficient administrative reasons why emphasis should be placed on the development of the agricultural side; but if this once was true, it may now be submitted that a very great opportunity—quite possibly the greatest opportunity—for the further development of the College, lies in its mechanical and general scientific department.

Connecticut is not an agricultural state. Its manufacturing interests are of vast importance and require the services of a large number of newly trained men each year. Have not its citizens the right to demand that this training be adequately given at their state college?

And how about a general scientific course for students not looking toward agricultural and mechanic arts, but who, through their courses in a course with a degree of B. S., could qualify for any of the professional schools in the leading universities, most of which are now post-graduate?

Even if they did not wish to continue the studies they would have a broader and more fitting citizenship. It may be answered that this training is now offered at the College in as far as possible under the same circumstances. If this be true, how many of the citizens of the state know it? Why continue to hide the fact under the name of an agricultural college? The time may not yet be ripe for a Connecticut State University; but why not a Connecticut State College?

Very truly yours,

M. C. HULL, ex-10.

Larchmont, N. Y.

(Editor's Note: Although the writer is evidently not acquainted with the scientific courses started since he was last a student, his letter is welcome for it is the only one received from the alumni relative to the changing of the name of our institution as outlined in the "Campus" of April 36, 1919.)

SOME FACTS.

At present the college owns 1339 acres of land, 107 acres of which are campus or reserved for buildings. The University has two artesian wells 800 feet and 1100 feet deep which yield 50 gallons and 15 gallons per minute respectively. The water consumption of the college is from 60,000 to 75,000 gallons per day.

TOO MUCH CREDIT CANNOT BE GIVEN.

The success of High School Day has demonstrated what Connecticut Agricultural College is able to put across when everyone gets together and joins in. The entire student body, especially those on committees, deserves considerable credit for the careful planning of the program. But above all who made the day the success that it was, there are two persons whose work cannot be commend-
ed too highly. To Professor George Lamson belongs the credit for the outlining of the original plans, the sending and tabulating of invitations sent out, the recording of the replies which literally swamped his office, the planning of the track meet, the excellent system of registration, the assignment of sleeping accommodations and the collecting of necessary bedding, not to mention the details of all other duties necessary. As Miss Lamson so ably. In fact, Professor Lamson was not only the chairman of the High School Day Committee but the chief organizer and promoter of the work of all committees.

To Miss Taft belongs the credit for the astonishing accomplishment of feeding the crowd at the rate of 962 in one hour and fifty minutes. The efficient system organized and carried out by Miss Taft was one of the big feats of the day as it enabled everyone to be fed in time to see the game. The other meals were as efficiently served. Never before had the dining hall been besieged by so large a crowd and the Indians, in manner which everyone was quickly and thoroughly fed is an accomplishment to the credit of Miss Taft.

GOV. HOLCOMB ON FARMING.

That the industrial interests of Connecticut are bound up in the production of food stuffs, is the opinion of Governor M. H. Holcomb, expressed in a recent endorsement of the state-wide drive for Farm Bureau members.

Governor Holcomb's message is as follows:

"To understand the County Farm Bureaus are to conduct campaigns for funds in the near future. I believe that there is no cause in this state to which contributions may more usefully be given than to the work conducted by these bureaus. Connecticut is not a manufacturing state, but probably one of the greatest problems confronting us is the production of a larger proportion of the food which we consume within our borders. Upon the success of the solution of this problem depends to a considerable degree the future industrial welfare of the state. The state maintains an agricultural college for the training of teachers and farmers and for the collection of information of all kinds concerning agriculture. It also maintains an Extension Service for the dissemination of this information and teaching among the people.

"The County Farm Bureau are the 'cutting edge' of this entire machine. They furnish the key by which the accumulated agricultural knowledge and information gathered by the Extension Service and the college and the Extension Service are brought home to the farming public. In addition to this they have been very successful in the solution of various economic problems confronting the farmers, and the encouragement of better methods of their work by the public is, therefore, of the utmost importance to the state as a whole."—Press Bulletin.

STATEMENT OF OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY ACT OF CONGRESS OF AUGUST 24, 1912.

