ATHLETIC ASSOCIATION HOLDS ADVISORY MEETING

MISUNDERSTANDINGS NOW CLEARED UP

Dr. Sinnott, Coach Guyer and Football Manager Manwaring Talk to Students

A meeting of the Athletic Association was called November 10, at eight o'clock by President Mahony on the advice of the Alumni Advisory Board. The purpose of the meeting was to straighten out a few prevalent misunderstandings.

Dr. Sinnott addressed the association on student cooperation with the faculty in athletics. He said that the main purpose of the faculty was to see that the scholastic standing was kept up and this would of course affect the physical condition of the student. But his idea was that an understanding could be reached between the faculty and the students and that the faculty should come a little farther than half way in regard to this matter of support. He ended by saying that the students should set aside class ties, fraternity ties and selfish aims and work for one thing, the advancement of the college.

Mr. Guyer remarked on the conditions he had to face as regards equipment and material for a football team. He stated that he was hired as Supervisor of Athletics and it was not his business to coach the varsity team but that he had given over a large proportion of his time to help back the team and thereby was saving the Athletic Association the expense of another coach. He will probably coach basketball and it is his desire to have the cooperation of the entire student body.

Mr. Manwaring also spoke a few words on the football schedule and the Rhode Island game. The meeting closed with a few songs and cheers led by the college cheer leaders.

MANSFIELD GRANGE CONFERS DEGREES

Mansfield Grange, No. 69, P. of H., held its November meeting last Monday evening. First and second degrees were conferred on Mrs. J. B. Pritchard, Walter F. Wood and Vernon C. D. Pinkham.

George Frasier reported for the committee of five on the proposed community center for the religious life of the Community. The plans for organizing a union church at Storrs and for securing a new church and building to be the center for the religious life of the community are being developed rapidly. Representatives of all the several interests in the community, recognizing a common need for a more satisfying religious life, are working together in a spirit and with an unanimity of purpose that makes for optimism and faith in the outcome.

The trustees of the college, at a recent meeting, after a discussion that showed their deep interest in the movement, adopted the following resolutions:

Resolved that the Trustees heartily endorse the Board's endeavor to provide at Storrs opportunities for non-sectarian religious services and the development of activities that shall make possible a more satisfying religious life for all members of the community.

The Trustees suggest that the building to be devoted to religious and social service purposes should have a significant place in the College group of buildings.

The special committees believe that religious and social service work should form a vital and significant part of the student life at Storrs and that this Board should consider such work in every possible way.

The special committees appointed to consider several of the more obvious problems to be met, reported their findings at a recent meeting of the Committee of Fifteen. These reports were so favorable to the plan, and so constructive in character, that the committee decided to call a meeting of all those interested in the near future, to consider the reports and discuss the most desirable next steps.

This meeting will be held in Room 7, Main Building, Sunday Evening, November 23, at 7:30 P. M. Everyone of the community is invited to be present and take part in the meeting that any action taken may really represent the thought and wishes of the community.

The center of life at Storrs is the student body and the center about which the suggested plan is developed is the needs and interests of the students, not merely in this generation but so far as we can sense them, for the many generation to come. It is hoped, therefore, that

UNION CHURCH PROJECT IS DEVELOPING RAPIDLY

TRUSTEES ENDORSE AND SUPPORT PLAN

"Committee of Fifteen" Will Report to Community Meeting on November 23

The plans for organizing a union church at Storrs and for securing a new church and building to be the center for the religious life of the community are being developed rapidly. Representatives of all the several interests in the community, recognizing a common need for a more satisfying religious life, are working together in a spirit and with an unanimity of purpose that makes for optimism and faith in the outcome.

The trustees of the college, at a recent meeting, after a discussion that showed their deep interest in the movement, adopted the following resolutions:

Resolved that the Trustees heartily endorse the Board's endeavor to provide at Storrs opportunities for non-sectarian religious services and the development of activities that shall make possible a more satisfying religious life for all members of the community.

The Trustees suggest that the building to be devoted to religious and social service purposes should have a significant place in the College group of buildings.

The special committees believe that religious and social service work should form a vital and significant part of the student life at Storrs and that this Board should consider such work in every possible way.

