TRINITY GAME SATURDAY ENDS SEASON FOR AGGIES

MANY ALUMNI EXPECTED TO WHOOP IT UP AT GAME. VICTORY MEANS AN EVEN BREAK ON SEASON’S SCHEDULE. BOSTON U BEAT TRINITY.

The Aggies will wind up their basketball season Saturday night when the Trinity hoopsters will try to repeat their early season victory over the White and Blue, this time on the floor in Hawley Armory. The Trinity game means more to the team than any other on the schedule with the exception of Worcester Tech, which game turned out disappointingly as far as the Aggies were concerned. There will be a host of alumni on hand according to word received from many old Aggie men who attended the Mid-Year Informal, and the home team will have plenty of backing. It is expected, too, that Trinity will have some representation besides their team.

The game should be nip and tuck, with students must define objectionable dancing.

Necessity for Regulations to Prevent Undesirable Dancing at local functions says Skinner

That the students must decide in the very near future as to what would be considered as objectionable dancing at the dances held in Hawley Armory, was a statement made last Wednesday by Mr. Arthur Skinner of the college social committee. The social committee has endeavored to deal with persons who engaged in objectionable poses or steps at the college dances, and to prevent the students from dancing in any manner that would cast undesirable reflections on the college social functions.

The committee does not aim to “kill joy”, said Mr. Skinner, not does it care any longer to make announcements at dances taking persons to task for disorderly dancing. The only way to meet the problem is for the students to decide what shall be considered as undesirable dancing, and see that it is refrained from during college functions. The social committee is already looking into the matter with the view of making recommendations as regards action in the very near future.

EVENTUALLY—WHY NOT NOW?

"Bob" Howes, Nutmeg Circular Manager, says that there are still places left.

ALUMNUS GIVE VIEWS ON OUR ATHLETIC POLICY

Says that College Teams are Best Medium of Publicity

The Campus has just received a letter from a prominent alumnus giving his views on our athletic situation. Because it is so thoroughly good and marked with a great deal of foresight it is published in full.

"In the various editions of your very efficient and entertaining college paper, I notice that you have very unselfishly solicited the opinion of the Alumni upon the various activities of the college.

"With that fact in mind, I will herewith endeavor to express by personal opinion of some of the activities of the College that particularly interest me and which are always a pleasure to me. I refer to the work already published in the various editions of the Campus, which I have thoroughly read and enjoyed."

In general, the topic I will discuss will be that of athletics, and in particular the valuable publicity the College would receive through the medium of its athletic teams.

In order that this publicity may reach its highest efficiency, it is necessary that there should be some definite plan by which the managers of the different teams should govern their schedules and to which should be added the concentrated aid of the students who will govern the teams.

"It pays to advertise just as much in athletics as in business and no better example of that fact could be shown than to mention the country-wide publicity by which Center College, Kentucky, received by having a first class football team and by also playing Harvard. One of the first great exponents of consistent advertising was Robinson Crutze. If he had not advertised to the world by hanging a piece of his shirt on a tall tree so that passing mariners could see it, the fact that he was in distress on a lonely island, he would never have been rescued and the delightful tale of our childhood days would never have been told.

"The fact that a College has a good team and wins a majority of its games is of itself small benefit, outside of its being a satisfaction to those intimately concerned, unless that fact is made known to as many people as possible within the area wherein the College desires to extend its influence.

"A State College, for reasons which are entirely evident, draws a large percentage of its students from its own State or near by states. Colleges

(Cont. on page 7 col. 1)
GAME STOOD 13 TO 10 AT END OF FIRST PERIOD. TECH. BREAKS THROUGH IN SECOND HALF AND SAFELY WINS THE GAME.

Horseshoe Shots of Victors too Much for Conn.

Connecticut was forced to trail Clark College at the small end of a 2 to 20 score in a slow game played in the Commerce High Gymnasium at Worcester on March 5. The Aggie quintet seemed unable to find the basket and missed a number of shots which should have added points to their score. The guarding of Winn was a feature of the game, for he prevented Alexander from making a single field goal during the game. Gronwoldt and Putnam were Connecticut's best point getters, and Smith scored the most baskets for Clark.