RICHARD E. DODGE.
HARD GAME LOST TO NEW HAMPSHIRE

SAWIN PITCHES FOURTEEN INNINGS OF SUPERB BALL.

After Playing Splendid Game Aggies Lose Lead by Unfortunate Decision Which Gave New Hampshire Two Runs.

On June 2 the Aggies lost the hardest game of the 1919 season and a game that rightfully belongs to them. In the first six innings the Aggies led by three, but three cheap errors on the part of the Southern boys allowed them to score three runs in the seventh. Lorden smashed the ball for three bases and Andrews fanned. Sawn walked Broderick who stole second. Butler drove the ball down the third base line and it hit Lorden in the leg. Although this clearly puts Lorden out according to the rules the umpire allowed him to score and Broderick also crossed the plate with the tying run. Coach Guyer called the attention of the umpire to the fact and the New Hampshire coach and players admitted that the ball hit Lorden but the umpire refused to change the decision. Even with this discouragement the Aggies played back and regained the lead in the eighth only to have it tied in the ninth when Andrews, who was standing on second when Mahoney allowed a passed ball to go through him, raced clear home when both teams had agreed on one base on a passed ball. Both pitchers settled down to a gruelling duel until the fourteenth inning. A pair of base hits coupled with a hit and an error allowed New Hampshire to clinch the game. The box score:

Connecticut

New Hampshire

FACULTY LOSE TO FRESHMEN IN PITCHERS' BATTLE.

Wenzel Gives Faculty Their First Defeat in Eleven Years.

The freshmen beat the faculty by the score of 3 to 2 in a pitchers' duel throughout with Wenzel getting the better of the argument over Moss. Incidentally Wenzel turned the trick of handing the faculty the first beating they have received in eleven years. Wenzel fanned ten of the faculty's hits and allowed them only two scattered hits. Moss also had the fresh swinging round the bases off and sent sixteen of them back to the bench but they found him for eight solid breaks, three of which were bunched in the fourth inning and allowed the freshmen to gather two tallies and sew up the game. Errors in the seventh allowed the faculty to get one run and put men on second and third with only one down but Wenzel fanned Holbrook and Moss and saved the day. The score by innings:

R E H

FRESHMEN 1 0 0 2 0 0 - 3 8 2

FACULTY 0 0 1 0 0 - 2 0 3

Batters - Wenzel and Mitchell for the Freshmen; Moss and Guyer for the Faculty.

AGGIES, TIRED OUT FROM LONG TRIP, LOSE TO BOSTON COLLEGE.

Game Played but Six Innings in Order to Allow Aggies to Catch Train.

The Aggie team down from their northern trip disgusted, tired and worn out, and played the most wretched ball imaginable against Boston. At no stage of the game did the invaders show any life or pep and received the worst trouncing of the season by the score of 12 to 5 in six innings. The game was called at the end of the fifth in order to allow the Connecticut men to catch their train. Johnson started on the mound for Connecticut and twirled an excellent brand of curves but received miserable support. The Aggie's errors came so thick and fast that the score keeper had a hard job keeping track of them.

The score by innings:

R H E

Boston 0 1 0 2 2 - 5 9 7

Connecticut 0 0 1 0 0 - 0 1 0

Sawin Fans Vermonters in Quick Order. Ryan Makes Home Run.

The Connecticut Aggies journeyed to Middlebury on May 31 and playing on Geddes, the Vermont pitcher, in the eighth inning hung up our fourth victory of the season. The Aggies drew first blood in the second, Enon and Sawn gathered in a neat pair of hits and Eaton scored. Middlebury tied it up in their half. The Connecticut boys forged to the lead again in the third. Murphy got a hit and Brigham slammed another for a safety. Mahoney laid down a bunt in an attempted sacrifice but Geddes threw Murphy out at third. Eaton smacked a double scoring Brigham and put us out in the lead once more. Ryan smashed a terrific line drive right over center but unfortunately Stockwell, Middlebury's second baseman was there, trying to cover the bag and he nabbed a sure hit.