The special committees appointed to consider several of the more obvious problems to be met, reported their findings at a recent meeting of the Committee of Fifteen. These reports were so favorable to the plan, and so constructive in character, that the committee decided to call a meeting of all those interested in the near future, to consider the reports and discuss the most desirable next steps.

This meeting will be held in Room 7, Main Building, Sunday Evening, November 23, at 7:30 P. M. Every member of the community is invited to be present and take part in the meeting that any action taken may really represent the thought and wishes of the community.

The center of life at Storrs is the student body and the center about which the suggested plan is developed is the needs and interests of the students, not merely in this generation but so far as we can sense them, for the many generation to come. It is hoped, therefore, that

(Cont. page 2, col. 1)
How General Pershing trained an unruly and poorly disciplined college battalion in to a crack company is vividly portrayed in the September issue of the Red Cross Magazine. The Commander-in-chief was appointed to take charge of the battalion of the University of Nebraska when but a young lieutenant, and he was commissioned. At that time the University’s battalion was in a sorry condition, composed of hardy youngNebraskans, accustomed to freedom and the rough and tumble life and who had never heard of such phenomena as obedience or restraint. To this company came a man, a great, careless, loose-jointed fellow most of whom had never stood straight in their lives or taken care of their personal appearance. But Pershing came to this place and it would have been no wonder if like his predecessors he accepted the literal impossibility of the task.

"By George, I’ve got the finest material in the world,” were the Lieutenant’s words as he for the first time saw his men. "You could do anything with this material if we had it under proper control. Watch me get it out." He did! By the middle of the first winter the school battalion was in shape for the real drill and the students were fondly calling their commander “the lieu.” In no time every man would have followed him to a prairie fire and do it, the training activity in the cards, without a slip while doing it. The battalion was the center of all interest, with pretty co-eds favoring the cadets and parents assessing the latelies’ military qualities. Probably this will not be possible right away, but eventually the college plans to have good specimens of all the breeds, which will bring it more fame than at present in the breeding and show world.

THE HON. PERYCAL WEED STORRS GIRL

Girls Marry Each Other When Usual Forms of Excitement Pall

Excitement was rife at Whitney Hall last Friday evening when about twenty-five young people of Storrs discovered that they were not to attend a business meeting, but a wedding.

Promptly at eight o’clock, Miss Gladys Beebe began the “Bridal March” from “Lochengrin,” upon the victrola. The bride, Miss Muriel Johnson, was given away by her “father” Stimson, to the Hon. Percival Lemos, on the organ, represented by Helen Blake. The ceremony was performed by Miss M. W. McCracken, Miss Helen Bolan as bride’s maid, Miss Alphonsine Plant as father’s home, and Miss Georgia Brown as ring-bearer, were the bride’s attendants.

Alice Larkham acted as usher. The bride wore a gown made of white tulle over satin and carried a bouquet of celery and carrots, from the “Hort Flower Shop.” After the ceremony, a wedding breakfast was served, followed by a reception and dance.

Professor H. F. Judkins, who was instructor in dairy husbandry for several years at this college, is now in the dairy department of the Massachusetts Agricultural College. Professor Judkins left Connecticut in April to take a position in the State College at Ames, Iowa. Now he is back in the dairy section of the country.

ESTENTS ENTERTAIN "ENDEvOR SOCIETY"

Faculty Members Invite Students to Their Home in Order to Become Acquainted

Professor and Mrs. W. M. Esten have started a new plan whereby the Christian Endeavor are invited to their home Sunday evenings immediately after the meeting, to sing and have a sociable time.

One of the main reasons for doing this is to decrease the gulf between students and faculty, thus getting them better acquainted. In this they were well rewarded for a large number attended, many of whom said it was their first visit to a faculty member’s home.

MUNROE COMING

Henry Munroe of ’16, well known on the Hill as “King” Munroe now in the Poultry Extension Service of Ohio State is going to pay us a visit the middle of this month and to be the guest of Prof. D. E. Warner.

Everyone is looking forward to "King’s" visit here as he was one of the most popular fellows who has been on the Hill. King came here in his Sophomore year of college from Rhode Island State and finished his poultry course with honors. He developed into one of the best poultry judges that this college has put out, being asked to help judge many large poultry shows here in the East.

