PROFESSOR EMERITUS SPEAKS AT ASSEMBLY

MONTEITH UPHOLDS BROADER EDUCATION

Advocates More Study of Literature and Mathematics

Women Sing Marseillaise

The faculty and students were very glad to hear Prof. H. R. Monteith as the speaker at the President’s Hour October 22. Prof. Monteith opened his address by telling of his long absences and of his joy at being able to conduct his classes again. He rightly termed himself as a Professor Emeritus. Some other than Monteith brought in his thesis on education in general were as follows: In this college, where agriculture is the subject that is most given attention, it is important that the academic side of education be kept at a high standard. The study of foreign languages makes us know our own better. Mathematics has its own history, and is recognized as one of the most valuable sciences in the training of the mind. Education has its own history, which is long and eventful. Students will profit by a study of this history. It is well to know and read the prominent authors of each age in literature. After reading and reflecting we gradually begin to understand and analyze. Then comes the time to know ourselves. This comes only after careful thought and reflection. Those students who keep the larger number of happenings in the world are the ones who are to be of the most service in later life. During the musical program given at the assembly Prof. Croteau’s French class composed of ten young women sang the “Marseillaise.”

VESPERSONS—NOVEMBER 2

Choral Prelude

Guilmain

Prelude for Easter Day

Miss Whitney will speak on the topic “Old Times in the Storrs Church.” Miss Whitney has been a member of the faculty for a longer time than anyone else on the hill and is very well qualified to present this subject. She understands and author. Then comes the time to know ourselves. This comes only after careful thought and reflection. Those students who keep the larger number of happenings in the world are the ones who are to be of the most service in later life. During the musical program given at the assembly Prof. Croteau’s French class composed of ten young women sang the “Marseillaise.”

LOW BACTERIAL COUNT SAY BACTERIOLOGISTS

Chlorine Gas to Safeguard Against Possible Contamination.

New Source of Supply Investigated

The rumor that has spread around the campus lately about the impurity of the water has been proven false by bacteriological tests which have been carried on by the sophomore class. There were two tests, one for the presence of sewage germs, B-coli, and for the number of bacteria present. It was found that there was absolutely no presence of sewage germs and a very low percent of bacteria of any kind. The test before was taken in September after a long spell of rain which caused a sewage pipe from an unknown source to leak only be remedied by putting chlorine gas in all the water to safeguard against contamination in the future.

The last rumor of contaminated water was taken up by the authorities of the college and the project of a new water supply from Merrow has been started and is being pushed through. A pumping plant and chlorine machine is to be installed at the source of water, to force the water over, and to safeguard against any contamination which might occur.

The project is backed by the state and was taken up by the authorities of the college and the project of a new water supply from Merrow has been started and is being pushed through. A pumping plant and chlorine machine is to be installed at the source of water, to force the water over, and to safeguard against any contamination which might occur.

When Buckwheat, Goldenrod and Asters Fail to Provide, Government Steps In

Prof. L. B. Crandall, head of the beekeeping department of the Connecticut Agricultural College, has succeeded in obtaining enough sugar for the beekeepers of Connecticut to tide over all the colonies of the state.

The U. S. Sugar Equalization Board asked for an estimate on the minimum requirements for Connecticut. Professor Crandall estimated that 40,000 pounds would be the necessary requirement, and this amount the Board has agreed to send.

Contrary to the original plan of having three distributing centers for Connecticut, a new plan has been adopted whereby all the sugar will be sent to Hartford and handled by Tucker and Goodwin of that city. From there the beekeepers may obtain their allotted amounts.

The annual Hallowe'en Masquerade is to be given by the co-eds at Hawley Armory, Friday evening, October 31, at 8 o’clock. Music will be furnished by the College orchestra. All are requested to come in costume. Prizes will be offered for the best costumes. It is hoped that everyone will enter into the affair with good spirit and come masked, even if his costume consists but of a sheet and pillow case.

It is due to the buckwheat failure in New York State and the poor stand of goldenrod and asters in New England, that the great lack of winter supplies for our honeybees is so acute.

Church Services

Morning Service—10:45 A. M.

Topic—Pointers on Language. Do you speak a language or a dialect? Mr. Dawson will discuss language spoken and as it should be spoken.

Christian Endeavor—6:45 P. M.

Subject—Standing for God and Right.

Leader—A. J. Brundage.

