14. The President reviewed the status of educational television for Connecticut and asked Commissioner Engleman to comment on the matter. On June 20, 1952, a special committee of the Board of Trustees composed of Messrs. Hook, Brock, and Watson, met at the University to discuss the entire matter with the President. The following letter covers the highlights of the conference and was approved by the special committee as a report to be made to the full Board. THE BOARD VOTED to accept the report of the special committee.
as representing the decision of the Board of Trustees at this time regarding educational television.

THE UNIVERSITY OF CONNECTICUT

June 24, 1952

"Mr. Finis E. Engleman, Commissioner
State Department of Education
Hartford, Connecticut

Dear Mr. Engleman:

The special finance committee of the Board of Trustees met with me on Friday, June 20, to discuss educational television. Considerable time was devoted to a discussion of all aspects of the problem. The special committee voted to approve of the President's action in forwarding a copy of the engineering survey on educational television for Connecticut made by Mr. Caro Ray of Stratford to Mr. Ralph G. Macy, Commissioner of Public Works.

'The President has taken the position that this engineering report should be made available to all State agencies and all other educational agencies interested in educational television.

'Mr. Ray's report recommends one channel with sufficient power as adequate to meet the educational television needs of the State. Mr. Macy and Commissioner Engleman have secured the services of Mr. T.A.M. Craven of Craven, Lohnes and Culver, Consulting Radio Engineers of Washington, D.C., to make another survey since they do not believe that one channel will provide complete coverage of the State. If the Washington engineers conclude that one channel will not provide adequate coverage, it will then be necessary for some agency to resolve the differences in the two engineering reports.

'After a careful review of the entire situation, the special committee voted to approve of the State Board of Education making application to the F.C.C. for the three channels that have been allotted to the State, with the following proviso that:

'Should it be decided that three channels are necessary and if the State of Connecticut provides funds for constructing three stations and funds for the annual recurring expenses for the operation of three channels, that an agreement be drawn up by the President of the University and the Commissioner of Education and approved by the respective boards indicating that one of the three stations become the operating responsibility of the University of Connecticut. The agreement should further provide for integrated programming of all three channels by the State
14. (Continued)

Department of Education and by the University of Connecticut
and that reasonable and suitable provision be made for all
other educational institutions and agencies in the State for
program time.

'Should it be decided that not three but only one
channel is adequate to cover the State, then it is provided
that the State Board of Education have responsibility for
operating the station and that an agreement be drawn up
which will guarantee to the University of Connecticut a
suitable and equitable share of the program time, the details
of the agreement to be drawn up by the Commissioner of
Education and the President of the University and approved
by the respective Boards.'

I am sure it is safe for you to assume that this action
by the special committee will represent the action of the
entire Board. I am sure the entire Board will be willing to
accept the position taken by the special committee. It is,
therefore, safe for you to proceed with your application
indicating the position of the Board in this matter.

The special committee would appreciate very much your
keeping me informed of any difficulties which you may
encounter or any changes that may develop with reference
to this project through your contacts with the F.C.C. and
other agencies.'

Sincerely yours,

- A. N. Jorgensen

President

15. The President advised the Board that the Provost and the Comptroller are
assisting the President in reviewing all biennial requests with Deans
and Directors following the receipt of biennial budget requests submitted
by all Deans, Directors, and Department Heads. The review of the budget
requests comprising over 1200 summary sheets has been reduced to summary
sheets totaling about 200. These summary sheets have been photostated
and will be made available very shortly to the special finance committee
of the Board of Trustees. The special committee will have available
the assistance of the President's office, the office of the Provost, and
of the Comptroller, in studying the summary sheets and supporting material.
It will be necessary for the special committee to make its report to the
Board of Trustees late in August or in early September, in order that the
Business Office may have sufficient time to transfer Board recommendations
and supporting detail to regular state budget forms to be submitted to
15. (Continued)

the Budget Department by October 1 in accordance with law.

16. The President discussed the Barrington report on the reclassification study of state employees. THE BOARD VOTED to direct the President to review with the State Commissioner of Finance the results of a careful study of University faculty salary schedules in the light of the recently revised Barrington schedules. The President was further directed to review the results of his conference with the State Finance Commissioner with the special finance committee of the Board of Trustees. IT WAS FURTHER VOTED that the special finance committee was given the power to act in determining the best possible salary schedules for the faculties of the University.

Respectfully submitted,

J. Ray Ryan
Secretary