He is now working on the relation of pigmentation to the yearly egg production and its value to the farmers, as a means by which the slackers may be eradicated from the farm flock of layers.

GLEE CLUB ELECTS

Last night Monday afternoon for officers in the Glee Club was held and the following men elected: Paul Mann—Secretary-Treasurer; Harold W. Hamm—Vice-president; Earl Crampton, manager; Philip Dean, treasurer; Charles Van Buren and Walter Wood, assistant managers.

The statement that there was to be a concert given here by the Club on December 18, was a mistake. That date is scheduled for a concert in Williamstown and the first one to be given here will probably come some time during the first part of the second semester.

CHURCH NOTICES

Morning Service, 10:45 at the Church on the Campus.

Rev. George Gilbert of Middletown, whom many of the students have heard speak at College Assembly, will supply the pulpit.

Sunday School will meet as usual directly after the morning service.

Vesper Service at 4:45 in the afternoon, speaker unannounced.

(Cont. from page 1, col. 2)

there may be a large representation of the non-fraternity men on the Hill, explaining briefly the purpose and aims of the Club, and emphasizing the need for a great percent of students to represent adequately the non-fraternity men in college affairs. The next speaker was H. H. Boas, who told what had been done in the way of obtaining a room for the Club and what the prospects were at present. J. P. Bishop, a member of the committee, presented the financial program which the committee had formulated, and assured the men present that little difficulty would be experienced in financing the project.

Following this, the Constitution of the organization was read by the Secretary, W. D. opposite the organization may prove to increase the number of students interested in such an organization to represent the non-fraternity men of this college.

There shall be no rushing or initiation of any kind.

Any member may be dropped upon three-fourths ratification of the membership.

Much enthusiasm was shown by those present in an open discussion which followed the reading of the Constitution. The members of this Club hope to take in practically all of the non-fraternity men of the College. With the increase in numbers of college men who do not go to any fraternity from year to year, this organization may prove to increase the influence of the non-fraternity men on the Hill.
SQUARE AND COMPASS
 REPRESENTED AT COLLEGE

STATE GRAND MASTER
 ADDRESSES ASSEMBLY

Wallace Moyle, of New Haven, Grand Master of the Masonic Order in Connecticut gave a very interesting talk at college assembly on October 5. He opened his address by telling how glad he was to be able to speak to students, saying that he is very much interested in the work of the college.

Referring to Athletics, Mr. Moyle told of his own experiences in "prep" school and college days. He attributed the advantages to be gained by those who participate in athletics, to the lessons they learn in playing fair and in team work. In this connection he spoke touchingly of Gardner Dow, whom he knew personally.

He further stated that these lessons were of great importance to the young men of today, as they are to be the ones who will have to solve the problems of the near future. He impressed on the young men the great lessons they learn in playing fair and in team work. He further stated that these lessons were of great importance to the young men of today, as they are to be the ones who will have to solve the problems of the near future. He impressed on the young men the great lessons they learn in playing fair and in team work.

Wednesday evening, November 5, the guests for dinner were: H. A. Hopwood, H. H. Gleason, C. R. Prescott, C. C. Maier, A. M. Mitchell, L. A. Alexander and H. E. Maguire. Louis and Mac were the last ones in so they were a bit conscience stricken. Major Zink May was realized that though he was 'in society' nothing unnatural was happening to him, he began to thaw out. That was when the fun started.

By the time the cream puffs were brought in (cakes and pies are forbidden in training) everybody was in the best of spirits. In fact the crowd felt so full of pep that the team lined up against the dishes. Louis ‘tackled’ the washing; Prescott ‘punted’ dry dishes to Maguire and he ‘passed’ them to the pantry.

No ‘fumbles’ were made so every one adjourned to the living room. Yes, Dutch came down a little on the other knee and danced. Zink forgot his ankle and gave an exhibition dance. All in all the evening was voted a success.

SURPRISE PARTY HELD

In the upstairs apartment, a darkened room with eighteen candles burning on one of the largest cakes seen in Whitney Hall this year, awaited one of the members of the Freshman class. Other members were anxiously waiting to hear the step outside. “Surprise.” Miss Morris was the honored one. The decorations were pink and green. “Eveing” dress was in order. Refreshments and dancing were enjoyed until “lights out.” Music furnished by a banjo mandolin. Those present were the Misses M. Jacobson, M. Morris, E. Dillon, C. Wakeman, K. Schmitt, M. Dunn, E. Wattie and B. Van Yor.

