The biggest and best Alumni Day Supper ever was served at 6 P.M. in the Dining Hall. This was the largest attended event since its origin. A total of two hundred people were present. The Supper was held at 10 o'clock instead of 11, so that the dining hall could serve two dinners. The place settings were set at 7 P.M.

President's Hour was held at 12:30. The guests were served a luncheon consisting of tomato soup, lamb chops and potatoes, rolls, pickles, peas, strawberry short cake, cakes and coffee. On the walls of the dining hall were the plans of three buildings which the trustees hope will be erected within the next few years. The plans were for a Science Hall, Girls' Dormitory and Agronomy Building.

Co. C., commanded by Capt. M. H. Lockwood, was the largest of the companies. The color guard led by Field Marshal Alexander, with a determined "do or die" spirit, marched off in the direction of the main campus, leading the charge of the ever-so-large crowd.

The dormitories were decorated with bunting and flowers. The flags were raised to half mast, and the color guard marched in formation. There was a loud cheer as the marchers entered the hall.

The Supper was followed by the annual meeting of the Alumni Association. President Clayton Bayne presided over the meeting, which was well attended. The financial report was presented and adopted. The officers were elected for the coming year.

After dinner, the guests were invited to tour the new buildings under construction. The new Science Hall was the most impressive. It was designed by the famous architect, Frank Lloyd Wright. The hall was spacious and well-lit, with large windows and skylights. The guests were impressed with the modern design and the latest technology.

The evening concluded with aorgy Building.

INFANTS SWAMP '21 NINE

The Junior team met its first defeat at the hands of the Freshies, Wednesday afternoon, May 26. One bad inning for the Juniors caused the infants to pile up seven runs. Baxter fanned nine men. He also laid out three hits out of three times at bat.

After a week of gaiety the success of the 1929 Junior Week was slightly dampened by wet weather and the baseball team of our rivals Rhode Island on Dow Field which knocked the Indians to the tune of 8 to 2. The Aggies seemed to lack their usual pep and bonehead plays were made time and time again counting for several of the visitors runs. And cutting short a number of good chances to score. Evidently it was a take-off from Fielding Daniel's famous first and not enough sleep on the part of the Connecticut squad. The game opened as if it would be a runaway for the home team but the conditions changed in the 3rd and from then on the Aggies were fighting on the defensive. Johnson started for the third time this week but the strain was too much for him and the Engineers chased him to the showers in the sixth, Laubacher, who relieved him, was hit rather freely also.

The game by innings:

First Inning. E. Johnson worked Johnson for a free ticket to first but was so satisfied with himself that Metelli caught him dreaming and Mahoney tagged him out. Nordquist the bad pill to center made the first basemen laugh at the ball and came in too far but saved the situation by making a grandstand catch. Greenhalph found Johnson for his second but died on first as Lord easily gathered in Murphy's high fly.

Lord started the inning off with a neat single but was thrown out when he attempted to steal second. Briggs fanned the air and Sickerler flew out to Center.

Second inning. Hudson slammed the pill in a terrible manner but Sickerler cut it off with a pretty catch. Casey walked and went to second on Whittaker's sacrifice. Turner fanned Lexy out at first.

Mahoney banged the pill to center for a single. Alexander hit the first pitched ball on the nose for a double scoring Mahoney. Hopwood fanned. Bauer's drive was too hot for Whittaker and Bauer rested on the pitcher as he turned to Alexander on third and none down. It looked as if the old ball game was going to be put on ice right there and then but Hopwood whiffed the ozone and an attempted double steal on the part of Bauer and Alexander wound up in a double play that took the heart out of Connecticut and gave Rhode Island confidence.

Third inning. Turner hit to Briggs and was retired at second. Johnson slammed the pill into right field, Bauer just barely being able to reach the ball but unable to stop it with the result that Johnson was resting on third when the ball was thrown back to the infield. The order was: E. Johnson with a pretty single but was thrown out, Metelli to Alexander, when he tried to steal. Greenhalph ended the inning by flying out to Sickerler.

