Results of the Inter-Collegiate Referendum

Out of 410 colleges and universities all over the country, 139,788 votes were cast.
Opposition to treaty in any form, 13,039.
Ratification of treaty without reservations, 48,322.
Ratification with Lodge Reservations, 27,970.
Ratification with a compromise between Lodge and Hitchcock Reservations, 49,653.

Fire Demoilishes Student’s Room

J. P. Johnson Overcome by Smoke While Fighting Flames

On Thursday afternoon shortly after one o’clock, much excitement and commotion was caused by a fire in the fourth section of Storrs Hall. At the time of writing the origin of the fire was unknown.

It started in Room 52, which is occupied by Woodworth, a School of Ag. student and others whose names were not learned. Due to the prompt and efficient work of students the fire was confined to the one room but practically everything in the room was lost.

J. P. Johnson was overcome by smoke, which put him in a rather serious condition for some time.

This is the second fire to occur in Storrs Hall in the memory of some of the present students. The other burn was in the spring of 1918. His new position will give him opportunity to work.

This is not the first experience “Link” has had with an editorship, as he was Editor-in-chief of the “Campus” in the spring of 1918. His father is also an editor, having a position on the staff of the Manchester “Herald.”

After graduation last summer Crosby spent some time under Prof. Garrigus, working for the Animal Husbandry Department of the College. Later, he went to Canaan, Connecticut, where he had charge of a cow testing association. According to W. A. Bres, under whose supervision the work was done, he made unusual success as a tester. This position he held up to the time of beginning work on the “Field Illustrated.”

As Editor of the “Campus” he achieved great success and it is only safe to prophecy that he will carry this achievement over into his present work.

Enter a judging contest at the “Ag” Club Fair and win a medal.

Women’s Varsity Team Wins in Basketball

Proves Too Speedy for Visiting Team

Columbian Club Unable to Score A Single Point

The women’s varsity team of Connecticut Agricultural College completely defeated the Columbia College girls of New Haven on Hawley Armory floor, Saturday night, January 24.

The size of the floor and height of the baskets apparently bewildered the visitors and the home team did such lively passing around them that they seemed unable to collect their wits and settle down to playing the game.

A score of some fifty odd was piled up by the “red caps” before the last whistle blew and even at that many good trial shots were missed. Numerous fouls were called by referee Hopwood on both sides and Miss Wakeham’s unusual ability to make these good plays had no small part in running up the score for the home team.

The excellent work of Connecticut’s guards broke up many a would-be chance to shoot of the visiting team. Splendid team work and the ability to cover the floor and arrive at the critical moment at the same time the ball did, characterized Connecticut’s playing.

As an exhibition of practice work it would have been fine but it was too one-sided to make an exceptionally interesting game to onlookers. In the middle of the second half the entire home team was replaced by subs and still the game went on much as before.

Miss Jacobson succeeded Miss Wakeham in shooting fouls to a remarkable degree and thus added several more points to the already high score.

The Columbian Club secured this game with the home team through the efforts of Helen L. Clark ’19, demonstrator who had the ability to make these good plays. Miss Clark has some of the girls of the Columbian Club in a cooking class.

With six straight straight wins to their credit Simsbury High School girls will try to make it seven by beating the Co-eds of C. A. C. on Sunday evening, January 31, 1920. Will they do it?

The varsity basketball team will play Trinity College at Hartford on February 13, 1920, instead of February 14, as previously scheduled.
SLEIGHING AND RELIEF
MAKE FINE COMBINATION

YOUNG PEOPLE GO TO WILLIAMTTCHU CAMPUS

Several Speakers from Student Body Address Appreciative Audience

Last Sunday afternoon about three o'clock three sled loads of young people, members of the Storrs Christian Endeavor, left the Hill for Willimantic. On the way down all had a very good time, even those who fell out of the sled, although no sleds were tipped over, great as was the desire on the part of some to see such a thing happen.

The party reached Willimantic about 5:15 and were given a cordial welcome by the Baptist Christian Endeavor of Willimantic, which very kindly served all the Storrs Christian Endeavor members with sandwiches and coffee.

After these refreshments all attended and many took part in the Christian Endeavor service.