The Connecticut Agricultural College, of us top to realize the advantage of club, we meet few that are not tu­ the surfac , however, it appear hap­ tivity, our only outlet for our excess telation energy.

giv very littl inight into Nature, while we may see it here at every turn cliff thus old a gain every college who to go to class unprepared and joke one another about studying. This is all wrong and something should be done to change the frame of mind of these students.

SMOKING

Every year the question of smoking in the various buildings on the camp­us comes up. There are always an­nouncements made about it during the year. However we are sorry to say, many students do not heed these friendly tips but persist in smoking in the buildings. This is especially true as regards the main building.

We think it is about time that some measure be taken to put a stop to it. It makes a bad impression on visitors and stale tobacco smoke is not en­joyed by everyone, especially the wo­men of the college. Let's show some respect for our College and cut out smoking in the buildings that we are asked.

FOOTBALL PEP

When a hitherto losing football team, after being fed well by its col­lege mates of the fairer sex, goes out and scores an eleven which has not been licked before this year, it shows that it has its pep right with it.

Nothing has quite such an effect on the morale of a group as a little wholesome attention from wo­men, plus a filling of the bread basket. The Y. M. C. A. recognized this in the army, hence their canteen work.

Ex-service men must miss this. Many of our football men are from that class, but they responded nobly to this last week. Here's hoping that this week's rabbit supper will bring back the pig skin from Rhode Island.

HELP ROW THE BOAT

As everyone knows, quite a lot of advertising in college papers is com­plimentary. Those who advertise do it not merely for the increased sales, etc., that they hope to gain from such publicity, but partly from the prin­ciple of the thing. This advertising in college publications and are willing to contribute in that way towards their support. But we will but look carefully thru these columns you will find that a good many, especially students, are taking that way of showing their in­terest in us. These ads, though each one may not be large, in the aggre­gate amount to quite a help in getting out this paper.

How many of you realize that it costs nearly $2,000 to put out the Campuses for a year? That means that every little bit counts.

It is a student publication run and supported by students. Now it is a big job, and to get away with it suc­cessfully means a great honor to the student body. You are paying your subscription, that helps, but if you feel that you would like to do more, here are a few suggestions.

Get the rates from Harry Lock­wood, the advertising manager, and see if you can line up an ad or so. Ask your father, if he is in business, to do so and he may be interested in advertising in our paper.

DO YOU STUDY?

There are a number of students in this class who are away from home and very anxious to get in touch with the students that are at home. They are asking how to get in touch with their college and when they will be home. That means that every little bit counts.

WOMEN'S ORGANIZATION

It is the student's advan­tage to get acquainted with the different paths and byways of this section and to haunt them when at leisure. It is exciting, invigorating and pleasant. Not until the student recognizes and uses to advantage the benefits of his Alma Mater's location will he receive the full benefits of an agricultural education.

WHO ARE COLLEGE MEMBERS?

Dear Editor:

One of the most common remarks made by visitors on the Hill is “When do you fellows dress up?” There is a whole lot in that one sentence. Some students think of the campus with the rabbit day in and day out; in fact I would not be surprised if a few of them forget to take it off before they “turn in.”

It is always the same ones, and there are a few of them who may be given slight consideration because of their financial condition. However, in most instances, it is simply a matter of careless­ness and neglect. Be­cause we are away from civilization somewhat is no plausible excuse for this careless­ness, and if we all stop to think of the effect sloppy dressing has on our morale, I believe we would pick up a bit. “Fellows, “If the coat fits you, put it on.”--Kuppenheimer.

SAVE WATER

To the Editor:

Few students realize the extent of the crisis we have arrived at in our water supply. Should a fire start in any of the frame buildings we would hardly be able to get it under control. How many of our football men are from the Rhode Island College the women feel that if we all put a stop to it should a fire break out in one of the frame buildings besides the cost of the water supply. Should a fire start in why not say so, instead of taking it we w ould for granted that men and women students are eligible.

Will someone who knows clear up the matter? If men students are meant why not say so, instead of taking it for granted that men are the only students here, especially in a group that is equalled or out-classed in numbers by the women?

