ATHLETIC FIELD GRADED AND IMPROVED TUESDAY

OTHER PLACES ALSO RECEIVE ATTENTION

Second Connecticut Day Ends in Outdoor Supper and Sports

Blisters, sunburns and stiff limbs are in order after the second annual Connecticut Day held yesterday. Although Gardner Dow Field got the greatest share of attention and permanent improvement, the rest of the campus received the care necessary. At eight o'clock Tuesday morning the bugle called the entire student body and faculty to the athletic field where Newton Alexander and Paul Putnam of "Headquarters Staff" made up groups for the various tasks about the campus.

An automobile under Prof. Kirkpatrick went out repairing and repainting the signs about the college. Swan Lake and the surrounding land was cleaned of refuse under the direction of Mr. Hughes, and Mr. Torrey and Dr. Sinnott spent the day with several students in the Old Cemetery.

The tennis backstop was repaired and a new wire baseball backstop constructed by Prof. Pitts and a group of twenty men. Prof. White supervised the work of leveling the tennis courts and Prof. Dorse, with his bunch of woodsmen took care of the trees.

The knoll at the east end of the athletic field was removed and the earth used to fill in back of the Armory and on either side of the grand stand. The west end of the field was also graded, Prof. Manchester, Stevens and Dodge being in charge.

Probably the biggest improvement made was the construction of a new drain at the west end of the athletic field.

CLASS OF 1922 PROMISES THE GREATEST JUNIOR WEEK IN THE HISTORY OF COLLEGE

WITH ONE SHORT WEEK REMAINING BEFORE THE COMMENCEMENT OF FESTIVITIES, ANTICIPATION IS RUNNING HIGH—NO DULL MOMENTS POSSIBLE IN PROGRAM CONTAINING GAMES, BANQUETS, DANCES AND SHOWS—MYSTERY CONNECTED WITH TAP DAY OF SENIOR SOCIETY

DELEGATES TO M. I. T. REPORT AT ASSEMBLY

MALONEY, DOW, PUTNAM AND MATHEWSON SPEAK

Students' Life and Problems Discussed at Convention

The College Assembly period on Monday evening May 18 was given over to reports of the student delegates to the intercollegiate convention held at Massachusetts Institute of Technology on April 15 and 16.

A great deal of valuable information was obtained concerning the student life and student problems at other colleges and universities, and the numerous student activities were discussed at length at the convention.

The idea of an intercollegiate convention was conceived by the Dean of M. I. T. and this spring delegates from several of the large universities met in New York to formulate plans for the convention. Delegates from more than forty colleges from all over the country were sent to Boston and the whole convention was financed by the Alumni Council of M. I. T. at a cost of nearly $10,000.

William F. Maloney attended the meetings on student government and presented his report to the faculty and students at College Assembly.

PROGRAM OF JUNIOR WEEK

Wednesday, May 18

Afternoon: Baseball Game—3:30 o'clock—Trinity vs. Conn. Evening: Junior-Senior Banquet—8:00 o'clock.

Thursday, May 19

Friday, May 20

Draud's Tap Day
Morning: Competition Drill for Amory Cup 10:00 to 12:00 o'clock. Afternoon: Baseball Game—3:30 o'clock—Rhode Island vs. Conn. Evening: Junior Prom—Howley Arena—8:30.

Saturday, May 21

Afternoon: Tric Adoption and College Sing—1:30 o'clock. Tea Dance—3:00 to 5:00 o'clock.

Evening: Junior Prom, "Billedet"—8:15 o'clock.

Wednesday, May 18, 1921, marks the beginning of a gala week which will be the happiest, jolliest, prettiest, most brilliant period of the year and which will undoubtedly go down in history as the best Junior Week ever experienced. From start to finish each minute will be occupied with interesting entertainment. Commencing with a baseball game at half past three Wednesday afternoon, the program runs the gauntlet of games, banquets, shows, dances, competitions and what not till midnight, Saturday, May 21, it expires quietly on the doorstep of Sunday morning.

CLASS DAY

On Class Day, May 18, the Junior class will probably attend the baseball game in a body and it is rumored that the class colors, green and white, will be adrettly displayed in some way or other at this time. In the evening comes the traditional Junior-Senior Banquet at which repeat the two classes bary the hatchet forever and complete amity rules over the festive board.

