CLASS OF '21 HAS FINE COMMENCEMENT PROGRAM

OPEN WITH CLASS DAY ON FRIDAY, JUNE 10

Many Alumni Expected to Return for Exercises

Commencement Week plans are all laid and a big celebration is planned for the fortieth anniversary of the college. The majority of the students are intending to remain on the Hill for degrees and diplomas will form for the occasion. The number of alumni are expected to return. Sunday, June 5, is Baccalaureate Sunday and the sermon will be given by the Rev. Frank M. Sheldon, a Boston. An exceptional musical service has been prepared.

The real Commencement Exercises will begin on Tuesday, June 10 at 7:00 p.m. when the graduating class will hold its Class Day ceremonies in Hawley Armory. The Peerless Orchestra, composed for the occasion, Miss Mary Dwyer will sing the class song at this time and Miss Salome Smith will read the Class History. The Class Will have been drawn up and will be presented by E. A. Osmoor. N. W. Alexander, president of 1921, will give the Farewell Address.

At four o'clock Friday afternoon the class memorial dedication will occur on the front campus. A stone, with appropriately inscribed tablet, is to be placed beside the class tree.

Fraternity reunions come from five until eight in the evening, after which the Dramatic Club of the college will present "A Tailor Made Man," in order to re-decide which will disclose the abilities of various actors and actresses new to a Storrs audience.

On Saturday, June 11, at quarter after nine there will be exercises at the New Women's Bldg. It has been found impossible to name the building at this time, but semi-dedication ceremonies will occur.

At ten o'clock an academic procession of alumni, faculty and candidates for degrees and diplomas will form at the Main Building and march to the Armory where the Commencement Exercises will be conducted. The principal address will be given by Dean Charles R. Brown of the Yale Divinity School. Award of Degrees and Diplomas will follow. The three prizes for those competing for the Hicks Prize Essay contest will be presented at this time, as well as the traditional book prizes to the highest men in the Senior Class. The Gamma Chi Epsilon Scholarship Cup will be given to the fraternity winning the highest scholastic honors of the year. The singing of Alma Mater will close the exercises.

An alumni luncheon will be served in the Dining Hall at 1:00 p.m. and immediately after the Alumni Association will hold a formal meeting.

POTTY JUDGES GET TROPHY AT ASSEMBLY

Mr. R. I. Scoville Speaks

Prominent Breeder Tells of Agriculture of South America

At College Assembly on May 25th, Professor G. H. Langton, And Poultry Judging Team with a large bronze loving cup which the Connecti- ject crew were in the judgment context at Madison Square Garden last spring. The team is composed of J. C. Taylor, '21, Paul F. Kennedy, '22, and Harry A. Beck, '23, whose ex-citing team is the contest and compete with colleges of North Car­ clina, Cornell, New Jersey and Massa­ chusetts.

Besides the loving cup, the three men, as members of the winning team, all received gold pens, and in addition, "Jock" Taylor was present- ed with a gold pen for having the highest individual score in the contest.

Following the presentation, the Honorable Robert I. Scoville of Ta­ com, N. Y., spoke on the Agriculture of South America. Mr. Scoville is a breeder of Guernsey cattle, and is prominent in live stock circles throughout the country. He has recently returned from a trip to South America, where he studied the live stock situation and the agriculture of the country.

Mr. Scoville stated that the west coast has practically no rain, and that this region produces the world's principal supply of nitrate, while guano is also an important product. Chile is known as a land of plenty, and for the high quality of fruit which is grown there.

The best agricultural section is across the Andes, where the alfalfa and the excellent pasture grass pro- duction beef of the best quality at a low cost. Live stock and agricultural are of primary importance to the country but dairying is not carried on to any great extent.

The greatest drawbacks to South American agriculture, says Mr. Scoville, are the lack of rainfall, the system of land tenure, which prevents the formation of a middle class of land owners, and the great distance from suitable markets.

The exercises.

One of the features of the Commencement exercises this year will be the awarding of the Gamma Chi Epsilon fraternity scholarship cup. This cup is awarded to the fraternity or any similar recognized organization having the highest average in scholastic standing for the year. The Al­ pha Phi fraternity has excelled in scholarship this year and will re­ ceive the award.

