HOME TEAM GOES DOWN
BEFORE KINGSTON FIVE

AGGIES LOSE HARD
TO R. L. ENGINEERS

Fast and Rough Playing Under Incompetent Referee Characterizes Game

The speedy Aggie five lost for a second time this year in Kingston by the score of 59-55. It required all of Rhode Island's old stalls to do it. Every year the official referee that Rhode Island has hired finds it impossible to get there so a substitute referee has to be used. They got away with it again this year. Next year there may be a clause in the contract to the effect that there will be no game unless a satisfactory official is one the floor to handle the contest.

The game was extremely fast and rough, fist encounters holding the attention of the audience to a considerable degree, while Rhode Island possessed a price roster in the gallery whose actions and remarks were sufficient to cause the Rhode Island coach to send a man to our coach to apologize for him.

Molloy and Murphy proved to be excellent football players for the engineers and had the science of tackling and tackling down to a science. The degree of perfection that Lockwood and Alexander were unable to get in their usual speedy passing and clever shooting. Molloy also proved to have a wicked eye for the hoop, however, and tossed in 15 out of Rhode Island's 29 points. The first half ended with the score 16 to 12 in favor of the home team and they managed to widen the breach by two points in the last half.

CHURCH NOTICES

There will be the usual Vesper Service in the church on the campus at 4:45 P. M. Sunday, February 1st. H. J. Baker will be the speaker.

The usual Christian Endeavor meeting will be held at 6:45 Sunday evening. The leader is announced, but the meeting is planned to be as interesting as any that has been held in the past and anybody is welcome to come.

RESULTS OF THE INTER-COLLEGIATE REFERENDUM

- Out of 410 colleges and universities all over the country, 139,788 votes were cast.
- Opposition to treaty in any form, 13,033.
- Ratification of treaty without reservations, 48,322.
- Ratification with Lodge Reservations, 27,970.
- Ratification with a compromise between Lodge and Hitchcock Reservations, 49,653.

FIRE DEMOLISHES STUDENTS' ROOM

J. P. Johnson Overcome by Smoke While Fighting Flames

On Thursday afternoon shortly after one o'clock, much excitement and commotion was caused by a fire in the fourth section of Storr's Hall. At the time of writing the origin of the fire was unknown.

It started in Room 52, which is occupied by Woodworth, a School of Ag. Student and others whose names were not learned. Due to the prompt and efficient work of students the fire was confined to the one room but practically everything in the room was lost.

J. P. Johnson was overcome by smoke, which put him in a rather serious condition for some time.

This is the second fire to occur in Storr's Hall in the memory of some of the present students. The other burned out the college Shakespearean Club Room in the basement of the first section some three years ago.

The building, being of brick and concrete construction, is not as hard to control fire in as some of the wooden structures and doubtless this fact saved the building in both these cases.

EXCHANGES

By a vote of 856 to 841, Yale undergraduates favored the discontinuance of the Yale song, "Bright College Years," which has been sung by Yale men for decades to the tune of "Die Wacht am Rheine." Therefore the Student Council has decided that the song will not be sung in the future at undergraduate gatherings.

Of the 5,000 Princeton men who served in the late war, 3,600 became officers, including four Brigadier Generals, 230 were decorated for bravery, and 137 were killed.

Enter a judging contest at the "Ag" Club Fair and win a medal.

WOMEN'S VARSITY TEAM WINS IN BASKETBALL

PROVES TOO SPEEDY FOR VISITING TEAM

Columbian Club Unable to Score A Single Point

The women's varsity team of Connecticut Agricultural College completely blanked the Columbia College girls of New Haven on Hawley Armory floor, Saturday night, January 24.

The size of the floor and height of the baskets apparently bewildered the visitors and the home team did such lively passing around them that they seemed unable to collect their wits and settle down to playing the game.

A score of some fifty odd was piled up by the "red caps" before the last whistle blew and even at that many good trial shots were missed. Numerous fouls were called by referee Hopwood on both sides and Miss Wakeham's unmindful of these good played no small part in running up the score for the home team.

The excellent work of Connecticut's guards broke up many a would-be chance to shoot at the visiting team. Splendid team work and the ability to cover the floor and arrive at the critical moment at the same time the ball did, characterized Connecticut's playing.