The local C. E. Society is a live one. The meetings are well worth attending. With such a leader as Mr. Brundage a good meeting is assured. Come, and enjoy it.

COTTER’S SATURDAY NIGHT

The first of the series of entertainments to be given by the Social Committee will be presented in Hawley Armory on Wednesday evening, October 22.

A dramatic production of Burns entitled “A Cotter’s Saturday Night” was given by a Scottish Musical Company, which had for its artists: Margaret K. Daniels . . . . Soprano Victor Gilbert ......... Tenor Jeanne H. Tanner ......... Contralto John E. Daniels ......... Tenor James Singer ......... Baritone Daniel Ross ......... Bass Alice Gilbert ......... Pianist

The above troupe presented songs, stories and scenes, commencing at 9 o’clock on a Saturday night, in a very pleasing and commendable manner.

L. A. S. is in a very favorable state, and is taking steps to bring about a real interest in the society. The new officers held their first meeting with 18 members present. At this meeting the new officers were installed, and it was decided to hold daily meetings in the residence hall.

LOU. AND DEXTER TUCKETT

Walter .

May Launch Similar Project

That Connecticut Agricultural College is known in the Republic of Panama and its location is familiar at least to the postal officials of the Connecticut was evidenced by a letter received by Walter Stearns, public man for the College. This letter was from Professor Huys, in charge of Dairying in the College. Professor Huys had heard of the milk campaign which had been carried on so successfully in the state last year, principally under the supervision of Dorothy S. Buckley of the Extension Department and was very desirous of learning more about the means by which it was organized. He stated that a similar project was about to be launched in Panama, and the success achieved by this College would warrant that its methods might prove useful and beneficial for adoption in the Republic.

The fact that his communication reached here promptly without further postal delays through the mail on Connecticut Agricultural College shows that the postal officials of Connecticut are on their jobs and have no difficulty in locating the place. Apropo of this it might not be out of place to mention the fact that letters addressed to the “Connecticut College” were never answered.

CONFERENCE AT PORTLAND

The annual conference of County Agents and State Specialists, held at Portland, October 23 and 24, was entertained by W. O. Filley, State For- ester, and A. E. Moss, A. A.; at the State Forest Reserve, tents and shacks serving as the housing facilities. Many different subjects were discussed during the two days by all the members and a few visitors; the evenings were spent with light sport. Thursday and Friday night the initiation of new members took place in a socially smokered smudged camp fire circle. The events were concluded on Friday night in order and Friday night the initiation of new members took place in a w...
LOST! A FRESHMAN HAT!

Great was the anxiety in the mind of a certain Freshman girl when she discovered that she had lost her Freshman cap. The cap of her beloved class 1923 was gone and no truant officer had found it. She was not only anxious and worried but also puzzled. How could she recognize her own individual cap when she saw it? Someone had loaned it by mistake and might be even then wearing it for his own. How could she prove it to the authorities? She had four white stripes, four blue stripes, a broad white visor and a green button. So had many, many other caps, in fact the entire Freshman class was provided with members of the same species—four white stripes, four blue stripes, a broad white visor and a green button. Wasn't there any distinguishing mark on hers? Why yes, of course, no one had the same autobiography and in the same position on those white stripes and visor as she had. She quickly decided that she would scrutinize every Freshman cap that came into her sight and examine it for those distinguishing marks and maybe sooner or later she would discover where hers had gone. She prepared her eyes peering at the hieroglyphics inscribed on blue and white caps! In her sleep she discovered that she had lost her own individual cap when she saw it?

She would put in this notice that long list of initials and nicknames. At first and a half years immediately prior to taking his present position this fall, Mr. Kilham was with the State Institute of Applied Agriculture at Long Island, N. Y., farming and as Horticulturist. He graduated some years ago from the Oregon State College of Agriculture, and is well fitted to fill his present position.

Lost a Freshman cap? The last two will deal mainly with the dormitories. These rules and regulations are as follows: First year, plant-animal husbandry; second year, animal husbandry; third year, horticulture; fourth year, farm management.

Production—Propaganda and care—and if, by any chance, he find that one man from each of the dormitory classes has been through Italy, France, Germany and Holland, visiting Naples, Rome, Paris and Berlin. According to the postal card received here recently, he expected to return to America on the Prinsendam which arrived October the 20th.