On Thursday afternoon, May 19, our guests will be given the treat of witnessing our Olympic champions in action on the cinder path. This interclass track meet, commencing at 3:30 will without doubt be the most hotly contested contest seen in interclass athletic circles for a college generation, for our runners, hurdlers and jumpers have been in strict training for some time now and should put up some excellent exhibitions.

The 1920 Nutmeg Vaudeville Show is planned for Thursday evening at 8:00 and promises to be one of the unique portions of the Junior Week program. This show will present the Ching-a-Ling Concert Company which will entertain with harmoniums.

Promenade Day

"Tonight's the night," will be said many times by many people on this day of the big dance. To keep them from thinking too much about the evening's pleasure and becoming impatient, one of the greatest features of the week, to visitors at least, has been procured for Friday evening, May 20. This will be the competition drill for the Amory Cup, in which three battalion companies will maneuver in infantry drill movements.
**MANHATTAN WALKS ALL OVER AGGIE NINE**

**FLYNN WORKS WELL**

Most of Manhattan's Runs were Unearned. Team Plays Loose Game

On last Wednesday the Aggies slid back in the old rut when they lost out to Manhattan College by a 6-2 score after their wonderful exhibition against Mass Aggies a few days before. In the Mass Aggie game the boys were cut to win and they had all the pep and confidence in the world but the Manhattan encounter was another lifeless, listless watch.

Coach Swartz sent "Porky" Flynn to the mound and the wisdom of his choice became more apparent as the game progressed.

Kirby, the second man up for Manhattan, singled and made third on Hubbard's grounder to Gordon who, after playing around with the ball for awhile heaved it to first but Hubbard was there safe. Sullivan laid down one to Minacci, who also followed Gordon's juggling act which allowed Kirby to score. Lina laid down another to Minacci who was awake this time but not fast enough to get Hubbard.

Gordon, our first man up, laid down a nice single. Metelli drew a free pass forcing Gordon to second. Emigh hit the first ball pitched for a sacrifice going Gordon. Alexander singled and while prancing around first drew the fire in that direction, giving Metelli a chance to steal home. Score, 2-2.

The second inning both teams tightened up and displayed a fair brand of ball. In the visitors half of the third they were able to tally a run giving them the lead. They repeated the same in the fourth and then they had to tighten up a little as the Aggies seemed to take a half-hearted apathetic in an attempt to overcome the lead.

The climax of the game came in the visitors half of the eighth when two singles and a couple of errors on the part of the Aggies gave them two more runs thus holding a four run lead.

Much credit should be given to the Connecticut battery as Flynn's hurling and Metelli's work behind the bat were the only signs of first class ball playing during the game.

**BAY STANDERS HAND NUTMEGGERS WALLOW**

Conn. Suffers Relapse From Form of Previous Week

The Aggies again came out on the short end of the score in their battle with M. A. C. at Amherst last Saturday. The Mass Aggie nine was in rare form and was well reinforced by Collins, who allowed only one hit, which was nailed by "Benny" Gordon. He also kept third base vacant during the entire game and struck out five.

Alexander, pitching for Connecticut, pitched a fine game of ball but hit six when his counts were always ac­cused by the Bay Staters. The sus­picious showing made by the Aggies against Mass. the preceding week at Starks when the game was called at the end of the fourth inning with neither side scored on put everything in favor of a win for the Nutmeggers and led to a three-game series which was expected to be a royal battle at Amherst.

**INTERCLASS GAMES SHOW MANY SURPRISES**

Two-Year Men Make Good Showing to Date—Juniors Weak

On Friday afternoon, May 6, the Sophomore team suffered its second defeat of the season, this time at the hands of best school of the year, the Freshmen, the score being 17-8. The contest ended with the Juniors playing a fast game, having the game in hand at all times. Dickens, the mound artist for the Sophomores, did good work after the first inning, in which frame the School pushed three runs across the rubber.

The battery for the School was Hogge, Menacci and Ricketts and for the Sophos Patterson and Dickens.

**SPRINGFIELD HAS TOUGH JOB SUBDUING AGGIE**

Double and Triple Rouse Team's Hopes

Smarting under the defeat handed them by Springfield on Dow Field the week before the Aggie nine traveled to Springfield Friday resolved to pay off the score. Although the team worked hard and fast they were unable to hang on the hoped for win and were forced to content themselves with the short end of a 5-1 score.