Connecticut went out in one, two, three order.

Fourth Inning. An error, a base on balls and a hit combined with some prize ivory work allowed the Engineers from Kingston to cross the plate twice and take the lead from which they were never headed. Connecticut again retired in one, two, three order.

Fifth inning. Two hits and an error aided by pretty base running on the part of Rhode Island resulted in two more runs for the visitors but Turner was twirling wonderful ball and the Aggies failed to get on the paths.

Sixth inning. Laubacher replaced Johnson on the mound and shut the visitors out without a run but Lucey found him for a two bagger.

Lord and Brinley drew free passes after Metelli and Laubacher were out. Sickerler cracked out a single scoring Lord but Brinley was run down between third and home when he attempted to score a few minutes later. Seventh inning. The Rhode Island boys continued their hitting practice slamming out two doubles and a single scoring two more runs while Turner fanned two of the Aggies and Lucey caught Alexander's hard fly.

Eighth inning. An error by Hopwood followed by two singles was the cause of Rhode Island scoring their eighth and final run. Connecticut was relieved of the power to score and the game ended with Rhode Island on the long end of a 8 to 2 score. The game, which was played on a wet field in a driving rain was witnessed by a large crowd of alumni who were back for Alumni Day and by a considerable gathering of the fair sex, from visitors.

Track Team at

Kingston June 5th

Track the team is progressing and the members expect to make a clean-up at Kingston on June 5th. There are about twenty fellows out training but it is not known how many will make the trip. Some of the fellows are making good at pole vaulting and high jumps.

A new jumping pit is being constructed near the tennis courts. This will be large enough so that all kinds of jumping may be carried on there.

The running track was repaired and put into fine shape by the committee in charge of the A. A. Field on clean-up day.

SOPH'S BOW TO FROSH

The Freshman Baseball Team hung up its third victory of the season when it trimmed the Sophs, Monday afternoon, May 24, to the tune of 11 to 4. Dehne went wild in the beginning of the fifth and walked two and hit two batters, allowing one run. He soon tightened up, however, and the second year men could not get another man across the plate.

THE CONNECTICUT CAMPUS
JUNIOR WEEK ENDED
BY JUNIOR PLAY
"NOTHING BUT THE TRUTH"
VERY WELL PLAYED
Manwaring Deserves Credit

Junior Week wound up with one of the best dramatic productions yet seen here, when the Junior Class presented "Nothing But the Truth." Probably the best play of the season, one even the faires would be proud of, because of the way the actors trifled with money, helped some.

Edith C. Smith, Everett D. Dow, as leads, did very clever work. E. Selden Clark, as the Bishop, showed himself to be splendid material for character parts. Rufus N. Lamont, as the Ruth Burburghit, were "perfect vagabonds." Perry Wallace, Charles Neumann and William Maloney played their parts well. They know how much they were to lose ten thousand dollars. Marian Nutting, as the maid, did well.

The presentation showed good selection of leads and also splendid coaching. Paul Manwaring coached the show and deserves a great deal of credit. He, together with Orchestra, furnished splendid music after the play.

(Cont. from page 1 col. 1.)

ters staff is yet anxious in regard to results of election.

Soon after dinner the axes and shovels were again shouldered and the attack was continued. By three o'clock the faint and weary were very much in evidence and at four-thirty the battle was declared a victory and everyone started for Dow Field to enjoy a rustling of prepared especially for the occasion by the co-ed contingent. "To said that some of the cooking was done through the bread line twice. This is merely one way of stating that a man with an appetite will do anything. Immediately behind a baseball on the field was the "Stenog," nine by five to three score. The playing of slides was furthered by spectacular base running.

In keeping with the spirit of the day an old clothes dance was held until ten o'clock. This served the two-fold purpose of entertainment and an antidote for the stiffening joints and sore muscles that were everywhere in evidence.