OLIVIER F. KILHAM, '09
NEWBERG, OREGON

Directs Agriculture in Pacific Coast High School under Smith-Hughes Act

An agricultural department is organizing and running smoothly at the Newberg High School, Newberg, Ore., with Oliver F. Kilham, C. A. C., '09, in charge as director. Newberg is twenty-four miles southwest of Portland and on the famous Pacific Highway. It is one of Oregon's leading fruit, nut and poultry sections.

and you will come again.

If, by any chance, he find that one man from each of the dormitory classes has been through Italy, France, Germany and Holland, visiting Naples, Rome, Paris and Berlin. According to the postal card received here recently, he expected to return to America on the Prinsendam which arrived October the 20th.

OUR VESPER SERVICE
AS SEEN BY FISHER

Urges Attendance—Speaks of Future Program—Asks for Support in Musical Line

R. C. Fisher, chairman of the committee on arrangements for Vesper service makes the following comment: "The majority of the students do not know what they are missing by not attending the Sunday Vesper Service in the Community Church at 4:45 P. M. This service ought to be especially appealing to the average student. This short, last-minute service, going on for thirty minutes, is interesting, and is at a time when one feels like enjoying the restfulness of such a service." There has been arranged an especially interesting and suitable program for the future. Hereafter a theme will be selected for presentation by a member of the faculty or one of the students on some subject related to community life. Mr. Torrey has charge of the musical end of these services and is developing a very fine program. He hopes for the support of all students interested in music of this kind.

This is sincerely hoped by the leaders of this service that the students will take advantage of this opportunity for worship as it is primarily for them, and a community affair. Come once and you will come again.

COLLEGE ASSEMBLY PLANS

Plans are being made this year to make College Assembly a vital part of the life of the institution. This is really the only opportunity the students have to get together as a unit. It is, accordingly, a very sense of duty for each student. The pupils now taking the work are full of enthusiasm.

COLLEGE BUYS FARM

The Bradley-Sears Farm, of Spring Hill has been bought by the college and will be used by the Extension Sheep Department. The recently materialized depot flock of sheep is being run now consists of 120 grade merinos and two Shropshire rams, the latter coming from New York. Roy E. Begg is to have direct charge of the newly acquired farm, with A. D. Telfer acting as shepherd. The farm bought consists of 190 acres of land, equipped with one large dwelling house (just opposite the Church on the mountain road), one large and one small barn and a silo. The establishment of this flock by the State marks a new era in the Sheep industry of Oregon. The students are in favor of having their rooms clean and orderly, it is expected that all will give their support to the new regulations.

A. W. Manchester of the Farm Management Department of the Connecticut Agricultural College and B. W. Ellis, County Agent of Windham visited farmers in that part of the state who have kept account of their dairy cattle, and it was found that the average milk is far higher than previous studies indicated.

The amount of grain now being fed to cows is surprising the average being 250 pounds per head which is twice as much. The high cost of milk will not come down until the farmers are a little more economical and prices of grain lower in the near future.

Men's Student Council

The Student Council has started its work this year with increased personnel. The amended constitution adopted by the students organization provides that the council be made up of four seniors, three juniors, two sophomores, and one freshman, to be elected the first Monday in the second semester, and one representative of the School of Agriculture to be chosen. The members for this year are F. J. Mahoney, '20, F. Bauer, '20, J. D. Scott, '20, E. R. Moore, '20, J. P. Johnson, '21, N. W. Alexander, '21, W. F. Quigley, '21, R. G. Chaffee, '22, P. L. Putnam, '22, and C. G. Markham, '20.

At the first meeting of the council F. Bauer was elected president, F. J. Mahoney, vice-president, and J. P. Johnson, secretary. There is considerable work for the council to do at present. A committee has been appointed to investigate sanitary conditions in the dormitories. Already some improvements are being made as a result of the committee's efforts. The committee will act during the whole year and if the students cooperate they will be assured of good conditions. Another committee has been working out a set of regulations regarding the dormitories. These rules will be presented to the organization at the regular monthly meeting on Monday, November 8. Improved accommodations for the students are in favor of having their rooms clean and orderly, it is expected that all will give their support to the new regulations.