Last fall Alpha Phi was awarded the cup for an average based on the second semester of the college year 1919-1920. This award was not counted toward a leg. From now on the cup will be awarded on averages taken from mid-year to mid-year with the first regular award at Commence­ ment 1921. The cup becomes the property of an organization winning it any three consecutive years. Alpha Phi now has the jump on all contest­ ants in the race for permanent pos­ session.

For a number of years the idea of such an award was discussed but it was never fully worked out. This award was first in a national competition directed by the National Guard, and the first regular award at Com­ mencement 1921. The cup becomes the property of an organization winning it any three consecutive years. Alpha Phi now has the jump on all contest­ ants in the race for permanent pos­ session.

APPROPRIATION CUT BY SENATE IS RE­ TURNED

When the Senate of the State Legislature passed upon the ap­ propriation for the college last Wednesday a cut of $135,000 was made. This action was taken upon the recommendation of Governor Lake in the inter­ est of economy.

Senator William H. Hall, a member of the Board of Trust­ ees of the institution, got the Senate to receive a special ap­ propriation bill Thursday giving the college the amount de­ ducted the previous day.

MATHEWSON ELECTED PRES. OF STUDENT ORG.

Elections for the Students' Organization were held last Wednesday evening and the following were elected for next year: R. H. Mathewson, president; H. A. Jaynes, first vice­ president; C. O. Dossin, second vice­ president; and A. C. Hotchkiss, secre­ tary-treasurer. These men were elected from nominations made under the amendments to the constitution which were adopt­ ed a week ago.

TWO AGGIE MEN

ANTICIPATE GREAT TIME AT MILITARY CAMP

Six weeks of military camp with supplementary boating, swimming, fishing and sight-seeing—not to mention tennis, baseball and golf—will be the happy lot of twenty-two young men of Connecticut Agricultural College this summer. Eleven men from the Advanced Military Science course of the college and eleven underclassmen of the battalion will leave their respective home towns on June 16 for Plattsburgh, New York, where the camp will conduct the annual Reserve Officers' Training Corps Infantry camp.
AGGIES PLAY WELL BUT
LOSE AT WILLIAMS

Pull off Double Steal in Third Frame—Lord Pitched Good Ball for Four Innings

The Aggies journeyed to Williams-town last week and crossed bats with the Williams College nine for the first time. They lost a wonderful game, but Williams gives Connecticut credit for playing one of the best games seen there this year. Only two weeks ago Williams took a fall out of Leigh, the only team to turn in a victory over Holy Cross.

Jack Coombs, formerly of the Athletics, now coach at Williams, was so impressed with the showing and caliber of the Aggies that negotiations have been started for a game on next year’s schedule.

In the third inning Emigh laid a bat grounder down to short and was able to beat the throw to first. His stolen second, Alexander drove one at Ward, who dropped it and “Alex” reached first safely. Then the Aggies proceeded to pull a double steal, “Alex” to second and Emigh to home. The play was executed in a perfect manner and gave the Aggies the first tally of the game.

In the fourth Richmond slammed out a three bagger and scored on Boynton’s sacrifice hit. Tie score.

In the fifth “Skinner” Lord, after pitching four innings, threw his arm and retired from the mound in favor of Johnson, who went in without a chance to warm up. This inning saw the undoing of the Aggies, Boynton did the Babe Ruth act with the bases full, giving Williams the lead.

In the eighth Connecticut staged a fine rally and were able to push three runs across the plate.

A couple of credits should be given to Captain Metelli for his wonderful work behind the bat and the way he handled his team on the field.

DRIVES OUT THREE BAGGER ALSO. "SOCCO" METELLI HAS BIG DAY BEHIND THE BAT. TRINITY IN-FIELD LIKE A SIEVE

Before a large holiday crowd of rooting Aggies and their fair companions the Aggie nine laid low, for they reached first safely. Then the Aggies proceeded to pull a double steal, "Alex" to second and Emigh to home. The play was executed in a perfect manner and gave the Aggies the first tally of the game.

Concerning the fracas the Hartford Courant relates as follows:

Johnson, soldiering for the Connecticut nine, was entirely too much for the Trinity team yesterday afternoon,.fanning eighteen members of the local club, allowing them three scattered hits and issuing one pass ball. The Aggies found Oertig entire, but nine errors of the Trinity outfit and five free tickets to first counted heaviest for the visitors.