The Vermont's boys threw a bad scare into our ranks in the seventh by scoring four tallies and it looked as if the game was lost but the old Aggie spirit came through and we slamm ed down the victory in the eighth. Mahoney and Eaton both popped flies to the first baseman. Then Ryan stepped to the plate and brought the crowd to its feet by smashing a home run over the center fielder's head. Sawin and Jaquith walked and Stockwell in scoring when Ross threw wild on Marsh's drive to short. Putnam was the hero of the day scoring Jaquith and Marsh with his first hit of the season and scoring himself on Murphy's drive. Brigham ended the scoring by flying out.

The score:

A B R B P O A E

Murphy, ss 5 0 2 0 0

Brigham, 2b 6 1 4 1 3 0

Mahoney, c 5 0 0 0 6

THE CONNECTICUT CAMPUS

Tufts College Medical and Dental Schools

The Tufts College Medical and Dental Schools are co-educational and provide women with an opportunity for entering vocations of great possibilities.

The requirements for entering the Medical School are that the candidate shall have a diploma from an accredited high school and two years of medical preparatory work covering Chemistry, Biology, Physics, English and either French or German.

The Tufts College Dental School admits graduates of accredited high schools on presentation of their diploma and transcript of record covering fifteen units. Many successful women practitioners are among its graduates.

TRANSPORTATION PROBLEM SOLVED

EVERY AVAILABLE AUTO ON THE "HILL" MADE MANY TRIPS.

Constant Stream of Cars Handled Large Crowd Without a Single Mishap.

Outside of the housing and feeding problems for High School Day, probably the next largest was the transportation problem. It was decided to see to it that cars were brought from Willimantic to Storrs and back. This committee in charge of transportation was W. F. Kirkpatrick, who carried out their work most creditably.

Another problem which confronted the committee was whether or not they could crowd the cars or must they live up to the law which states that a car may carry only two over its seating capacity. The police of Willimantic were interviewed, but, the owners of the cars had to see that the law was lived up to. They consented, however, to have a man at the station to help out the committee.

The transportation committee, dressed in blue and white left Storrs at 8 a.m. and, as soon as they reached Willimantic, they began to work as the seniors began to arrive at 9 a.m. and there was a steady stream of cars to the "Hill" until 2 p.m. A man was stationed at Faculty Row and he sent the incoming cars along the Willimantic road as far as the Village House and then up to the Armory. The cars left by way of Faculty Row.

The exit of the visitors began on Sunday morning at 10 a.m. and the same cars which brought them up Saturday had them all back in Willimantic Sunday at 3:30 p.m. Then there came a slow but steady stream of empty Pierce Arrows, Reos, Dovers, Buicks, and Fords coming back to Storrs for a needed rest.

SIGMA ALPHA PI.

Vincent Randall, ex-'20, a salesman of Hall & Co., Waterbury, received word when riding on the running board of an automobile which collided with a runaway team. The neck yoke tore a flesh wound in his leg which required eighteen stitches. Reginald J. Pullen, '22, has been discharged from St. Joseph's Hospita1, Willimantic, where he was laid up since his motorcycle accident. Earle Nodine, '18, late of Co. G, 102nd Infantry, visited the "Hill" June 1.

Howard Carrier spent the week-end of May 31 in Boston and saw the Aggies play Boston College.

ALPHA PHI

The annual Fraternity banquet was held Saturday, May 17, at the Hotel Bond in Hartford. Seventeen active members and sixteen alumni were present.

Brundage, '15s, Walter Ackerman, '15, and Benjamin Sterrs, '16, who was wounded in France, were all visitors on the "Hill" School Day.

PHI EPSILON PI.

Nathan Cohen, '17, David Traurig, '17, and Israel Shapiro, ex-'21, spent the week-end of May 17 and 18 on the "Hill."

Emanuel Shalman, '21, Nathan Cohen, '17, and Donald Hinsh, '19, spent an enjoyable week end May 31 with friends at the Massachusetts Agricultural College.

Plans for a week-end party to be held in Hartford, June 7 and 8, have been completed. A large number of alumni and members of the different chapters of the Phi Epsilon Pi are expected to be present. This is to be the final affair of the Phi Epsilon Pi for this year.