Boosting the College

No matter what may be said to the contrary, it is a fact that C. A. C. needs a greater name in its own state. Time and again I have heard people express the idea that Connecticut is merely a farm school with a lopsided economy. We students know the very opposite to be true in all respects. It is therefore up to us to work hard and spread propaganda showing our activities in all lines. Let us make the name of C. A. C. so well known that when our representatives come back to campus they will gladly heed our demands for greater facilities.
BLACKGUARDS MEET—OFFICERS ERECT

Members Loan to Association. Once Financed Sending "Campus" to Alumni Soldiers

The Connecticut Agricultural College Blackguards held its first meeting for this year on Wednesday, October 22, for the purpose of electing officers and discussing plans for the ensuing season's entertainments. The following officers were chosen.

F. J. Mahoney, '20, Chairman; E. A. Lord, '22, Secretary and Treasurer; Wm. F. Maloney, '21, Business Manager; E. D. Dow, '21, Director. Each member loaned a dollar to the association to cover expenses on rehearsal of the organization as it becomes a life member of the WDC. They gave their first entertainment, entitled "The Soldier Boy Minstrels", on December 29, 1917, in Hawley Armory. It was advertised as given by "Connie" Mahoney, Clifford Prescott, and "Brub" Dow, former end men will take these places again, assisted by Wm. Maloney, "Buck" Van Buren and Ricketts. Paul Manwaring will probably act the part of interlocutor.

GLEE CLUB HOLDS FIRST MEETING

The prospective singers have something to work for, since Manager Cramton has a few trips already scheduled, and has planned to take the largest possible number of singers on these trips as far as transportation facilities permit.

A. G. Tappert, '18, is teaching agriculture in Delmaire, New Jersey.

NINE cases out of ten, the man who once smokes a WDC Pipe becomes a life member of the WDC club. He can't help it, because a WDC is certainly a man's size smoke. It's as sweet and mellow as carefully selected French briar and expert seasoning can make it. Not only material of the first water, but craftsmanship of the highest order, and designs that are most pleasing—all combine to make the WDC Pipe a smoke of peace, contentment and satisfaction. A man's smoke. Any good dealer will confirm this.

DOING YOUR DUTY

SAFETY VALVE

Dear Editor:

In a talk with a member of the business department of the college the other day it was brought to my mind the disgraceful condition existing in getting the students to two near uniformity in care of waste paper and rubbish of all kinds.

If you were in your own home would you throw out crumpled papers and paper out the window, brush dirt into the hall, pull the shower baths from the walls? No, you would never think of doing such an act. Then why do it here? Cooperate with the janitor, he will keep the place clean if he does not have a problem beyond his ability.

It is every student's duty to do his share of the dormitories and livable for the other students; also to pick up and put away the necessary equipment. Of course there are careless, shiftless lot, as would appear from the appearance of the dormitories and the grounds.

So cooperate not only with the janitor but with each other. Pick up the mess. Be college students, not kindergarten ones.

B. M.

Dear Editor:

There is probably not one among the entire student body who would voluntarily be rude to one. Yet last week when the coeds were exceedingly discourteous to the speaker of the hour. From the fact that these few thoughtlessly disturbed those who were interested in hearing the speech, and that they themselves missed a very instructive talk on the Philippines, these offenders were deserving of a severe warning that they students are careless, shiftless lot, as would appear from the appearance of the dormitories and the grounds.

Roger F. Belden,
Managing Editor

The Puerto Rican question is now before the minds of all the students. Our varsity has now gone down before its fourth defeat. There must be some fundamental reason. Can we say that our material is not good, or shall we place the blame elsewhere? Is it because our student body is not backing the team, or must we still look further for our Jinx. Have we not found our trouble yet. We have the material, our student body is backing the team, but it seems our team isn't getting the proper development.

FOOD FOR THOUGHT—WHERE IS THE TROUBLE?

"Submitted"

Dear Editor:

It has been said that appearance is half the battle, and there is no doubt that appearance counts a great deal. They with the appearance which is a part of the uniformity of the scene. Wesleyan in baseball last spring had a decided effect on the spectators at the game, as will be remembered.

But one of the most important factors in attracting public attention, the appearance of the cheer leaders, has been far from perfect. The spirit of an institution is to a great measure decided by the appearance and enthusiasm which is shown at athletic gatherings. Cheer leaders are perhaps the most important factor in guiding that spirit. They themselves attract a great deal of attention, and all College men are pleased and the manner in which they do their work is one of the most impressionable respects of a campus.