After the Christian Endeavor service all went up into the church. The service was given over almost entirely to the students. Pre. Keeler had charge of the meeting and there were three other speakers from the college. The topic of the talk was "The College Man in Action." Mr. Bigger talked from the scholastic point of view. Mr. Mannwaring gave the bearing of college athletics on college and after life. Mr. Pinkham took up the topic from the fraternity and club side of the question. Mr. Keeler took up the relation of religion and religious work in the program of the college man, both at present and in the future.

The meeting was considered a success by all who heard it. The orchestra consisting of Messrs. Gerhardt, Brandt and Fogg added not a little to the success of the evening. It was a very enjoyable occasion.

After the meeting more refreshments were served and then all bundled up and placed themselves in the sleds. On the return trip songs were sung, jokes told and incidentally one hat lost, which caused one of the straw-riders to hike about six miles to retrieve the lost article for his fair companion. The party reached Storrs about eleven and all voted it a good time, even though the sleds were not tipped over at all.

Brown University. While a student there he was employed in the office of the chief engineer of the State Board of Public Roads. Within a very short time after his graduation from Brown he was appointed engineer and has served as such with marked success since that time.

Mr. Patterson is a son of Prof. Henry Patterson, formerly of the faculty of the college and is a brother of Mrs. Harry L. Garriga.
Y. M. C. A. TO HAVE MEETING ROOM

President States Plans For Increased Influence in Community

Through the efforts of Dr. Sinnott the local Y. M. C. A. has obtained permission to use the room commonly known as the Armory Lecture Room for its headquarters.

The association proposes to fit this room up with comfortable furniture and make it over into a cozy place for social service purposes. Other groups and organizations will be permitted to use and will probably contribute in some measure towards furnishing it.

This room, with its many windows and its spacious fire place is particularly adapted to this purpose. In fact, it is almost a counterpart of the Fac­ulty Club, one of the easiest rooms on the Hill.

The Y. M. C. A. has been working at a disadvantage in not having any of its own and considers itself very fortunate in securing this one.

Harold Bridges, President, states that a campaign is on for increased membership and he expects the association to boom in the near future. He has full confidence in his successor, Douglas A. Evans, however, and urges the loyal support of all members in carrying out the year’s program.

DAWSON PREACHES ON CREATION

Says Much is Lost by not Making Use of This Power

The text of Rev. Dawson’s sermon last Sunday was “Creation.” He led up to the conclusion that man was created in the image of God and that we have the power consciously to clear of mysteries. God is light, love, truth. God is creative; man is creative. Man is the only creative agent that has the power consciously to cooperate with the divine being.

Mr. Dawson also said that many of us are not aware of, and some of us are even afraid of the creative power within us. Many movements of our lives are of great value in creative thinking. Psychologists say that there is an ebb and flow during the day of creative thinking. The maximum are reached at different times by different persons and we must study himself psychologically to ascertain these periods, which when found will be of greatest value.

Business and life are not built on routine drudgery, but on insight, vision and creative power.

M. S. DEGREE TO BE GRANTED IN FUTURE

TRUSTEES APPROVED PLAN RECENTLY

Graduate Work to be Encouraged in Specialized Departments

The Board of Trustees has recently approved a plan for granting an M. S. degree from this institution. The object of this plan is to enable students to continue advanced study in a special field after graduation.

The work would cover a period of more than one year and in some cases opportunity would be open for graduate students to assist in laboratory work and in that way give them a chance to earn money to aid them in their studies after receiving their B. S. Degree. In case students sought while taking graduate study it would lengthen the period for receiving the degree to two years. This is the method usually used in other institutions.

By taking advantage of this plan students will gain experience in teaching and thus be better fitted to take up college or experiment station work. According to Professor Lamson, who is chairman of the committee on graduate study, he also states that particular emphasis will be laid on the work done on the special problems that are assigned to the graduate student for thesis work and that it is hoped that students who are best fitted in the various departments will avail themselves of this opportunity for advanced study. The plan is approved by the Board of Trustees and is as follows:

“Students who have received a bachelor’s degree from a college or school of high standing may become candidates for the degree of Master of Science. At least one year of resident graduate study is required with a thesis or report, the subject and scope of which is to be approved by the department concerned. No credit is allowed for work done in absentia, but that connected with the preparation of the thesis. During the first month of the year’s work, each student must submit his schedule of studies to the Committee on Graduate Study for its approval. A student may elect work in more than one department of study, provided the subjects chosen form a coherent group, but the extra work of the student must be under the direction of a single department.”