As an exhibition of practice work it would have been fine but it was too one-sided to make an exceptionally interesting game to onlookers. In the middle of the second half the entire home team was replaced by subs and still the game went on much as before.

Miss Jacobson succeeded Miss Wakeham in shooting fouls to a remarkable degree and thus added several more points to the already high score.

The Columbia Club secured this game with the home team through the efforts of Helen L. Clark '19, demonstrator at the university, in making these good players.

Miss Clark has some of the girls of the Columbia Club in a cooking class.

With six straight straight wins to their credit their High School girls will try to make it seven by beating the Co-eds of C. A. C. on Saturday evening, January 31, 1920. Will they do it?

The varsity basketball team will play Trinity College at Hartford on February 13, 1920, instead of February 14, as previously scheduled.
PATTERSON CONTRIBUTES TO ROAD ENGINEERING

HAS BRIEF ARTICLE IN "ENGINEERING NEWS"

Irving W. Patterson of the class of 1905 makes a distinct contribution to engineering information in an article on "Why Bituminous Macadam Is Successful in Rhode Island" in a recent issue of the Engineering News-Record. Mr. Patterson who has been for several years chief engineer of the State Board of Public Roads of Rhode Island, a position comparable to that of State Highway Commissioner in Connecticut, summarizes in the article the successful features which he has had with this type of road construction in Rhode Island.

In editorial comment on the article the Engineering News-Record says, "Naturally, the first query will be as to details of construction. Why have the roads been so successful? The question is answered in Mr. Patterson's article. Briefly he accounts for the success under five heads: (1) Very thorough drainage; (2) the use of hard stone; (3) the correct stone of the asphalt for the penetration top; (4) the use of asphalt of low penetration; (5) very thorough rolling, before, during and after the penetration stage.

Mr. Patterson's article bears out again what we all really know but must emphasize constantly—that successful highway work requires scrupulous attention to detail. This is evident, as is evidenced by the excellent attention of its own results which Rhode Island has achieved.

"Five reasons are given why the work has been so successful. Mr. Patterson has emphasized that drainage is the most important of these. Experienced road builders will thoroughly agree with him. But Mr. Patterson's emphasis is not one of mere theory. His article testifies that he takes scrupulous care of the drainage, while the evidence given by the roads themselves affords full and final proof. In the section on drainage Mr. Patterson has written one of the best treatments in American technical literature on highway foundations and drainage. It may well form a text for an inspiration to highway engineers everywhere, even though they are not convinced of the value of penetrable bituminous surface or have conclusions that forbid the use of that type."

In speaking of the same matter, Mr. Patterson himself summarizes a remarkable article, "Our plans of careful design of foundation have proved to be very effective, since we have not as yet noted a single instance of formation of cracks developing after the completion of a road."

After his graduation here in 1905, Mr. Patterson studied engineering at Brown University. While a student there he was employed in the office of the chief engineer of the State Board of Public Roads. Within a very short time after his graduation from Brown he was appointed chief engineer and has served as such with marked success since that time.

Mr. Patterson is a son of Prof. Henry Patterson, formerly of the faculty of the college and is a brother of Mrs. Harry L. Garriga.
LARGEST RELIGIOUS MOVEMENT OF AGE

Inspiration Carried to Student Body by Evans and Thwing

In the Armony Lecture Room, Friday afternoon, Douglas A. Evans, president of the Senior Class, reported on his trip to China, during which he met the college's representative at the Student Volunteer Convention. Mr. Evans very clearly brought before his audience the massiveness and impressive nature of this convention—the largest assembly of educated men ever gathered together for a religious purpose.

At the opening night, many men from every branch of study were assembled under one roof. The chairman's gavel, as it dropped, brought a silence so profound that it seemed a whisper could not be heard in the coliseum. The reverential atmosphere of the opening night was maintained throughout the whole convention. "No delegate," said Mr. Evans, "could fail to be deeply affected by the whole proceedings." Our delegation, led by Bridges, was particularly impressed by the speeches of John R. Mott, and Sherwood Eddy. There seems to be no doubt that some of these men will become present as speakers, and many future great Americans present in the audience.