(Signed) W.S.G.A.

RING FOR VICTORY

Since July 8, the Main Bldg. bell and the central heating plant whistle have not sounded simultaneously until No­ember 8, for four months afterward. This latter occasion was to celebrate the victory over Boston University in football and was intended to in­spire joy to all those who heard it. It struck terror to the hearts of some, however, who during the past sum­mer had learned to run that sound as a signal of “fire” and “although they knew perfectly well its message, they were not informed of the fact before this. If, however, you ignore the fact that the fire alarm is not sounded, you are taking advantage of the fact that the fire alarm is not sounded.

(Signed) Ferret.

"You ever have your meal ticket "punched"?

Hildring—"Chow, bud, chow!"

Dutch Maier has decided to stop using his tongue as a "shock absorber" when he's riding on the rear end of the college truck.

The animal husbandry class were dumdounded when they were over at Mansfield Depot and found a "red squirrel" among the horses they were to judge.

Do you fellows mean to say that you never saw a red squirrel and this is Markham's second year up here?

The average woman would a good deal rather be disappointed in love than be disappointed in marriage.

When a man disappears, people wonder whether he ran away with a woman or from one. It's generally both.

**TRICK SOLDIER**—"I'll say this for the Great War."

Gob—"What?"

"It only lasted about two months after the S. A. T. C. started."

**FATHER** knows what athletic sports are, because he is maintaining one at college.

The football manager has more assistants and less assistance than any man in the world.

**JUNIORS DEFEAT SCHOOL OF AG.**

On Monday afternoon the class of 1921 played their final game of the season against the School of Ag., and were victorious by the score of 12-7. This was the first victory for the Juniors, they having been formerly held to a 0-0 score by the Freshmen and were defeated by the Sophomores 7-0.

The star play of the game was the intercepting of a forward pass by Bendokas and a forty yard run for a touchdown. He also kicked the goal, making the score 7-0 in favor of the school. The score remained unchanged until the last minute of play when the Juniors put over their winning touchdown. The work of Quig for the Juniors and of Bendokas for the School of Ag. featured.

**HORTICULTURE**

The Department of Pomology is sending a team to enter the New England Fruit Show at Providence. The last contest was held at Boston about four years ago and it has seemed best to revive the custom of having a student judging contest. The Rules and Regulations call for a team of five, but this is being waived and a team of three will be entered. The team from Connecticut Agricultural College will be represented by the seniors in Pomology, Messrs. Bridges, Mahoney and Osborn. This contest will take place on Wednesday, November 12th.

Three students will be at Providence to assist in setting up the Connecticut exhibit. The Connecticut exhibit will consist of two hundred and fifty flats in a solid bank five boxes high, and fifty feet long. At the end of this exhibit will be a special display of fruit in boxes, baskets and other packages.

The classes in Pomology have been using their laboratory periods the past week protecting the fruit trees from mice. Already some damage has been noticed. A new preparation is being tried out consisting of commercial lime sulphur solution thickened with slacked lime. The grass and rubbish are cleaned away from the base of the tree and the above mentioned material is applied to the base of the tree for a distance of several inches. Paper, wire guards, and banking with soil are also used in connection with the lime sulphur paint.

**SENIORS JUDGE FRUIT**

The Connecticut Agricultural College was well represented at the New England Fruit Show which was held from November 11th to 13th in Providence, Rhode Island.

Harold Bridges, '20, Morris Downs, '21 and William Poole, '21, left for Providence on Sunday and under the direction of Professor Sherman Hollister of the Horticultural Department set up the college exhibit of the fruit entered by Connecticut Pomological Society and the college cooperating.

M. L. Osborn, '20; Harold Bridges, '20; and F. J. Mahoney, '20, formed the judging team which competed against Massachusetts Agricultural College.

On Wednesday, November 5, Storrs had the first taste of winter in the shape of a snow flurry. The weather man probably figured that we needed a change from the rain which has flooded the place lately. Since the snowstorm, the old north wind has blown pretty keenly at times and the hockey players are all polishing up the steel runners in anticipation of the fun on Swan Lake coming later.

The screens have been removed from the various windows during the week end, in some places being replaced by storm windows. If such a winter comes as visited us the year before last, we will be prepared for it.