EXCHANGES

At Rhode Island State College the students who have been in the service will be allowed twenty extra credits for six months’ service and forty extra credits for twelve months’ service.

The girls of the Home Economics Department of the New Hampshire College are starting a Home Economics Club.

This year’s informal hockey is successful at the University of Maine, the sport will be made a major one next year.

An Aeronautical Club is building a landing field at New Mexico State College.

A NEWSPAPER

Some have asked us why we do not run a literary feature once in a while in the Campus. The reason is simply this, the Campus is first of all a newspaper, published weekly by students and while we have the news, news is run a literary feature once in a while big enough, then the time to is out of place in a college paper and what we print. The few poems surely you would not like technical advertising.

ONCE MORE

For at least the fifth or sixth time in the last college generation the debating club has been organised and the usual debates between Rhode Island State, Massachusetts Aggie and Connecticut have been dreamed of by the organizing members. It certainly would be mighty fine to have a good debating club which would be permanent as well as useful. Prof. R. H. Vining, provided he maintains more interest than others who have been in like position, and he undoubtedly will, can be of great help in forming a society which will stand the gaff of time.

In this regard, the would-be debaters are more fortunate than the Glee Club, for at least they have a truly interested advisor. But in another regard they are sadly at loss; they have too few upperclassmen, as has always been the case in past debating societies. The best days of the best debating clubs were back in 1917 at which time many Juniors and Seniors held a lively interest in debating. If such a condition can again be maintained about, the future of the new society would seem very likely, and there is no reason to believe that all of the upperclassmen are "bunk lizards" or too interested in other activities to attach themselves to the debating society.

Mr. Shults always had an active interest in debating since his freshman year, and he should make a wise president to guide the infant organization. Moreover, if he is able to awaken interest among some of his classmates and one or two Seniors, he will practically have guaranteed himself a successful run for a long-lived debating society.

ARE THEY SORE?

Evidently Rhode Island is still smarting under the defeat which we handed her in the football this fall. Our rival can bear a sad lack of sportsmanship in their makeup lately. New Hampshire recently cancelled relations with them because of this, and the Argus is not at all pleased with the treatment received this year and if conditions do not improve a breach may be the outcome. It certainly is too bad that after our difference of past years have been smoothed over that our relations could not be a little more friendly. The policy of returning to Storrs the same night seems to be a hardship on the men especially in the sort of weather condition we have just now and it is hoped that next year's game can be played at night and that the squad will remain in Kingston over night.

"GRABATINES" AGAIN!

There have been fairly definite statements at large which would indicate that the system in the new dining hall will be the same as the cafeteria which was installed in the S. A. T. C. This has already excited much unfavorable comment by the students; but if this system is actually put there will surely be a lot more of it.

We will venture to say that there is no one who eats in the dining hall, unless it is the boarding mistress, who is satisfied with the system. Certainly remarks of visitors show their frank displeasure. We are forgetting that we ever knew such a thing as table etiquette.

There will be serious objections put up before the students will see a perfectly good dining hall spoiled by having an unsatisfactory system installed.

MID-WINTER FAIR

One who is acquainted with our College need not be told that its major purpose is the promotion of Agriculture. An agricultural fair is one of its most frequent methods of accomplishing a considerable general knowledge of the better side of agriculture to a large group and we are going to have a fair here next month.

"FINE FEATHERS"

"THE CUB" REPLIES

Dear Editor:

Some of us have some respectable looking clothes hanging on the rear hoods of our clothes closets but it has been so long since we tried to wear them that many of us have forgotten that we have such things as clothes. We normally run around without any collars or ties, with our elbows gazing at the horizon through gaping holes in our sleeves, while our trousers never showed of such a thing as a pressing, and our shoes have long since forgotten that brushes and polish were made to shine shoes with. In fact most of us travel around Storrs in a manner that would be disgraceful at home and if our girls back home should happen to see us in this condition a whole harem of us would return to the bachelor stage. Now Storrs is a long ways from Broadway and there is no necessity of living out in formal dress suits every evening for dinner, but at least when we know that there are to be guests, such as a visiting team, etc., on the Hill, at least we might put on a clean collar and tie and look respectable and not give the visitors the impression that we are not tough back woods farmers. Think it over and the next time we have a visiting team here (or other visitors) let's show University in good clothes. There are certainly would be mighty pleased.