The fundamental idea of the convention as interpreted by Mr. Evans was the thought of each individual delegate to obtain as much inspiration as possible from the convention and to go back home with that idealism characterizing the conferences. For all the strife of the past and the seeming blackness of the present, the universal brotherhood of man may still become an accomplished fact; "it's coming yet for a' that," as Burns puts it. This was the theme very ably presented by our alumnus, J. B. Thwing of the State Y. M. C. A. Association, who talked after Mr. Evans. Mr. Thwing cited several examples of boys in India and China, who had been taken from the streets, educated by missionaries and started on brilliant careers, in which they have been prominent world figures. The need of continued effort on our own characters was indicated by the speaker. As future leaders, the college men can do greater good if they possess a strong religious foundation. Mr. Thwing spoke convincingly of the great work of the Y. M. C. A. in carrying on such work in America's colleges.

A great need has been felt for some time at Connecticut for such an institution. Mr. Bridges, also of the Senior Class, stated that Y. M. C. A. branches had been recently established here. Mr. Evans and Mr. Bridges intend to further their influence and it is expected that the students will not be slow in furthering this good work at Connecticut.

Y. M. C. A. TO HAVE MEETING ROOM

President States Plans For Increased Influence in Community

Through the efforts of Dr. Sinnott the local Y. M. C. A. has obtained permission to use the room commonly known as the Armony Lecture Room for its headquarters.

The association proposes to fit this room up with comfortable furniture and make it over into a cozy place for social service purposes. Other groups and organizations will be permitted to use and will probably contribute in some measure towards furnishing it.

This room, with its many windows and its spacious fire place is particularly adapted to this purpose. In fact, it is almost a counterpart of the Faculty Club, one of the coziest rooms on the Hill.

The Y. M. C. A. has been working at a disadvantage in not having any of its own and considers itself very fortunate in securing this one.

Harold Bridges, President, states that a campaign is on for increased membership and he expects the association to boom in the near future.

Mr. Bridges finishes college at the end of this semester, thus losing to the association a faithful and able leader. He has full confidence in his successor, Douglas A. Evans, however, and urges the loyal support of all members of this group in carrying out the year's program.

DAWSON PREACHES ON CREATION

Says Much is Lost by not Making Use of This Power

The text of Rev. Dawson's sermon last Sunday was "Creation." He led up to the conclusion that man was in a created state, and he expected the association to boom in the near future.

Harold Bridges, President, states that a campaign is on for increased membership and he expects the association to boom in the near future.

Mr. Bridges finishes college at the end of this semester, thus losing to the association a faithful and able leader. He has full confidence in his successor, Douglas A. Evans, however, and urges the loyal support of all members of this group in carrying out the year's program.

M. S. DEGREE TO BE GRANTED IN FUTURE

TRUSTEES APPROVED PLAN RECENTLY

Graduate Work to be Encouraged in Specialized Departments

The Board of Trustees has recently approved a plan for granting an M. S. degree from this institution. The object of this plan is to enable students to continue advanced study in a special field after graduation. The work would cover a period of not more than one year and in some cases opportunity would be open for graduate students to assist in laboratory work and in that way give them a chance to earn money to aid them in their studies after receiving their B. S. Degree. In case students sought while taking graduate study it would lengthen the period for receiving the degree to two years. This is the method usually used in other institutions.

By taking advantage of this plan students will gain experience teaching and thus be better fitted to take up work in colleges or experiment stations. According to Professor Lamson, who is chairman of the committee on graduate study, he also states that particular emphasis will be laid on the work done on the special problem that is assigned to the graduate student for thesis work and that it is hoped that students who are best fitted specializing in the various departments will avail themselves of this opportunity for advanced study. The plan is approved by the Board of Trustees and is as follows:

"Students who have received a bachelor's degree from a college or high school of high standing may become candidates for the degree of Master of Science. At least one year of resident graduate study is required with a thesis or report, the subject and scope of which is to be approved by the department concerned. No credit is allowed for work done in abridgment of that connected with the preparation of the thesis. During the first month of the year's work, each student must submit his schedule of studies to the Committee on Graduate Study for its approval. A student may elect work in more than one department of study, provided the subjects chosen form a coherent group, but the extra work of the student must be under the direction of a single department."