Winn shot a basket soon after the game began and Alexander scored on a couple of free tries. Winn made another basket, and then Alexander got his number, holding him scoreless for the remainder of the game. At this point Clark made a spurt that netted them fifteen points before Connecticut was able to score again; and put the game on the shelf for the "Worcesterites." Smith had his eye on the basket all times and during this scrimmage he caged three shots near from the middle of the floor, and another from a difficult angle.

Daly replaced Gronwoldt at center and in the last eight minutes of the half Clark was held to only one point, while Putnam succeeded in driving two through the hoop. Rough playing was indulged in by both teams, and Dean went in for Baxter five minutes before the whistle blew. The half ended 20 to 6 in Clark's favor.

Gronwoldt went back at center in the second half, and the Aggies tightened their defense, so that neither side scored for the first five minutes. Gronwoldt caged a pretty shot and Fowler followed it with two double counters in quick succession. Alexander added a point and Connecticut started a rally which kept her under Clark's goal for a while and netted four points, Putnam and Gronwoldt doing the firing. Clark took time out to organize her defense, and then each team added three points to its score. Gronwoldt made a pretty basket after penetrating the Clark defense unaided. Dean received a severe blow on the head, and Baxter went in again, caging a difficult side shot in the first play. In the last five minutes neither side made a basket, but Alexander dropped in two fouls and Keenelyside one, before the game ended.

The summary:

Conn. Clark
Baxter rf Fowler
Alexander if Egan
Gronwoldt c Smith
Putnam rg Winn
Lord lg Keenelyside

Tech.
Goals: Gronwoldt 3; Putnam 3; Baxter 1; Fowler 2; Egan 1; Smith 1; Winn 2; Keenelyside 1

Field Goals: Gronwoldt 3; Putnam 3; Baxter 1; Fowler 2; Egan 1; Smith 5; Winn 2; Keenelyside 1

Goals from fouls: Alexander 6; Keenelyside 4; Substitutions: Conn., Dalton for Gronwoldt, Dean for Baxter; Clark, Gould for Egan.

ANNUAL CLASS MEET
TO BE HELD SOON

Class of '23, Victors Last Year, Have Lost Several Good Men

Our annual spring indoor inter-class track meet will take place on Saturday, March 19. Last year's meet carried off in great style by the Class of 1923, is well remembered but 21 and '22 maintain that it will not happen this year.

In Lilly, Levy and Voorhees, who did not return this fall, the Sophs lost three valuable point gainers. Hawley, Wooster and Mitchell, the Junior mainstay are still here and Fienemann and Gronwoldt, big men for '21, are expected to do fine work for their class.

The following events will be run off: 35-yd. Dash 100-yd. Dash against 200-yd. Dash against 440-yd. Dash against 880-yd. Dash against 2 Mile Run VICTORS LAST YEAR

SIGMA ALPHA PI WINS FIRST BOWLING MATCH

In the first match of the inter-fraternity bowling tournament last Wednesday evening, the Sigma Alpha Pi defeated the Cosmopolitan Club. The first string won by 19 pins and the second by ten.

Littleworth, Brown, and Wallace rolled for the winning organization and Block, E. Slenets and Brennis for the Cosmopolitan Club. No high scores were made, the highest 88, being rolled by Block.

It's not such a long look forward to the final game of the season on Saturday and there is every reason to expect a fur-flying fracas from the boys from Trin-Idy at Naumeg town. Trinity didn't have much trouble with the White and Blue in the season's opener, but times have changed. Trinity has a fine out, and with two splendid guards, and although they didn't stack up very well against Springfield, they sent the Boston College five back 12 to 10 and with its first defeat after a long string of big victories. It will be with considerable satisfaction that the team cancels the licking they received earlier in the season and puts the blue and Gold trophy on the wall, Aellige'll do it, too.

Trinity Here Saturday

AGGIES TRAIL CLARK IN 28-20 SCORE

SCHOOL OF AG.