J. N. S. speaks of returning to the "bachelor stage" as the "bachelor stage" and men were the rule rather than the exception. He also alludes to the "girls back home" as though, either there were no girls here, or else they were not sufficient excuse for airing one's good clothes. In spite of these little discrepancies, his article has much merit as was evidenced by a remark overheard in the dining hall last Sunday. One of the women students asked who were the two good looking strangers at a certain table, and was much surprised to learn they were our students whom she sees every day. But they were clean cut, had their hair neatly cut and combed and were dressed in good looking clothes. They say "clothes do not make the man." We grant that, but sometimes they do show him up to pretty good advantage.—Editor.

Dear Editor:

It is most gratifying to note that now and then a Safety Valve is sufficiently constructed to prevent a reply and the Cub is more than glad to receive one from "Only a Teacher" in the last Campus.

However, it does seem that this teacher was not the average college student, for the writer has known students from one large University, and found that very few of them looked forward to final examinations with the expectancy and joy which the teacher has experienced and there are very few who receive A grades in all subjects.

The value of the first article, asking instructors to grant exemptions to those deserving, is by no means implied by the reply of the Teacher. It might be well to point out that it has been the habit of many instructors to exempt men with grades better than 85 from final examination in the subject for which they received the mark. Moreover, in a University, no student carries as many courses as does a student in Connecticut Agricultural College in one semester. Therefore, an instructor is a bit, let us say narrow, but rather "too wide" in expecting courses of C. A. C. to be of University standard.

As for the Teacher's petitions, to the Cub's knowledge there has been only one instructor on the faculty who ever had trouble in maintaining order in class. In most cases just the personality of an instructor commands enough respect to maintain a reasonable degree of order. Also if any instructor can teach his men to look forward to examinations in all subjects with hopes for a joyful time, he is a marvel.

As far as illegible papers are concerned no one can blame the teacher for correcting them. Still, an illegal paper is very much worse than listening to a poor lecture. Very few people steal but we have laws to take care of them. Moreover, very few students cheat and if a professor cannot leave them on their honor during an examination, it is a misfortune which we all realize. But if he wants every student to really hand in his work as was evinced by a remark overheard in the dining hall last Sunday. One of the women students asked who were the two good looking strangers at a certain table, and was much surprised to learn they were students whom she sees every day. But they were clean cut, had their hair neatly cut and combed and were dressed in good looking clothes. They said "clothes do not make the man." We grant that, but sometimes they do show him up to pretty good advantage.—Editor.

The Mechanical Engineering Department has recently added a modern machine shop to its equipment and installed them in the machine shop. The department also purchased a high grade jig saw which has not yet been received.

H. V. Beebe, the village storekeeper of Storrs, has been severely ill as a result of a fall on the ice January 22. He is in a critical condition and his many friends and customers are anxious about him.

The green pig will be exhibited at the "Ag" Club Fair February 20th.
TO ADD NEW MEMBERS IN SECOND SEMESTER

GAMMA CHI EPSILON
HONORARY FRATERNITY

Scholarship, Morals and Student Activities Promotes by Faculty and Students

Since 1917, there has been an honor fraternity, Gamma Chi Epsilon, at the Connecticut Agricultural College. One object of this fraternity is to promote scholastic standing, participation in college activities and moral character. In order that a man may be elected to this fraternity, he must stand among the upper one-fourth of his class in scholarship at the end of the fifth semester, he must be a participant in college activities and must also be of high moral character.

The fraternity was founded early in 1917 by three members of the faculty—President Charles L. Beach and Professors H. R. Moonteith and H. F. Jenkin. The latter is no longer an instructor at the college and Doctor H. D. Newton is now the third faculty member. Five members of the Class of 1917, who were then seniors, and five members of the Class of 1918 were elected into the fraternity. These members and their classes are as follows: Class of 1917—J. R. Kilbridge, J. H. Norton, W. D. Sheas, A. B. Watson and H. A. Weidlich; Class of 1918—T. H. Birch, J. H. Hock, B. B. Morse, L. P. Sanford and F. B. Thomson. These men were the first active members of the fraternity.