EXCHANGES

At Rhode Island State College the students who have been in the service will be allowed twenty extra credits for six months' service and forty extra credits for twelve months' service.

"GRABATINES" AGAIN!

There have been fairly definite statements at large which would indicate that the system in the new dining hall will be the same as that formerly in the building. This has already excited much unfavorable comment by the students; but if this system is actually put in place there will surely be a lot more of it.

We will venture to say that there is no one who eats in the dining hall, unless it is the boarding mistress, who is satisfied with the system. Certainly, remarks of visitors show their frank displeasure. We are forgetting that we have always such a thing as a table etiquette.

There will be serious objections put up before the students see a perfectly good dining hall spoiled by having an unsatisfactory system installed.

THE CONNECTICUT CAMPUS

"FINE FEATHERS"

DEAR EDITOR:

Some of us have some respectable looking clothes hanging on the rear hooks in our clothes closets but it is so long since we tried to wear them that many of us have forgotten that such things as suits are usually run around without any collars or ties, with our elbows gazing at the horizon through gaping holes in our sleeves, while our trousers never bared of such a thing as a pressing, and our shoes have long since forgotten that brushes and polish were made to shine shoes with. In fact most of us have traveled around Storrs in a manner that would be disgraceful at home and if our girls back home should happen to see us in this condition a whole lot of us would return to the bachelor stage. Now Storrs is a long ways from Broadway and there is no necessity of being out in fine dress suits every evening for dinner, but at least when we know that there are to be guests, such as a visiting team, etc., on the Hill, at least we might put on a clean collar and tie and look respectable and not give the visitors the idea that we are not doing the work of black woods farmers. Think it over and the next time we have a visiting team here (or other visitors) let's show at least what we can do in some decent clothes. In days that have passed it was a strict rule of the dining hall that no one was allowed to enter without a collar and tie and a coat. Even sweaters were taboo and in the mind of the writer it would be a good thing for us all if this rule were put in force once more.—I.N.S.

"THE CUB" REPLIES

DEAR EDITOR:

As far as illegible papers are concerned no one can blame the teacher for complaining, he is not to be blamed for sending an illegible paper very much worse than listening to a poor lecture.

Very few people steal but we have laws to take care of them. Moreover, very few students cheat and if a professor cannot leave them on their honor during an examination, it is a misfortune which we all realize. But if he wants every student to really understand the expectancy and the precaution of watchfulness in order to cope with the one in a hundred who will cheat.

The Cub's appeal still goes. Instruction is a foundation untold services by excusing deserving students from final examinations.—The "Cub."

H. V. Beebe, the village bookseller of Storrs, has been severely ill as a result of a fall on the ice January 22. He is in a critical condition and his many friends and customers are anxious about him.

The green pig will be exhibited at the "Ag" Club Fair February 20th.

ARE THEY SORE?

Evidently Rhode Island is still smarting under the defeat which we handed her in the football this fall. Our rivals now have a sad lack of sportmanship in their makeup lately. New Hampshire recently cancelled relations with them because of this and the Argus has not all pleased with the treatment received this year and if conditions do not improve a breach may result. It is too bad that after our differences of past years have been smoothed over that our relations could not be a little more friendly.

The policy of returning to Storrs the same night seems to be a hardship on the men especially in the sort of weather we have been having of late and it is hoped that next year's game can be played at night and that the squad will remain in Kingston over night.

SAFETY VALVE

IDEAL PROTECTION

"ONE MORE"

For at least the fifth or sixth time in the past college generation the debating club has been organized and the usual debates between Rhode Island State, Massachusetts Aggie and Connecticut College have resumed if the organization is to be believed. It certainly would be mighty fine to have a good debating club which would be permanent as well as useful. Prof. R. H. Vining, provided he maintains more interest than others who have been in the position, and he undoubtedly will, can be of great help in forming a society which will stand the gaff of time.

As regards the debating clubs are more fortunate than the Glee Club, for at least they have a truly interested advisor. But in another regard they are sadly at a loss; they have too few upperclassmen, as has always been the case in past debating societies. The best days of the best debating clubs were back in 1917 when at time many Juniors and Seniors held a lively interest in debating. If such a condition can again be maintained about, the future of the new society will seem very likely, and there is no reason to believe that all of the upperclassmen are "bunk lizards" or too interested in other activities to attach themselves to the debating society.