The results secured from "Campus Day" have led many to suggest that it be made a yearly event and that this will probably be carried out. It is planned to make improvements of permanent nature in future years. This year's contribution to permanent improvement was the placing of neat durable sign posts at all important roads within a radius of twenty miles of the college. At the end of the day the operators weathered the rain and started for home.

The fact that Alumni Day comes so close to Commencement may cause a falling off in the number of Alumni visiting the Hill on the latter day. I will leave the notice to be arranged by the Trustees and the members of the class of 1910 to be present. Unfortunately I will be unable to attend myself but as Secy.-Treas. of the Class it is my duty to get the "ball a rolling."

The Campus is an excellent paper with a smart attitude. It is a credit to the institution. Put "1910 Class Reunion" in large type if you can.

While in Los Angeles a white short while ago, I happened upon Leo Mark '13. He is scouting around contemplating the purchase of a ranch in southern California. I also saw in Monrovialle, New Jersey, Mr. Raymond, who used to be a prof. in the college back in the nineties. You might look up his initials and the exact date of his professorship and enter the above as a little item in the campus. As I am less than a hundred miles from Corvallis, Ore., I hope to get down and look over the Oregon Agricultural College and incidentally see Prof. Pitts. I hope you may enter the Class Reunion notice at your earliest convenience. What day is in commencement this year?

With best wishes,

GEORGE A. ROOT.

Address:

3 Hilgard Hall, Berkeley, Cal.

An event occurred on Campus Day which well bring forth the versatility of our Co-eds. Besides demonstrating to us that they know how many hot dogs a hungry man wants, they also made known to the world their ability to toss the pill, ram on the sack, or play that noble game of baseball, ar or were.

Although the Stenogs did not pull them very hard, still our girls showed up extremely well in various departments of the game. Their heavy hitting, for instance against the hard plant twirling of Mr. Warner should win special praise, Miss W. in particular certainly wins a wicked rolling pin. Allow us to suggest that the Var-[iety get dope from the Stenogs on the proper way to coach on the sidelines.

The greatest chances in the game were taken by Dutch Maloney. Twenty-three applications have been managed to come through all right, received from fellows desiring to umpire the next game in this league.

JUNIOR WEEK REVIEW

Connecticut has recently completed one of the greatest Junior Weeks in its history.

Starting, practically with the Junior Prom on Thursday night, the big events continued in the road of success that the Prom had so well traveled on.

The social happenings of this Week are brought to us by students of the activities. It has been said that we went to extremes, this year in these one-week events; that we over-emphasized the importance of the affairs in preparation and in achievement. There is no question that a tremendous amount of mental and physical energy was expended to make Junior Week the success that it was, but no man could participate at the Prom or witness it, and regret the put in, for instance, on the decorations.

It is at the Prom that we live on one of the highest planes of school life. Not only do we have a good time but the formality of the affair, the aesthetic side of it, the impressiveness of the whole thing carries us up for the night to a higher order of things.

The Backguardians on Friday night were able to entertain the visitors well. Some of the original phases of their show were well staged.

To top off the week, crowds of alumn, came back to glimpse the old scenes on Saturday, Alumni Day. The R. O. T. C. battleloon endeavored to interest the grunts and alumni in competition for the Amory Cup. The movements of the companies were hampered somewhat by the marching ground but they showed the high degree to which the battalion has attained in the last year.

After the unveling of the Gardner Dow tablet, the Blue and White Nine endeavored to beat the Rhode Island State team before a crowded grandstand and mobbed sidelines. It is to be hoped that the spectators looked past the score figures and saw in the game some of the good playing that the Aggie nine has in it and which it has displayed at other times during the season.

The Junior Play, which always accompanies any Junior Week, was exceptionally well presented by the members of '21. Much favorable comment has been heard about the presentation of "Nothing but the Truth." It was a high class production. Our best players were represented in the leading roles and it is hardly necessary to say that they vindicated the college's opinion of their acting ability.