The other active members of the fraternity by classes are: Class of 1919—L. C. Crosby, C. R. Brock, E. R. Moore and A. C. Mallett; Class of 1920—F. Bauer, R. F. Belhorn, F. W. Wooding and H. W. Wright. The process by which men are elected to the fraternity is efficient and considerate. At a meeting of both faculty and active members, on the second Tuesday of the second semester, the secretary of the faculty submits a list of those members of the Junior Class, who have the highest scholastic average for their college course; this list consists of not more than one-fourth of the total membership of the Junior Class. The men, whose names appear on this list, are considered by the Fraternity with a view to accepting them as members. The points considered are the man's character and his participation in college activities. If he is found lacking in one or both of these considerations it seriously handicaps, if it does not entirely do away with the possibility of his becoming a member. The men must then be voted on by ballot by members of the fraternity. A unanimous vote is necessary for an election. No more than the upper one-five per cent of the Junior Class is considered eligible for this election.

As soon as there are a sufficient number of members in the fraternity, Gamma Chi Epsilon hopes to join Alpha Zeta—a well established national honorary fraternity.

SENIORS VS. JUNIORS

The Seniors added another victory to this list Monday evening when they triumphed over the Junior five by a 14-12 score.

The game started well and the Seniors were soon in lead of their opponents. Then the Juniors tightened up and the score remained nearly even until the last five minutes when the Seniors added two more points to their list.

Until the last few minutes Blevins and Osborne ran free on the floor and took the ball at will. Then the Seniors changed tactics and much to the amusement of the audience hastened their opponents rather rough. This was soon stopped by the referee's whistle and the game ended 14-12 in favor of the Seniors. This was undoubtedly the hardest played interclass game this season and was a good evidence of the keen rivalry in sports which exists between the classes.

The line-up was:

Seniors:
Hopwood RF
D. H. Osborne
Upsham LF
Wallace
Gleason C
Johnson
Maloney RG
Blevins
Moore LG
Alexander

Junior's:
North RG
Olsen RF
Strout LF
C. H. Thomas
Pierce C.
D. N. Fraser
L. P. Swinnerton

FRESHMEN VS. SCHOOL

Monday night the Freshmen won from the School of Ag. for the second time this season by a score of 10-4. The game was called by Referee Putnam directly after the Senior-Junior "tag-of-war" and both teams started in fine form. Captain Mullan's men showed the spectators how basketball should be played and their excellent teamwork was the feature of the game.

The School's team played a hard clean game but were handicapped by the absence of Blanchard and Ricketto two of their best players. Schlott and Trost worked together well but did not have their eyes on the basket.

Near the end of the game the Freshmen second team replaced those who had started the game.

The line-up is as follows:

Freshmen:
Baxter RF
Trost
Mullen LF
Schlott
Dehne C
Bristol
Lilley LG
Meigs
Daly RG
Bendoks

School:
Benson RF
Strout
D. H. Osborne
Upsham LF
Wallace
Gleason C
Johnson
Maloney RG
Blevins
Moore LG
Alexander

DAIRY

Edward Benson of Milwaukee, Wisconsin, was the week end guest of H. A. Holbrook. During his visit Mr. Benson made several trips through the various departments.

Miss B. Gluck, stenographer in the Creamery Department and Miss Lula Standish, the stenographer in the Dairy Department, are confined to their homes by severe colds.

W. A. Rhea has left Storrs and gone to his home town, Pierce City, Missouri. Mr. Rhea intends to enter the banking business in that place.

A bulletin on the Feeding and Management of Young Dairy Cattle has just been issued by the Dairy Extension Department. The bulletin is written by W. A. Rhea. It takes up the care and treatment of growing calves, the various amounts and kinds of feed and skim milk substitutes. It gives a detailed account of the common diseases and parasites that effect the calves while young and gives a detailed account of the care of the calf from birth until six months old until bred.

A chart in the bulletin shows the normal growth of Holstein and Jersey heifers at each month of age up to maturity.

This is one of the most practical and instructive bulletins which has been issued by the Extension Department this year and it should be of value not only to the farmer and dairyman but also to the student.

R. W. Brown, herdsman, and G. Gelttinger, assistant herdsman, have both been ill for the past week.

H. A. Holbrook has recovered from his illness and is back on the job.

Leroy M. Chapman, of the Extension Service, returned last Monday from Wyne, Maine, where he retested a cow, now on record test. This cow has been tested by the heads of the dairy departments from every agricultural college in New England and at the request of the owner of the cow, Mr. Chapman went to Maine to re-test the cow.