Mr. Shulman always had an active interest in debating since his freshman year, and he should make a wise president to guide the infant organization. Moreover, if he is able to awaken interest among some of his classmates and one or two Seniors, he will practically have guaranteed the success of the long-lived debating society.

J. N. S. speaks of returning to the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "bachelor stage" as the "balt...
TO ADD NEW MEMBERS IN SECOND SEMESTER

GAMMA CHI EPSILON HONORARY FRATERNITY

Scholarship, Morals and Student Activities Promotes by Faculty and Students

Since 1917, there has been an honorary fraternity, Gamma Chi Epsilon, at the Connecticut Agricultural College for the purpose of promoting scholastic standing, participation in college activities and moral character. In order that a man may be elected to this fraternity, he must stand among the upper one-fourth of his class in scholarship at the end of the fifth semester, he must participate in an activity of the fraternity, and must also be of high moral character.

The fraternity was founded early in 1917 by three members of the faculty—President Charles L. Beach and Professors H. R. Monteith and H. F. Dunham. The latter is no longer an instructor at the college and Doctor H. D. Newton is now the third faculty member. Five members of the Class of 1917, who were the second and five members of the Class of 1918 were voted into the fraternity. These members and their classes are as follows: Class of 1917-J. R. Kilbride, J. H. Norton, W. D. Shea, A. B. Watson and A. H. Weidlich; Class of 1918- T. H. Birch, J. H. Halsey, R. B. Morse, L. P. Sanford and F. B. Thomson. These men were the first active members of the fraternity.

The other active members of the fraternity by classes are: Class of 1919-L. C. Crosby, C. R. Brock, E. R. Moore and A. C. Mallett; Class of 1920—F. A. Bauer, R. F. Bolin, F. W. Wooding and H. W. Wright.

The process by which men are elected to the fraternity is efficient and considerate. At a meeting of both faculty and active members, on the second Tuesday of the second semester, the secretary of the faculty submits a list of the members of the Junior Class, who have the highest scholastic average for their college course; this list consists of not more than one-fourth of the total membership of the Junior Class. The men, whose names appear on this list, are considered by the Fraternity with a view to accepting them as members.

The points considered are the man's character and his participation in college activities. If he is found lacking in one or both of these considerations, it is simply because he possesses the necessary qualities. The members are then voted on by ballouf by members of the fraternity. A unanimous vote is necessary for an election. No more than the upper one and five per cent of the Junior Class is considered eligible for this election. As soon as there are a sufficient number of members in the fraternity, Gamma Chi Epsilon hopes to join Alpha Zeta—a well established national honorary fraternity.

FIGURES SUBMITTED TO BOARD OF FINANCE

College Worth Nearly a Million and a Half

In the recent report given to the State Board of Finance, which was due June 50, 1919, but not handed in until recently due to the rushed conditions, the following statements were given:

The college owns 1,506 acres of land. This includes the Gilbert Farm at Georgetown, Conn., Experiment and Extension Station land and the land, at Storrs. The valuation is represented as follows:

Total number of buildings 204 ............ $1,155,400.00

This includes barns, dorms, dwelling houses, ice houses, garages and miscellaneous buildings

Seawage and Water systems 62,953.00

Wagons, carriages and motor trucks 4,000.00

This does not include the new truck purchased this fall

Live Stock 50,561.00

Horses, oxen, cows, swine, sheep, poultry and bees

Estimated value of merchandise 185,794.77

Tools, appliances, furniture, equipment, drugs, etc.

Total ............ $1,458,737.77

TEXT BOOK ORDERS

Since registration, lists of books necessary for the courses of next semester have been posted and the College Book Store has taken order for them. This was advised so that the second semester might be started with a little confusion and delay as possible. A note from the Book Store management to the Campus states that "on Tuesday evening, January 27, orders were telegraphed to seventeen book publishers covering a total of 672 books. This total is made up of 47 different texts."

As one interested party said, there might have been a lot more orders put in for books if we were all sure of passing the examinations for the first semester, but who wants to gamble in futures?