Junior Week was well planned and carried out. Credit is due to nearly every one in the institution for its successful culmination.

CAMPUS DAY

By the united labors of the students and faculty, our campus has been cleaned, transformed, and beautified. Campus Day work this year was well done; the gangs were well organized beforehand and they were able to attack promptly and efficiently the jobs they were set to do. Very fewishklers. Professors worked equally with students. All hands did well.

Not only for High School Day are the improvements effective but are permanently of value to the college. The revised version of the grounds certainly looks great.

We are tempted to think of what might be done if this united effort could be put forth into other lines.

INFORMATION ABOUT OUR COLLEGE

Number of students last fall . . . . 354
Number of students now . . . . . 280
First class graduated in 1883.
Celebrated by College about 1300.
Horses and cattle about 30 Percherons.
Sheep and lambs 200 Shropshire.
Beef Cattle 30, Herefords, Shorthorns.
Hogs 75, Berkshire.
Milling about 20 cows; Jersey, Holstein, Guernsey, Ayshire.
Acres of corn, 25.
Acres of oats, 10.
Hay, Alfalfa and Clover, 50 acres.
Orchards, equivalent of 25 acres.
Department store, about 10 acres.
Three main divisions of the College:
Teaching, Experiment, Extension.
Some faculty are full time teachers, some full time extension, others full time experiment and a large part devote their time to two or three of these branches.

actual number who are teaching classes about 45, about 65 faculty members.

Capacity of water tank 300,000 gals.
Height of tower 80 ft.
Depth of well 800 ft.; 160 ft. below sea level.
Number of miles of the running track per mile—4.
Insure track 17 laps per mile.
We are about 614 feet above sea level.
Number of degrees of chimney at heating plant 125 ft.
Floor in gymnasium 72 x 140 ft.
No. of graduates, about 475.
No. who have studied here 2500.

THE GARDNER DOW TABLET

Gardner Dow will never be forgotten as long as Connecticut Coilege exists. The field which bears his name is now marked at its entrance with a tablet which speaks a simple story, which he used to read to us when we entered upon our field, players or spectators.

We have no finer thing to exhibit on our campus than this little tablet. Let the visitor read and the reader carry it to the games. Let him not forget Gardner Dow, who fought and died for the Blue and White.

SAFETY VALVE

HARMONY WANTED

Where are our warblers? It has annually been their custom to gather on the front campus a summer's night and have their evening singing and singing exams. But this year our tenors or something must have been out of voice because it has only been once or twice that a singer approving on the dorm steps has run through our old melodies. We long for the floating notes of "My Cool-black Baby" or "By the Light." If it doesn't inconvenience you too greatly, songsters, couldn't you oblige the inhabitants of Storrs with a selection now and then—Uh-oh.

DON'T SPOIL IT NOW

The biggest "Campus Day" ever held at Connecticut brought about almost unbelieveable results. Our campus has surely been transformed. The changes and improvements are most of them lasting and worth while. It rests on all of us, however, whether or not we keep the grounds looking neat. What can look more unsightly than large pieces of paper festooned around the shrubbery on the campus? We have one of the best laid out campuses in New England and it should be our ambition to keep it the most of any campus in New England.

The fellows at C. A. C. have a privilege which is not present at many colleges, namely smoking on the campus. There is nothing more unsightly than to see the entrances to buildings strown with cigarette butts. A sure way to rid the grounds of these is to follow out the restrictions which were imposed by the military authorities during the S. A. T. C. course at Connecticut. No boxes or ash trays should be thrown about. After each smoke the user was required to tear off the paper, scatter the (bc;rcv) and roll the paper in a small wad. In this way the appearance of these unsightly objects was entirely done away with.

It rests with us all—are we going to keep the campus looking at its best or shall it be allowed to become littered up?