Connecticut has been noted for its fight and spirit and is proud of the praise received and yet no action has been taken during a few of the coeds clothes. The spirit of the cheer leaders is that of the war, and their war is being fought. With the spirit of the near future, Connecticut men will be following another to produce novel ideas for increasing the success and the man who is engaged in getting the Athletic Association to provide suitable clothes for the cheer leaders will be real boon to the campus.

Cheer leading is real work, and the men who do it, at least ought not to be put to the inconvenience of providing an outfit for themselves, and the students should feel proud enough to see that they never appear on the field in the future, as they did at the Trinity game.—The Cub.

PREAMBLE OF THE CAMPUS.

The purpose of the "Connecticut Campus" is stated in section 2 of article 1 of the constitution as follows:

The purpose of this publication shall be to publish all college and campus news and such other information as may be of interest to the faculty, students and alumni of the Connecticut Agricultural College. We are running a weekly this year. Can you imagine all the news you would miss if the paper came out only semi-monthly? We are, instead of weekly as at present.

Someone, a student at that, asked us the other day why we were changing to a weekly this year. If any one else wants to ask that question, that is our answer.

IN LIGHTER VEIN

You notice that we are starting a column of light stuff picked up here and there about the campus. This has never been the policy of this paper to run anything of the kind in its columns before but with the expansion in our size and the expansion in the college, perhaps it is time to expand our style. Many of you will find a hind here. These things are nothing but amusing, interesting and furnishing food for thought to students of the Connecticut Agricultural College.

The trustees of the college held a meeting at the Hotel Green, Danbury Conn., and on Wednesday, October 29, they were at the Gilbert Farm, Georgetown, Conn.
GRISWOLD BEATS WOOD IN TENNIS TOURNAMENT

FINALS PROVE CLOSE - FINE PLAYING SHOWN

Contestants Well Matched but Steadiness and Cunningsness Triumph in the End

The tennis tournament came to a close last Thursday when Griswold overcame Wood in one of the hardest fought tournaments thus far waged on these courts.

From the start to the finish each showed excellent form and were equally matched but Griswold showed superiority in his unflagging steadiness.

Although Wood kept him on the back line, and continually forced Griswold to use backhands he pulled himself out with well placed and scientifically stroke balls.

Every set was exceptionally close and kept the spectators in continual suspense as may be seen by the score.

Griswold won first set 6-3 with ease but Wood won the second 8-6. Griswold then got the next two 6-4 and the last 9-7. In the beginning of the last set Wood had the game on ice 4-1 but Griswold then tightened up and won the next four games, and then a continual game on each side till Griswold had Wood, 8-7 and the score 40-30 and for the last point they rallied for thirty-six strokes before Griswold cunningly put over a beautiful lobbed ball which ended the point, game and set.

SUMMARY OF TOURNAMENT

Wood beat Ashcroft 6-0, 6-2.
Wood beat Pinkham, 6-9, 6-4, 6-0.
Wood beat Schwietzer 6-0, 6-1.
Wood beaten by Griswold, 6-3, 6-8, 6-4, 9-7.
Griswold beat Gerhardt 6-0, 6-0.
Griswold beat Fogg, 2-6, 6-1, 6-1.
Griswold beat Bridges, 2-6, 6-2, 6-0.
Griswold beat Bauer, 6-3, 6-8, 6-4, 9-7.
Griswold beat Wood, 6-9, 6-8, 6-4, 9-7.

PROSPECTS OF TENNIS TEAM

The main object of the Tennis Tournament that has just come to a close was to find out the best players in the college so that steps could be effectively taken in starting a Tennis team this coming season.

This is a Tennis Association formed to take care of getting games and the required finances to see the team thru the coming season.

The tournament has revealed what was looked for, that was five good players. These were picked without any trouble for their superiority over the rest, and they are as follows according to rank: Griswold, Wood, Bauer, Bridges and Upson. With these men it is hoped to have a team that will go through a successful season and make a good showing.

LEFT THE PIGSKIN WITH POMFRET TEAM

Seconds Lose Game 34--8 - Poor Playing in Second Quarter Gave Opponents the Advantage

The C. A. C. Seconds journeyed to Pomfret last Saturday, and by allowing themselves to go to pieces in the second quarter were beaten by the score of 34--8. The individual stars for the "Aggies" were Wooster and D. Graf.

The first quarter was fairly even. Pomfret scored a touchdown on a long end run.

During the second quarter the "Aggies" went to pieces and allowed the school lads to work several fake plays and two shoestring plays which went for touchdowns. Pomfret piled up twenty-seven points in this quarter.