THE STAMP OF APPROVAL

placed by the Agricultural Colleges of the United States and Canada upon

is a convincing testimonial to its unequalled ability to maintain wholesome, sweet and sanitary cleanliness in all departments of dairy production. Wyandotte Dairymen's Cleaner and Cleanser not only cleans, but cleans thoroughly, quickly and clean. Its use applies to milking machines, separators, cans and general dairy equipment. Moreover, being free from caustic, lime, or any soapy or greasy ingredient it rinses easily, leaving no film to affect the quality of the milk product.

SENIORS VS. JUNIORS

The Seniors added another victory to this list Monday evening when they triumphed over the Junior five by a 14-12 score.

The game started well and the Seniors were soon in lead of their opponents. Then the Juniors tightened up and the score remained nearly even until the last five minutes when the Seniors added two more points to their list.

Until the last few minutes Beverlin and Osborne ran free on the floor and took the ball at will. Then the Seniors changed tactics and much to the surprise of the audience, had their opponents rather tough. This was soon stopped by the referee's whistle and the game ended 14-12 in favor of the Seniors. This was undoubtedly the hardest played interclass game this season and was a good evidence of the keen rivalry in sports which exists between the classes.

The line-up was:

Seniors
Hopwood RF
Osborn LF
Upsham LF
Glessen C
Mahoney RG
Moore LG

Juniors

Buckley RF
Wallace LF
Johnson C
Blevins RG
Alexander LG

FRESHMEN VS. SCHOOL

Monday night the Freshmen won from the School of Ag. for the second time this season by a score of 10-3. The game was called by Referee Putnam directly after the Senior-Junior tug-of-war and both teams started in fine form. Captain Mullen's men showed the spectators how basketball should be played and their excellent teamwork was the feature of the game.

The School's team played a hard clean game but were handicapped by the absence of Blanchard and Rickets two of their best players. Schott and Trost worked together well but did not have their eyes on the basket.

Near the end of the game the Freshmen second team replaced those who had started the game.

The line-up is as follows:

Freshmen School
Buckley RF
Trost LF
Mullen LF
Schott C
Deane C
Bristol L
Lilley LG
Sheege L
Daly RG
Bendikas LG

ALPHA PHI

Barton Callahan '18 was a visitor on the last week end. "Butch" is in the employ of the Brooks Corp., bond and stock dealers of New York.

Herbert Beisiegel '22 and E. Selden Clark '21 went with the Blackguards, who gave a minstrel show in Norwich. Joseph Crawford '18 of New Canaan died January 23, 1920. He was buried January 26 and he leaves a host of friends who were his classmates on the Hill.

George J. MacDermott '22 was called home Sunday, January 25, because of the sudden death of his mother. After attending his sad duties George expects to return to take his exams.

DAIRY

Edward Benson of Milwaukee, Wisconsin, was the week end guest of H. A. Holbrook. During his visit Mr. Benson made several trips through the various departments.

Miss B. Gluck, stenographer in the Creamery Department and Miss Lola Standish, a C. A. C., are confined to their homes by severe colds.

W. A. Rhea has left Storrs and gone to his home town, Pierce City, Missouri. Mr. Rhea intends to enter the banking business in that place.

A bulletin on the Feeding and Management of Young Dairy Cattle has just been issued by the Dairy Extension Department. The bulletin is written by W. A. Rhea. It takes the care and treatment of growing calves, the various amounts and kinds of feed and skim milk substitutes. It also tells of the common diseases and parasites that effect the calves while young and gives a detailed account of the care of the calf from birth until six months old until bred.

A chart in the bulletin shows the normal growth of Holstein and Jersey heifers at each month of age up to maturity.

This is one of the most practical and instructive bulletins which has been issued by the Extension Department this year and it should be of value not only to the farmer and dairyman but also to the student.

R. W. Brown, herdsman, and G. Gittler, assistant herdsman, have both been ill for the past week.

H. A. Holbrook has recovered from his illness and is back once more at his position in the Creamery.

Leroy M. Chapman, of the Extension Service, returned last Monday from Wyome, Maine, where he assisted a cow, now on record test. This cow has been tested by the heads of the dairy departments from every agricultural college in New England and at the request of the owner of the cow, Mr. Chapman went to Maine to re-test the cow.