THE CONNECTICUT AGRICULTURALIST

The Ag. Club Monthly is coming through. It needs 500 subscriptions to start on a sound basis. Every one by subscribing; send a subscription home to the folks; get a few farmers you know to subscribe. This new paper will be well worth the paper and ink cost. The issue appears October 1, 1920. It is expected that every 'Ag' student at Connecticut will subscribe and send one subscription a month. Why not give the "Ag" Club the assurance that it can place 500 copies. "The Connecticut Agriculturalist" is coming reality. Give it a start!
Some years ago a definite plan for the future of the college was made and a New York landscape artist drew a plan for the campus. At the present time about one-half of the buildings planned have been erected but the plans were figured to accommodate a student body of 350 and to-day we already have passed that mark so that the question of accommodating students is a serious one especially since the girls' dormitory was burned last summer. A plan has been suggested to run the college the year around. This plan has its advantages and disadvantages and nothing has been done in regard to putting it into practice.

At this point Mr. Alspop concluded his talk by appointing an executive committee composed of President Beach, Professor Dodge, inactor Heald of Stafford, D. J. Minor of Bristol, S. McLean Buckingham of Watertown and Mrs. A. H. Benton of Andover. This committee withdrew in order to draw up sub-committees to do the work planned.

The next speaker was Mr. E. Kett Hubbard of Middletown, president of the Manufacturers' Association, trustee of the college and a member of the state finance board.

Mr. Hubbard spoke from the financial angle and stated that he was extremely proud of the progress made by the college in the past twelve years which was in many ways phenomenal. He thanked the faculty, some of whom he said had stuck to their posts at C. A. C. in the face of offers of larger salaries in other positions. The main difficulty encountered he thought was the excessive cost of large buildings at Storrs. Many people had suggested moving the college elsewhere but at the present time the college represents over a million dollar plant and must be kept going.

He said that the college had already received more than its share of state funds in proportion to all of the insane asylums, hospitals, etc., and in considering the budget to be presented to the next legislature, the needs must be included to the lowest possible amount consistent with the burning needs of the college.

Mrs. Joseph W. Alspop was the last speaker and proved a loyal friend of the college. She was rather odd with Mr. Hubbard's views and thought that the college was perhaps the most important state institution in that it was building men and women to lead the state in the next generation.

He felt that the state must give sufficient funds to carry on the work successfully and sincerely hoped that the coming legislatures would realize the value of the college and support it loyally. Mr. Alspop is an Aggie supporter first, last and always and deserves great credit and thanks from the student body.

Following the speeches the party broke up into the sub-committees and left to investigate the college in detail and make a report of the various needs to the executive committee.

The Pilgrimage was a grand success and ought to be a big step in the advancement of Connecticut.
PHI DELTA
Clarke Barnes is in the lumber business at his home in Mystic.
Lemuel Stoughton is farming at his home at Warehouse Point this summer. He spent the winter doing cow testing work for LeRoy Chapman of the dairy department.
Joseph Barmier is still in the dairy business at North Franklin, Conn.
Geo. Prindle is working for a farm implement and tool company at Shelton.
George says that farming is all right but that he likes inside work best.
Ralph Ackerman is in the Boston office of the International Agricultural Corporation. This concern handles commercial fertilizers.
Among those who were on the Hill Alumni Day were: Ralph Ackerman, "Benny" Thompson, Clarke Barnes, "Eddie" Newmarkler, Paul Butler, Stoughton, "Ned" Sherman, Ralph Fairchild, Martin Roer, "Bill" Brown, Joseph Ayer, Fred Trinder, Arthur Bird and George Prindle.

ALPHA PHI
The fraternity has recently added a new Columbia Grapenot and several pieces of new furniture to the equipment of its fraternity room in Koons Hall. Many repairs and alterations have also been made.
Barton E. "(Butch)" Callahan attended the Junior Prom. Butch absent-mindedly left his "fiver" on a public street without hitching it and as a consequence was forced to make a flying trip to Hartford early Friday morning to explain his neglect to the police officer. He got off, however, by handing them his usual line and a small tip, and returned to the Hill for Alumni Day.
Richard Mathewson of Bridgeport High School visited the Hill for a few days as the guest of his older brother R. H. Mathewson, '22.