The Commandant said "Cover off" the other day and what did a Freshman do but take off his hat! Free trip to Leavenworth.

**SIMPILITY**

Simplicity in cream separator construction avoids waste and makes possible quick and easy handling of milk.

The De Laval Cream Separator is remarkably simple. Thousands of De Lavals are run and cleaned by children every day.

This simplicity means long life and freedom from repairs, and is the outcome of over forty years of unquestioned leadership in cream separator inventing, developing and perfecting.

Every part has been developed to its highest degree of simplicity coupled with efficiency and the De Laval has earned for itself the name of being "the world's standard separator."

More De Lavals are in use than of all other makes combined.

See the local De Laval agent, or, if you don't know him, write to the nearest De Laval office as below.

THE J. B. FORD Co., Sole Mfrs.

WYANDOTTE, MICH.
ARMISTICE DAY CELEBRATED

The Anniversary of Armistice Day was celebrated at Storrs by tolling of the bells, beginning at 11:00 A.M. and lasting half an hour, suspension of classes in the afternoon, and an address in Halsey Armory at 3:00 P.M. and a bonfire and dance in the evening.

Rev. MacCready of Willimantic made the address of the afternoon, in which he paid fitting tribute to the Connecticut men who gave their lives for the cause.

All ec-service men were asked to come in uniform and were escorted by the college R. O. T. C. The college orchestra furnished music for "America" and "The Star Spangled Banner," the selections used.

After the service the companies fell out and all fell its available parade ground and marched from there to the place where they were to lay the bugle in.

At 7:30 P.M. the fire was lighted and was enjoyed for about an hour. After that everyone adjourned to Halsey Armory where dancing was in order until 10:30. Miss E. L. Mason and Miss E. J. Rose were the patronesses of the evening.

The affair was in charge of the American Legion. During the evening pictures were flashed on the screen that were taken of different features of the celebration on Armistice Day last year.

CHORUS

The Choir is practicing on Christmas music besides its regular weekly work. Rehearsals are held Wednesday day evening at 7:00 and Sunday morning at 10:00. G. S. Torrey, the leader, is anxious to have any women who would like to sing and are willing to attend faithfully to rehearsals, come to the church next Wednesday evening, when he can get tenors and basses to balance them.

DRAMATIC CLUB

At a meeting held on Wednesday, November 12, it was decided to post- pone the speech which was to have been given then for the entertainment of the club members.

Posters will soon be up for "The Tyranny of Tears," and tickets will be on sale very shortly. The cast is spending all its available time on rehearsals, which have been interrupted only by the necessity for Miss Wallace the coach to be absent for short periods of time for treatment on her eye, which has been giving her some trouble of late.

Effort is being made to have the footlight fender straightened and painted, and the front curtain cleaned before the presentation of the play.

The organization of the New National Dramatic Fraternity has arrived and a committee is looking into proposals for changes and will present their recommendations to the club before long.

Manager Webb is very busy these days getting ready for November 24. The cast will be picked and work begin on the next play just as soon as time will permit.

SHAKESPEAREAN CLUB

Everett Mitchell, '13, and his wife attended the football game on the Hill last Saturday.

First Lieutenant J. H. Hildrindg '18 is still commanding Co. E. 88th Regular Infantry, Camp Pike, Arkansas.

"Pinkie" Stretch '16, G. D. Wiegert '18 and Herbert Hallcock spent the week end on the Hill.

Selection of Freshmen will take place November 14th and 15th.

E. D. Blevins, who has been home on account of poor health, is back in classes once more.

ETA LAMBDA SIGMA

Captain James A. Geehan, '10, U. S. Army has resigned his commission and is now managing the Hub Clothing Store of Boston, Massachusetts.

He has owned this business since 1914.

Professor J. Herbert Wood, '13, department of poultry, University of Georgia spent the first week of this month with Archie M. Piper, '09, manager of the Georgia Paper Shell Paper Co., Albany, Georgia.

Walter Eaton, '11, has just been released as a member of Co. C, New- ton Constabulary of the Massachu­setts State Guard with whom he has been doing police duty in Boston. He will continue his business as landscape architect in Auburndale, Mass.