Plain Mary is a 9 year old Jersey cow of St. Lambert breeding and is a true St. Lambert type. She is owned by the Ayerdale Stock Farm, Bangor, Maine, but during this test she is being kept at the farm of Kelly, Coosar and Winn at Wyome, Maine.

During the month of January, the eleventh month of lactation, she produced about 1000 pounds of milk. At this rate of production, when the test ends in February, she will have made a record of over 15,000 pounds of milk and 1015 pounds butter fat.

This will probably establish a new world's record for Jersey cows in the mature class.

ANIMAL HUSBANDRY

Troy, Tuesday January 27th, thirty-five grade Merino ewes were shipped to New Haven County from the Sheep Exhibit Board, Spring Hill.

While at the Boston meeting of the Massachusetts State Board of Agriculture last week, Prof. Garrigus met a woman who declared her dogs were more important than babies and called sheep the dog's worst enemy. Some people have an affinity for seeing the cart in front of the main every time.

HOME ECONOMICS

Miss Helen L. Clark '19 spent the week end of January 23 at Valentine House. "Clarkie" is employed in New Haven as a bookkeeper. She had a basketball game between the Co-eds and the Columbian Club of New Haven. In spite of her new affiliations, she is still a C. A. C. and helped cheer the Co-eds on to victory.

Miss Viola Ericson '22 has been at her home in New Britain for two weeks suffering from a badly sprained back and side.

Miss Louise Ransome '22 spent the week end of January 23 at the home of Mable Bennett '22 in Hartford. Miss Ransome has been detained there confined to her bed with a severe attack of the grippe.

Miss Dorothy B. Dick '22 has left college to take up the study of dietetics in a hospital in New York.

SHAKESPEAREAN CLUB

Lincoln Crosby '19 has accepted a position on the editorial staff of the Field Illustrated. It is published by the Agricultural Society of New York.

R. L. Birdsall '10 has just finished a tour of the eastern states. He was seeing for Holstein cattle for Gardner Hall Jr. Company.

C. B. Pomeroy '01 spoke before the Willimantic Chamber of Commerce, Wednesday evening, January 21.

S. P. Hollister '05 attended a committee meeting of the Connecticut Eological Society at Hartford to arrange for an exhibit for Farmers' Week.

P. J. Ford '04 is sitting on the Washington Board of Relief.

A. J. Brundage '08 spent a day in Springfield, and while there saw E. H. Furfush '10 and Clinton J. Grant '05. The latter has just completed his seventh year as county agent for the Hampden County Improvement League. He was one of the first county agents appointed in the New England States.

ETA LAMBDA SIGMA

The fraternity banquet will be held in Hartford on June 6th. The place will be announced later.

A. E. Upham '20 spent the week end with F. C. Maier '21 in Boston.

J. B. Thwing '02, State Secretary of the Y. M. C. A., spent the week end on the Hill.

Dr. F. A. Miller ex-90 is at present working in the laboratory of the Rockefeller Institute in New York in an attempt to isolate a causative organism in influenza and to manufacture a prophylactic serum.

Lloyd H. '18 is at present working at several days on the Hill last week and is now thinking seriously of re-entering.

L. W. Cassel '19 is making a short visit to New York at the request of his employer.

J. Reeves ex-90 underwent an operation for appendicitis at the Hartford Hospital a short time ago. He is convalescing satisfactorily at his home in Collinsville.

John Luddy '10 has been appointed census enumerator for the Enfield district.
AG. CLUB FAIR
WELL UNDER WAY

Educational Exhibits and Other Features to Add to Interest

The Agricultural Club is going to stage a fair for the College on Friday, February 20th, in the Armory. The stunt is not a new one but this year many features are to be introduced. Primarily the event will be agricultural, but to draw the entire student body and others, the management is making the fair of a more attractive than before by mixing some unique contests and entertainments into the program.

Under the direction of some of the faculty several groups of students are working up educational exhibits for various branches of the agricultural industry, including Agronomy, Animal Husbandry, Bacteriology, Farm Machinery, Floriculture, Home Economics, Horticulture and Poultry. The competitive exhibits will be mainly in corn, small grains and potatoes. The judging contests, which include three divisions: Corn, Dairy Cattle and Livestock, are open to all students, and three medals (one silver and two bronze) will be awarded to the three most successful competitors in each contest. With each of the silver medals in Dairy Cattle and Livestock judging goes a subscription to the "Field Illustrated" for one year. These awards are worth working for.