UPSILOON CHAPTER OF PHI EPSILON PI
Donald Hirsch, '19, Dave Traurig, '16 and Nat Cohen held the Hill on May 22.
Sam Beiler, "Judge" Goldenthall and "Moe" Jacobs represented Kappa Alpha and Phi Chapters respectively.
George Sheidman, '22, was initiated on May 22nd. "Lou" Traurig, "Kely" Calehman, "Vic" Raine and "Ace" Klein attended the initiation as well as some above named right here.
The Annual Fraternity Banquet will be held in the Hotel Garde, Hartford, June 5, at 8 o'clock.

Has anyone found that Sophomore Class meeting that was advertised on the Lost and Found Bulletin Board.

SHAKESPEAREAN CLUB
The following alumni were on the Hill Alumni Day.
Lewis W. Stevenson, '10; Theodore G. Waters, '06; Harry H. Richards, '06; S. G. McLean, '03; Morton E. Pierpoint, '03; Ralph G. Tryon, '06; Chas. R. Beach, '19; Horace C. Vickert, '15; Charles R. Pomery, '97; Julian Norton, '17; Elmer N. Dickenson, '17; Theodore Schmidt, '16; Elmer F. Farnham, '15; J. A. Morgan, '16, and Jay B. Rickett, '15.
"Buck" Cadwell, '15, writes from Cuba and asks to be remembered to all his friends. He is working for the Francisco Sugar Co., and expects to plant 6000 acres of sugar this spring.
Among the Committee of 100 who were on the Hill, Wednesday, May 26, were Obiok F. King, '97; Charles B. Pomery, '97; Henry Robert Scoville, '19; Morton E. Pierpoint, '03; Dwight J. Miner, '06; H. G. Manchester, '15; and Stancliff Hale, '96.
Donald L. Judd, '13, writes from Hawaii where he is teaching school.
His address is Lonaianamau School, Lamania, Maui, Hawaii.

ETA LAMBDA SIGMA
Among the alumni brothers on the Hill for Alumni Day were:
The following brothers were on the Hill for Alumni Day:
On April 21, Robbins A. Smith was married to Miss Lilian Leonard in New York City. He is at present manager of Maplewood Farm in Cheshire owned by Judge Peasley.

HIGH SCHOOL DAY ISSUE
The Annual High School Day issue of the Campus will appear next week. After that, much deliberation, the Board decided on this date rather than the Saturday before or the Saturday on which High School Day occurs to Senior year will then have seen the college and its members and they will be able to appreciate much better the contents of the High School section of the paper. Besides the regular news it will contain over sixteen columns of items that will interest the prospective student of Connecticut.
We hope to be able to run a few cuts in this issue, supplementary to the articles and stories. We shall try to get the best out of the material in hand, and it will not be over a day or two late anyway.