"Pup" Eaton, ex-'22, has joined the Theta Delta Chi Fraternity at Dart­mouth College where he is a student this year.

Walter Clark, '18, has returned to the Hill to take a position with the Extension Department.

Thomas Beich,'18, has returned east from Detroit to accept a position as sales manager for the Goodrich Rubber Co., of Boston. While in De­troit he attended the Goodrich School of Management.

C. Dewey Knott, ex-'21, has accepted a position in the Engineering Department of the Eastern Bridge and Construction Co., of Worcester, Mass. Harry Hanks, '12, James Goodrich, ex-'20, and Earnest Carpenter, ex-'21, were on the Hill over the week end of November 2.

Alfred F. Aulick, '15, formerly gardener supervisor, Stamford, Connect­icut, has taken a position as Clear Spring, Maryland, teaching agricul­ture and coaching football in a high school. He is also managing a large farm in the outskirts of the city in addition to his high school work.

HOME ECONOMICS

Last week Friday Miss E. L. Mason took the Elmira College Class in textiles to South Manchester on a trip through the Cheney Silk Mills. Frances Bris­tof accompanied them and while there visited Miss C. E. Binton who was a student here last year.

Mary Dwyer and Doris Linton spent Saturday in Hartford.

Another visit was made to South Manchester, Conn. for its textile schools.

The Junior Girls in Practice House gave a rabbit supper to the second division of football men on Tuesday evening.

SIGMA ALPHI PI

At the annual initiation the following men were admitted to the Frater­nity: Elwin George Gifford, Albion, New Hampshire; Herbert Ben­nott, Milton Sherman Bindless, Walnut Paige Clarke, Ralph Eimore Collins, Norman Philip Dick­erson, Storrs; Edgar D. Dodge, Carl Ocran- car Dossin, Clarence Erwin Franklin, Franklin Floyd Gates, Robert Russell Keeler, Paul Lamont Frederick Liley, Robert A. Loomis and Thomas Neumann, Charles Henry Stocking, and Clarence Allyn Vaill.

Among the Alumni to return for the initiation were Walter Smith, '17, Sidney Edwards, '18, Harold Schwenk, '16, Vincent Randall, ex-'20, and Robert Matte ex-'20.

Summer D. Hollis, '16, is now a County Agent in Rhode Island, being stationed at Newport.

PHI MU DELTA

The fraternity held its initiation on Friday and Saturday, November 7th and 8th. Things started Friday night when the candidates entered the dining hall wearing their outfits of overalls, straw hats and black sashes with the Greek letters of Phi Mu Delta on them. After supper the members of the fraternity took the initiates to Hartford to see a show. Before the show the candidates paraded up and down Main Street just to pass the time away. The members of the fraternity sat in a group in the orchestra circle at the show.

During intermission, Brandt and Lovett gave a musical selection on the street. Brandt said that it would have been perfect only if a big cap had been for his license. Mannix measured the distance from the curb of an intersecting street to the opposite curb with a foot rule. Everyone then returned to the show.

After the show the initiatives started another parade down main street. They took six steps forward and three backward until they got to Asylum Street. Here they were placed on various hydrants and ash cans and were allowed to tell the people their names and what they thought of themselves. Soon after the party broke up and started back to Storrs.

Saturday night the formal initia­tions was held in the Chapter Room. After the ceremony ice cream and cookies were served. Those initiated were: C. Brandt, last Saturday the girls found they had saved so much money from their household budget that they took a week-end trip on the surplus. Vera C. Bowditch, Mary B. Densley, Dorothea M. McAvoy and Salome C. Smith. spent the time in Hartford and Anna M. Larsen went to Greenwich.

Many Beeghly spent last week-end in Hartford the guest of Mable Bennet.
The Department is planning to remove the feed from the judging pavilion to the barn on the poultry farm in the near future. This will make the pavilion available for judging classes.

The senior Holstein herd sire, King Sogis Inksa Fayne, has recently been sold for beef. He will be replaced by Dodge Farm Fareso Bernie Del Kal. The creamery this year is being run on a reduced basis, and students are working practically all the work that was done until this year by a man hired to take care of that end of the dairy.