HANDS OUT ONE SCORE

Johnson was directly responsible for the one score registered by Trinity in the first inning. Hall hit to Johnson and he threw wild to first.

The first inning hit to Johnson and he threw wild to first. Hall was forced at second but H. Oertig was safe at first and stole second while Cram fanned. A single by Mackintosh brought home the score. Johnson made up for this in the seventh when he tripled to right field with one man on base.

OERTIGS STARTS WELL

Oertig started off the game in good shape, holding the visitors hitless until the fifth inning, but the support of his teammates was lacking.

After the fifth inning the fielding work of the Trinity team improved greatly, but Oertig showed the effects of the strain and weakened. In the inning, the seventh, the Aggies found him for four hits, one a triple, netting four runs.

Cram, after Oertig, played the best ball for Trinity, smashing out a pretty triple in the ninth, and accepting nine chances at second base without a misplay. Cram’s triple was not much use, for while he smacked the first ball pitched during the last half of the inning, the three batters following him all succumbed to Johnson’s curves.

METELLI PLAYS GREAT GAME

Captain Metelli of the Aggies played great ball and shared the honors of the victory with his battery mate. Brundage was twice retired during the game without either a putout or an assist by the Trinity team.

In the first inning he walked into a ball he had dumped in front of the plate and Rotty called him out and in the eighth he was called cut for running into Canner, the Trinity first baseman, while trying to beat out an infield hit.

CONNECTICUT WINS FROM WENTWORTH, 5—4

Fourteen Inning Game Described as “Hectic” by the Boston Globe

On the first lap of the northern trip the Aggie nine locked horns with Wentworth Institute at Roxbury on Thursday afternoon and after fourteen innings emerged on the long end of a 5—4 score. The Nutmeggers held the lead until the ninth, in which frame the beamonians managed to tie the score and five extra innings were needed to prove the superiority of Coach Nichols proteges.

Taylor, pitching his first varsity game for the Aggies, led the Baysitters well in hand until the seventh inning when he was relieved by Johnon. "Kuk" worked well, making nine strikeouts as his contribution. Alex- ander had a big day, driving out a three bagger and crossing the home station three times.

WOOD CARRIES OFF HONORS IN R. I. MEET

After a cramped-up ride of over four hours to Kingston, the Connecticut track team met defeat last Saturday at the hands of the Rhode Island cinder men.

Hudson of Rhode Island, was the high man of the meet while Wood collected the greatest number of points for the Connecticut team.

In both the mile and two mile runs, Wood carried off the honors. Davenport took second in the pole vault. Jacobitt hurling the javelin for his first time, won first place with Lawson second.

FOUR YEAR COURSE in Agriculture, designed to train young men as Scientific Farmers, Teachers, and Agricultural Experts. Entrance requirements, four-year high school course. B.S. degree.

TWO-YEAR COURSE in the School of Agriculture, for those who have not the preparation, time, funds, or inclination to take the four-year course. Open to those who have completed the work of the common school.

FOUR YEAR COURSE in Mechanical Engineering. Four years of high school work required for entrance. B.S. degree.

FOUR-YEAR COURSE in Home Economics. Open to young women who are high school graduates. B. S. degree.

SHORT WINTER COURSES in Agriculture.
Recent appropriations have provided additions to lands, buildings and equipment valued at $500,000. Expenses low. No tuition charge to residents of Connecticut. Military instructor. A catalog will be sent upon request.

CHARLES LEWIS BEACH, President.

MAJOR FERRIS PLEASED
WITH BATTALION

Capt. Johnson's Company Wins
Amory Cup in Competition

The annual Competition Drill for the Amory Cup took place on the Gardner Dow Field Friday morning, May 20 from 10 to 12 o'clock. Major Ferris, last year's Commander here as the Connecticut Agricultural College, acted as judge. The cup was awarded to C Company.

The drill consisted of an inspection by the Judge of each company individually, followed by company maneuvers in close and extended order. The schedule of the drill was so arranged as to show each of the companies in the various parts of the competition to the best advantage, and it contained one or two points which had been used in the competition by each company but each company came thru very creditably.

The companies went through the drill with a snap and precision that showed an acquaintance with the subject. The Judge commented upon the appearance of the company especially.