Plain Mary is a 9 year old Jersey cow of St. Lambert breeding and is a true St. Lambert type. She is owned by the Ayerstone Stock Farm, Bangor, Maine, but during this test she is being kept at the farm of Kelly, Cossar and Winn at Wyne, Maine.

During the month of January, the eleventh month of lactation, she produced about 1000 pounds of milk. At this rate of production, when the test ends in February, she will have made a record of over 15,000 pounds of milk and 1015 pounds butter fat.

This will probably establish a new world's record for Jersey cows in the mature class.

ANIMAL HUSBANDRY

Tuesday, January 27th, thirty-five grade Merino ewes were shipped to New Haven County from the Sheep Extension Board.

While at the Boston meeting of the Massachusetts State Board of Agriculture last week, Prof. Garrigus met a woman who declared her dogs were more important than babies and called sheep the dog's worst enemy. Some people have an affinity for seeing the cart in front of the mule every time.

HOME ECONOMICS

Miss Helen L. Clark '19 spent the week end of January 23 at Valentine House. "Clarike" is employed in New London as a cook and basketball player in the basket ball game between the Co-eds and the Columbia Club of New Haven. In spite of her new affiliations, she is still a C. A. C. and helped cheer the Co-eds on to victory.

Miss Viola Ericson '22 has been at her home in New Britain for two weeks suffering from a badly sprained back and side.

Miss Louise Ransome '22 spent the week end of January 23 at the home of Mable Bennett '22 in Hartford. Miss Ransome has been detained there confined to her bed with a severe attack of the grippe.

Miss Dorothy B. Dick '22 has left college to take up the study of dietetics in a hospital in New York.

SHAKESPEAREAN CLUB

Lincoln Crosby '19 has accepted a position on the editorial staff of The Field Illustrated. It is published by the Agricultural Society of New York.

R. L. Birdsall '10 has just finished a tour of the eastern states on behalf of the Holstein cattle for Gardner Hall Jr. Company.

C. B. Pomeroy '91 spoke before the Willimantic Chamber of Commerce, Wednesday evening, January 21.

S. P. Hollister '05 attended a committee meeting of the Connecticut Poultry Association at Hartford to arrange for an exhibit for Farmers' Week.

P. J. Ford '04 is sitting on the Washington Board of Relief.

A. J. Brundage '08 spent a day in Springfield and while there saw E. H. Ferbush '10 and Clinton J. Grant '08. The latter has just completed his seventh year as county agent for the Hampden County Improvement League.

He was one of the first county agents appointed in the New England States.

ETA LAMBDA SIGMA

The fraternity banquet will be held in Hartford on June 4th. The place will be announced later.

A. E. Upham '20 spent the week end with F. C. Maier '21 in Boston.

J. B. Thwing '02, State Secretary of the Y. M. C. A., spent the week end on the Hill.

Dr. F. A. Miller ex-90 is at present working in the laboratory of the Rockefeller Institute in New York in an attempt to isolate a causative organism in influenza and to manufacture a prophylactic serum.

Lloyd '19 came up to see several days on the Hill last week and is now thinking seriously of re-entering.

L. W. Cassel '19 is making a short visit with friends before going to New York.

J. Reeves ex-99 underwent an operation for appendicitis at the Hartford Hospital a short time ago. He is convalescing satisfactorily at his home in Collinsville.

John Liddy '10 has been appointed census enumerator for the Enfield district.
L'ENVOI

APologies TO kIPLING

When "Job's last notes are written,
And everything's down in ink;
When the last poor bug is pictured,
And our arms are twisted and kinked;
We shall rest and faith we shall need it,
And lie down for a week or two,
Till the Dean of all Ag students
Shall put us to work anew.
And those that were good shall be happy.
They shall be given an A and a chair;
Others shall write on reams of paper,
And wildly tear their hair.
They shall have only their knowledge
To draw from—no note books at all;
They shall work three hours at a sitting
And blankly stare at the wall.
And only "Job" shall praise us and only
"Job" shall blame;
And all shall work to please him,
And no one shall work for fame.
But each in the joy of working,
And each in his separate fair
Shall draw the thing as he sees it,
For the Prof of the things as they are.