DEFEATS JUNIOR

In the usual Monday night football alumni basketball game the School of Agriculture defeated the Juniors to the tune of 13-10. The Juniors played with a crippled team, Dean and Boss being unable to play. The first half of the game was rather uninteresting. Many wild passes were thrown with an exhibition of wonderland when both sides were held. The first score on both sides was made on a foul. The half ended with the score tied 1-1.

In the second half the teams settled down to basketball. "Bike" shot a long basket from the side lines that put the Juniors in the lead. From there on the Aggies were ahead until a minute before the whistle blew when the School tied the score, making it necessary to play the overtime period. Then the School played rings around the Juniors. The game ended 13-10.

FUNCTIONS AND WORK OF C. A. C. EXPLAINED BY PRESIDENT BEACH

Speaking at College Assembly he says we do not aim to become a University or to compete with other state institutions.

The true state of affairs concerning the college was presented to the students at College Assembly last week by President Beach, who told of the functions of the institution and the work it was doing throughout the state. Mr. John C. Simpson, manager of the Eastern States Exposition was also slated to speak but was unable to be present.

In order that every student and alumni should know what is defined the functions of the College situation stands for, President Beach as follows: first, investigational work carried on by the Experimental Station; second, the distribution of agricultural knowledge to the working farmer, through the Extension Service; and third, the training of leaders in scientific agriculture, through the College itself.

To show what the College is really doing for the farmers of the State, the President gave a list of some of the activities of the College. A year ago the Extension Service saved the Connecticut farmers more than $100,000 by the full purchase of Maine seed potatoes of superior quality. Ten thousand hens have been trap-nested in the Egg-laying Contests, and the best birds are now being used by the farmers for breeding stock. Two hundred culling demonstrations have been held and it is estimated that $15,000 has been saved in the cost of feed by the culling out of 12,000 "slacker" hens. A monthly news letter, containing the most economical month for the month, is sent to 800 dairymen in the state. Daily reports on the condition of city markets in Connecticut are furnished during the summer to all who desire them. 32, before coming to C. A. C., so that they are by no means all "city farmers," as has been stated.

GLEE CLUB CONCERT WELL UNDER WAY

Program to be given in April

The College Glee Club will make its first appearance of the year on April 15, when the songsters of the college will render a concert of vocal and instrumental music under the direction of Mrs. Howard Newton.

Since the leadership of the organization was placed in the hands of Mrs. Newton, the club has made a great deal of progress and work on the concert is already well under way.

After the two try-outs held a short time ago, about twenty men were admitted to the club, bringing the total membership up to forty. These men have been organized into four groups according to voice and will receive special group instruction and from these groups Mrs. Newton will select the soloists and the quartet. A "Ginger Trio," like the one here several years ago, will also be selected and will furnish the humorous and peppery songs of the evening.

New music has been purchased for this concert and the directors and officers are working hard with the object in mind of making this musical the best ever given at the college. The program has not been entirely decided upon, but will include solo, quartet and chorus selections, readings and instrumental selections. Camexes have given a concert from 8 to 10 p.m., to be followed by dancing.

ENGAGEMENT OF PROF. SKINNER IS ANNOUNCED

Prof. Arthur G. Skinner, instructor of Animal Husbandry at the college, has announced his engagement to Miss Mae Wallace, a nurse at the U. S. Health Hospital at West Roxbury, where she is doing psychiatric work. Miss Wallace was formerly an instructor at the college in English and public speaking, but left during the war to take up her present work. For a while she worked in a hospital in England, looking out for the needs of shell-shock cases. Last spring she returned to the college for a few months, but left again to resume her work in a hospital in Dussville, N. Y. After this hospital was discontinued she was offered the position in the Service Hospital, where she is at present.

Prof. Skinner smiled when asked for particulars but had nothing to say for himself except that the report was true. He is a graduate of Toronto University, having taken up live stock subjects there while a resident of Canada. He made himself well known and popular in this state both in teaching at the college and in his work outside with the Extension staff.

As a result of the very creditable presentation of "Seven Keys to Bald-plate" by the Dramatic Club on February 26, the club has been requested to present the play in Loome's Opera House, Willimantic, on St. Patrick's Day.