The increased number of students here, the dining hall uses nearly all the milk that is handled by the creamery. About 300 quarts a day go to the dining hall and the dairy is not attempting to produce or buy much more than this. Aside from the increase in the orders from the dining hall the use of college milk has been reduced more than one third of what it has been, due to the supply brought in to the faculty houses by another milkman.

The creamery now, as the milk supply is too short, and all students and residents miss their delicacy very much, for the best grade of ice cream has always been obtainable at certain times in the creamery. All orders for the frozen sweet are now filled by B. C. Hall of Merrow.

All the pasteurizing, separating, washing, butter making, testing and other work is being done by students, with Harry Lockwood, '20, in charge. Professor G. C. Fisher is nominally in charge of the department and takes care of the bookwork and most of the classwork, but Lockwood frequently instructs the classes in practical work connected with the creamery.

Professor G. C. White and Professor Fisher are forming an association of about fifteen farmers to be called the Tolland County Cow Testing Association. They will employ two students to go out each week and to test each of these farmers and to give them the benefit of the things they have learned while studying dairy conditions under the supervision of the dairy department of the college.

Another valuable addition to the dairy herd was made last Tuesday by the arrival of Golden Maid's Emperor. This Jersey bull, loaned to the college by Colonel A. V. Barnes, is a two-year-old, sired by Fauvics Prince, sire of most of Colonel Barnes' famous herd.

Fauvics Prince took first prize in the aged bull class at the Eastern States Exposition at Springfield and also took first prize at the National Dairy Show. Trinity Empress, dam of Golden Maid's Emperor, bred on lines similar to those of Fauvics Prince, produced 10,772 pounds of milk and 586 pounds of butter while under a year's test, during which she was handicapped for several days by a severe sickness.

Professor G. C. White says that this new member will aid in making our herd more widely known in this section of the country.

The College Barber
A new method of testing milk in a far more simple way was stumbled on, as many discoveries are, by Prof. W. M. Esten of the Bacteriology Department of the Connecticut Agricultural College. He was testing different cows milk for the variation of milk solids and he found they varied as the butterfat did in a direct correlation to each other.

In looking over his data he found that the sodium hydroxide titre varied directly as did the butterfat in fresh milk, not only directly but accurately. So he saw that if this relation be true it would be a far more simple method in testing milk. He then began to test different cows and breeds by both methods, proving the accuracy of the test. The statistics showed that the sodium hydroxide titre ranged in the college herd from .075 to .24. The Holstein breed averaged .16 and that of the Jersey breed was .18, the average of the whole herd being .17, thus showing that the butterfat in the Jersey breed is higher than that of the Holstein by the difference of amount of sodium hydroxide titre.

This method works as accurately if the animal is sick, for a sick cow was tested and it was found that she tested .11, proportional to the amount of butterfat proven by the Babcock test.

This method has not been worked out far enough to satisfy the authorities, but is further being tested and if the results are favorable it will be published, and the dairymen will enjoy a new and simple method for testing milk. For the apparatus consists of one bottle of 1:10 solution of NaOH, one burette, one white cup and a stirrer.

Professor R. C. Fisher of the Dairy Department and M. E. Syrargue and Miss Dorothy Buckley of the Extension Service recently attended the Milk Conference in the State Auditorium at Boston. The main subject under discussion was the indispensability of milk in the human diet. A chart is to be made showing the relations of NaOH to the per cent of butter fat from the lowest to the highest. The simplicity of this method is shown here: take a sample of milk, 20 C.C.; put it in the white cup, adding a few drops of the phenolphthalein, then running enough NaOH out of the burette to neutralize the solution. Taking the amount of NaOH used and multiplying that by .0059, the neutralizing power of one c.c., and dividing that by the amount of milk used, gives the per cent of sodium hydroxide titre in the milk which is directly related to a certain per cent of butter fat; this table of direct relations of butter fat to the titre will be published when the experiment is satisfactorily worked out. So it is hoped that before spring this new and simpler method of testing milk will be published for the benefit of the public.

Dry Goods and Groceries

Our Motto: To give our customers the very best goods and to make the prices as low as is consistent with good quality.

H. V. BEEBE
Storrs, Conn.

PHONE 599-4

STEAM CARPET CLEANING
and Rough Dry Family Washing, as well as our famous Shirt and Collar Wash, is sure to please. Prices right.