ETA LAMBDA SIGMA.

James S. Goodrich was on the "Hill" over the week-end of May 19. Mr. Goodrich has been appointed Chief Sales Manager of the American Cement Company of Hartford.

Arthur Reeves, ex-'19, has been appointed Regimental Adjutant of his Regiment now stationed in Germany.

Edwin C. Eaton, '11, has recently accepted a large landscape gardening contract on the estate of Mr. W. V. Rochingham of Essex, Mass.

Edward J. Renshan, now First Sergeant U. S. Engineers, was awarded the Carnegie Medal for rescuing three children last winter, who had fallen into Chestnut Hill Reservoir, Boston, while skating.

Upon leaving College this June, Earnest E. Carpenter, '21, intends to assume the position of supervisor on his father's farm in East Granby, Conn.

G. N. ABDIAN

You have all seen his Silk Leather, and Felt Banners and Pillow Covers. Just wait for his call, or write to 999 Broadway, West Somerville, Mass.
The Inter-fraternity Council has been especially active during the past few weeks and several important meetings have been held.

The Council decided that it would not be legal for a new fraternal organization at Connecticut to use the name or letters used by any other fraternity once existing at the institution. This rule was applied by J. S. Miller, 19, which wished to take the name of Kappa Beta Iota a fraternity which was in existence in 1916 and is the spirit of the Upsilon Chapter of Phi Epsilon Pi.

A committee consisting of Dwight Scott, Emanuel Shulman and Everett Dow was appointed to present to the Council, rules and regulations which should govern the actions and attitude of the three upper classes toward the freshmen. It is the plan to have the whole upperclass body cooperating in guiding the freshmen, in aid to accomplish more work and to encourage better spirit.

Many suggestions were made by the Council with the view of bettering the new athletic association constitution. It was the opinion of the members of the Council that in respect to the co-ed vote that the young women students should not be allowed to vote at athletic association meetings and that their dues should be made part of the amount charged to the male students. Action will be taken on these suggestions by the Athletic Council and the Athletic Association.

The Council recently presented its probable new constitution to the fraternities for ratification. Suggestions were called for in an attempt to decide upon a more fitting name for the body than Inter-Fraternity Council as non-fraternity men sit at Council meetings, and it is likely that a new name will soon be published.

Connecticut to be Well Represented at R. O. T. C. Camp This Summer.

Connecticut Agricultural College will be represented at the R. O. T. C. summer camp which will be opened at Camp Devens, on Saturday, June 21 and close about July 31. The men will be given free transportation to and from the camp. Those who have made plans to attend are, Newton Alexander, 21, George MacDermott, 22, Clifford Prentice, 22, George MacCarron, 22, and Donald Lawson, 22. The following men will go if necessary arrangements can be made, William Poole, 21, H. D. Neumane, 21, Edward Grifflin, 21, Roy Marsh, 22, Frank Hemmeler, 22, and Charles Van Buren, 22.

Ask the Man Who Has Used It

Whether or not he has made good crops with Nitrate. Why speculate with Non-Nitrated forms of Nitrogen when, by using Nitrate, you can insure crops against adverse conditions? With the rational use of Acid Phosphate, we always recommended by us, there will be no interference with normal soil conditions, either in one year or in one hundred.

THE MAN WHO BUYS A DE LAVAL
Is taking no Chances

Any time you buy a cream separator—no matter who makes it or what claims are made for it—that has not behind it a long record of satisfactory service, a record known to all, a record that is in itself a guarantee of satisfactory service, you are taking a gamble with all the odds against you.

Why take chances all when you come to select a machine that may mean so much in increasing the profit from your cows?

There is one cream separator that has been the acknowledged world's standard for over 40 years. It's the one cream separator that is used by the creamermen almost exclusively. Dairy farmers the country over know the De Laval and its sterling quality. Experience has shown them that

It is the Best Cream Separator that money can buy.

OVER 2,525,000 DE LAVALS IN DAILY USE
Interesting Facts Regarding its Development Disclosed.

At College assembly held May 28 President Charles L. Beach spoke on the "Development of the Campus." Before beginning his speech President Beach thanked the students for helping to make High School Day such a wonderful success.