EXCHANGES

The price of board at Rhode Island State College has been reduced from $6.50 to $6.00 per week.

Vermont's annual Kake Walk is approaching.

"One thing that the Vermont Legislature should remember is that thousands of dollars that the University of Vermont is now asking will be returned to the state ten fold in manhood."—The Vermont Cynic.

"The biggest celebration that Kingston has seen in some years caused the entire community last Friday evening after the basketball quintet sent the Connecticut team back to Storrs with a 29-18 defeat to account for. Within ten minutes after the game, the Freshmen had plied the old board track on the campus and with the aid of 50 gallons of oil the bonfire blazed away with Connecticut's hopes gone up in smoke."

The Beacon

In view of Connecticut's recent visitors it is interesting to note that New Hampshire State College is also playing host to the legislators of their state in an effort to obtain an appropriation.

The decision of President Thomas of Middlebury College to accept the offer from Pennsylvania State College came as a complete surprise. A successor to President Thomas has not yet been chosen.

Massachusetts Institute of Technology may have the second fisheries college in the United States if the trustees of the institution act favorably on a recent report of Professor Prescott. Because of the increasing importance of the fishing industry in this country the institute's move may be followed by other universities throughout the country.

ALUMNI NOTES

"198—"Tommy" Eleck is farming it in Woodstock, Vt. He writes that it is 26 below there and it keeps him hustling to keep warm.

15—Vernon Dutton is production manager of a counter brake production at the New Departure Manufacturing Co., of Bristol.

23—Clarence E. Franklin is now a student at Pratt Institute, New York, but writes that he still has the old spirit for C. A. C. He said that the naval balloon which was lost recently passed over him while he was in class.

29—Harry B. Lockwood was on the Hill for the dance and play.

19—Lincoln C. Crosby attended the play on Saturday evening. He was accompanied by William O'Brien, principal of Groton High School.

The February issue of the Field Illustrated and System on the Farm contained an article by L. L. Crosby, entitled "Factory Methods at Seabrook." The same issue had an article on "Feeding the Dairy Heifer" by Prof. George C. White.

DANCING AT STORRS

There is no doubt that the students must decide at once, the various forms of dancing which will be prohibited at the college. This matter has gotten beyond the control of the social committee and must be settled once and for all by the students. This does not mean that the "Blue Law" revival is necessary. Connecticut is not alone in having objectionable dancing at college functions to contend with, in fact we have probably escaped easier than the average institution. Many of the college papers show that certain indecencies of dancing must be done away with if the collegiate hop is to maintain its respectability, and the Brown University "Herald" probes even deeper than the dance into alleged shocking moral manifestations at that University. The student council at Western Reserve passed resolutions prohibiting indecent dancing.

Contrariwise, dancing at Storrs, the "toddle" was very much in evidence. Now there is nothing particularly wrong with the "toddle" if it is properly danced, but there's where the trouble comes. Most of the "toddlers," after assuming a position which would cause discomfiture to an aerobt or a contortionist, stage a species of dancing, if it can be called that, that is not only indecent but disgusting to the onlooker.

Perhaps the most "modern minds" will consider it an "outside" unfurl, but there is no doubt that it is within the realms of respect and decency. The student body as a whole undoubtedly believes in respectable dancing, and will see that the good name of Connecticut is not slurred for indecency at social functions. The others will probably be indignant and say, That the method of preventing objectionable dancing by announce- ment during a dance is disfavored, cannot be denied. The social committee should never have allowed such procedure. Therefore, it is up to the students to impose a satisfactory method of regulating dancing at college functions.

At one of the universities in the west a set of regulations was drawn up, prohibiting students participating in dancing so that any part of the heads or faces of the partners shall not touch and dancing in one spot on the floor. Any extreme and affected positions or movements were prohibited. Such rules might well apply to Connecticut dances, with student censorship, rather than faculty censorship, as is the rule at many colleges.