SPEED DEMON MAKES RECORD TRIP
Champ Clark's Lizzie is Wonderful Car
Barney Oldfield, Ralph de Palma and other kings of the racetrack, before least your laurels are snatched from you. Champ Clark, 23, is a youth who bids fair to eclipse in a spectacular manner the best records you ever made.
Champ Clark went home a couple of weeks ago. It seems that Champ is the proud owner of a rheumatic Tin Lizzie, vintage of 1914 or thereabouts, to which it is quite attached.
Not wishing to leave his Lizzie home to pine away without him, he brought her along upon his return. He started from home late Sunday night and came around through Hartford, which he reached at just about midnight.
He noted the time on one of the street clocks. It was just twelve. "Now," quoth Champ, "Here goes a busted record between Hartford and Storrs, by heck!" So he settled back comfortably in his seat, gave her the gas and let her rip.
She ripped. According to Champ, she had to be run over between 10 and 50 miles an hour all the way. He proceeded to tell people about it the next morning, starting off with a very cynical and doubting audience of roommates, who tried to convince him that the flivver hadn't been made yet and that this story was not to be stuck to his story. He later admitted that his engine was hitting on only three cylinders, and that he had to stop 3 or 4 times on account of battery trouble, but he said that did not make any difference. Any body could figure out his speed.
However, as if often the case, the right or wrong of a thing is determined upon circumstances more or less obscure and insignificant at the time. After much talk on both sides, somebody finally had the idea of going to a cloud bank, and when his pan handling triumphant Lizzie was safely parked for the night, he went up to the cloud bank by the Dining Hall, he pulled out his trusty Ingenuity to get the time. Just one o'clock! "Gosh," says Champ, "I must have been going between 45 and 50 miles an hour all the way." He proceeded to tell people about it the next morning, starting off with a very cynical and doubting audience of roommates, who tried to convince him that the flivver wasn't made yet and that this story was not to be stuck to his story. He later admitted that his engine was hitting on only three cylinders, and that he had to stop 3 or 4 times on account of battery trouble, but he said that did not make any difference. Any body could figure out his speed.
However, as if often the case, the right or wrong of a thing is determined upon circumstances more or less obscure and insignificant at the time. After much talk on both sides, somebody finally had the idea of going to a cloud bank, and when his pan handling triumphant Lizzie was safely parked for the night, he went up to the cloud bank by the Dining Hall, he pulled out his trusty Ingenuity to get the time. Just one o'clock! "Gosh," says Champ, "I must have been going between 45 and 50 miles an hour all the way." He proceeded to tell people about it the next morning, starting off with a very cynical and doubting audience of roommates, who tried to convince him that the flivver wasn't made yet and that this story was not to be stuck to his story. He later admitted that his engine was hitting on only three cylinders, and that he had to stop 3 or 4 times on account of battery trouble, but he said that did not make any difference. Any body could figure out his speed.

MINERAL IN MILK

Milk holds a valuable place in the average American's diet, on account of the composition of its mineral constituents. Cereal foods contain relatively little calcium, sodium or chlorine. Hence animals are unable to grow on diets composed solely of cereals unless these inorganic deficiencies are supplemented.

Milk, on the other hand, is rich in calcium, for it contains about three times as much as does the average wheat grain, and about six times as much as does corn meal. The presence of an abundant supply of calcium in the food is essential, for it not only contributes to the maintenance of the proper neutrality of the body fluids, but is needed to form strong and well-developed skeletons.

that they had real talent. "Nothing but the Truth" was presented.

After the play a few dance numbers were offered by the Horace's Orchestra from Hartford, until midnight when the fun makers, both young and old, made their way to the dorms and bed.

Among the Alumni present were:

The College Barber

THE CONNECTICUT CAMPUS

BOX CANDY

Mr. Dawson will occupy his pulpit in the church on the campus at 10:45 on Sunday, May 30.

CHRISTIAN ENDEAVOR

Topic: Being a Comrade.

The attendance last Sunday showed an increase over the Sunday before. We have a good topic for next Sunday, one that is easy to talk upon and your talk will help liven the meeting.

AT OTHER COLLEGES

SPRINGFIELD COLLEGE

One hundred men at Springfield have voiced their opinion of the American girl. The Springfield College man's idea of the kind of a girl he wants for a wife is well set forth in the following representative reply: "A lover of sports, yet delighting in the home; a girl with brains, ready wit, independence and frankness." Asked what things were detected in a girl, the trait which received the greatest condemnation was snobbiness.

NEW HAMPSHIRE COLLEGE

"The Story of Extension Work in New Hampshire during the Year 1919" is the title of a bulletin just published by the New Hampshire College Extension Service. Under the headings of Work for Better Farms, Better Homes and Better Communities, the bulletin describes the activities of the Farm Bureau and extension agents and tells many of the results accomplished.