After each company had had its individual turn on the drill field, the battalion was formed by Cadet Major Lockwood and put through a parade that was very well executed. During the ceremony of the parade President Eeatch presented Cadet Captain John- son with the Amory Cup.

The officers of the winning company are Cadet Captain J. P. John- son, Cadet First Lieutenant H. B. Bieseigel, Cadet Second Lieutenant R. F. Keeler.

QUESTIONNAIRE PAMPHLET NEW FORM OF PUBLICITY

A questionnaire recently sent out by the Extension Service of the College contains over forty questions and answers about the College in pamphlet form for the guidance of prospective students. This pamphlet is not propaganda for the College, but answers to a simple way questions which are asked about the institution and its work.

Some of the questions answered are: What is a Land Grant College? What courses of study are offered? For what types of work are graduates in Agriculture and Mechanic Engineering fitted? What courses of study are open to women? What are the requirements for admission to the two-year and four-year courses?

JUNIOR PLAY GIVEN
IN WILLIMANTIC

The Junior Play, "Billeted," was given Thursday evening, May 26, at St. Mary's Hall, Willimantic. The performance was for the benefit of the American Legion. Their request for the play was undoubtedly due to the favorable impression made by "Seven Keys to Baldpate," given earlier in the season at the Loomy Opera House.
Again the Campus must speak frankly of athletic conditions on the hill. The supposed reasons for these conditions are held by a majority of the letter men and most of the non-athletic students.

For the second season in succession Coach Swarts, who has been considered as the varsity baseball coach has been allowed to sever his relations with the team, before the team had finished its schedule. A year ago Mr. Swarts was kept here at the college after the football season of 1919 in order that he might coach baseball. He remained until the first game of the schedule and then took his berth with the Reading Club of the International League. A coach was hired in his place, but he did not take charge until after the first game.

The students were not well pleased that Mr. Swarts was released before the season was finished. They would have been better pleased if he had been allowed to go when he announced his intention of going before early spring. It would have been only wise to keep him. This is a decided lack of business in the conducting of our athletic enterprises.

The hiring of coaches is the responsibility of the physical director and when the physical director gives his appointment to understand all that is required of the coach. Coach Swarts on two occasions during the season indicates a decided lack of real business in the conducting of our athletic enterprises.

It is the opinion of the Campus that the salvation of our athletics lies in the procuring of some individual who can serve in the capacity of physical director or head coach who will throw himself into our work wholeheartedly. In all our schools we believe that the Aggie nine is of great consideratation. We do not believe that the Aggie is an unimportant nine. We believe that any significant nine deserves full consideration. This is a splendid time to prove our colors into the best of our ability.

Mr. Swarts, looking out for himself, has been given, for leaving the campus at this time. If he delayed as long as June 1, he would be liable to the loss of his job with Reading. He was expected to stay until June 1, as he was wanted to "peg low down the line" himself. To lose a coach during a season is regrettable but might be pardoned. For a man, same coach continued another two seasons in success is intolerable. And to allow such a condition of affairs to exist again must be impossible.

It may be suggested that Mr. Swarts return to Connecticut as a Coach. It is our opinion that the student body as well as a large number of students are not desirous of his return and in fact believe it contrary to the best interests of Connecticut.

Mr. Swarts is a fine chap and we are disappointed by the style in which his interest is by no means. We believe that the Aggie nine is of great consideration. We do not believe that the Aggie is an unimportant nine. We believe that any significant nine deserves full consideration. This is a splendid time to prove our colors into the best of our ability.
KAMPUS KLIPS

In accordance with a suggestion from Mr. Edison, Kilpper has arranged the following questionnaire for the Sophomores so that they might brush up on the extent of their knowledge and be able to talk intelligently with anyone on the benefits thus far derived from their stay at C. A. C.

Prof. Vining: "Give me an instance of a present day classic."
Fetalib: "A tired but happy group arrived at the college."
Prof. Vining: "What is your authority?"
Tom: "The Campus."

Her cheeks, he said, are roses red
And lovely as can be;
Her ruby lips are treasure ships
That speak of love to me.
But when to kiss this little miss
The Booby took a notion,
He found her lips were painted ships
Upon a painted ocean—Ex.