A student of dancing definition proc- edure will do away with the "fac- ulty-supervised system," by which a patron singled out an objectionable couple on the floor and warned it personally, much to the mortification of the dancers and the patron as well. Under student supervision the pat- rons will cease to be "cops" which state of affairs will be more tasteful to them. Then it would only be another accomplishment of student government. That the majority of the students are decent cannot be doubted and is safe to say that the students will see that the problem of coping with objectionable dancing is solved.

THE DINING HALL

Congratulations are due the dining management for their management of an operation which it manifested over the week-end of the mid-year informal. There certainly must have been a decided difference in this year's impression of clean linens, wait- service and music to that of "cafeteria for all" and the armor plate crockery of the old dining hall. The meals over all were good, and there isn't a Patron that could be asked for and were served in fine style. Such pleasing results naturally raises the question "why more often?" It seems to us that all that is needed is a stronger spirit of co-operation and participation in the management on the part of the student body. If the student body continues to look on the dining hall as a natural enemy then all that can be expected is that the management of the dining hall will adopt the same attitude. If, however, the students take some active interest in its affairs it will be possible for the manage- ment to go far from the path of jus- tice without being required to make some explanation to the student body.

In the old dining hall conditions were at no time of the best and both the student body and the management seemed to present the appearance of an armed camp at all times. If an idea was advanced by one side, no consideration was given to its merits or little consideration at the hands of the other. With the increased facil- ities afforded by the new dining hall many of the former abuses were abol- ished and, given a little time for con- sideration, both the management and the greater part of the student body would begin to realize that some day it could be at fault. Why not benefit by this lesson before we forget the many unpleasant incidents of the last year, that the management of the college is undergoing a change. Wouldn't it be now an appropriate time to appoint a student committee, an efficient force in many institutions, for student repre- sentation in the management?

(cont. from page 1 col. 4)

of the endowed type draw their stu- dents from all over the country and partly from sections where they are liberally represented by their al- umni. In the case of C. A. C. where- as it should attract a large percent- age of the men of the State for its Agricultural training to its doors, it is also due to its closeness to the large centers of population of the State particularly New York, that it should attract a great many men from those places.

"Business of all kinds, institutions, corporations, and people, have to a greater or less extent, something to sell and are interested in rendering to every possible buyer sufficient service to not only keep that buyer as a regular customer, but we'll increase their clientele. But, before that service can be rendered, some form of advertising must be used to attract the attention of prospective buyers, because they will seldom bother to seek it out unless some dis- tinct and attractive method is used to demand their attention. In the case of C. A. C., it may not be feasible to create this attraction by a brilliant flashing electric sign on Broadway or some other method to attract the eye of every possible buyer, but it is just as consistent and effective a way.

"In one way, this could be accom- plished by an intelligent and sustain- able policy of advertising even at sport and game in which the college is interested to the leading newspapers of not only the state, but also to the cities of the nearby states and especial- ly to the New York, Boston, and Philadelphia. The majority of games in which the College athletic teams are engaged, we never hear about at all, and when we do it was reported by the college we happened to be play- ing and especially if we were beaten by that college.

"But then, the college athletic association should assume some de- finite plan of engaging its games, not with some second-rate college, who they possibly hope to defeat, or who will gladly give them a good game, but rather with the idea that each game is played for a certain reason, either for the sake of helping the college to form and maintain a relationship with other colleges of high standing or that by playing a certain college near where the college desires to ex- tend its influence, it may be a means of advertising the college.

"In selecting opponents, I believe that the College should at all times strive to get teams possibly not as good as her class even though they happen to be at that particular season strong- er than her own. A great many of the teams that I might mention usually stronger but still they are in the same class that by rights she should belong. As an example, Bos- ton College, when she was gone ahead of us within the last few years that she played in many ways out of our class as much as Dartmouth would be. But the teams of the last few years of the same would be the case of Tufts College, she has for some reason fell behind during the last few years and is now in about the class of Trinity or Wesleyan, where by rights C. A. C. belongs. In regard to the advisability of playing such as Columbia, would be debat- able, however, this is far from the case within or near New York City might serve our purpose just as well.