The afternoon portion of the Fair program will be the exhibits open to the public, and judging contests among the students, followed by the placing of exhibits by the judges; the whole interleaved with music and a few vaudeville acts. In the evening the exhibits will again be open, a few reels of real movies will be shown, the medals will be awarded for the judging contests, and dancing will be in order. Some of the unique exhibits already planned are a mysterious young lady, the green pig and a tame goose. Others are in preparation.

A few interesting contests in which anyone may enter will also be held. If the present program is carried out, Friday, February 20th, will be a tag day for the "Ag" Club, the tag admitting its wearer to all parts of the Fair except the side shows and dance floor. Everyone should plan to be on the Hill and help make the Fair a success.

Entries for the exhibit contests should be filed with E. S. Clark by 6 P. M., February 20th. Official premium lists and catalogs are being printed for the "Ag" Club Fair.

For a man to lose a hat is not as bad as for him to lose his head; but for one to lose a glove off his hand on a night as cold as last Sunday and not know where it went to is peculiar to say the least. How about it, Brandt?

L'ENVOI
APologies TO KIPLING
When "Job's" last notes are written, And everything's down in ink; When the last poor bug is pictured, And our arms are twisted and kinked; We shall rest and faith we shall need it. And lie down for a week or two, Till the Dean of all Ag students Shall put us to work anew.

And those that were good shall be happy. They shall be given an A and a chair; Others shall write on reams of paper, And wildly tear their hair.

They shall have only their knowledge To draw from—not note books at all; They shall work three hours at a sit­ing. And blankly stare at the wall.

And only "Job" shall praise us and only "Job" shall blame.

And all shall work to please him, And no one shall work for fame.

But each in the joy of working, And each in his separate fair Shall draw the thing as he sees it, For the Prof of the things as they are.

-R. I. Leyer

ATHLETICS

Baseball Manager Lowry Osborne has scheduled a game for May 18 with St. Michael's College of Winooksi, Vermont. This is the first time that our team has ever competed with that institution. The game will be played during the week of the northern trip. Manager Osborn hopes to schedule a game with Norwich University either the 12th or 15th of June. The negotiations are proceeding favorably so far.

The outlook for the 1920 baseball season is very bright. There are five possible candidates for pitcher: Johnson and Sawin, last year's men; Chamberlain, who pitched in 1917; Alexander and Lord.

For catcher there is Mahoney, who is now captain of the team; Metell, and Prescott, who will probably return next semester. The rest of the last year's team are all here with the exception of "Pop" Eaton, who is now at Dartmouth.

A meeting of the Athletic Council was held in the office of Prof. Sherman Hollister on Wednesday evening, January 21, 1920, and it was definitely decided that in the future, Boston College will not appear on Connecticut schedules.

This was decided officially after the Council failed to ratify the Boston-Aggie baseball game which was scheduled for May 8, 1920. This action is indicative of the feeling of both students and members of the faculty, who have long been opposed to playing the Boston College teams.

FACULTY VS. SOPHOMORES

The Faculty defeated the Sophomores by a close margin. The Faculty had good team work and played the net strong. The Sophomores also had good team work and played hard but they lost the last set on net balls. The Faculty discovered the Soph's weak point and played it hard.

The line-up was as follows:

Facility
Warner
Moss, Guyer
Wheeler
Freedman, Fraser
Swarts, Ackerman
O'Brien, Manter
Brown

Sophomores
Gardner
Slanetz
W. Graf
Kennedy
Mitchell
Lawson
Beissiegel

SENIORS VS. FRESHMEN

The fourth series of Volley ball was held Wednesday, January 21st. The games were interesting and parts of them quite exciting. The Seniors had their team work down to perfection. Gleason and Hopwood did some team work too and although they did not pass the ball so much they all worked together.

The line-up was:

Seniors
Moore
Hopwood
Gleason
Bauer
Schimmel
Upsham
Brown

Freshmen
De Otto
Block
Reveley
Mills
Radiisky
Baxter
Brundage

Score—Freshmen: 5—13
Seniors: 15—15