The field was in a heavy condition due to the previous rains, a condition which worked against the Nutmeggers. "Kuk" Johnson, pitching his usual good brand of ball, held the Springfield nine at bay for the greater part of the game. "Louie" Alexander and Kid Brundage both wallopped the apple in fine style, "Louie" being content with a double while "Kid" poled out a three-bagger.

**TO STUDY DRAMA**

Theta Alpha Phi is taking steps which will make membership in the Dramatic Club much more valuable. It is expected in the future that the club will require its members to study contemporary drama, and provide facilities to acquaint them with the best plays of the past and present and the greater actors and actresses, in short, to really give them the material to appreciate the good drama and good acting. It is probable that in the future more care will be taken in the selection of plays, in order that the local audiences may see something worth while and to allow the dramatic club casts to have appropriate opportuni­ties to show real worth.

All students who walk in their sleep will please tie their hands in the future before they go to bed. This is inserted at the earnest request of the Farm Department.

Ricketts has just finished a correspondence course in Nuxated Iron and states that the most valuable lesson he learned was that too much water is liable to rust an iron constitution.

AEROPLANE TO ADD TO JUNIOR WEEK NOVELTIES

"Red" Markham to Fly from Hartford to Storrs

Dome rumor has it that the campus is to be graced by a real honest to goodness aeroplane during the gala Junior Week festivities. According to reports Chauncey "Red" Markham, '20, was on the Hill over the week end to renew acquaintances and stated that he hoped to startle the natives by arriving in this novel fashion. It is not clear whether "Red's" plans will materialize but his many friends on the campus are hoping for the best.

The machine is a Curtiss Biplane owned by Stewart Chadwick of Hartford, a personal friend of Markham. Chadwick was a pilot during the war and is now engaged in carrying passengers from Hartford to Bridgeport via the air route. Chadwick recently received much publicity in the papers throughout the state for his daring feat of making a passage safely during a fifty mile gale.

"Notes of harmony
Thru Hawley Armory"

till two o'clock in the morning, and—well, this social event is indescribable—thats all—you have to experiment it.

It may be mentioned at this point that at various times during the day that is, Friday, May 20, a Senior secret society called the Druids, will publically tap those Juniors which it chooses for future members.

On Saturday afternoon, May 21, the Junior Class will ceremonially adopt the Tree. A College Sing will be held at the same time. From three o'clock until five of Saturday afternoon a Tea Dance will occur in the Armory. The orchestra will stay over from the Prem and with five pieces, including a saxophone, will endeavor to provide something to dance to.

The Junior Play, "Billedt," is coming Saturday evening at 8:15. Music will be provided by the same orchestra. The best dramatic talent of the class will be displayed to great advantage in this well-chosen play.

After the show, the orchestra will play for dancing till midnight.

It is possible that a greater number of visitors and alumni will be on Hill than ever before to take in the events of the week. Many students are planning to bring their cars up for the week-end. The Executive Committee is doing its best to have the weather man make some excellent selections for May 18, 19, 20 and 21. Well, just one short week more.

OLD CANNON RUSH REVIVED TODAY

Two Underclasses Will Test Strength at Last

Once more the underclass sons of Old Connecticut will battle in the arena for the possession of a cannon, as they used to do in the old days before the humane society established a branch at Hartford. Furthermore the same old traditional piece of artillery will be used. The secret of its recovery is profound.

Brave men that they are, the Seniors have volunteered to fire the piece. The Rules Committee will then stand around waiting for things to commence, and will declare that class the winner which comes out of the melee with the blunderbuss.

The following rules govern the contest:

1. The participants will be the male members of the S-phomores and Freshmen classes.
2. The cannon will be discharged once between the hours of 3 p.m. and 8 p.m. May 19, 1921.
3. Upon hearing the discharge each participant will find the cannon and the class capturing it will be declared the winner.
4. The Rules Committee will act as judges and will debar any man from further participation in the scrap for unnecessary violence.
5. The losing class will pay for the gunpowder used.

In former years classes capturing the cannon made sure to hide it as carefully as possible so as to avoid any burglary, because the cannon should be kept till the following year by the winning participants.