"What I have referred to would apply for football as far as bas- ketball is concerned, we should play any and everybody who is our equal or better and if the material at the time, we should perhaps try to get the best possible from all means play Harvard and Yale. The same would apply to the baseball team, if for no other reason than that the teams are pretty high against a worthy opponent, and even if the game does not result in a victory the score will be low enough to demand respect. It is purely a waste of time for a good and a poor advertisement to play schools like Lowell Tech. and Went- worth Institute. (This is not a criti- cism of next fall's football schedule, as it is certainly a very good one), because not only do they have a very poor athletic standing, but a win over them is of no credit and a defeat is worse than no game at all.

"In regard to the second team playing games with other institutions, although the men deserve a reward for their hard work and are consid- ering the size of the college that it does more harm than good, because such games are nearly always record- ed as if the second team were playing the game and that is not a justice to the second team nor a benefit to the college. When the college is large enough to get a fairly good fresh- man team, it would doubtless be very beneficial, as by playing such games with the different high and prep. schools would attract some great many men, who in say two or would be looking forward to entering some college would be attracted to our own doors instead of some other institu- tion.

"As a means of illustrating what I have in mind I will offer a schedule of prospective games and a reason for the same.

Football

Trinity.
Wesleyan
Worcester Tech.
N. Y. Univ., Columbia or Stevens at New York.
Boston Univ. or Tufts at Boston.
Norwich Univ.
Rho Island.

Trinity, as she is a worthy and well known college and not too strong for a first game.

Wesleyan, for the same reason, and both would give the alumni in and near Hartford a chance to see the teams in action.

Worcester Tech. for the same rea- son.

New ork University or any other team near New York. I con- sider it very essential that the play in New York City at least once every fall.

Mass. Aggie, as she is a very good rival and also by playing her, a chance for comparing our team for the N. E. State College championship would be obtained and thus relieve us of the necessity of playing N. H.
DINING HALL
CHANGES MANAGEMENT

Miss Bowman Succeeds Miss Taft as Head

The resignation of Miss Violet Z. Taft, head dietician and manager of the Connecticut Agricultural College Boarding Department, has been handed in to take effect the 11th of this month. It is probable that Miss Taft will take up further studies in dietetics at the University of Chicago. Miss Taft is a graduate of the Framingham Normal School, Class of 1912. Before coming to Connecticut, she spent three years in hospital work as a dietician. In September, 1918, at the beginning of the S. A. T. C., Miss Taft came to Connecticut as manager of the old dining hall where she worked under serious handicaps until the new dining hall was built this past summer.

It is probable that her position will be filled by Miss Mary Bowman, at present assistant dietician. Miss Bowman is a graduate of Mechanics Institute, Class of 1919. She has been engaged as assistant dietician at the dining hall for the past three months. Before coming to Connecticut she was stationed at Holyoke, Mass., as teacher of cooking.

R. O. T. C. NOTES

Sergeant Donald Cozad has been detailed here to take Sergeant Strothers' place. Sergeant Strothers has been sent to the University of Maine for duty there as a sergeant in the R. O. T. C.

The program of instruction at Plattsburg next summer will include the subjects of most interest and value to the student. The physical training will include such means of muscular development as running and jumping, obstacle course tests, scaling, digging, boxing, wrestling, hand to hand fighting, group games, swimming and athletics.

Such means of recreation and amusement as social entertainments, rest and reading rooms, excursions to points of interest and pass privileges and week end leaves will be enjoyed by all who are not rendered ineligible through misdemeanors.

The stress of the drill will be laid on these subjects: discipline, morals, psychological training, manual of arms, close and extended order drill, care and nomenclature of such arms as the regular infantry rifle, automatic rifle, stokes and trench mortars, and grenades.

This varied program will offer a summer of interest and enjoyment to all who attend. Those that have attended any previous camps always report an enjoyable and profitable summer vacation.

Captain Boyers will receive applications from any of the students who wish to undertake the work.

What Is Air Pressure?

The air is composed of molecules. They constantly bombard you from all sides. A thousand taps by a thousand knuckles will close a barn door. The taps as a whole constitute a push. So the constant bombardment of the air molecules constitutes a push. At sea-level the air molecules push against every square inch of you with a total pressure of nearly fifteen pounds.