AGRONOMY DEPT. BEGINS
TEN YEAR EXPERIMENT

Something new in the way of a pasture experiment is being conducted at Spring Hill by the Agronomy Dept. of the College. About fifty acres of pasture have been obtained, thirty acres have been cleared of brush and seven four-acre pasture plots have been fenced off. Two and one-half miles of woven wire fence were needed to fence the pastures, and the two plots selected were as nearly uniform as possible.

Hereford steers are being used in this experiment and they will receive no other food except pasture grass during the summer. The object of this experiment is to determine the normal number of steers which can be kept on these plots, and also to determine the effect of different fertilizers on the growth of pasture grass.

"FEED UP"—and What
This Means to Every Dairyman

THE first flush of grass, and the way cows avail themselves of it, tempts many dairymen to reduce the amount of feed at this time of the year.

This is the wise thing to do, but for a short time only.

Start feeding again lightly after the first flush of grass, or your cows will shrink to such an extent that they will not come back strong for the fall work.

If you feed Buffalo Corn Gluten Feed, with a fair amount of milk feed, your cows should give from three to four pounds of milk per pound of grain fed.

Your herd needs Buffalo Corn Gluten Feed—in summer as well as in winter—in order to make it a real source of profit to you.

You cannot afford to overlook these facts, or neglect to take a broad view of the cost and return from your herd. Then you will order Buffalo Corn Gluten Feed.

JUNIOR TREE TO BE NINTH ON OAK ROW

Adopted by 1922 as Official Class Tree

The Class of 1922 began the idea of adopting a Class Tree that had been previously set out in a suitable place by the Grounds Department when a little oak in front of Professor Davis' home was adopted as the Junior Class Tree.

Professor Lamon made a short speech, Miss Viola Ericson gave a reading and Charles Ferris, the president of the class gave a brief talk.

A short College Song followed the adoption of the tree.

The Grounds Department has set out a row of trees that are to be dedicated to the War World veterans and two more rows of small trees, one row on either side of the road. The trees of the odd year classes will be on one side of Faculty Row and the even year classes will have their trees on the other side. The first eight trees on either side are dedicated to the heroes of the war.

GLEE CLUB ABANDONS PLANS FOR CONCERT

The Glee Club will not present a concert at Commencement as was previously mentioned in the Campus.

After taking into consideration the great number of activities already under way for the 40th Commencement of the college it was deemed advisable not to give another concert in June.

ALUMNI SENTIMENT FAST GROWING
IN FAVOR OF SECRETARY

YALE, WILLIAMS, MASS AGGIE AND MANY OTHER PROGRESSIVE INSTITUTIONS ALL FIND ALUMNI SECRETARY INESTIMABLE ASSET.

The most important matter to come before the business meeting of the Alumni Association on Commencement Day is the question of an Alumni Secretary. Several alumni clubs have been organized and have held one or two meetings and for the continuation of these clubs an alumni secretary is needed. Working through the annual reports of Alumni Secretaries can arrange for speeches at their meetings, be present himself, get into communication with and call upon possible students for next year, and put the alumni in line for some of the many jobs which yearly are reported to the college and are unable to be filled because candidates are not available.

An alumni secretary is the active connecting link between the college and its graduates and future students. The possibilities for good both to the college and to its former students are almost unlimited.

"Alma Mater" and "Alumni" are largely American ideas. European universities have omitted to develop in their graduates any sentiment of loyalty to the institution and in the institution any care for the welfare of the alumni. In England and Scottish conditions are semi-American. In our country one of the first colleges to organize alumni efforts was Williams, whose Alumni work dates back from 1792 and is much the same today as then. Alumni effort centers around the organization. There is an organization and the list of class secretaries. The Yale alumni fund is also organized by classes but has a separate class agent for each class. The effort is to secure a large number of annual contributors. Each graduate is urged to give annually such amount as he chooses. A large number of givers is sought rather than large gifts. The alumni of Williams College complete this year a century of their organization. Harvard alumni started their work in 1840. The University of Michigan, a state university, graduated its first class in 1844 and its first alumni association was formed six years later. At a point 80 years later, the University of Connecticut has not been back ward in getting started in alumni work. Minnesota alumni organized in 1877 and University of Wisconsin in 1908. Now practically every State University has a flourishing association with an alumni paper and an alumni secretary. The above facts are gleaned from the Handbook of Alumni Work, a publication of the Association of Alumni Secretaries.