FRATERNITIES GET NINE MORE MEN

Some are Already Initiated

Nine men were pledged to the various fraternities on the campus on Monday evening, May 2, when the second semester racking season ended.

Reports to the Mediator show that the following men were pledged: Timothy Cronin, '24, of Worcester and Allan Wilson of Bridgeport to the Phi Mu Delta Fraternity; Fenn Minacci, '24, of East Canaan, A. Danahue, '24, of Hartford and L. Richardson, '24, of Springfield, Mass., to the Alpha Phi Fraternity; Robert Weber, '24, of Hartford and C. Upham, '24, of Waterbury to the Eta Lambda Sigma Fraternity; and G. Geoffrion, '24, and Newton Brockett, '24, of Clintonville to the College Shakespearean Club.

The Alpha Phi and Eta Lambda Sigma Fraternities have already held their initiations.

Rumor has it that the Mechanical Engineering Department, not to be outdone by the various Ag courses which are taking trips, has decided to get up a tour of its own, which will probably consist of a factory inspection in some large city.
A SENIOR SOCIETY

If Dame Rumor can be depended upon Connecticut has taken another step in advance in we hear that a Senior Society has been functioning for the last year or more and the President expects to announce itself in the near future. Moreover, if any group of individuals at Storrs can keep a secret for such a length of time, our Senior Society has shown itself capable of doing almost the impossible.

Let us hope that the rumor is true because anything fits in better with the intellectual garden of the senior class. That such a collegiate custom should fall into disuse is truly to be regretted, for men who have been through the mill always comment on the fun, satisfaction and class spirit which was derived from these very inexpensive and quite impromptu parties. The class smoker was an excellent chance to meet the fellow one didn't see very often in a companionable way and have a good chat with him.

No doubt the death of this institution is due to the increased number of co-eds present whom the boys were loath to neglect even long enough to have a smoker made up entirely of stags. Of course this is indignated (that's a new one) the moment there was any smoker talk in the air, and the result was a very dressed up and dry as well as smokeless ice cream party. The stags better get back on the job again and have a smoker. The girls can have one too, if they desire, but don't try to mix 'em. Anyway let's keep the custom alive.

It will be suggested to the members of the present senior class that they go into membership in the alumni association 100 per cent strong at a future meeting of that class, which will be the first instance of such an action in many a year. This should always be the custom, as it means the association has strings on the young alumni for a year at least, with a possibility of keeping it upon them.

Another good idea springing from the intellectual garden of the senior class is a senior banquet during the last hours of the college year, at which the seniors have their last undergraduate get-together.

SAFETY VALVE

My Most Honorable Editor:

Being a man that has had plenty of experience both attending dances at "Willie" and on the Hill, I am taking it upon myself to enlighten the readers on the so-called Willie Hounds that have appeared in the last three issues of the Campus, and telling them a real reason why they go to "Willie."

The reason that men go to "Willie" is not the fact that they are not satisfied with the "wonderful" dancing of the Co-eds, but the fact that when they do dance with you they think that they are doing you a favor. Of course we realize that they doing us a great favor, but so are the young ladies in "Willie" when they dance with us, and they don't make us believe that they are doing us a favor.

The second reason is that there are but six girls and there are three hundred fellows on the Hill and of course many of the male students can get an option on the Co-ed first and us second-raters have to go to Williamantic to enjoy ourselves.

The third reason is that we male students miss the home life which we have been used to and it pleases us a great deal more to have the pleasure of walking home with some young lady with a pleasant disposition, and meeting the folks and being set up to a meal which is prepared and duplicated in your own home, than take chances on a Co-ed's steady being away and having the pleasure of walking home with her and saying "Good Night," then back to the room to have the "lonesome blues."

So fair damsels of Co-education, do not be so hard on the 'Willie Hounds for every human being likes to have a joyous evening and why be so selfish to think us second-raters stagnant, or to wait substitutes to wait for an evening when the best dancers go away? —Main Street

DOCTOR NEWTON AT CHEMISTS' MEETING

Doctor H. D. Newton of the Chemistry Department spent the week of April 16 attending the spring meeting of the American Chemists' Association meetings which were held in the Mechanics Institute in Rochester, N. Y.

About two thousand members of the society were present and eighty from Harvard University were invited to the meeting which was attended by the chemical instructors and professors who were present.