Pressure, then, is merely a matter of bombarding molecules.

When you boil water you make its molecules fly off. The water molecules collide with the air molecules. It takes a higher temperature to boil water at sea-level than on Pike's Peak. Why? Because there are more bombarding molecules at sea-level—more pressure.

Take away all the air pressure and you have a perfect vacuum. A perfect vacuum has never been created. In the best vacuum obtainable there are still over two billion molecules of air per cubic centimeter, or about as many as there are people on the whole earth.

Heat a substance in a vacuum and you may discover properties not revealed under ordinary pressure. A new field for scientific exploration is opened.

Into this field the Research Laboratories of the General Electric Company have penetrated. Thus one of the chemists in the Research Laboratories studied the disintegration of heated metals in highly exhausted bulbs. What happened to the glowing filament of a lamp, for example? The glass blackened. But why? He discovered that the metal distilled in the vacuum deposited on the glass.

This was research in pure science—research in what may be called the chemistry and physics of high vacua. It was undertaken to answer a question. It ended in the discovery of a method of filling lamp bulbs with an inert gas under pressure so that the filament would not evaporate so readily. Thus the efficient gas-filled lamp of today grew out of a purely scientific inquiry.

So, unforeseen, practical benefits often result when research is broadly applied.
ANOTHER NEW CLUB IS ORGANIZED
Dairy Students Form "Chine and Churn" Club

For some time in the past, there has been a feeling among the men who are majoring in Dairying that some sort of a club should be formed to promote the Dairy interests at the college to create a larger influence in the Dairy lines. It was thought also that such a club would give access to knowledge not obtainable in the classroom.

Accordingly several students have met with the faculty of the dairy department to discuss plans for such an organization. Several short meetings finally terminated in a definite constitution and by-laws.

The name of the organization decided upon by the members is unique in its character, yet significant to any dairymen. The Chine and the Churn, was the name chosen by the members at the last meeting. This club will be founded along the same lines as the Block and Bridge Club recently formed by the Animal Husbandry students.

Membership will be confined to Juniors and Seniors who are majoring in Dairy work. Members will be elected from the Junior Class, during the early part of the first semester. The present officers recently elected are all taken from the Senior Class. President—D. W. Gates. Vice-President—W. L. Grinnell. Rec. Secretary and Treasurer—W. C. Chapman. Corresponding Secretary—C. M. Hartwell.

At present the Club has twenty-one members and also the four faculty of the dairy department.

The first meeting of importance of the club was held on Monday evening, March 7, in the dining hall, being in the form of a "Good Feed," at which Dr. Williams of Springfield, Mass., was the chief speaker of the evening. He later led a round-table discussion accompanied by slides in Main 7, which showed some phases of the Pathogenic Diseases of Dairy Cattle.

CONNECTICUT DAY PLANS ARE IN THE MAKING

At its last meeting the Student Council discussed preliminary plans for Connecticut Day. President D. A. Graft was instructed to appoint a committee to look into the matter in order that a plan may be offered at the next Students' Organization meeting.

The Council also discussed the Honor System for examinations and voted to find out what the student sentiment is regarding this subject.

A member of the faculty will probably be invited to address the student body on this matter in a short time.

Room changes will be permissible on March 19. Any one wishing to change must present a paper to the secretary's office on or before March 16 showing that there is a vacancy in the room and that he will be acceptable to the occupants. No one can be forced to leave a room against his wishes.

(Cont. from page 3 col. 4)

State. Boston University, Tufts or even Boston College should be played every year at Boston not only for the sake of the alumni but also to get before the public in that vicinity.

Norwich University as a fairly easy game before the R. I. State game.

Rhode Island game should be featured and everything done to promote the spirit of rivalry, and the object of the seasons endeavors, much the same as that of Harvard and Yale.

Basketball

It of course makes very little difference when or where the different basketball games are played but with the fine record which this team is making every year, everything should be done to help it, and they should always play in Boston and New York or even Philadelphia, and they should also play Harvard and Yale.

Track

By all means the College should send a relay team B. A. A. games at Boston every winter and also to some of the games held so often at New York.