ENTOMOLOGY STUDENTS TO WORK IN NEW JERSEY

Connecticut will be well represented in the fight against the Japanese Beetle in New Jersey this summer. Five of our entomologists are practically sure of governmental appointments for the work. J. Bigger and C. Compton of the Junior Class and H. Jaynes, R. Mathewson and T. Gardner of the Sophomore Class are the Storrs entomologists who intend to let the Japanese Beetle know he has struck a different place from Japan.

The beetle was imported from Japan in the grub stage nearly ten years ago. Within this period it has multiplied so rapidly as to infest a considerable portion of New Jersey adjacent to Philadelphia. Realizing the danger of a spreading of the insect, the government has organized a fight against it. Some of the leading entomologists of the country will work on this problem and experts will be sent to Japan to study the parasites of the beetle.

The standing of the interclass league is as follows:

Won Lost P.C.
Freshmen 4 0 1000
Sophomores 2 2 500
Faculty 1 1 500
School of Ag. 1 2 333
Seniors 9 3 000

FOUR-YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B. S. degree.

TWO-YEAR COURSE in the School of Agriculture, for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who have completed the work of the common school.

FOUR-YEAR COURSE in Mechanical Engineering. Four years of high school workrequired for entrance. B. S. degree.

FOUR-YEAR COURSE in Home Economics. Open to young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture. Recent appropriations have provided additions and buildings, and equipment valued at $900,000. Expenses low. No tuition charge to residents of Connecticut. Military instruction. A catalog will be sent upon request.

CHARLES LEWIS BEACH, President
RESULTS OF RECENT PILGRIMAGE

On Wednesday, May 26, about 60 prominent citizens of the state made a pilgrimage to the State College at Storrs in order to study at first hand the work and needs of the institution, and to determine, if possible, what the future policy of the College should be.

This visit was made at the invitation of the Trustees of the College, who invited representatives from each of the following State organizations: The Manufacturers' Association, State Chamber of Commerce, Headmasters' Association, Farm Bureau and State Grange. Each organization was entitled to eight representatives and in addition a number of other prominent men and women were invited. Some of the delegates were unable to come but expressed their willingness to help the committees in any possible way.

A committee of six, composed of President Charles L. Beach of Storrs, Professor E. R. Dodge of Storrs, Senator Head of Stafford, D. J. Minor of Bristol, S. McLean Buckingham of Watertown, and Mrs. A. H. Benton of Andover, met and appointed committees to study the various departments. In most cases three members were appointed on each committee, with one or two faculty members in addition, and each committee was given the power to increase its numbers to seven. The committees, with the chairmen of each, are as follows: Administration and Library—H. B. Mallory of Danbury, Chairman.

Agronomy and Agriculture Engineering—Dr. Walter C. Wood, New Canaan.

Dairy—S. McLean Buckingham, Watertown.

Experiment Station—A. M. Farmum, New Haven.

Extension Service—J. M. Whittelsey, Middletown.

Pomology, Vegetable Growing, Agriculture and Forestry—Stanifield Hale, South Glastonbury.

Academic Studies—Harrison B. Freeman, Hartford.

Home Economics—Mrs. B. T. Avery, Ledyard.

Agricultural Economics and Marketing—La Mott Russell, Manchester.

Mechanical Engineering—E. C. Weldon, New Haven.

Poultry—H. A. Birdseye, Farmington.

Science—C. C. Hyde, Teacher in Hartford.

Student Accommodations—N. H. Bachelor, Loomis Institute.

Only three members of the Executive Committee were present: E. G. Hill of the "Hartford Times," A. E. Bowers of Manchester and C. J. Abel of New London.

For each committee a summary of the work of its own particular department had been prepared, and before leaving, some of the committees met to discuss the problems of their own departments. Other committees arranged to meet at the college within two weeks for a further study of the situation.