"The first task," quoting from this book, "in most cases, was the establishment of some means of alumni participation in the control of the university." C. A. C. alumni through the efforts of the Alumni Association, have long had this participation, and there are elected from their number two members of the Board of Trustees and these two have been active in the affairs of the college. In the increasing number of co-eds another alumni trustee be added to the present two, the third to be a graduate of some years standing.

"The mill tax which forms the main item of support of the University of Michigan and of several other state universities has only been possible through the influence of the alumni." In Minnesota alumni initiated and carried through a campaign for a bigger campus, in California an appropriation of nearly two million dollars. "It is certain," says the Handbook, "that the voice of the alumni is going to increase in influence in the future. Even now what the alumni wish has often become the deciding factor in shaping educational policies."

"Their support, sometimes advisory, sometimes financial, and sometimes political, gives to the alumni voice a weight which carries." It is necessary for the alumni to exercise good sense and not to launch new and radical ideas without proper consideration.

"The secret of the alumni is going to increase in influence in the future. Even now what the alumni wish has often become the deciding factor in shaping educational policies."

"Their support, sometimes advisory, sometimes financial, and sometimes political, gives to the alumni voice a weight which carries." It is necessary for the alumni to exercise good sense and not to launch new and radical ideas without proper consideration.

"The secret of the alumni is going to increase in influence in the future. Even now what the alumni wish has often become the deciding factor in shaping educational policies."

The alumni secretaries are the main in whom alumni activities center: he should know our institution, should report faithfully the facts, and should organize and convey through alumni effort in behalf of the college and vice versa.

Admitting the fact that an alumni secretory is desirable and that the time is now at hand when something should be done, the main question is how the project can be financed. "A fair share of the smaller colleges," says the Handbook, "find it a highly profitable investment to finance their alumni organizations almost entirely."

The Massachusetts Agricultural Col-
C. A. C. BACTERIOLOGICAL IS ORGANIZED

The C. A. C. Bacteriology Society has recently been organized by students particularly interested in this subject. Membership is limited to those who have an average of B or better in an advanced course in bacteriology. The purpose of the society is to promote scholastic standing and keep in touch with the world's advancement along this line.

Prof. W. M. Esten, Professor of Bacteriology, is an honorary member of the society. The charter members are C. A. Slanetz, E. J. Slanetz, L. E. Faulkner, E. A. Lord, Kenneth Bryant, Elmore Ashman, C. C. Ellis and Albert Foldman. The officers are: President, E. J. Slanetz; Vice President, Elmore Ashman; Secretary-Treasurer, C. C. Ellis.

PRELIMINARY CIRCULAR OF COLLEGE IS ISSUED

In anticipation of the annual catalogue of the college which has been delayed, the secretary's office has issued a preliminary circular of information to be distributed to prospective students. It explains the several courses for men and women and gives other facts concerning admission requirements, cost, and number enrolled during the past year. Three half-pages are shown and a page is devoted to student life and activities. These circulars are in the secretary's office and it is desired that the students send them to high school pupils whom they think would be interested in the college.

The annual catalogue will be printed by The Journal Press of Meriden. It is expected that all of the copies will be in the printer's hands by the end of this week and that the catalogue will be ready early in July.

INSPECTION TRIP BY ENGINEERING STUDENTS MADE LAST THURSDAY

The sophomore students of engineering, accompanied by Professor Pitts, made a short inspection trip last Thursday. They first visited the J. M. Tatum Handle Factory at Eastford and then went to South Willington where the Gardner Hall Co. was inspected. Here the dying, winding and finishing processes on thread were seen and the making of spools observed.

The electric transforming station at Stafford Springs was looked over and the apparatus explained by the man in charge. Current is received at this station at sixty-thousand volts and transformed down to twenty-thousand to be sent to Willimantic and twenty-three hundred for use at Stafford. A small generator is located there, water power being used.

From there the class went to the Westinghouse plant in Hartford. Various types of motors and generators being repaired were examined and some "tricks of the trade" were demonstrated.

Dear Sir:

Upon inquiry regarding the 28th issue of the "Campus" I have learned that there was not such an issue this past year. It was an error.

We shall be glad to be of service to you at any time in the future,

Very truly yours,

F. M. Kittner.