During the third quarter, the C. A. C. boys came back and played the home team off its feet. The team advanced the full length of the field and Taylor went over for a touchdown. The try for a goal failed. A few minutes later, one of the Pomfret boys had thrown behind his goal line for a safety, bringing the second team's total up to eight points.

The last quarter was slightly controversial's although neither side managed to score. During the last two minutes of play Wooster intercepted a forward pass and ran sixty yards before being tackled by the last Pomfret man between him and a touchdown.

The line-up:

C. A. C. Seconds  Pomfret
Newmann le  McIntyre
Allen it  Chamberlain
Ferris lg  Hinton
Blevins c  F. Taylor
Jurallewicz rg  Robinson
Poolo rt  Cathy
Boas re  Daniels
Taylor qb  Henderson
Wallace rbh  Hillhouse
Wooster rb  Mallory
D. Graf fb  Taylor

In the third game of the interclass series played on Gardner Dow Field on Monday afternoon the Sophomores were victorious over the School of Ag. by the score of 25-0. Wooster was the shining light on the team, tearing off some fine runs and scoring two of the touchdowns. The other touchdowns were made by Klein and Wood, each after a long run.

The work of Putnam at tackle for the Sophomores was also brilliant. Bendokas starred for the School of Ag.

The small area in the rear of where Grove Cottage stood has never been sufficiently well drained, but tiles are now in and the spot will be drained into the swamp between Beebe's and faculty row.

Walter T. Clark has been appointed Assistant Farm Management Denstrator. He is a former student of Connecticut Agricultural College, class of 1916, and from April 1st, 1917, he occupied the position of Assistant Agent of Windham County.

Houses Renovated for New Birds

The first pen of birds to arrive for the new contest was a pen of Barred Plymouth Rocks from the Gossard Farm. The fowl were two pens of Plymouth Rocks from the Gossard Farm. It is believed that it was five birds per pen but there were only six birds sent, making it necessary for the management to inform them of the error.

The latest arrivals for the new contest were two pens of "jail birds." These birds have received their nicknames because of the fact that they are the property of the U. S. Disciplinary Barracks, Fort Leavenworth, Kansas. During the past week the management of the contest has been busy preparing the houses for the new contest. All of the houses have undergone a new coat of whitewash and have been newly painted and whitewashed so that they are now in splendid shape to receive the new birds.

CONSERVATION HORTICULTURE COURSE

The Conservation Horticulture Course, taught by A. T. Stevens is designed to conserve horticultural produce by reducing unpalatable forms to fruit juices, evaporated fruit, vegetables and the like which may be used for storage. The course also teaches economy in transportation and storage.

Many farmers have today fruits and vegetables of a grade which put on the market would only bring a small return or are even unsalable, and vegetables of a grade apples could be made into sweet bottles and sterilized find a ready sale. Its large sale is doubtless due to protect the water from them, and besides, there would be much less loss from spoilage. Celery ready for the market by the carload might weigh thirty thousand pounds, but when dehydrated only weighs about two hundred and fifty pounds. This same principle applies to nearly all ordinary vegetables. The College has widely advertised this conservation of fruits and vegetables and hopes in the near future to see the farmer realize a larger profit on his crops by its adoption.

KAMPUS KLIPS

(Continued from page 5)

Charles Compton alias Jack McCormick will now render that popular song "Did she fall or was she pushed?"

Maguire caught five squirrels with his machine gun Saturday.

It's tough all right, Scoop, when a Senior can't call at Whitney Hall and bring a Freshman Co-ed to an entertainment. Freshmen rules are a bother anyway!

No, girls, the Freshman boys aren't roaming around wrapped up in Army blankets. They're merely wearing the newly issued uniforms.

Prof. Lamson—Where is superstition practices?
Student—In Waterbury.
Prof. Lamson—Ah! Concrete example of where superstition and ignorance are combined.

Instructor to M. H. Lockwood—Mr. Lockwood, kindly remove that dog from class.
Lockwood carries dog to door.
Bright Student—All right, Dog, drop Lockwood outside and come in. Life is problem.

What kind of dogs do you like, Sniffin'?
Oh, "Black" and "Tans."

Will the Soldiers, Sailors and S. A. T. C. boys step one pace to the front?

THE Connecticus Agricultural College
Storrs, Conn.