The facilities of the Bausch and Lomb Camera were used for the inspection of the plant by special invitations from these companies.
What Makes the Firefly Glow?

Y ou can hold a firefly in your hand; you can boil water with an electric lamp. Nature long ago evolved the “cold light.” The firefly, according to Ives and Coblenz, radiates ninety-six percent light and only four percent heat. Man’s best lamp radiates more than ninety percent heat.

An English physicist once said that if we knew the firefly’s secret, a boy turning a crank could light up a whole street. Great as is the advance in lighting that has been made through research within the last twenty years, man wastes far too much energy in obtaining light.

This problem of the “cold light” cannot be solved merely by trying to improve existing power-generating machinery and existing lamps. We should still be burning candles if chemists and physicists had confined their researches to the improvement of materials and methods for making candles.

For these reasons, the Research Laboratories of the General Electric Company are not limited in the scope of their investigations. Research consists in framing questions of the right kind and in finding the answers, no matter where they may lead.

What makes the firefly glow? How does a firefly’s light differ in color from that of an electric arc, and why? The answers to such questions may or may not be of practical value, but of this we may be sure—it is by dovetailing the results of “theoretical” investigations along many widely separated lines that we arrive at most of our modern “practical” discoveries.

What will be the light of the future? Will it be like that of the firefly or like that of the dial on a luminous watch? Will it be produced in a lamp at present undreamed of, or will it come from something resembling our present incandescent lamp? The answers to these questions will depend much more upon the results of research in pure science than upon strictly commercial research.

FOUR YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B. S. degree.

TWO-YEAR COURSE in the School of Agriculture, for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who are employed or desirous of securing the work of the common school.

FOUR YEAR COURSE in Mechanical Engineering. Four years of high school work required for entrance. B. S. degree.

FOUR-YEAR COURSE in Home Economics. Four young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture. Recent appropriations have provided additions to lands, buildings and equipment valued at $350,000. Expenses low. No tuition charge to residents of Connecticut. Military instructor. A catalog will be sent upon request.

Charles Lewis Beach, President.
to merit the support of the student body. That positions on the Campus board were not to be considered merely as honors but were to be sought only by such men as would be willing to sacrifice the necessary time, not only when the spirit moved, but week in and week out, was also clearly brought out by Dow.

Walter Stemmons, college agriculturist, explained the stand and functions of the faculty committee on student publications and expressed the willingness of the committee to collaborate to its fullest extent at all times. Mr. Stemmons stressed many of the points brought out by Mr. Dow, especially the responsibilities of the men on the boards of college publications. That the Campus is probably the highest calibre organ of any student body of our size in the country was the opinion expressed by Mr. Stemmons, adding that he as a newspaper man with many years' experience in the field of college publications, had yet to see a paper with as much initiative.

Allan W. Manchester related some incidents in regard to his experience with the "Lookout," a literary magazine which was supplanted by the Campus. Mr. Manchester complimented the Campus on its editorial policy but warned against inability to see all sides of a question. The power of the press at the present time in the world at large and the opportunity that student publications have for moulding student opinion was also discussed by Mr. Manchester.

Robert H. Mathewson, managing editor of the Campus and editor-in-chief of the 1921 Nutmeg, gave a brief report of the publications conference held recently at M. I. T., to which he was a delegate. The possibilities of securing membership in Phi Delta Epilson, an honorary journalistic fraternity were discussed by Mr. Mathewson after he had read a communication from the fraternity in regard to qualifications.

The Seniors present were Earle Blevins, formerly associate editor of the Campus and head of the Press Club, William P. Maleoney, business manager of the 1920 Nutmeg and a member of the Campus news board, Warren Brockett, formerly editor-in-chief of the Campus, a member of the 1920 Nutmeg staff and prominent in Press Club work, Henry W. Fienne, former Editor-in-chief of the Campus, Newton Alexander, member of the Campus news board and Salome C. Smith formerly of the Campus news board and a member of the 1920 Nutmeg staff.

Mr. Stemmons to Visit the West

Walter Stemmons, agricultural editor of the college, will make a trip to Missouri next week where he will attend a convention of the American Association of Agricultural Editors at St. Louis. Mr. Stemmons will also speak at the School of Journalism in the University of Missouri, of which he is a graduate.