President Beach said that an institution must be built on a solid foundation to succeed. He looks forward to the consolidation of the state experiment stations at Storrs. Portions of his speech were as follows:

"This year four Home Economics students graduate. At present we have no separate building for the teaching of Home Economics. When we do build such a building it will be necessary to place it in a position for future growth. There is not a single Home Economics teacher in this state who graduated from this college."

President Beach said that he was not very disappointed after all that we did not get the amount for the Home Economics building as the sum would not have been sufficient. A dormitory would not be built to accommodate less than one hundred girls.

"The engineering department will probably be developed as was the original intention of the Land Grant Act. The R. O. T. C. will be continued and a calvary unit may be possible.

"If the baseball players on the college team may not be allowed to be professionals or men who have ever played baseball for money then the association itself must not collect gate receipts and indulge in commercial baseball.

"The School of Agriculture will be dropped as it conflicts with the work in high schools. There will be either an increase in the number of fraternities or the membership of the present fraternities will increase. For this reason fraternity houses will be necessary. To solve this problem it has been suggested that the new dormitories be built in sections like Storrs and Koons Halls. The sections could have flats to rent to the fraternities.

"The new dining hall is to be built this year. The future dormitories will be in the rear of the present ones. The present dining hall will be used as a Mechanical Arts building. The land in the rear of this building will probably be reserved for the growth of this science.

"The corner near the dairy building is reserved for the agronomy building.

"When the railroad goes through Mansfield depot the front entrance of the campus will be changed to that part near the dining hall and the Willimantic entrance will be the "back door."

The plans for the new buildings to be erected here soon have not been completed. Very little information can be gained as to the preparations, outside of the fact that the dining hall and infirmary will be the first to be built.

PRENTICE CATCHES ELUSIVE PIG ON HIGH SCHOOL DAY.

Captured Pig Turned Loose Again
But Will Eventually be Consumed
By Freshmen at Their Banquet.

Immediately after the varsity baseball game with Trinity, Saturday, May 24, High School Day, the fun of the day was indulged in by twenty students, four from each class. A good-sized pig covered with axle grease was turned loose, or rather let out to the mercy of the few who had dressed for the occasion, looking more like laborers than students. A large circle was formed about the pig and at the sound of the pistol the pig was let loose and then there was a grand rush. The center of attraction dodged the biggest part of the upperclass men and made straight for the biggest freshman in the line-up, namely, Clifford Prentice, '22. Prentice dropped in this line, and grabbing him by the hind leg, wrapped his own legs about the pig's body and accomplished what is known as a scissors hold. There was much screaming on the part of the pig for some few minutes because the rest of the crew rushed to the scene and dropped onto the pig and fought for a good grip in hope that they might get the decision. The rule of the game was that the man covering most of the pig would win out. There was no getting it away from Clifford Prentice, and he was proclaimed victor. The pig was turned loose again for a little more practice and amusement.

It is the intention of the freshman class to have a pig roast and pass judgment on the quality of A. C. Skinner's selection. Mr. Skinner, the instructor in animal husbandry, bought the pig of Mr. Oliver Downs of Brooklyn, Conn. It is a Chester White, weighing about 100 pounds.

HIGH SCHOOL SENIORS HOLD INTERESTING ATHLETIC MEET.

Cummings of Stafford the Star of the Meet in which Forty Took Part.

The athletic events held in conjunction with the rest of the festivities on High School Day attributed greatly to the success of the occasion. Over forty high school athletes from all over the state, including ten girls, entered into various events with great spirit and enthusiasm. The boys competed in: the 100-yard dash, the 220-yard dash, the running broad jump, the running high jump, and the baseball throw, while the girls amused the crowd by running a potato race.

W. A. Cummings of Stafford High proved the star of the day, taking first place in the 100-yard dash, the running broad jump and the running high jump. William Baxter of Stamford High School also showed up well, carrying off second honors in the running broad jump, the running high jump, the baseball throw and capturing third place in the 100-yard dash.

The Connecticut Agricultural College
Storrs, Conn.

FOUR-YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B. S. degree.