A cross-country team even if not developed very far as yet could easily compete with R. I. State every year and with all the long legs that usually decorate the Campus, a first-class team could eventually be developed.

A track team every year should be as definite and perpetual as any of the other teams and will add to the fine in doors track that we have, every effort possible should be made to foster that sport.

Baseball

The baseball schedule should include the best teams possible and it is a good plan to take as many trips as is possible especially to the nearby cities and Boston and New York City, lasting three or four days.

"Doubtless very much that I have herein discussed is already far better known and for all I know is at present being put into practice. If such is not the case, however, if what I have mentioned will help only in a small way those persons who direct the present and future policy of the athletic teams of the college and by whose efforts the name and fame of C. A. C. may become a watchword to all her loyal sons and a magnet for all those young men looking to an institution of learning from which they may receive everlasting benefit, my efforts will not have been in vain."

CO-ED NOTES

The Misses Kay Potter and Mary Beegly visited at their homes, Sound Beach and Greenwich, over the weekend.

Miss Edith L. Mason was at her home in Springfield, Mass., over the weekend.

The lacrosse House group this semester includes Merle Tuttle, Mary Belden, Mildred Gay, Sylvia Ives and Kay Potter.

Wednesday Evening, March 2nd, Mr. and Mrs. C. B. Gentry were entertained at a formal dinner.

THE CONNECTICUT CAMPUS
great talent in swinging the clubs. Their fair companions tripped the light fantastic in a manner to bring joy to the hearts of everyone present when they gave the Weaving Dance. This dance was a very intricate affair being mastered by the co-eds after many weeks of practice, the costumes and effects lending much to the color of the act. That the West Point cadets have nothing on the co-eds was shown by the marching drills of both the '23 and '24 girls. Under the personal supervision of Director Guyer, they did four east and west with the accompanying exercises in a manner to make a soldier's heart swell with pride. An excellent dumb-bell drill was given by the girls as a climax to their part in the evening's program.

Perhaps the most classical event of the evening was the Gymnastic Schottische given by the Freshman girls. The audience was amazed with the ease and grace with which they went through the intricate steps of this difficult dance and the Armory rocked with applause at conclusion. It is already rumored that several attractive offers have already been received by Director Guyer to have this given in several of the nearby cities.

Not to be outdone by the co-eds, the Fresh boys exercised their toes and arms in a very grueling wand drill at the conclusion of which several of the participants were visibly “groggy.” Reclining in a spider web position on the floor, they demonstrated in an arm and leg sitting drill the easiest way to reduce weight and, incidentally, to polish the floor.

That all of the program was not of a serious nature was evinced by the several games which were played. The wand relay, akin to a hurdle race, was won by the School after the Freshmen had broken their wand and committed every blunder possible. The Sophs, owing to lack of practice, took second place, while the '24 men were a poor third. In the “skin the snake” race the School again showed their superiority by trimming the Freshmen. The obstacle race proved a real thriller, the audience being on its feet from start to finish. The freshmen took the lead at the start and held it to the finish though the Sophomores and School put up a hard fight to win.

In the semi-final of the evening, Sneidman, the “Turk from Meriden,” met Cronin, the “Terrible Sweden from Westerly, R. I.” in a three round bout. The affair was a hummer from start to finish, each contestant trying to put his rival away with a “holy maker.” Newspaper writers gave the decision to Cronin, who is out for the heavyweight championship of Eagle ville. Coach Swarts refereed the fight. In Cronin’s corner was “Scotty” Grant, a former handler of Willard, while Sneidman was attended by “Red” Cohen. The evening wound up in a blaze of glory, when the “Fata” and “Leans” contested for the basketball supremacy of the college. The lean

**FACULTY NOTES**

Prof. C. B. Gentry spent the week of February 21st at Atlantic City, New Jersey, attending the regional conference of those in charge of supervision of teacher training under the Smith-Hughes Act. He also attended the meeting of the National Society for Vocational Education.

Miss Edwina Whitney recently attended a meeting of the American Library Association in New Haven.

The librarians, two hundred in number, were guests of the Yale University Library Association while in the city.