—R. L. Leyer

AG. CLUB FAIR
WELL UNDER WAY

Educational Exhibits and Other Features to Add to Interest

The Agricultural Club is going to stage a fair for the College on Friday, February 20th, in the Armory. The stunt is not a new one but this year many features are to be introduced. Primarily the event will be agricultural, but to draw the entire student body and others, the management is planning many exhibits of all kinds for the most successful competitors than before by mixing some unique contests and entertainments into the program.

Under the direction of some of the faculty several groups of students are working up educational exhibits for various branches of the agricultural industry, including Agronomy, Animal Husbandry, Bacteriology, Farm Machinery, Floriculture, Home Economics, Horticulture and Poultry. The competitive exhibits will be mainly in corn, small grains and potatoes. The judging contests, which include three divisions: Corn, Dairy Cattle and Livestock, are open to all students, and three medals (one silver and two bronze) will be awarded to the three most successful competitors in each contest. With each of the silver medals in Dairy Cattle and Livestock judging goes a subscription to the "Field Illustrated" for one year. These awards are worth working for.

The afternoon portion of the Fair program will be the exhibit open to the public, and judging contests among the students, followed by the placing of exhibits by the judges; the whole interlarded with music and a few vaudeville acts.

In the evening the exhibits will again be open, a few reels of real movies will be shown, the medals will be awarded for the judging contests, and dancing will be in order. Some of the unique exhibits already planned are: a mysterious young lady, the green pig and a tame goose. Others are in preparation.

A few interesting contests in which anyone may enter will also be held. If the present program is carried out, Friday, February 20th, will be a tag day for the "Ag" Club. The tag adorning the wearer to all parts of the Fair except the side shows and dance floor.

Everyone should plan to be on the Hill and help to make the Fair a success. Entries for the exhibit contests should be filed with E. S. Clark by 6 P.M., February 20th.

Official premium lists and catalogs are being printed for the "Ag" Club Fair.

For a man to lose a hat is not as bad as for him to lose his head; but for one to lose a glove off his hand on a night as cold as last Sunday and not know where it went to is peculiar to say the least. How about it, Brand!?
### EXAMINATION SCHEDULE

**MONDAY, FEBRUARY 2**  
9:00 A.M.  
- English 1  
- Agron. 2a  
- Economics 3a  
- Physics 2  
- Hort. 1a  
- Gen. 3a  
- Dairy 2a  
- English 2a  
- M. E. 1  
- Zoology 2a  
- Hort. 10a  
- 2:00 P.M.  
- Hort. 1a  
- Gen. 3a  
- Dairy 2a  
- English 2a  
- M. E. 1  
- Zoology 2a  
- Hort. 10a  

**TUESDAY, FEBRUARY 3**  
9:00 A.M.  
- Zoology 1a  
- Chemistry 2  
- History 3  
- German 1  
- M. E. 1a  
- 2:00 P.M.  
- Hort. 2  
- Dairy 3a  
- Vet. Sc. 4a  
- H. E. 1c  
- H. E. 2a  
- French 3  

**WEDNESDAY, FEBRUARY 4**  
9:00 A.M.  
- Math. 1  
- Math. 2  
- P. H. 1a  
- H. F. 3b  
- A. H. 3a  
- Economics 4a  
- Dairy 10a  
- 2:00 P.M.  
- Ag. Eng. 1b  
- Jorn. 3  
- H. E. 1c  
- M. E. 2  
- History 4  
- English 101  

**THURSDAY, FEBRUARY 5**  
9:00 A.M.  
- Agron. 1a  
- Physics 2a  
- Zoology 3c  
- Education 3a  
- Poultry 3a  
- Bacteriology 3a  
- Hort. 10a  
- 2:00 P.M.  
- Hort. 1a  
- Gen. 3a  
- Dairy 2a  
- English 2a  
- M. E. 1  
- Zoology 2a  
- Hort. 10a  

**FRIDAY, FEBRUARY 6**  
9:00 A.M.  
- English 2  
- Chemistry 3a  
- Hort. 3a  
- A. H. 101a  
- 2:00 P.M.  
- Ag. Eng. 2a  
- Agron. 3a  
- H. E. 3  
- M. E. 2c  
- Education 4e  
- Dairy 10a  
- 4 M. E. 4, 4c, 4e