FOUR YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course, B. S. degree.

TWO-YEAR COURSE in the School of Agriculture, for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who have completed the work of the common school.

FOUR YEAR COURSE in Mechanical Engineering. Four years of high school work required for entrance. B. S. degree.

FOUR-YEAR COURSE in Home Economics. Open to young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture. Recent appropriations have provided additional lands, buildings and equipment valued at $950,000. Expenses low. No tuition charge to residents of Connecticut. Military instruction. A catalog will be sent upon request.
SIGMA ALPHA PI

The annual smoker of the Sigma Alpha Pi fraternity was held in its room on October 23. Thirty of the freshmen were present. Members who returned were Walter Smith, '17, George Alcott, ex-'21, and Edward Baeder, ex-'23.

Albert Klingman, '18, has resigned his position with the Food Research Laboratory of Indianapolis, Ind., and has come east to Brooklyn, N. Y., where he has entered the printing business with his father.

Sidney A. Edwards, '18, was a visitor on the Hill October 26th.

Walter Smith, '17, has resigned his position on the farm of Norman Peck in Kensington, and is now at his home in New Haven.

STONE CRUSHER MOVED

The stone crusher which has been about the college for two years has been moved to Mansfield Hollow, where a private party will use it in the construction of a one-mile stretch of road. The selectmen of the Town of Mansfield, which owns the machine, plan to sell the crusher after the present work is completed. The stone crusher has been of a noticeable nature for some time past due to its having lain idle and rusting on the side of the road by the experimental fields.

“CAMPUS” MEETING HELD

A meeting of the Campus Board and all those interested in the work of the “Campus” was held Friday, October 24. The meeting was opened by Editor-in-Chief Warren E. Brockett, '21, who spoke of the need of the greatest cooperation in the matter of securing news. The value of “Campus” work and how it should be done were explained in detail. Everett D. Dow, '21, closed the meeting by a few remarks on securing “news” and giving out assignments. The Managing Board plans to hold meetings weekly.

CHALLENGERS

The faculty of the Connecticut Agricultural College have had the satisfaction of holding their heads high ever since the college started by saying that they had never been defeated by any team made up of students of this college. They are a little worried now as Wood and Griswold have challenged them to a set of doubles to be played off next Saturday if weather conditions are favorable. Griswold and Bauer in a tournament this summer nearly overcame the faculty in two close sets of 8–6, 8–6. But the association thinks the combination of Griswold and Wood is superior, and expects to win the game from the faculty.

ETA LAMBDA SIGMA

Thomas Reed, ex-'18, is instructor in poultry husbandry at the St. Lawrence University, Canton, New York. Hilian M. Rogers, ex-'18, is running an orange farm at Deed Ridge, Nahant County, Florida. He had to go south for his health. Last week he spent a few days at his home in Waterbury, but was unable to get back to the Hill.

“Bennie” Kilbride, '17, spent a couple of days in Waterbury with A. E. Upman. While there they visited “Barney” McDonald, '16, George Steuart and “Bill” Shea, '17. Kilbride will spend about two weeks at his home in New Haven before returning to his position in the advertising business in Chicago. While at home he will undergo an operation on his tonsils. His address in Chicago will be 2518 Michigan Avenue.

Ernest S. Ely, ex-'19, has accepted a position with a large steel concern in Pennsylvania. Ely plans to visit the Hill in the near future.

PHI EPSILON PI

The annual Fraternity Smoker was held Friday October 24. About fourteen freshmen were present. The speakers for the evening were E. Shulman, '21, who spoke of the history and meaning of the fraternity, and Louis Traurig, who spoke of the value of a national fraternity.

E. Shulman will be the active representative at the New England Council meeting called for November 1 at Tufts College. Dave Traurig, '17, will be the alumni representative.

Members from Beta Chapter, Columbia University, Kappa Chapter, New York University, and Omicron Chapter, Tufts College, held an informal reunion after the Yale-Tufts game in New Haven, October 25.

Louis Traurig, '22, was on the Hill Friday to attend the smoker. “Lew” is managing one of his father’s stores in Seymour, Conn.

Miss Edith L. Mason attended the Home Economics division of the State Teachers’ Convention at Hartford, Friday, October 24. Luncheon was served by the Domestic Science students of the High School.

Two auditors were on the Hill Friday, October 24, to audit the accounts of the Treasurer, R. L. Longley.
